

Table of Contents

Preface

Chapter 1: Luminophores

Synthesis and Luminescent Properties of TiO₂ Materials Single and Triple Doped with Rare Earth Ions (Sm³⁺, Tb³⁺ and Eu³⁺)

W.H. Liu, J.R. Zhang, G. Naren and A. Bohnuud 3

Energy Transfer of a New Self-Activating Ba₃TaGa₃Si₂O₁₄: ySm³⁺, xNb⁵⁺ Phosphor Obtained by a Small Substitution of Nb⁵⁺ for Ta⁵⁺

X.L. Zhou, K.X. Wang, Y. Zhang, Z. Wang, S. Rilige, Q.X. Tian, H. Halamuji and K.F. Chao 13

Luminescence Properties of Cs₃Cu₂I₅ Phosphors Powder with Solid State Method

Y.L. Zhu, X.C. Song, N.Y. Pan, C.H. Huang, H. Alata, A. Bolag, H. Oimod, J. Ning, B.Q. Zhou and O. Tegus 21

Nonlinear Excitation of Color Centers in a LiF Crystal by Femtosecond Laser Radiation

E.F. Martynovich, A.S. Frolova, D. Unurbileg, B. Ulziiabayar, O. Bukhtsooj and J. Davaasambuu 27

Chapter 2: Materials and Technologies of Fire Protection and Fire Resistance Providing

Flame Front Model with the Clusters Condensation

D. Tregubov, O. Kireev, E. Slepuzhnikov, O. Borsuk and I. Dadashov 39

Thermodynamic Calculations of the Main Characteristics of the Combustion Process of Pyrotechnic Nitrate-Metallized Mixtures with Additives of Organic and Inorganic Substances under External Thermal Influences

N. Koziar, O. Kyrychenko, A. Khyzhniak and O. Diadiushenko 49

Assessment of the Influence of Features of Crack Formation in Reinforced Concrete Products on their Fire Resistance

A. Vasilchenko, O. Danilin, E. Darmofal and T. Lutsenko 61

Justification of the Efficiency of Application of Plaster for Fire Protection of Concrete Structures

Y. Tsapko, O.P. Bondarenko, O. Tsapko and M. Sukhaneyvych 69

Increasing the Fire Protection Efficiency of Metal Building Structures

K. Ostapov, S. Ragimov, Y. Senchykhin and V. Avetisian 79

Method for Detecting Fire Indoors Based on Differences in Sample Averages of an Arbitrary Gas Environment Dangerous Parameter at Adjacent Observation Intervals

B. Pospelov, E. Rybka, Y. Mykhailovska, Y. Bezuhla and A. Melnychenko 91

Effect of H₃PO₄ and Phenol Additives on Gel Formation in Silica Fire Retardant Coatings for Building Materials

N. Lysak, O. Skorodumova, A. Chernukha and V. Kurepin 103
