

Table of Contents

Preface

Chapter 1: Photocatalysts and Catalytic Conversion

Effect of Nickel and Lanthanum Co-Doping on Photocatalytic Activity of Strontium Titanate

I.D. Lestari, Y. Iriani, R. Suryana, D.K. Sandi and E.K.A. Ardi 3

The Effect of Dark and Light Pre-Treatment on the Photodegradation Efficiencies of Methylene Blue Using TiO₂ Nanoparticle under Mercury Light Irradiation

D.A. Ediyataputri, F.H. Khoiriyah, N.S.W. Putri, F.R.M. Syams, F.J. Riyadi and T.E. Saraswati 11

Green Synthesis of TiO₂ and its Modification with Activated Carbon from Nutmeg Shell for Photodegradation of Chlorpyrifos Pesticide

M. Ramadhani, S. Lubis and I. Maulana 19

Synthesis of Activated Carbon/ZnO Nanocomposite Using Melinjo (*Gnetum gnemon*) Seed Shells for Enhanced Photocatalytic Degradation of Chlorpyrifos Pesticide

S. Lubis, I. Mustafa, S. Sheilatina and W. Rahmi 29

Effect of Natural Diatomaceous Earth Catalyst on the Catalytic Conversion of Polypropylene into Fuel

M. Zulrika, H. Husin, H. Meilina, M. Ali, F. Nasution, A. Ahmadi, L. Maulinda, N. Nurhazanah and Z. Zikrullah 41

Chapter 2: Materials for Dye-Sensitized Solar Cells

Synthesis of rGO/ZnO Nanorods Composite and its Application as a Photoanode in DSSC Solar Cells

M. Badif Nurwidi, S. Wahyuningsih and A.H. Ramelan 53

Characterization of Natural and Synthetic Dyes for Large-Scale Dye-Sensitized Solar Cells

R.H. Kisrina, F. Adi Nugroho, S.S. Nisa, N.Y.S. Subekti, R.T. Kisrina, A. Supriyanto, H. Widiyandari, T. Paramitha, H.K.K. Aliwarga and A. Purwanto 69

Silica Extraction from Pumice Stone as Anti-Reflective Coatings for Dye-Sensitized Solar Cell (DSSC)

S.T. Utomo, F. Saputra, R.I. Mufidah, M.N. Hidayah, N.F. Maharani and R. Suryana 79

Chapter 3: Materials and Technologies of Fire Protection and Fire Resistance Providing

Research of Fire Extinguishing Efficiency of Binary Mixtures of Pentafluoroethane (HFC-125) and Heptafluoropropane (HFC-227ea) with Nitrogen

R. Likhnyovskyi, Y. Tsapko, V. Kovalenko and O. Tsapko 89

Study of Gelation Processes in Flame Retardant Compositions of the SiO₂ Sol System – A Phosphate-Containing Additive

N. Lysak, O. Skorodumova, A. Chernukha, V. Kochubei and K. Sotiriadis 101

Peroxide Conditions Modeling for the Combustion Occurrence

D. Tregubov, M. Chyrkina-Kharlamova, Y. Hapon and Y. Zmaha 111

The Possibilities of Using a Fire Extinguishing Substance Based on Water-Soluble Polymer for Extinguishing Solid Combustible Materials

I. Stylyk, A. Kodrik, O. Titienko and S. Zhartovskyi 123

Experimental Study of Combustion Characteristics of Typical Material in a Non-Hermetic Room

B. Pospelov, E. Rybka, R. Meleshchenko, D. Polkovnychenko and R. Korniienko 131

Determination of the Effect of Magnesium Hydrophosphate on the Physical-Rheological and Chemical-Colloidal Properties of Aluminosilicate-Based Flame Retardant Paints

T. Kurska and N. Grygorenko 139
