

Table of Contents

Preface

Chapter 1: Numerical Investigation of Heat and Mass Transfer Processes

Numerical Simulation of Natural Convection in an Inclined Cavity Filled with Ionanofluid M. Benshab, S. Bouchta and M. Feddaoui	3
Analytical and Numerical Study of Double Diffusion Natural Convection in a Shallow Enclosure with Nanofluids: Impact of the Lewis Number on Heat and Mass Transfers B. El Hadoui and M. Kaddiri	13
Lattice Boltzmann Method Simulations of Laminar Mixed Convection in an Inclined Lid-Driven Cavity Discretely Heated and Filled with Nanofluid A. Daiz, A. Bahlaoui, I. Arroub, S. Belhouideg, A. Raji and M. Hasnaoui	25
Numerical Study of Mixed Convection Flows around Large-Scale Heat Sinks: Application to Data Center Cooling F.Z. Laktaoui Amine, M. El Alami and E. Semma	37
Natural Air Convection Using LBM in a Cavity Heated Linearly M. Qaffou, Y. Ighris, Z. Abbassi, Y. Elguennouni, M. Hssikou and J. Baliti	47
Theoretical Analysis and Numerical Simulation of Thermosolutal Mixed Convection in a Vertically Oriented Rectangular Enclosure M. Rahmoun, T. Makayssi, B. El Hadoui and M. Lamsaadi	59
Free Convective Thermal Transmission through Different Shapes of Enclosures: An Overview A. Al-Hadad	73
Sustainable Aerodynamics Analysis of Heavy Vehicles: Solution for Drag Reduction A. Abdulkadhim, F. AL-Daamee, M. Abdulsada and A.M. Abed	101
Investigation of Temperature Influence on Mass Transfer during Sustainable Biodiesel Production from Castor Oil S.M. Alagha, S. Rushdi and N.K. Hasan	109
A Study on the Effect of Wire-Net Stainless Steel Porosity on Heat Transfer Enhancement in a Solar Air Heater S. Sinsang, P. Vengsungnle and R. Luampon	119
Simulation and Optimization of Heating Networks D. Bossinov and G. Ramazanov	127

Chapter 2: Sustainable Energy Materials

Potential Resolved <i>In Situ</i> Atomic Force Microscopy of Surface Film Formation on Graphite in Ethylene Carbonate with Lithium Perchlorate S.K. Jeong	135
Direct Regeneration of LFP Cathode Material from Spent Li-Ion Batteries via Aqueous Relithiation C. Flores, D. Mohanty, I.M. Hung and R.B. Cervera	143
Monolith Multilayer Catalytic Membrane for Direct Conversion of CO₂- Rich Natural Gas into Syngas and Energy N. Jusoh, A.H. Md Nor, A.S. Abd Rahman and Y.F. Yeong	151
