Preface

History and People of Solid-State Diffusion – An Overview

H. Mehrer and G.E. Murch 1

Techniques of Tracer Diffusion Measurements in Metals, Alloys and Compounds

D. Gärtner, L. Belkacemi, V.A. Esin, F. Jomard, A.A. Fedotov, J. Schell, J.V. Osinskaya, A.V. Pokoev, C. Duhamel, A. Paul and S.V. Divinski 31

Fundamental Core Effects in Transition Metal High-Entropy Alloys: “High-Entropy” and “Sluggish Diffusion” Effects

A. Mehta and Y.H. Sohn 75

Vacancy-Mediated Diffusion and Diffusion-Controlled Processes in Ordered Binary Intermetallics by Kinetic Monte Carlo Simulations

R. Kozubski, G.E. Murch and I.V. Belova 95

Kinetic Monte Carlo Simulations for Solid State Ionics: Case Studies with the MOCASSIN Program

S. Grieshammer and S. Eisele 117

Kinetics and Thermodynamics of Fe-X (X= Al, Cr, Mn, Ti, B, and C) Melts under High Pressure

Y. Zhang, J. Tang, W.Y. Wang, Y.D. Wu, D.Y. Lin, J. Wang, B. Tang, X.D. Hui, I.V. Belova, G.E. Murch and J.S. Li 143

Novel Interdiffusion Analysis in Multicomponent Alloys - Part 1: Application to Ternary Alloys

M. Afikuzzaman, I.V. Belova and G.E. Murch 161

Novel Interdiffusion Analysis in Multicomponent Alloys - Part 2: Application to Quaternary, Quinary and Higher Alloys

I.V. Belova, M. Afikuzzaman and G.E. Murch 179
