Welcome

Founded in 1967 in Switzerland, Trans Tech Publications Ltd. keeps up to date with and endorses the latest trends in academic publishing. The editorial and publishing processes are supported by our own online management and publishing system integrated into the Scientific.Net website.

The trademark, Scientific.Net, was created by the company and represents one of the largest web resources providing high-demand content focused on science and engineering themes. Each year thousands of new academic publications enrich the Scientific.Net collection. It includes academic journals and book series that publish regular and special issues, volumes, conference proceedings, and monographs.

Top-rated higher educational and research institutions as well as consortia representing entire countries subscribe to the Scientific.Net online library. Paperback books are sold all over the world through numerous agents and distributors. Modern technology allows our customers to reach the online content through mobile devices and enjoy the advantages of an eBook format. The resource has gained popularity due to the single papers purchase option which serves the needs of individual scientists striving to obtain particular research papers of their interest.

Alongside with the traditional subscription-based model, Trans Tech Publications Ltd. has introduced optional Open Access publication for authors who want their work to be distributed under the Creative Commons Attribution 4.0 International License. The amount and use of freely accessible content on Scientific.Net is constantly growing.

Trans Tech Publications Ltd. strives to meet the high expectations of customers and partners via efficient service and high-quality products.

Anne-Kristin Wohlbier, CEO

A large, stylized handwritten signature in black ink, which appears to read 'Anne-Kristin Wohlbier'. The signature is written in a cursive, flowing style.

For Libraries: Electronic Resources

Our WEB-Package includes **more than 4000 titles** across our subject areas and contains monographs, handbooks and proceedings (& subject Collections) . Purchasing our WEB-Package provides the most cost-effective acquisition option for gaining comprehensive access to this highly relevant body of scholarly content.

Scientific.Net publications cover the following disciplines :

- Materials Science
- Building Materials
- General Engineering
- Mechanical Engineering
- Bioscience & Medicine
- Manufacturing
- Electronics
- Construction
- Civil Engineering
- Mechanics
- Nanoscience
- Computer Science
- Information Technologies
- Industrial Engineering
- Environmental Engineering

Benefits to libraries:

- Outright purchase
- Perpetual access rights
- Multiple concurrent users
- Long-time preservation
- COUNTER-compliant usage statistics
- Pick & Choose licensing options as well as package options

Benefits to our library users:

- 24/7 access on **www.scientific.net**
- Freedom to use offline or print
- Advanced search options

The state-of-the-art platform Scientific.Net offers advanced search & retrieve options of our information both to librarians and readers/users.

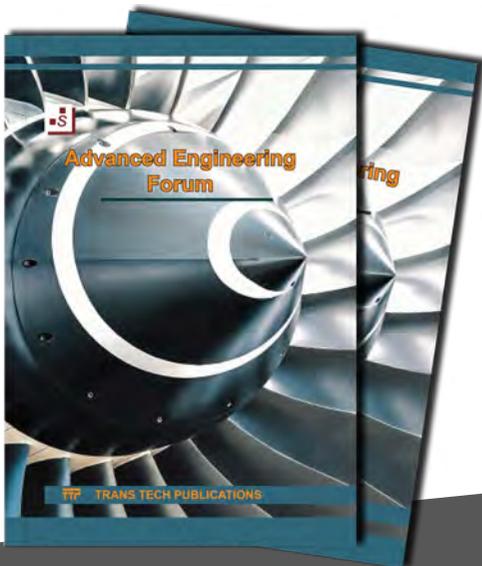

If so required, physical carriers (such as USB sticks) for archival purposes are also available (on request only).

For more information about our collections, title lists, license terms, please visit **<https://www.scientific.net/ForLibraries>** where you can also ask for free trial periods (library only).

✉ Please contact TTP for all licensing options at **subscriptions@scientific.net** (or any subscription agency you prefer to order with)

Advanced Engineering Forum (AEF)

(abbr key title: Adv. eng. forum)

WEB ACCESS 2026: Vols. 58-60
January-December 2026

Vols. published as of 2011-Jul 2025: **56**

Pages / papers on 31.12.2024:
11 988 / 1 508

archival purchase covering a custom
period of 10 consec. years (2016-2025
or others at customer discretion):
EUR 22,820

Editor-in-Chief

Prof. Alan Kin Tak Lau

Swinburne University of Technology, Hawthorn,
Australia

About:

"Advanced Materials Research" (AMR) is a peer-reviewed journal which covers all aspects of theoretical and practical research of materials science: synthesis, analysis of properties, technologies of materials processing and their use in modern manufacturing.

"Advanced Materials Research" is one of the largest periodicals in the field of materials engineering.

Editor-in-Chief

Dr. Farooq Sher

Nottingham Trent University, Nottingham, United Kingdom

About:

"Advances in Science and Technology" (AST) is a peer-reviewed series of proceedings. "Advances in Science and Technology" includes proceedings from Materials Science and Engineering related conferences and symposiums from all over the world. Published proceedings include engineering papers, review paper and papers about new materials research, development and application, its research, processing, and practical use in various areas of production and engineering.

Editor-in-Chief

Prof. Facundo Almeraya Calderon
*Autonomous University of Nuevo León (UANL),
Laboratorio de Corrosión y Protección; Mexico*

About:

"Construction Technologies and Architecture" (CTA) is the scientific peer-reviewed series dedicated to building construction technologies, production technologies for modern construction materials and aspects of its application, structural mechanics, geotechnics, soil mechanics. The series is also focused on research in the area of construction engineering, construction project management and information technologies in modern building and construction engineering. Special attention is paid to the current problems in architecture, restoration of monuments, design in industrial and civil engineering. Concerns in transport infrastructure, trends in its modernization and development are also covered by the scope of the series.

Editors-in-Chief

Prof. Sergiy V. Divinski

Westfälische-Wilhelms Universität Münster, Germany

Prof. Andreas Öchsner

Esslingen University of Applied Sciences, Germany

About:

"Defect and Diffusion Forum" (DDF) (formerly Part A of "Diffusion and Defect Data") is designed to publish up-to-date scientific research and applied aspects in the area of formation and dissemination of defects in solid materials, including the phenomena of diffusion. In addition to the traditional topic of mass diffusion, the journal is open to papers from the area of heat transfer in solids, liquids and gases, materials and substances.

Prof. Yong Ho Sohn

University of Central Florida, Orlando, USA

About:

"Diffusion Foundations and Materials Application" (DFMA) is a new book series that evolved naturally from the journal "Diffusion Foundations" (DF). Its contents cover both the fundamental and applied aspects of mass transport and heat transport in solids, liquids and gases. Accepted topics include: additive manufacturing, multiscale modelling, materials processing, nuclear materials, continuous phase transformations, light metals and alloys, composites, nanostructured materials, functional nanomaterials, electronic materials, energy and environment, biomaterials, corrosion.

from volume 1): **EUR 1,260**

Editor-in-Chief

Prof. Anabela Carvalho Alves

University of Minho, Portugal

About:

"Engineering Headway" (EH) is a peer-reviewed proceedings periodical which was founded to provide prompt information on the recent research results and practical achievements in a wide range of modern engineering issues. The combination of purely technical solutions with social and psychological aspects of human activity is a special feature of modern engineering practice and makes essential corrections in its development, expanding the scope of its influence. The thematic orientation of the Engineering Headway starts from various fields of materials science and mechanical engineering to modern processing and synthesis technologies, including control of technological processes, modern production management in general and information and digital technologies.

Editors-in-Chief

Prof. Afroz Barnoush

*Qatar Environment and Energy Research Institute;
Qatar*

Prof. Elena Gordo Odériz

Universidad Carlos III de Madrid, Spain

About:

"Engineering Innovations" (EI) is an open-access peer-reviewed interdisciplinary journal that highlights the latest scientific results on a wide range of modern development in various branches of engineering sciences. The journal is a companion journal to the highly recognized peer-reviewed Journal of Engineering Research in Africa.

Along with the traditional fields of engineering studies, the journal Engineering Innovations also welcomes research articles with significant impact on engineering development related to research and development of innovative solutions in niche areas, design of the technological and production systems, management of modern manufacturing, sustainability and ecological compatibility of modern production, engineering approaches and solutions related to construction, sustainable transportation, urban infrastructures, productive agro- and food production, etc.

Editor-in-Chief

Prof. Akii Okonigbon Akaehomen Ibadode
University of Benin, Nigeria

About:

"International Journal of Engineering Research in Africa" (JERA) is a peer-reviewed journal which is devoted to the publication of original scientific articles on research and development of engineering systems carried out in Africa and worldwide.

The articles should be related to theoretical research or be based on practical study. Articles which are not from Africa should have the potential of contributing to its progress and development.

Materials Research, Köln, Germany*

About:

"Materials Science Forum" (MSF) is a peer-reviewed journal covering all aspects of theoretical, computational and experimental research in the area of materials science, including but not limited to materials synthesis, analysis of materials properties, technology of materials processing and materials application.

Nano Hybrids and Composites (NHC)

(abbr key title: Nano hybrids compos.)

WEB ACCESS 2026: Vols. 50-52
January-December 2026

Vols. published as of 2012-Jul 2025: **46**

Pages / papers on 31.12.2024:
3 886 / 368

- OPTION 1 (current year): **EUR 500**
- OPTION 2 (current year + back vols):
EUR 710
- OPTION 3 (current year + perpetual/
archival purchase of all back vols
from volume 1): **EUR 2,550**

Editors-in-Chief

Dr. Amir Al-Ahmed

*King Fahd University of Petroleum and Minerals,
Dhahran, Saudi Arabia*

Prof. Yun-Hae Kim

*Korea Maritime and Ocean University, Busan,
South Korea*

About:

"Nano Hybrids and Composites" (NHC) is the successor journal of the former journal "Nano Hybrids" (NH). It is a peer-reviewed journal which publishes research and review articles on hybrid nanomaterials such as inorganic-organic, inorganic-inorganic and organic-organic. It is an interdisciplinary research journal which also focuses on all aspects of nanoscience, nanotechnology and composites. Submissions are accepted in all topical areas, ranging from basic aspects of the science of nanomaterials and composites to devices based on nanomaterials and applications.

Solid State Phenomena (SSP)

(abbr key title: Solid state phenom.)

WEB ACCESS 2026: Vols. 383-396
January-December 2026

Vols. published as of 1988-Jul 2025: **372**

Pages / papers on 31.12.2024:
105 530 / 14 568

- OPTION 1 (current year): **EUR 1,320**
- OPTION 2 (current year + back vols):
EUR 1,900
- OPTION 3 (current year + perpetual/
archival purchase of all back vols from
volume 1): **EUR 19,900**
- OPTION 4 (current year + perpetual/
archival purchase covering a custom
period of 10 consec. years (2016-2025
or others at customer discretion):
EUR 7,400

Editor-in-Chief

Prof. Rafał Leszek Abdank-Kozubski
Jagiellonian University in Krakow, Poland

About:

"Solid State Phenomena" (formerly Part B of "Diffusion and Defect Data", ISSN print: 0377-6883) is a peer-reviewed journal which covers a set of research: fundamentals of the structures and their influence on the properties of solids, of experimental techniques and practical applications of materials, solid-state devices and structures in the context of the latest achievements in the area of research of solid state phenomena.

"Solid State Phenomena" specializes in the publication of thematically complete volumes and special topic volumes. Periodical also considers stand-alone papers by individual authors.

Available OPTIONS:

ONLINE OPTIONS:

■ Option ONLINE 1.

Web 2026 Current Year with no Back Volumes = Access to the current year (2026 excluding BackVols); Existing customers have perpetual Access to Back Volumes for all subscribed years.

■ Option ONLINE 2.

Web 2026 plus Access to Back Volumes, back to volume 1. Perpetual access to 2026. After cancellation no access to Back Volumes with the exception of years subscribed.

■ Option ONLINE 3.

Web 2026 plus Access to all Back Volumes, back to volume 1. Perpetual access to all back volumes.

■ Option ONLINE 4.

Web 2026 plus Access to Back Volumes covering a custom period of 10 consecutive years (2016-2025 or any other period at customer discretion). Available for a selection of 6 journals. Perpetual access to back volumes.

PRINT OPTIONS:

■ Option PRINT 1.

Print+Free Web: For the current year (2026) the customer will receive free Web, no perpetual rights

■ Option PRINT 2.

Print+Access to Back Vols. = Print current year plus access to Back Vols., back to Volume 1.
