

Preface

On behalf of the Organizing Committee, we are deeply honored and delighted to present the proceedings of the “The 11th International Conference of the Indonesian Chemical Society (ICICS 2023)”. The theme of the 11th edition is "Strengthening the Role of Chemistry as a Fundamental Science in Supporting the Downstreaming of Agro-Industrial Products,” which highlights the vital role of chemistry in advancing agro-industrial practices and sustainability.

ICICS is an esteemed annual event organized by the Indonesian Chemical Society (Himpunan Kimia Indonesia), encompassing all fields of chemistry. This conference served as a vital platform for scientists, researchers, and professionals from Indonesia and around the world to convene, exchange knowledge, share research findings, and discuss the latest advancements in chemistry. ICICS played a crucial role in fostering collaboration, knowledge-sharing, and the dissemination of cutting-edge research within both the Indonesian chemical community and the broader international scientific community.

We would like to extend our sincere appreciation to our speakers, keynote speakers, invited speakers, and all presenters and participants who have travelled from near and far to be part of this distinguished event. Your invaluable contributions and engagement were the essence of this conference, enriching our collective pursuit of scientific progress and innovation.

Lastly, we extend our heartfelt appreciation to the members of the Organizing Committee, our dedicated students, and all individuals who have contributed their time and effort to make this conference a success. Without their dedication and hard work, this event would not have been possible.
