

Table of Contents

Preface

Chapter 1: Applied Materials

A Comprehensive Study of Bulk Nd_{1-x}Sr_xNiO₂: Understanding the Absence of Superconductivity P. Das	3
Sustainable Development and Environmental Impact of Critical Infrastructure: Integrating Textile Waste into Concrete Materials M. Lalariyan and S. Deb	13

Chapter 2: Geotechnical Engineering

Importance of Geophysical Investigations in Underground Urban Metro Tunnel Projects S. Krishna and G.S. Ingle	29
Comparative Study of Factor of Safety of Tunnel Segment by Adding Macro-Synthetic Fiber Using Ansys A. Sawant and G.S. Ingle	41
Application of Tunnel Seismic Prediction (TSP) in the Geologically Sensitive Eastern Himalayas B. Dutta, S.R. Shekokar and P.C. Dhang	51
Regression Analysis of Q- Value Data for Shale Rock in Tunnels: Implications for Support System Design M. Dutta, S. Tirpude and S. Potnis	73

Chapter 3: Innovative Engineering Research and Solutions

Study of Variation of Nonlinear Current in Plasma for Terahertz Radiation Generation R. Gill and R. Malik	93
Sustainable approach of Solar Photovoltaic system for Generation of Hydrogen Used as the Fuel of Automobiles IC Engine for Jaipur, India S. Kumawat, S. Agrawal and S. Lal	99
