

Table of Contents

Preface

Chapter 1: Steel and Alloys

Microstructural Characteristics, Hardness and Tribological Behavior of Additive Manufactured CM247LC Nickel Super Alloy C. Palanisamy, R. Raman and P.A. Olubambi	3
Certain Investigation on Feasibility of Developing Riser Less Ductile Iron Castings S.V. Subramanian, C. Palanisamy, R. Raman and P.A. Olubambi	15
Influence of Annealing Temperature on the Chemical Composition of Composite Al-Si Coating Deposited via Magnetron Sputtering on ZK60A A.K. Singh, N. Glizde and K. Savkovs	27

Chapter 2: Engineering Research and Design

Comparative Flexural Analysis of Cantilever Beam at Various Loads Using Analytical, Computational and Experimental Techniques A. Abuye, F. Kibrete, G. Ayay and E. Gebrekidan	35
Topological Optimization of Mining Vehicle Tyre P. Muller and L. Mthembu	45
Mathematical Model of Unsteady MHD Couette Flow of Maxwell Viscoelastic Material and Heat Transfer with Ramped Wall Temperature K. Mundell-Thomas and V.M. Job	65
Development and Implementation of an Artificial Neural Network for the Simulation of Flood Phenomena in a Natural Area E. Keramaris and I. Petikas	77
