

Preface

This issue features articles that showcase research findings presented at the International Conference on Functional Materials for Energy and Manufacturing (ICFMEM 2023), which was held on July 26, 2023, at Pallavan College of Engineering in Kancheepuram, Tamilnadu, India. ICFMEM provided a platform for experts, researchers, scholars, and academicians across the globe to exhibit their recent innovative research results and the most recent trends in the diverse fields of materials and energy.

The program was comprised of three Plenary and four Invited lectures and eighty oral presentations covering emerging fields of materials and energy. The organizing committee sincerely acknowledges the support and continuous encouragement from Shri. E. Santhanam, Smt. S. Selvambal (Patrons-RBRI), Dr. P. Anandhi (Conference Chair) and Dr. Kamrul Hasan Talukder (Conference Secretary), Khulna University, Bangladesh.

Also, we would like to express thanks to Professor Dr. Ilhami Colak, Nisantasi University, Turkey, for rendering his support. We are grateful to the advisory committee and technical review committee (National/International) for their valuable suggestions and contributions in organizing the impressive scientific event.

The organizers sincerely thank the guest editors and all the reviewers for their great efforts in bringing out the high-standard scientific publication. The organizers of the conference also extend their gratitude to the publisher Scientific.net for support in the publication of this issue.
