

## Table of Contents

<b>Synthesis and Characterization of Glutaraldehyde-Crosslinked PEG-PVA Biodegradable Hydrogels for Tissue Engineering Applications</b> J.Y. Hu	1
<b>Green Tea Catechin@ZIF-8 Encapsulation within Calcium Alginate Hydrogel: Preparation, Characterization and <i>In-Vitro</i> Release</b> V.V.L. Nguyen, T.H.T. Pham, G.Q.N. Pham, U.N. Cao and T.H.A. Nguyen	15
<b>Experimental Proof of Concept Modelling and ASPEN Based Scale Up Techno Economics of Phenolic Nutraceutical Extract Production from South Western Polyherb</b> E.O. Oke, O.U. Usofor, O. Adeyi, B.I. Okolo, S. Onoja and K.J. Simonyan	27
<b>Surface Modification of Commercially Pure Titanium Substrate with Different Coating Materials Using Electrophoretic Deposition Technique</b> N.A. Al-Ali, Z.J. Kadhim, A.A. Shaher and A.R. Al-Adhadh	51
<b>Optimizing Composition and Rigidity of Unidirectional Laminates for Total Hip Prosthesis Applications</b> R. Zekkour, K. Faiza and R. Manaa	63
<b>Nano Finishing of Orthopedic Implant Plates Using Abrasive Flow Machining</b> S. Saroj, S. Bhukya and V. Gudipadu	75
<b>Modulating Neurons via Optothermal, Magnetic, and Electrical Mechanisms Using Metal Nanoparticles</b> M.Z. Sahin, E. Uzun and I. Tekeoğlu	81
<b>Design and Simulation of a Microfluidic System for Hydrodynamic Irrigation of <i>In Vitro</i> Pancreatic Islets</b> E. Zuñiga-Aguilar, O. Ramírez-Fernández and O. Anaya-Reza	93
<b>A Short Description of most Common Biocompatible Materials that are Suitable for 3D Printing in Medical Field</b> M. Florea and G.V. Mnerie	105
<b>Applications of 3D Printing Technology in Healthcare</b> E. Angula, L.L. Agirre, A.A. Pujana and S.K. Saini	127
<b>A 3D Printing Soft Prosthesis and an IoT Architecture for Controlling Gestures</b> J.L. Ordoñez-Avila, D.D. Lopez, D. Ventura, J. Molina-Palucho, A.D. Colindres, M.E. Perdomo, K.M. Reyes Leiva, J.V. Fajardo and M. Cardona	137
