

# Table of Contents

## Preface

### Influence of New SiO<sub>2</sub> Nanofluids on Surface Wettability and Interfacial Tension Behaviour between Oil-Water Interface in EOR Processes

A. Amraei, Z. Fakhroueian and A. Bahramian 1

### Application of ZnO Nanostructures in Improvement of Effective Surface Parameters in EOR Process

P. Esmaeilzadeh, Z. Fakhroueian, M. Nadafpour and A. Bahramian 9

### Photocatalytic Active Nanorutile TiO<sub>2</sub>: Synthesis Characterization and Photocatalysis Tests

M.Y. Meor Sulaiman, E.M. Mahdi, P. Wilfred and M. Muslimin 17

### Diffusion Processes in the Sintering of Zirconia-Based Nanomaterials

O. Melikhova, J. Čížek, I. Procházka, W. Anwand, T.E. Konstantinova and I.A. Danilenko 25

### Effect of Annealing Temperature of Magnesium Doped Zinc Oxide Nanorods Growth on Silicon Substrate

R. Mohamed, Z. Khusaimi, N.A. Abdullah, A. Aziz, M.H. Mamat and M. Rusop 33

### The Growth of ZnO Nanoparticles by Solution-Immersion Method on Various Types of Seeded Template

N.A. Abdullah, A. Aziz, N.A.M. Asib, R. Mohamed, M.H. Mamat, M. Rusop and Z. Khusaimi 39

### Electrophoretic Deposition of Ni/SiO<sub>2</sub> Nanocomposite Coating: Fabrication Process and Tribological and Corrosion Properties

A.G. Isfahani and M. Ghorbani 45

### Effect of SiC Particles Dispersion on the Grain Size and Mechanical Properties of Cu/SiC Metal Matrix Nanocomposites Produced via MFSP

M. Barmouz and A. Araee 53

### Optical Properties of Amorphous and Nanostructure Si/SiO<sub>2</sub> Quantum Wells

T. Takeuchi, M. Kondo, M. Fujita, A. Kawaharazuka and Y. Horikoshi 59

### Diffusion of CO<sub>2</sub> in Polymer Nanocomposites Containing Different Types of Carbon Nanoparticles for Solid-State Microcellular Foaming Applications

M. Antunes, V. Realinho, G. Gedler, D. Arencón and J.I. Velasco 63

### Morphology and Physical Studies of Nanostructured Fe<sub>64</sub>Cr<sub>36</sub> Alloy Elaborated by Ball Milling

S. Triaa, L. Faghi, F. Kali-Ali and M. Azzaz 75

### Effect of Carbon Nanotube Additive on the Thermal Performance of a Horizontal V-Grooved Heat Pipe

M. El-Nakla, W. Ahmed and A. Al-Sarkhi 83

### Improved Oil Recovery by High Magnetic Flux Density Subjected to Iron Oxide Nanofluids

N. Yahya, M. Kashif, A. Shafie, H. Soleimani, H.M. Zaid and N.R.A. Latiff 89

### The Band Structures of Single-Walled Carbon Nanotubes and ZnO Nanoparticles Used for Oil Recovery in Water Flooding System

A. Shafie, N. Yahya, M. Kashif, H.M. Zaid, H. Soleimani and M.S. Alnarabiji 101

### Novel Enhanced Oil Recovery Method Using Co<sup>2+</sup><sub>x</sub>Fe<sup>2+</sup><sub>1-x</sub>Fe<sup>3+</sup><sub>2</sub>O<sub>4</sub> as Magnetic Nanoparticles Activated by Electromagnetic Waves

H. Soleimani, N. Yahya, N.R.A. Latiff, H.M. Zaid, B.M.R. Demira and J. Amighian 111

### Synthesis and Characterization of Mesoporous Multi-Walled Carbon Nanotubes at Low Frequencies Electromagnetic Waves

H. Soleimani, N. Yahya, N.R.A. Latiff, K. Koziol, B.M. Maciejewska and B.H. Guan 117

### Hydrogen Interaction with Defects in Nanocrystalline, Polycrystalline and Epitaxial Pd Films

J. Čížek, O. Melikhova, M. Vlček, F. Lukáč, M. Vlach, P. Dobron, I. Procházka, W. Anwand, G. Brauer, S. Wagner, H. Uchida, R. Gemma and A. Pundt 123

### Application of Electromagnetic Waves and Dielectric Nanoparticles in Enhanced Oil Recovery

H.M. Zaid, N.R.A. Latiff, N. Yahya, H. Soleimani and A. Shafie 135

### Numerical Charaterization of the Shear Behavior of Hetero-Junction Carbon Nanotubes

S.I. Yengejeh, M. Akbarzade and A. Öchsner 143

<b>Effect of Silver Nanoparticles on the Mechanical and Physical Properties of Epoxy Based Silane Coupling Agent</b>	
B. Vengadaesvaran, N. Arun, R. Chanthiriga, A.R. Bushroa, S.R. Rau, R. Kasi, G.H.E. Alshabeeb, R.T. Subramaniam and A.K. Arof	153
<b>Use of Cellular Automata for Modelling of the Carbon Nanolayer Growth on a Light Alloy Substrate</b>	
M. Golabczak, A. Konstantowicz and A. Golabczak	159
<b>Nonlinear Multi-Scale Finite Element Method to Predict Tensile Behavior of Carbon Nanotube-Reinforced Polymer Composites</b>	
E. Mohammadpour and M. Awang	169
<b>Optimum Dispersion Technique of Carbon Nanotubes in Epoxy Resin as a Function of the Desired Behaviour</b>	
S.G. Prolongo, A. Jiménez-Suárez, B.G. Melitón, M. Campo and A. Ureña	177
