|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Electrical Properties of Copper Oxide Nanoparticles</b><br>S. Sagadevan and M. Priya                                                                                                                                                                            | 1   |
| <b>Mechanical Properties of Epoxy Nanocomposites Using Alumina as Reinforcement - A Review</b><br>D. Pinto, L.F.A. Bernardo, A. Amaro and S. Lopes                                                                                                                 | 9   |
| <b>Self-Cleaning TiO<sub>2</sub> Nanofilms on FTO Glass: Influence of Electrophoretic Deposition and UV Irradiation Conditions</b><br>N. Horandghadim, M. Ghorbani and A. Dolati                                                                                   | 39  |
| <b>Nitrogen-Doped Carbon Nanotubes and Graphene Nanohybrid for Oxygen Reduction Reaction in Acidic, Alkaline and Neutral Solutions</b><br>J.Y. Liu, Z. Wang, J.Y. Chen and X. Wang                                                                                 | 50  |
| <b>Molecular Dynamics Simulation of Size Effect on the Mechanical Properties of Amorphous Silica</b><br>F.L. Duan, C. Zhang and Q.S. Liu                                                                                                                           | 59  |
| <b>Texture and Magnetism of Nanocrystalline Ni Films and Multilayers</b><br>P. Pouloupoulos, A. Vlachos, S. Grammatikopoulos, V. Karoutsos, P.S. Ioannou, N. Bebelos, D. Trachylis, M.J. Velgakis, E.I. Meletis and C. Politis                                     | 68  |
| <b>CdSe Quantum Dot-Sensitized Solar Cell: Effect of Size and Attach Mode of Quantum Dot</b><br>F.Y. Shao, M. Li, J.W. Yang, Y.P. Liu and L.Z. Zhang                                                                                                               | 78  |
| <b>Chemical Characterization of DC-Sputtered In<sub>2</sub>O<sub>3</sub> Films with a Top SnO<sub>2</sub> Layer</b><br>Á. Bedoya-Calle, M. García-Méndez, A. Torres-Castro, S. Shaji and U. Ortiz-Méndez                                                           | 86  |
| <b>Effect of Nature of Surfactant on the Formation of β-Ag<sub>2</sub>Se Nanoparticles and Optical Properties of β-Ag<sub>2</sub>Se and ZnS/β-Ag<sub>2</sub>Se Nanocomposite</b><br>V. Andal and G. Buvaneswari                                                    | 96  |
| <b>Development and Optimization of Biometal Nanoparticles by Using Mathematical Methodology: A Microbial Approach</b><br>S. Honary, H. Barabadi, P. Ebrahimi, F. Naghibi and A. Alizadeh                                                                           | 106 |
| <b>The Expression of Inflammatory Cytokine and Heme Oxygenase-1 Genes in THP-1 Cells Exposed to Metal Oxide Nanoparticles</b><br>M. Horie, K. Nishio, H. Kato, S. Endoh, K. Fujita, A. Nakamura, A. Miyauchi, S. Kinugasa, Y. Hagihara, Y. Yoshida and H. Iwahashi | 116 |
| <b>Prolonged Release and Cytocompatibility on Immortalized Keratinocytes of CoQ10-Loaded Nanostructured Lipid Carrier</b><br>J.M. Wang and Q. Xia                                                                                                                  | 128 |
