

Table of Contents

Preface

Chapter 1: Engineering Tribology

Experimental Comparison of the Material Properties of Original and Aftermarket Gears P. Mikuš, A. Breznická, L. Timárová and M. Jus	3
Mathematical Model of Friction M. Jus and L. Bartošová	11
Examination of the Internal Surface of a Firing Chamber of Armament Elements A. Trytek, M. Marciniak, T. Galek, K. Łysiak, M.J. Surowaniec and J. Czaja	19
Research on the Characteristics of Steels Essential for Increasing the Durability of Selected Special Equipment Structures M. Polášek, J. Pokluda, J. Maryáš, J. Escherová, P. Mikuš, M. Kohutiar and M. Jus	33
Tribological Analysis of Manganese Phosphate Coating on Steel Pistons for Internal Combustion Engines P. Zurawski and A. Trytek	43
Degradation of Hydraulic Oil in Operating Conditions L. Hujo and B. Kopiláková	61

Chapter 2: Waste Treatment

Synthesis of Epoxidized Waste Cooking Oil as Plasticizer in the Production of Xyloglucan-Chitosan Films P. Assawasaengrat, K. Kikaew, W. Wanliphakha, W. Orachorn, W. Chokelarb and P. Sriprom	71
Economic Assessment of Tamarind Kernel Powder Edible Film Production S. Kirdponpattara, A. Phumkacha, T. Leejarkpai and S. Chuetor	77
A Comparative Analysis of Zn²⁺ Adsorption from Simulated Mining Wastewater Using Unmodified and NaClO-Modified Sugarcane Bagasse-Derived Biochar T.R.L. Panaligan, J.R. Aquino, A. Almario, J.D. Francia and I.A. Mendoza	83
Physical and Functional Properties of Spent Coffee Ground after Various Drying Techniques N. Maiyah, Y. Auenchitr, S. Supapvanich, A. Sirijariyawat, P. Ingkasupart, N. Chotigavin and S. Kerdpi boon	89
Optimized Adsorption of Aqueous Cu (II) Ions Using Novel Microwave-Extracted Sodium Alginate from Brown Seaweed (<i>Sargassum sp.</i>) G.J. Lainez, A.M.A. Umali, M.G.M.M. Casalme, A.P. Aquino, M.D. Virtus and I.D.S. Magsino	97
Cleaner Bio-Based Plasticizer Synthesis from Waste Cooking Oil to Substitute Toxic Dioctyl Phthalate in PVC Film C. Chaiyaraksa, P. Sriprom, F. Boonkaen, A. Laemsri, A. Smingkaew, W. Chokelarb and P. Assawasaengrat	103
Morphology, Thermal Properties and Rheological Behavior of Acrylate-Styrene-Acrylonitrile-Based Composites Filled with Waste Non-Metallic Printed Circuit Boards S. Wongmanee, A. Rattanapan, T. Sritapunya, S. Tuampoemsab, M. Nithitanakul and P. Sapsrithong	109
A Comparative Study on Mechanical Properties and Morphology of PP/Waste Cement Composites with Using PP-g-MA as Compatibilizer and 3-Aminopropyl Triethoxysilane as Coupling Agent S. Wongmanee, P. Sapsrithong, S. Tuampoemsab, T. Sritapunya, J. Paksamut and A. Rattanapan	117
