

Table of Contents

Preface

Chapter 1: Functional Materials and Engineering Solutions

Elastic Anomalies in the 2D Van Der Waals $\text{Ti}_3\text{C}_2\text{T}_x$ MXene: Possible Sliding Ferroelectricity and Ordering of Intercalated Halides F. Cordero, H. Pazniak, T. Ouisse, J. Gonzalez-Julian, A. Di Carlo, V. Soprunyuk and W. Schranz	3
Study of the Thermoelastic Effect in GaN I. Tkalec-Vaju, N. Grandjean and D. Mari	13
Solid Solution of Metal Dopants in Semiconducting β-FeSi₂ Matrix S. Sam, K. Yamazaki and H. Nakatsugawa	19
Fabrication of ZnO-NiO Nanocomposite/ Nano-Crystalline Silicon Thin Film Solar Cell S. Thamri and M.H. Raouadi	37
In-Flight Investigation of Floating Beads for Sloshing Mitigation for Liquid-Fueled Rockets M.C.N. Roux, B.A.H. Meunier, L. Cordey and D. Mari	53
Acoustic Insulation of Panels Made from Recycled Plastics and Resin R. Gaggino, L. Gaetan and L. Peisino	61

Chapter 2: Original Approaches in Condensed Matter Physics

From the Maxwell's Equations of Lattice Deformations to the Description of the Universe by a « Crystalline Ether » G. Gremaud	81
Dynamics of Full Skyrmions in a Chiral Liquid Crystal C. Bachmann, D. Mari and S. Brechet	133

Chapter 3: Advanced Processing Technologies and Technological Equipment

Optimization Studies on Machining of Boron Nitride Reinforced with Al Hybrid Composite in WEDM Process Using Taguchi – Dear Based Optimization M. Palanivendhan and T. Muthuramalingam	151
Design and Manufacturing of Defect-Free Pump Casings: A Numerical and Experimental Approach N.D. Khoa, T.B.T. Nam and P.Q. Trung	157
Development and Validation of a Cost-Effective Rotary Friction Welding Machine by Repurposing a J23 Mechanical Press Frame N.D. Khoa, P.Q. Trung and D.D. Khoa	163

Chapter 4: Thermal Engineering

Theoretical and Analytical Methods for Determining Heat Transfer Coefficients in Evaporation Processes T. Poós and H. Abu-Zienah	171
Selecting Thermal Pipe Insulation via Discrete Optimization M. Szokody and T. Poós	181
Experimental Investigation and Effective Numerical Modeling of Heat Transfer in Phase Change Materials D. Illés, R. Kovács and M. Szűcs	193
