

Table of Contents

Preface

Crystal Structures of Zirconia Phases and their Inter-Relation

E.H. Kisi and C.J. Howard 1

Phase Diagrams and Thermodynamic Properties of Zirconia Based Ceramics

H. Yokokawa 37

Microstructural Aspects on the Cubic-Tetragonal Transformation in Zirconia

T. Sakuma 75

The Tetragonal to Monoclinic Martensitic Transformation in Zirconia

P.M. Kelly and C.J. Wauchope 97

A Model of Stress Assisted Transformation in Mg-PSZ and Ce-TZP

C.J. Wauchope and P.M. Kelly 125

Plastic Deformation of Cubic Zirconia Single Crystals

U. Messerschmidt, B. Baufeld and D. Baither 143

Role of Ferroelasticity in Toughening of Zirconia Ceramics

A.V. Virkar 183

Defect Chemistry and Defect-Dependent Properties of Undoped and Stabilised Zirconia.

Bulk vs Interface

J. Nowotny, M. Rekas and T. Bak 211

Soft Chemistry Routes to Zirconia Ceramics

D. Segal 241

Densification of Zirconia - Conventional Methods

O.C. Standard and C.C. Sorrell 251

Sintering and Densification; New Techniques: Sinter Forging

A.J.A. Winnubst and M.M.R. Boutz 301
