PREFACE

Processing of Ceramic Matrix Composites

R.R. Naslain and A.P. Nascimento Filho 3

Development of SiC Fiber-Reinforced SiC Composites by Radiation-Cured Preceramic Polymer

M. Sugimoto, Y. Morita, T. Seguchi and K. Okamura 11

New Type of Sintered SiC Fiber and Its Composite Material

H. Ishikawa, S. Kajii, T. Hisayuki, K. Matsunaga, T. Hogami and Y. Kohtoku 15

Fabrication of Carbon Fiber/SiSiC Composites and Their Mechanical Properties

D.W. Shin, I.S. Kim and S.S. Park 19

Dispersion of Chopped Short Fibers in Production of Fibers-Reinforced Glass-Ceramic Matrix Composites

J.Q. Gao, Q.W. Huang and Z.H. Jin 23

Sol-Gel Derived Al₂O₃ Fiber Dispersed with Fine YAG Particles

A. Towata, H.J. Hwang, M. Sando and K. Niihara 27

Chemical and Mechanical Degradation of Hi-Nicalon and Hi-Nicalon-S Fibers under CVD/CVI BN Processing Conditions

F. Rebillat, A. Guette, L. Espitalier and R.R. Naslain 31

Studies of the Spinnability of Polycarbosilane and Spinning Technology of Its Continuous Fibers

Y. Wang, Y. Song, C. Feng, Z.G. Zou, Y. Zhao and J. Long 35

SiC-Based Fibers Synthesized from Hybrid Polymer of Polycarbosilane and Polyvinylsilane

A. Idesaki, M. Narisawa, K. Okamura, M. Sugimoto, Y. Morita, T. Seguchi and M. Itoh 39

Fabrication of Cf/SiC Ceramic Matrix Composites by Polymer Precursor Pyrolysis

X. Zhou, C. Zhang, J. Ma and A. Zhou 43

The Development of a Combustion Chamber Liner Utilizing a Long-Fiber Reinforced Composite Material Made Using the Poly-Silazane Impregnation Method and the Chemical Vapor Deposition Method

K. Matsumoto, N. Fujioka, T. Hayakawa, N. Kawamura and K. Sato 49

Development of Lanthanumhexaluminate Fiber-Coating via Sol-Gel-Route Using Inorganic and Organic Precursors

L. Mayer, B. Saruhan and H. Schneider 53

Damage Tolerant Oxide Ceramics Using Pure Fiber and Matrix Laminates

T.C. Radsick, B. Saruhan and H. Schneider 61

High Performance Tyranno (Si-C-M-O) Fibers for Composites

S. Masaki and T. Yamamura 67

Mechanical Properties and Microstructural Characteristics of Carbon Fiber Reinforced Silicon Carbide Matrix Composites by Chemical Vapor Infiltration

Y. Xu, L. Cheng, L.J. Zhang and D. Yan 73

An Effective Process for Silicon Carbide Matrix Composites: Dual-Composition Solution Impregnation and Pyrolysis under Medium Pressure

W. Zou, T. Wan, J. Su, L. Yan and J. Lu 77

Sol-Gel Processing of Silicon Based Matrixes for Carbon Fiber Reinforced Ceramic Composites

S. Manocha, D. Vashistha and L.M. Manocha 81

Development and Properties of an Oxide Fiber-Oxide Matrix Composite

S.M. Johnson, Y.D. Blum and C.H. Kanazawa 85

Processing and Microstructure of Polymer-Derived Oxide Composite Materials

D. Suttor and G. Ziegler 91

Fabrication and Mechanical Properties of Reaction Sintered Silicon Carbide Matrix Composite

T. Kameda and Y. Itoh 95

SiC Fiber Reinforced Si₃N₄ Ceramics with Self-Diagnosis Function

Y. Takagi, H. Matsubara and H. Yanagida 99

Processing and Mechanical Properties of C-Fiber Reinforced SiCN-CMCs B. Rothe, D. Suttor and G. Ziegler	103
Processing and Characterization of Carbon Fiber Reinforced Ceramic Nanocomposites N.H. Tai, K.P. Lee, H.H. Cheng and C.S. Liu	105
In-situ Synthesis and Oxidation Resistance of C-SiC-TiC-TiB₂ Composite H.N. Xiao, Q.Q. Yang and Q.Z. Huang	109
Fabrication and Characterization of 3D C/SiC Composites via Slurry and PCVI Joint Process K. Suzuki, S. Kume, K. Nakano and T.W. Chou	113
Processing and Characterisation of Silicon Carbide Fibre Reinforced MoSi₂-Based Composites A.R. Bhatti, R.N. Moss, R. Piller, R.A. Shatwell and R. Slightam	117
Process and Properties of Fiber-Reinforced Ceramic Matrix Composites with Function of Fracture Detection M. Asayama, M. Sando and K. Niihara	121
Micromechanical Analysis of CMC Structural Members Based on Homogenization Method K. Kageyama and I. Kimpara	127
Mechanical Properties of Coating Free SiTiCO Fiber-Reinforced SiC Matrix Composites T. Mamiya, Y. Kagawa, Y. Shioji, M. Sato and T. Yamamura	133
Mechanical Properties of Carbon Fiber-Reinforced hBN Matrix Composites at Elevated Temperature Y. Matsuo, S. Kumagai and K. Yasuda	137
Fracture Behavior of Unidirectional Si-Ti-C-O Fiber- Bonded Ceramic Composite Materials M. Tanaka, S. Ochiai, M. Hojo, T. Ishikawa, S. Kajii, K. Matsunaga and T. Yamamura	141
Mechanical Properties of C/C Composites B. Thielicke	145
Geometry Determination of Cruciform-Type Specimen and Biaxial Tensile Test of C/C Composites Y. Ohtake, S. Rokugawa and H. Masumoto	151
Modelling of the Mechanical Behavior of a 2.5D C/C Composite under Tensile and Shear Loads at Room Temperature O. Siron and J. Lamon	155
Damage Modelling at the Mesoscopic Scale for 4D Carbon/Carbon Composites X. Aubard, C. Cluzel, L. Guitard and P. Ladeveze	159
Formation of a CVI-SiC Matrix Coating Reinforced by Carbon Fiber on a 2-D Woven C/C Substrate A. Otsuka, K. Sakamoto, T. Takahashi, Y. Ohtake, G. Zhang, S. Ueno and H. Masumoto	163
Determination of the Interlaminar Tensile Strength of a C/C-Composite by the Diametral Compression Test at Temperatures up to 1800°C U. Soltész, B. Schäfer and B. Thielicke	167
Shear Failure Behavior of Continuous Fiber Reinforced Ceramic Matrix Composites Y. Ishiguro, T. Akatsu, Y. Tanabe and E. Yasuda	171
Anomalous Strain Behaviour under Stress Controlled Loading of CFCCs M. Steen, C. Filiou and P. Bonnel	175
Toughened Silicon Carbide Based Composites by Microstructure Design and Processing D.L. Jiang	179
A Novel Technique of Using Interfacial Debonding to Measure Fiber-Bridging Stress in Ceramic Composites Y.J. Sun and R.N. Singh	185
Themomechanical Behavior and Microstructure of Tyrannohex Composites M. Drissi-Habti, J.F. Després, K. Nakano, H. Hatta and T. Ishikawa	189
Fracture Behavior of Cross-Ply Laminates Carbon-Carbon Composites K. Goto, L. Denk, H. Hatta, Y. Kogo and S. Somiya	193
Creep Behavior and Modeling of SiC-Based PC Ceramic Matrix Composites with Glass Sealant in High Temperature Air T. Ishikawa, N. Suzuki, I.J. Davies, M. Shibuya, T. Hirokawa and J. Gotoh	197
In situ Properties of 3-D Woven SiC/SiC-Based Composite I.J. Davies, T. Ishikawa, M. Shibuya, T. Hirokawa and J. Gotoh	201

Probabilistic-Statistical Approach to Matrix Cracking in Ceramic Matrix Composites (CMCs)	
V. Calard and J. Lamon	205
Failure Mechanisms and the Macro-Response of Carbon Fiber Reinforced SiC Matrix Composites	
J. Varna and T. Hansson	209
Triaxially Braided C/SiC Composites: Research and Development by the Combined Process of CVI+PIP	
W. Zou, M. Song, T. Wan, L. Yan and K. Wan	213
Microstructure and Mechanical Properties of Hot-Pressed Silicon Carbide Fiber-Reinforced Silicon Carbide Composite	
K. Yoshida, M. Imai and T. Yano	217
Tensile Matrix Cracking Behavior of Hi-Nicalon Fiber/Glass Matrix Cross-Ply Laminate Composites	
T. Okabe, N. Takeda, J. Komotori, M. Shimizu, K. Imai and Y. Imai	221
Effect of the Open Porosity on the Flexural Strength of 2-D Woven Carbon Fiber Reinforced SiC/C Matrix Composites by Reaction-Bonding	
E. Tani, K. Shobu and T. Nakashima	225
The Pretreatment on Carbon Fibers for C/SiC Composites	
L. Yan, M. Song, T. Wan and W. Zou	229
Triaxially Braided C/SiC Composites: Structure and Properties	
W. Zou, J. Lu, M. Song, S. Qiao and S. Bai	233
Triaxially Braided C/SiC Composites: A High Temperature, Lightweight, Nozzle Material	
W. Zou, L.T. Yan, T. Wan and M. Song	237
Three Dimensional Crack-Fiber Interaction Process in Fiber-Reinforced Ceramic Matrix Composite: Model Experiment	
T. Ito and Y. Kagawa	241
Mechanical Behavior of a Si-Ti-C-O Fiber-Bonded Ceramic Material	
L.P. Zawada and T. Ishikawa	245
Static Fatigue of 2D SiC/SiC Composites with Multilayered (PyC-SiC)_n Interphases at High Temperatures in Air	
S. Pasquier, J. Lamon and R.R. Naslain	249
On the Way to the Equivalence between Measured Parameters Using Non-Notched and Notched Woven Specimens of SiC/C/SiC Composites	
M. Drissi-Habti, J. Chermant and D. Rouby	253
Design of Room Temperature Tensile Test Specimen Made of Ceramic Matrix Composites	
J.L. Shi, L. Brady and A. Ireson	257
From the Yarn to the Bulk: A Meso-Macro Approach of the Mechanical Behaviour of 2D Ceramic Matrix Composites	
M. Boussuge and E. Munier	261
High Temperature Behaviours of Two Nanocomposite Oxide Fibres	
F. Deléglise, M.H. Berger, J. Pitchford and A.R. Bunsell	265
Thermal Stability of Glass-Sealed Si-Ti-C-O Fiber Reinforced SiC Composite	
M. Suzuki, T. Yoshida, M. Shibuya, J. Gotoh and M. Imuta	271
Structure and Materials of a Multi-Layer Coating for the Oxidation Protection of C/C Composites up to 1700°C	
L. Cheng, Y. Xu and L.J. Zhang	275
Thermal Expansion Behaviour of High Melting Point Oxides	
M.-. Antti, O. Babushkin, Z. Shen, M. Nygren and R. Warren	279
Characterization of Coating Cracks in Oxidation-Resistant SiC Coating on C/C Composites	
T. Aoki, H. Hatta, K. Goto and H. Fukuda	283
High-Temperature Properties of Newly Developed Advanced SiC Fibers	
H. Serizawa, C. Lewinsohn, G.E. Youngblood, R.H. Jones, D.E. Johnston and A. Kohyama	287
Oxidation Behavior of Glass-Protected Tyranno-Hex Ceramic Matrix Composites	
M. Drissi-Habti, S. Sakakibara, K. Nakano, K. Suzuki, T. Yarii and Y. Kanno	291
Effects of Matrix Cracking on the Creep of SiC-SiC Microcomposites	
R.E. Tressler, K.L. Rugg, C.E. Bakis and J. Lamon	297

Tensile Creep Properties of Si-M-C-O (M=Ti or Zr) Fibers in Air Derived from Polymer Precursors	
M. Narisawa, K. Sogame, K. Okamura, M. Sato and T. Yamamura	303
Some Recommendations for Long Term High Temperature Tests	
G. Boitier, H. Cubéro and J. Chermant	309
Creep at the Mesoscopic and Microscopic Scale of 2.5D C_f-SiC	
G. Boitier, J. Vicens and J. Chermant	313
Macroscopic Creep of 2.5D C_f-SiC	
G. Boitier, J. Chermant and J. Vicens	317
Fatigue Behavior at High Temperature in Air of a 2D Woven SiC/SiBC with a Self Healing Matrix	
P. Carrère and J. Lamon	321
Cyclic Fatigue Behaviour at Room Temperature and at High Temperature under Inert Atmosphere of a C/SiC Multilayer Composite	
A. Dalmaz, P. Reynaud, D. Rouby, G. Fantozzi and M. Bourgeon	325
Improvement of Cyclic Fatigue Analysis by the Use of a Tensile Master Curve in Carbon/Carbon Composites	
C. Tallaron, D. Rouby, P. Reynaud and G. Fantozzi	329
Subcritical Crack Growth Mechanisms and Failure Mechanism Maps for Ceramic Matrix Composites	
C. Lewinsohn, C.H. Henager, Jr. and R.H. Jones	333
Nanocreep of Carbon Fibers in 2.5D C_f-SiC	
G. Boitier, J. Vicens and J. Chermant	337
Tensile Behavior of Woven Ceramic Matrix Composites at Room and Elevated Temperature: An Experimental and Numerical Study	
A. Haque, M. Rahman, U. Vaidya, H. Mahfuz and S. Jeelani	341
Thermal Cycling, Thermal Aging and Thermal Shock Behavior of Nicalon-Fiber Reinforced Glass Matrix Composites	
A.R. Boccaccini, H. Kern, J. Janczak-Rusch, C.B. Ponton and K.K. Chawla	345
Development of Interfaces in Oxide Matrix Composites	
M.H. Lewis, A. Tye, E. Butler and I. Al-Dawery	351
(PyC/SiC)_n and (BN/SiC)_n Nanoscale-Multilayered Interphases by Pressure Pulsed-CVI	
S. Bertrand, O. Boisson, R. Pailler, J. Lamon and R.R. Naslain	357
Multilayered Interphases in SiC/SiC Composites: Influence of the Interfacial Bond Strength on the Interfacial Characteristics	
F. Rebillat, J. Lamon and R.R. Naslain	361
A Multilayer Ceramic Matrix for Oxidation Resistant Carbon Fibers-Reinforced CMCs	
F. Lamouroux, S. Bertrand, R. Pailler and R.R. Naslain	365
Methodology for Assessing the Interfacial Sliding Stress of a 2D Woven SiC-SiC Composite	
J.-. Morvan and S. Baste	369
Modeling of Interfacial Debonding in Unidirectionally Fiber-Reinforced Ceramics	
S. Ochiai, M. Tanaka and M. Hojo	373
Role of Roughness in Fibre/Matrix Interface Behaviour	
D. Rouby and H. Cherouali	379
Mullite/ZrO₂ Laminate Composites for High Temperature Applications	
S.Y. Park, B. Saruhan and H. Schneider	385
Fiber Reinforced Porous Alumina Substrate Consisting of Layer with Distinct Grain Sizes	
M. Nagayama, Y. Shigegaki, A. Oka, T. Sugita, K. Miyahara and T. Sasa	391
Oxidation Behavior of Ceramic Fibers from the Si-C-N-O System and Sub-Systems	
G. Chollon	395
Polyfunctional Interface Coatings for High Temperature Resistant Ceramic Composite of SiC/SiC Type	
A.M. Tsirlin, V.G. Gerlivanov, E.K. Florina, Y.E. Pronin, V.G. Syrkin, A.A. Uelskii, A.V. Grebenschikov and M.A. Khatsernov	399
Properties of Advanced Fibers for SiC/SiC Composite Applications in Fusion Energy Systems	
R.H. Jones, C. Lewinsohn, G.E. Youngblood and A. Kohyama	405
Designing of Textile Preforms for Ceramic Matrix Composites	
T.W. Chou	409

Design, Fabrication and Characterization of High Temperature Joints in Ceramic Composites M. Singh	415
Design of High Performance CMC Brake Discs W. Krenkel and T. Henke	421
Tailoring of Interface Mechanical Properties in Al₂O₃ Fiber-Reinforced Al₂O₃ Matrix Composite H. Kakisawa and Y. Kagawa	425
Morphology of Ceramic Matrix Composites J. Chermant	429
Joining of Si-Ti-C-O Fiber Reinforced Ceramic Composite and Fe-Cr-Ni Stainless Steel M. Nakamura, M. Mabuchi, N. Saito, Y. Yamada, M. Nakanishi, K. Shimojima and I. Shigematsu	435
Development of High Temperature Materials Including CMCs for Space Application M. Imuta and J. Gotoh	439
CMC for Hot Structures and Control Surfaces of Future Launchers U. Trabandt, H.G. Wulz and T. Schmid	445
Low Cost Processing for C/C-SiC Composites by Means of Liquid Silicon Infiltration R. Kochendörfer	451
