

Table of Contents

Preface

Statistical and Stochastic Description of Microvoid Evolution Observed in Dynamic Failure of Ductile Materials

Z.P. Huang and H.L. Li 1

Plastic Spin and Evolution of an Anisotropic Yield Condition

H.P. Truong Qui and H. Lippmann 13

Finite Element Modeling of Deformation Behavior of Foaming Glass

K. Shinagawa, T. Kaneko, M. Nakashima and Y. Hirashima 23

Multiple Strata Cyclic Plasticity Model for Polycrystalline Metal

Y. Obataya and T. Kato 29

Study on Elasto-Viscoplastic Constitutive Equation of Volcanic Cohesive Soils

H.J. Liao, Z. Yang, X.Y. Gao and M. Akaishi 35

New Constitutive Models for Concrete: Plastic Hardening and Post-Failure Damage Models

F.H. Wang, S.C. Fan and S. Teng 41

Influences of Strain Rate and Temperature Variation on Material Intrinsic Length of Plasticity Strain Gradient Theory

Y. Zhao and T.X. Yu 47

A Homogenization Method for Analysis of Heterogeneous Cosserat Materials

X. Yuan and Y. Tomita 53

Ductile Shear Fracture Mechanics

A.G. Atkins 59

Rapid Propagation of a Mode I Crack in an Elastic-Viscoplastic Medium with Loading and Unloading Processes

M. Lu and Y.W. Mai 69

Discing Around Perforations of Thin Plates and Tubes by Hemispherical-Nosed Missiles or Spheres

T.G. Zhang and J. Mu 75

Feasibility and Reliability of Genuine Solid State Press Bonding of Aluminum Alloy 5083

S. Lee, Y.H. Yu, J.Y. Wang and H.Y. Wu 81

Stress Field near Crack Close to Bonding Interface in Explosion Clad Plate

I. Oda, Y. Tanaka, A. Masuki and T. Izuma 87

Variable-Amplitude Fatigue Strengths of Fiber-Metal Laminate: GLARE

A. Hachinohe and M. Kawai 93

The Failure of a Pretensioned Thin Al Strip under Irradiation of a Laser Beam

S. Zhang, Y.H. Yin, G.J. Zhang and Y. Chen 99

A Microcrack Based Continuous Damage Model for Brittle Geomaterials

J.F. Shao and J.W. Rudnicki 103

Environment-Assisted Cracking of Thermostat Bimetal in 3.5% NaCl Solution

Y.-. Su and T.Y. Zhang 109

Modelling of Deformation Textures of Cold Rolled BCC Metals by the Rate Sensitivity Model

S.H. Lee and D.N. Lee 115

Plasticity in Mono-Crystalline Silicon under Complex Loading Conditions

L.C. Zhang and I. Zarudi 121

Dislocation Structure and Deformation Mechanism for the Anomalous Yield Behavior in Fe₃Al Intermetallic Alloys

H.J. Jun, C.G. Park and Y.W. Chang 129

Modelling Screw Dislocation Mobility in the Bulk and in the Vicinity of Crack Tips using a Peierls-Nabarro Approach

A.H.W. Ngan 135

Microscopic Observation of Plastic Deformation of Polycrystalline Iron

P. Clauws, S. Okada, I. Shimizu, S. Tomosada, E. Ilzuka and T. Kobayashi 141

| | |
|--|-----|
| Single Grain Analysis of Strain Hardening and Internal Stresses in Cold Rolled IF-Ti Steel with a new High-Resolution Microdiffraction Technique O. Castelnau, T. Ungár, M. Drakopoulos, A.A. Snigirev, I. Snigireva, C. Schroer, T. Chauveau and B. Bacroix | 147 |
| Self-consistent Estimates for Nonlinear Viscoelastic Polycrystals: a Simplified Resolution of the Affine Formulation Adapted to Monotonic Loading Paths R. Brenner, O. Castelnau, R. Masson, B. Bacroix and A. Zaoui | 153 |
| Microscale Spatial Distribution of Dislocations and Long Range Internal Stresses in Cold Worked bcc Fe E. Schafner, M.J. ZEHETBAUER, T. Ungár, S. Bernstorff and H. Amenitsch | 159 |
| X-Ray Microbeam Diffraction Studies of Large Strain Dislocation Substructure Formation in OFHC Copper G.C. Butler, S.R. Stock and D.L. McDowell | 165 |
| Moving Plastic Discontinuities Effect on Overall Behaviour of Metals L. Langlois, M. Cherkaoui and M. Berveiller | 171 |
| High Temperature Plastic Deformation and Microstructure of Fe-9at%Si Polycrystals C.G. Oertel and W. Skrotzki | 177 |
| Evolution of Grain-Scale Microstructure during Large Strain Simple Compression of Polycrystalline Aluminium A. Bhattacharyya, E. El-Danaf, S.R. Kalidindi and R.D. Doherty | 183 |
| Practical Constitutive Models Covering Wide Ranges of Strain Rates, Strains and Temperature S. Tanimura, K. Mimura and W.H. Zhu | 189 |
| Crash Analysis of Thin-Walled Structures with an Elasto-Plastic Explicit Finite Element Method W.J. Kang and H. Huh | 201 |
| Ductility and Brittleness Simulation during Micro Void Evolution Process of Ductile Material Using Rigid Plastic FEM Based on Gurson Type Yield Function T. Tsuta, Y. Yin and T. Iwamoto | 213 |
| Interpretation of High Strain-Rate Tested Results by Micrographic Evidence H. So, C.L. Huang and B.H. Wang | 219 |
| Behaviour Characterisations of Sheet Metals, Metallic Honeycombs and Foams at High and Medium Strain Rates H. Zhao and G. Gary | 225 |
| The Effect of Strain Rate and Martensite Volume Fraction on Tensile Impact Behavior of Dual Phase Steels Y.M. Xia and Y.X. Zhou | 231 |
| Effect of Soft Material on Insulating Impact Pressure into Explosive W.H. Zhu, G. Shi and S. Tanimura | 237 |
| Ballistic Performance of Hot Isostatically Pressed (HIPed) Ti-Based Targets V.F. Nesterenko, S.S. Indrakanti, S.N. Brar and Y. Gu | 243 |
| Dynamic Yield Stresses of Porous Materials Made of Bronze and Iron J.H. Zhang, B. Wang, G.X. Lu and T.G. Zhang | 249 |
| Influence of Axial Pre-Load on Plastic Failure of Beams Subjected to Transverse Dynamic Load F.L. Chen and T.X. Yu | 255 |
| Rate-Dependent Constitutive Law and Nonlocal Spallation Model for Concrete Subjected to Impact Loading D.N. Chen, S.T.S. Al-Hassani, Z. Yin and S. Gan | 261 |
| Characterization of Strain Rate-Dependent Shear Response of 63Sn/37Pb Solder under Uniaxial Torsion L.H. Dai, S.W.R. Lee and X. Huang | 267 |
| Dynamic Response of an Elastic-Plastic Free-Free Beam Subjected to Impact at any Cross-Section along its Span J.L. Yang and F. Xi | 273 |
| Saturated Impulse of Elastic-Plastic Beams under Concentrated Pulse Force F. Xi and J.L. Yang | 279 |
| Effects of Damping on Dynamic Plastic Response of Circular Plate Q.M. Li and G.W. Ma | 285 |

| | |
|--|-----|
| Embedded Cell Model of Three-Dimensional Two-Phase Composites S.G. Zhan, T.C. Wang and B.H. Ji | 291 |
| Constitutive Behaviors of Discontinuous Reinforced Composites B.H. Ji and T.C. Wang | 297 |
| Plasticity Theory for Particulate Composite Materials with Imperfect Interfaces Z. Zhong and X.B. Yu | 303 |
| Micromechanical Analysis for Off-Axis Nonlinear Behavior of Unidirectional Carbon Fiber Composite at Room and High Temperatures M. Kawai and R. Negishi | 309 |
| A Variational Method for Fiber Stress Profiles in Unidirectional Composites with Matrix Creep N. Ohno, T. Ando, T. Miyake and S. Biwa | 315 |
| Basic Study of Progressive Crushing Mechanism H. Saito, R. Inai, A. Yokoyama and H. Hamada | 321 |
| Numerical Simulation Technique for Progressive Crushing Behavior of FRP Tube under Impact Loading A. Yokoyama and M. Tateishi | 327 |
| Study on the Stress and Failure of Elastic-Plastic Interface for Fiber Composite P.R. Jia and G.Q. Jiao | 333 |
| Tensile Properties of Thermoplastic Weft Knitted Composites S.W. Lam, P. Xue and X.M. Tao | 339 |
| Effects of Fine-Particle Addition on Plasticity of Polymer Composites C.P. Tsui, C.Y. Tang and T.C. Lee | 345 |
| Static and Dynamic Tensile Responses of Glass Woven Fabric Reinforced Composites M.L. Sham, J.K. Kim, M. Sohn and S.S. Hu | 351 |
| Orientation Relationship and Mechanical Properties of Rolled Polypropylene Sheets S.Z. Wu and W.B. Lee | 357 |
| Mechanical Properties and Fracture Mechanisms of Fiber Reinforced PBT/PC/Elastomer Blends K. Wang and J.S. Wu | 363 |
| A Parametric Analysis of Surface Quality in Diamond Turning of an Al6061/SiC_p Metal Matrix Composite K.C. Chan, M.V. Ramesh, W.B. Lee and C.F. Cheung | 369 |
| An Investigation of Surface Roughness Formation in Ultra-Precision Machining of Al6061/SiC_p Metal Matrix Composites C.F. Cheung, K.C. Chan, W.B. Lee, M.V. Ramesh and S. To | 375 |
| The Localized Internal Necking Process between Microvoids in a Plastic Solid J.G. Ning, Z.P. Huang and J. Hao | 381 |
| A Study of Adiabatic Shear Plugging in Ti6Al4V Alloy J.L. Yu, X.L. Dong and J.Y. Zhang | 387 |
| A Simplified Approach to Material Instability under High Strain-Rate Stretching S.T.S. Al-Hassani and D.N. Chen | 393 |
| Strain Gradient Effect on Initiation of Adiabatic Shear Localization in Metal Matrix Composites L.H. Dai, Z. Ling and Y.L. Bai | 401 |
| FEM Simulation of Torsion Tests for Pre-Deformed Lead with Work-Softening X. Ma, B. Wang, L.X. Kong and M.R. Barnett | 407 |
| Transformation Conditions in SMAs under Multiaxial Stress State: Experiments and Simulations K. Tanaka, T. Watanabe, D. Ohnami and F. Nishimura | 413 |
| Constitutive Equation and Computational Simulation of Deformation Behavior of TRIP Steels Y. Tomita | 425 |
| Deformation Behavior of Elastic-Plastic Materials Containing Instantly Transforming Inclusions T. Antretter and F.D. Fischer | 431 |
| Transformation Condition in a Fe-Based Shape Memory Alloy Under Thermomechanical Loadings F. Nishimura, T. Watanabe and K. Tanaka | 437 |

| | |
|---|-----|
| Transformation Induced Plasticity in Maraging Steel: An Experimental Study K. Nagayama, Y. Kitajima, S. Kigami, K. Tanaka, F.D. Fischer and G. Cailletaud | 443 |
| Prediction of Mechanical Properties of TRIP Steels by FEM and Micromechanics J.H. Bae, S.J. Park, K.H. Oh, C.G. Lee and S.J. Kim | 449 |
| Some Deformation Features of Polycrystalline Superelastic NiTi Shape Memory Alloy Thin Strips and Wires under Tension K.K.K. Tse and Q.P. Sun | 455 |
| Superelastic NiTi Memory Alloy Micro-Tube under Tension— Nucleation and Propagation of Martensite Band Z.Q. Li and Q.P. Sun | 461 |
| Analysis of Tensile Strength of Y₂O₃ Stabilized ZrO₂ Y. Nakayama and S. Kakita | 467 |
| Homogenous Rolling and Texture Modelling in Cold Rolled Low Carbon Steel B.J. Duggan and G.L. Liu | 473 |
| Springback of Laterally Loaded Circular Plates M. Kadkhodayan and M. Najjari | 479 |
| Deep Drawability of 5083 Al-Mg Alloy Sheet at Elevated Temperature and its Prediction T. Naka, R. Hino and F. Yoshida | 485 |
| An Inverse Problem of Reinforced Panels Forming I.V. Sukhorukov | 491 |
| FE Analysis of Springback in Hat-Bending with Consideration of Initial Anisotropy and the Bauschinger Effect T. Uemori, T. Okada and F. Yoshida | 497 |
| Computer-Aided Process Design for Tension Levelling of Clad Sheet Metal F. Yoshida and M. Urabe | 503 |
| Direct Evaluation of Sheet Metal Forming Properties under Various Deformation Conditions K.P. Rao and E.V.R.K. Mohan | 509 |
| On Alternative Representation of Forming Limits P.D. Wu, A. Graf, M.K. Jain and S.R. MacEwen | 517 |
| Computer Aided Process Planning (CAPP) System for Non-Axisymmetric Deep Drawing Process D.H. Park, W.R. Bae and S.S. Kang | 523 |
| Experimental Study on Large Deformation in Fine-Blanking Process by Implementing Different Stripper Designs: Vee-Ring Type Vs. Plate-Type L.C. Chan, B.J. Wu, T.C. Lee and Y.C. Leung | 529 |
| A Study on Microstructure and Texture Evolution in Homogeneously Cold Rolled 93/7 Brass B.J. Duggan and Y.J. Chen | 535 |
| Determining and Valuation the Zones of Minimal Reserves of Working Capacity for Concave and Convex Die J.W. Pilarczyk, S. Wiewiórowska, Z. Muskalski and M. Krakowiak | 541 |
| Experiments and Analysis of the Effect of Local Induction Heating on Deformation F.H. Osman (1), D. Ebbatson, M. Hua and Y.F. Guo | 547 |
| Numerical Simulation of Non-Adiabatic Shear Banding in Metal Forming Process using Finite Element Method Z.H. Chen, C.Y. Tang and T.C. Lee | 553 |
| Deformation Characteristics of Helical Gear with Small Bevel Angle during Net Shape Forging Process S.Y. Huang, M. Zhang, Z. Chang, Y. Zhao, H. Wang and S. Zhang | 559 |
| Effect of Alloying Element on the Mechanical Behavior and Superficial Defects in Thixoforged Components of Al-Si Alloys H.K. Jung and C.G. Kang | 565 |
| Finite Element Numerical Simulation Modeling for Reheating Process of Semi-Solid Forming H.K. Jung and C.G. Kang | 571 |
| Design and Analysis of a Computer Integrated Open Die Forging Cell J. Ferreira and F.H. Osman (1) | 577 |

| | |
|--|-----|
| Measurement of Friction Characteristics using a Three Pin System F.H. Osman (1), F. Potel and M.S. Loveday | 583 |
| An Internal Variable Approach to Superplasticity of Microduplex Pb-Sn Alloys T.K. Ha and Y.W. Chang | 589 |
| The Effect of Temperature and Strain Accumulation on the Superplastic Deformation Behavior of an Al-Cu-Zr Alloy Y.N. Kwon and Y.W. Chang | 595 |
| Superplasticity-like Deformation of a Coarse-Grained Al5052 Alloy K.K. Chow and K.C. Chan | 601 |
| The Parameter Identification of Superplastic Constitutive Model Using Optimization Q.L. Jin and H. Wu | 607 |
| Texture Evolution during Low Temperature Superplasticity in Aluminum Alloys S.W. Su, I.C. Hsiao and J.C. Huang | 613 |
| The Strain Rate Cycling Induced Superplasticity and its Computer Optimization in Titanium Alloys G.C. Wang, S.Q. Lu and R. Dou | 619 |
| Discussion on Constitutive Equations of Fine-Grain Superplasticity M. Tokuda, A. Ide and T. Inaba | 625 |
| A Study on the Tensile Deformation of Superplastic-Like Al-Al₃Ni Eutectic Alloy with [111] Fiber Texture J.Y. Uan, T.S. Lui and L.H. Chen | 631 |
| Electron Backscattered Diffraction Study on Superplastic Properties of Coarse-Grained Fe-27at.% Al Based Alloys J.P. Chu, S.H. Chen, H.Y. Yasuda, Y. Umakoshi and K. Inoue | 637 |
| The Effect of Reinforcement on Superplastic Flow in Powder-Metallurgy Processed Aluminium Matrix Composites W.J. Kim | 643 |
| Research of Al-Zn 10-Mg-Zr Superplastic Alloy L. Gao, Y. Lu and S.X. Wang | 649 |
| Cavity Nucleation at Particles during Deformation at Elevated Temperature H. Hosokawa, H. Iwasaki, M. Mabuchi and K. Higashi | 655 |
| Coupled-Multilevel Modeling for Hot Deformation and Sintering T. Aizawa and F. Tsumori | 661 |
| Improvement of Post-Deformation Properties by Static Annealing for a High Strain Rate Superplastic Composite H. Iwasaki, T. Mori, M. Mabuchi and K. Higashi | 667 |
| Project of 'Towards Innovation in Superplasticity' in Japan K. Higashi and T. Sakuma | 673 |
| Softening Effects in the Bending of Tubular Structures and Components S.R. Reid and T.H. Kim | 679 |
| Practical Computation of the Plastic Collapse Limit of Defective Pipelines under Complex Loadings B.Y. Xu, B. Yang, Z. Xu and Y.H. Liu | 691 |
| Dynamic Buckling of a Column with Adhesive Bonds B. Wang and J. Zheng | 703 |
| Collapse Analysis of Thin-Walled Structures by Finite Element Limit Analysis H.S. Kim and H. Huh | 709 |
| The Characteristics of Collapse for Thin-Walled Members by Inclined Impact Load M. Naganawa, K. Murase and H. Wada | 715 |
| Dynamic Plastic Buckling of Circular Cylindrical Shells Under Axial Impact H.W. Ma, G.Q. Cheng, S.Y. Zhang and G.T. Yang | 721 |
| Modeling of Elastic-Plastic Beam-on-Foundation X.W. Chen, T.X. Yu and Y.Z. Chen | 727 |
| Finite Element Analysis of Thin Walled Tubes under Point Loads Subjected to Large Plastic Deformation C. Kardaras and G.X. Lu | 733 |
| Experimental Studies of Thin-Walled Circular Aluminium Tubes under Axial Loading S.R. Guillow, G.X. Lu and R.H. Grzebieta | 739 |

| | |
|---|-----|
| Large Deformation Model of Flat-topped Conical Shell under Axial Compression P. Xue, T.X. Yu and X.M. Tao | 745 |
| Large Plastic Deformation of W-Beams Used as Guardrails on Highways S.K. Hui and T.X. Yu | 751 |
| The Load Carrying Capacity of the Pressure Vessel with Two Defects along Axial Direction H.F. Chen and D.W. Shu | 757 |
| The Calculation of Shakedown Loads for Contact Problems M. Boulbibane and I.F. Collins | 763 |
| On-Line Measurement of Heat Generation by Plastic Deformation in Some Structure Members H. Sakamoto, K. Seki and M. Kodama | 775 |
| Hybrid Control of Inelastic Structures during Earthquake K.K.F. Wong and R. Yang | 781 |
| Thin - Film Forming of Cluster Diamond-Dispersed Aluminum Composite by Dynamic Compaction N. Nakayama, M. Mayuzumi, K. Hanada, T. Sano, R. Tominaga and H. Takeishi | 787 |
| Microstructure and Friction Properties of Cluster Diamond Dispersed Cu Composite K. Hanada, A. Imahori, H. Negishi, T. Sano and M. Mayuzumi | 793 |
| Structural Analysis for Lightweight Design of a Seat Frame in Automotive Vehicles H.G. Kim, G.H. Choe, B.H. Lee and Y.T. Cho | 799 |
| Gradient Aspects of Crystal Plasticity at Micro and Macro Scales E.C. Aifantis | 805 |
