

## Table of Contents

### Preface

<b>Statistical Modeling of Microstructural Effects on Fatigue Behavior of <math>\alpha/\beta</math> Titanium Alloys</b> A.B.O. Soboyejo, S. Shademan, V. Sinha and W.O. Soboyejo	1
<b>A Probabilistic Framework for the Modeling of Fatigue in a Lamellar XD<sup>TM1</sup> Gamma Titanium Aluminide Alloy</b> W.O. Soboyejo, W. Shen, J. Lou, C. Mercer, V. Sinha and A.B.O. Soboyejo	31
<b>Probabilistic Fatigue Damage Assessment for Short Crack Growth</b> Z.(. Zhao and I.(. Orisamolu	57
<b>Probabilistic Modeling of Fatigue Crack Growth in Ti-6Al-4V</b> W.O. Soboyejo, W. Shen and A.B.O. Soboyejo	81
<b>Cautionary Aspects of Applied Probabilistics</b> C. Annis	99
<b>Life Prediction - The Need for a Mechanistically Based Probability Approach</b> D.G. Harlow and R.P. Wei	119
<b>Reliability High Cycle Fatigue Design of Gas Turbine Blading System Using Probabilistic Goodman Diagram</b> M.- Herman Shen and T. Nicholas	139
<b>A Statistical Model for the Prediction of Brittle Fracture</b> J. Zhou and W.O. Soboyejo	163
<b>Probabilistic Approaches to the Prediction of the Effects of Multiple Parameters on the Mechanical Properties of Gamma-Based Titanium Aluminides</b> A.B.O. Soboyejo, Y. Ni, C. Mercer and W.O. Soboyejo	181
<b>Time-Dependent Reliability of Ceramic Components under Transient Loads</b> O. Jadaan, N.N. Nemeth, L. Powers, J. Palko and E. Baker	213
<b>Deformation and Failure in Stochastic Fibrous Networks: Scale, Dimension and Application</b> A.M. Sastry, C.-. Wang and L. Berhan	229
