

Table of Contents

Preface

Statistical Modeling of Microstructural Effects on Fatigue Behavior of α/β Titanium Alloys A.B.O. Soboyejo, S. Shademan, V. Sinha and W.O. Soboyejo	1
A Probabilistic Framework for the Modeling of Fatigue in a Lamellar XD^{TM1} Gamma Titanium Aluminide Alloy W.O. Soboyejo, W. Shen, J. Lou, C. Mercer, V. Sinha and A.B.O. Soboyejo	31
Probabilistic Fatigue Damage Assessment for Short Crack Growth Z.(Zhao and I.(Orisamolu	57
Probabilistic Modeling of Fatigue Crack Growth in Ti-6Al-4V W.O. Soboyejo, W. Shen and A.B.O. Soboyejo	81
Cautionary Aspects of Applied Probabilistics C. Annis	99
Life Prediction - The Need for a Mechanistically Based Probability Approach D.G. Harlow and R.P. Wei	119
Reliability High Cycle Fatigue Design of Gas Turbine Blading System Using Probabilistic Goodman Diagram M.-. Herman Shen and T. Nicholas	139
A Statistical Model for the Prediction of Brittle Fracture J. Zhou and W.O. Soboyejo	163
Probabilistic Approaches to the Prediction of the Effects of Multiple Parameters on the Mechanical Properties of Gamma-Based Titanium Aluminides A.B.O. Soboyejo, Y. Ni, C. Mercer and W.O. Soboyejo	181
Time-Dependent Reliability of Ceramic Components under Transient Loads O. Jadaan, N.N. Nemeth, L. Powers, J. Palko and E. Baker	213
Deformation and Failure in Stochastic Fibrous Networks: Scale, Dimension and Application A.M. Sastry, C.-. Wang and L. Berhan	229
