

Table of Contents

Preface

Modelling of Beam-on-Beam Collisions

T.X. Yu, A.J. Pontes, N.M. Neves and H.H. Ruan

1

Discrete Dislocation Plasticity

A. Needleman and E. Van der Giessen

13

Applications of a Phenomenological Plasticity Model with Non-Normality Effects

V. Tvergaard and M. Kuroda

25

Numerical Modelling of Large-Strain Phenomena in Polycrystalline Solids

K.W. Neale, K. Inal and P.D. Wu

35

A Model of Large-Strain Cyclic Plasticity and its Application to Springback Simulation

F. Yoshida and T. Uemori

47

Brittle-Ductile Transitions in Machining

K. Puttick

59

The Theory of Frictional, Elastic/Plastic Materials

I.F. Collins

71

A Phenomenological Constitutive Model for Ferromagnetic Materials Based on Rate-Independent Flow Theory

X.Q. Feng, D.N. Fang and K.C. Hwang

77

Unified Constitutive Model Considering Equivalence of Back Stress Due to Plastic and Viscoplastic Deformation

T. Mayama, K. Sasaki and H. Ishikawa

83

Constitutive Equation of Piezoelectric Ceramics Taking into Account Damage Development

M. Mizuno

89

An Expression of Plastic Anisotropy in Large Strain Range

M. Gotoh

95

Constitutive Modeling of Drawing and Extrusion with Cyclic Torsion

L.X. Kong and P. Hodgson

101

Constitutive Modeling and Material Instability

P.B. Béda and G. Béda

107

Fracture of Type 5083 Aluminum Sheet under Warm Stretch Bending

T. Naka, R. Hino and F. Yoshida

113

Modeling Brittle Damage Evolution in Forging/Extrusion Die

E.- Yoh, Y.- Kim and Y.S. Lee

119

Stress Field and Deformation around a Crack Tip Evaluated by Infrared Thermography and Fracture Strength of Welded Mild Steel Plates

I. Oda, A. Willett, M. Yamamoto, M. Miyawaki, N. Watanabe and I. Nakagawa

127

Deformation and Fracture Characteristics of Electron Beam Welded High Tensile Steel - Mild Steel Plates

I. Oda, A. Willett, T. Matsumoto, M. Yamamoto and Y. Sosogi

133

Inclusions and Fracture in Submerged Arc Welds of Carbon-Manganese Pressure Vessel Steels

C. Liu, D.O. Northwood and S.D. Bhole

139

Development of a Mesoscopic Cell Modeling the Damage Process in Steel at Elevated Temperature

S. Castagne, M. Remy and A.M. Habraken

145

Failure of Heat Exchanger Tubes Due to Localized Damage

M.M. Malik, I. Salam and A. Tauqir

151

Adaptive Delaunay Meshing Technique for Fracture Mechanics Problems

P. Dechaumphai, S. Phongthanapanich and P. Bhandhubanyong

157

An Elastoplastic Damage Model for Unsaturated Rock and Concrete

J.F. Shao, F. Bourgeois and O. Ozanam

163

FE-Meshless Coupling Method for 2D Crack Propagation

L.L. Lou and P. Zeng

169

Rate-Dependent Shear Deformation of Ductile Acrylic Adhesive and its Constitutive Modeling	175
M. Takiguchi, S. Izumi and F. Yoshida	
Dynamic Strength and Strain Rate Sensitivity of 37 wt% Pb 63 wt% Sn Eutectic Solders	181
B. Wang, J. Zheng and D. Shu	
Plasticity of Steel under Explosive Loading and the Effect on Cylindrical Shell Fragmentation	187
G. Szuladzinski	
A Numerical Simulation of Axial Crushing of Tubular Strengthening Structures with Various Hat-Shaped Cross-Sections of Various Materials	193
M. Yamashita, M. Gotoh and Y. Sawairi	
Technical Advantages of Hot Dynamic Compaction of Powders for Consolidating Diamond and Related Material Powders	199
K. Hokamoto, T. Tomoeda, H. Tsutsumi and M. Fujita	
Extended Rate-Dependent Subloading Surface Model	205
K. Hashiguchi	
Numerical Study of Dynamic Buckling of Steel Columns Subjected to Underground Explosion	211
H. Hao, H.K. Cheong and S. Cui	
Elastic-Plastic Dynamic Response and Buckling of Steel Columns under Strong Vertical Ground Motion	217
S. Cui, H.K. Cheong and H. Hao	
A Study of Inertia Effects under Impact Loading	223
S. Abdennadher and H. Zhao	
Failure Analysis of Plastic Thin Spherical Shells under Local Impact	229
J.G. Ning, W.D. Song and H.Y. Liu	
Experimental Investigation of the Second Critical Velocity of Dynamic Buckling of a Cylindrical Shell under Axial Impact	235
H.W. Ma, L.J. Zhang, G.W. Wang and Z.B. Cheng	
On the Characteristics of Energy Absorption Control in Thin-Walled Members for the Use of Vehicular Structures	239
S.K. Kim, K.H. Im, Y.N. Kim, J.W. Park, I.Y. Yang and T. Adachi	
Energy Absorption Characteristics of CFRP Composite Tubes under Axial Compression Load	245
Y.N. Kim, K.H. Im, S.K. Kim and I.Y. Yang	
Energy Absorbing Capacity of Shock Absorbers Combining Rubber and Steel Pipes	251
M. Minagawa, Y. Doi and F. Nagashima	
Reusable Collapsible Impact Energy Absorber	257
A.A.A. Alghamdi	
Study of Loading Capacity and Energy Absorption Behaviours of W-Beam under Impact Loads	263
X.Q. Huang, Y.P. Liu and L.Q. Tang	
Multiaxial Proportional and Non-Proportional Cyclic Behaviour of 40H Steel and PA6 Aluminium Alloy	269
Z.L. Kowalewski and K. Turski	
Cyclic Plasticity of Precipitation-Hardenable Stainless Steel	275
T.H. Yip and Z.R. Wang	
Effect of Plasticity Mismatch on Fatigue Crack Growth in Bimetallic Materials	281
P.R. Jia, G.Q. Jiao, N. Li and J. He	
Investigation of Cyclic Elasto-Plastic Behavior of Copper Sheet	287
T. Uemori and F. Yoshida	
Spatial Free Plastic Forming of Slender Parts - Finite Numerical Approach	293
M. Thalmair and H. Lippmann	
An Investigation into the Influence of Deformable Dies on the Springback of Circular Plates	299
M. Kadkhodayan	
Prediction of Springback in Anisotropic Sheet Metals Based on an Asymmetrical Non-Quadratic Yield Function	305
V.T. Nguyen, Z.P. Chen and P.F. Thomson	

Study of Hydrostatic Extrusion Processes with Extra-High Extrusion Ratio	311
Y.M. Hwang and M.T. Yang	
FE-Simulations of T-Shape Tube Hydroforming	317
Y.M. Hwang and Y.K. Lin	
Indirect Extrusion with Active Friction (ISA)	323
K.B. Müller	
Numerical Simulation of Sheet Metal Blanking Predicting the Shape of the Cut Edge	329
M. Rachik, J.M. Roelandt and A. Maillard	
Inverse Finite Element Analysis of S-Rail Forming with a Direct Mesh Mapping Method for Crash Analysis Considering Forming Effects	335
S.H. Kim and H. Huh	
A Rigid-Plastic Meshless Method for Forming Simulations	341
Y.M. Guo and K. Nakanishi	
A Numerical Study of Double Stage Extrusion of a Circular Bar	347
M. Gotoh, M. Yamashita and K. Wakasugi	
Deep Drawing of Nickel Foil and Stainless Steel Foil	353
Y. Marumo and H. Saiki	
Study of Asymmetrical Cold-and-Hot Rolling of Three-Layer Bounded Clad Sheet	359
G.Y. Tzou, M.N. Huang, C.J. Chen, Y.C. Chiu and M.H. Ian	
Finite Element Analysis for the Milli-Forming of Crystalline Materials with Damage	365
Y.S. Lee, Y.-. Kim and K.H. Na	
An Elasto-Plastic Finite Element Analysis of the Axisymmetrical Tube-Nosing Process with a Conical Tool	371
Y.M. Huang and Y.M. Huang	
Warm Forging of a Bevel Gear - On the Lubricating Characteristics of Lubricants	377
D.H. Kim, D.J. Jeong and B.M. Kim	
Analysis of Multi-Pass Wet Wire Drawing Process and Pass Redesign	383
M.A. Kim, S.K. Lee, H.H. Jo and B.M. Kim	
On Eccentric Spherical Forming of Metal Plate Using Underwater Shock Waves	389
H. Iyama, S. Nagano and S. Itoh	
Prediction of Forming Limits for Voided Anisotropic Sheets Using Strain Gradient Dependent Yield Criterion	395
Y.S. Kim, H.S. Son, S.H. Yang and S.R. Lee	
Research on 19MnCr5G Steel under Hot Metal Forming Conditions	401
W. Weroński, Z. Pater and A. Gontarz	
Some Aspects of New Forming Process of Screw Spike	407
W. Weroński, A. Gontarz and Z. Pater	
New Aspects of Orbital Forming Technology	413
S. Rusz and M. Greger	
A 3-D Finite Element Analysis of the Rolling of Thin Strip with Friction Variation	419
Z.Y. Jiang and A.K. Tieu	
FEM Simulation Study for Rapid Preforming of Axisymmetrical Forging by Differential Heating	425
M. Hua, S.Q. Lu, T.X. Yu and F.H. Osman (1)	
Modelling of Friction Variation in Slab Edging with a Finite Element Approach	431
A.K. Tieu and C. Lu	
A Novel Rolling-Annealing Cycle for Enhanced Deep Drawing Properties in IF Steels	437
L.K. Tung, M.Z. Quadir and B.J. Duggan	
Experimental Study of the Effects of a Change of Tool Geometry on Blanked Edges of Fine-Blanked Parts	443
Y.C. Leung, L.C. Chan and T.C. Lee	
Basic Research on Cold and Warm Forging of Microparts	449
U. Engel and E. Egerer	
Effect of Process Parameters on Tubular Hydroformability	457
B.J. Kim, D.I. Hyun, S.M. Oak, S.K. Choi and Y.H. Moon	
Workability in Rolling and Upsetting of Cast Chromium	463
Y. Harada, M. Ohmori, K. Mori and S. Maki	

Prediction of Tool-Chip Interface Friction and Chip-Groove Effects in Machining with Restricted Contact Grooved Tools Using the Universal Slip-Line Model	469
X. Wang and I.S. Jawahir	
Computational Fluid Dynamics (CFD) Simulation of Ultrahigh Velocity Abrasive Waterjet	477
H. Liu, J. Wang, R.J. Brown and N. Kelson	
Evaluation of Machinability under Various Cutting Conditions in High-Speed Machining Using Ball Nose-End Mills - Effects of Cutter Orientation and Cutting Environments	483
C.M. Lee, S.W. Kim, D.W. Lee, E.-. Ng and D.K. Aspinwall	
Investigation of Chip Formation Mechanism and Surface Integrity in High Speed Milling Titanium Alloy	489
M. Chen, G.L. Liu, F.H. Sun, X.G. Jian and R.W. Yuan	
Theoretical and Experimental Research on Generation Mechanism of Grinding Wheel Topography by Laser Dressing and 3D Laser Scanning	497
M. Chen, F.H. Sun, G.L. Liu, X.G. Jian and X.T. Li	
Studies of Adhesion and Roughness of Diamond Coated Drills and Influence on Cutting Performance	503
M. Chen, F.H. Sun, X.G. Jian, B. Hu and X.S. Liu	
CBN Quill Grinding for 2-Dimensional Curved Surface	509
Q.S. Yan and Z.Q. Zhang	
The Evolution of the Cube, Rotated Cube and Goss Recrystallization Textures in Rolled Copper and Cu-Mn Alloys	515
D.N. Lee, H.J. Shin and S.H. Hong	
Micro-Morphology Generation in In-Vessel and Twin-Roll Castings under Magnetic Excitation by the Cellular Automaton Approach	521
T. Tsuta, T. Iwamoto and B. Wang	
Observation of the Tensile Deformation Behavior of Polycrystalline Titanium with the Scanning Probe Microscope	529
T. Abe, Y. Li and N. Tada	
Orientation Change Measured by the EBSD Method and the Plastic Deformation of Grains in Polycrystalline Copper	535
T. Abe, R. Kondou, N. Tada and I. Shimizu	
Analysis of Plastic Deformation with Crystal Slips Using Rigid-Plastic FEM	541
T. Abe and N. Nagayama	
Experimental Research on Deformation of Ti-Ni SMA under Complex Loading Conditions	547
K. Hashimoto, M. Tokuda, T. Inaba, A. Shiode, P. Šittner and B. Bundara	
Experimental Research on Two-Way Shape Memory Effect of Cu-Based SMA Polycrystal	553
T. Inaba, M. Tokuda, S. Sugino, T. Warita, P. Šittner and B. Bundara	
Surface Roughening and Microscopic Inhomogeneous Deformation of Polycrystalline Metal during Plastic Torsion	559
I. Shimizu, T. Abe, N. Kaino and M. Kai	
Texture Evolution during Deep Drawing of Mo Sheet	567
K.K. Park, J.H. Cho, H.N. Han, H.C. Lee and K.H. Oh	
An Investigation into the Formation of Microbands and Shear Bands in IF Steel	573
Q.Z. Chen, K. Shen, G.J. Shen and B.J. Duggan	
Effects of Pressing Temperature and Initial Microstructure on the Equal Channel Angular Pressing of Ti-6Al-4V Alloy	579
Y.G. Ko, Y.H. Lee, W.S. Jung, D.H. Shin and C.S. Lee	
Criteria for Plastic Deformation and Crack Initiation in Monocrystalline Silicon	585
H. Tanaka, S. Shimada and N. Ikawa	
Molecular Dynamics Study of Interface Generated between Atomic Clusters	591
K. Saitoh	
Equivalent Continuum for Discrete Molecular Dynamic Systems	597
M. Zhou	
A Stress Criterion for the β-Sn Transformation in Silicon under Indentation and Uniaxial Compression	603
W.C.D. Cheong and L.C. Zhang	
Effect of Water on the Mechanical Response of Monocrystalline Silicon to Repeated Micro-Indentation	609
I. Zarudi, L.C. Zhang and M.V. Swain	

Atomistic Deformation of Silicon under Triaxial Stresses	615
K. Mylvaganam and L.C. Zhang	
Constitutive Modelling of Multi-Phase Transformation of Silicon under Nano-Scale Deformation	
T. Vodenitcharova, L.C. Zhang and T.X. Yu	621
Assessment of Geometrical Orientation of Martensitic Particles in TRIP Steel by Fourier and Wavelet Transformation Image Analysis	
T. Iwamoto and T. Tsuta	627
Finite Element Analysis of Transformation Behavior of an Fe-Based Shape Memory Alloy	
F. Nishimura	637
Microstructure Transformation, Precipitation and Mechanical Properties of Nb Micro-Alloyed Shipbuilding Steel Plate EH36 Subjected TMCP	
W.H. Sun, A.K. Tieu, Z.Y. Jiang and H. Li	643
Modeling of Phase Transformation in a Transversely Isotropic SMA Rod	
Z. Zhong, X.B. Yu, Q.P. Sun, T.X. Yu and H.C. Huang	649
The Role of Carbon in the Phase Stability of 3Y-TZP at Low Temperatures	
Z.B. Zhao, C. Liu and D.O. Northwood	655
Thermal Stability and Phase Transformation of the Hot-Rolled TRIP Steels Exposed to Coiling Temperatures of 350 to 500 C	
H.J. Jun, S.H. Park, S.D. Choi and C.G. Park	661
Deformation-Induced Martensitic Transformation under Various Deformation Modes	
H.C. Shin, T.K. Ha, W.J. Park and Y.W. Chang	667
Characterization of Micro-To Macroscopic Deformation Behavior of Amorphous Polymer	
Y. Tomita and M. Uchida	673
Fabrication of SiC_p/Al Composite Billets by Horizontal Continuous Casting and their Mechanical Properties	
C.G. Kang, S.W. Youn and P.K. Seo	679
Micro-Forming of PMMA for Optical Components	
K. Hanada, Y. Hashiura, R. Maeda, T. Sano and H. Negishi	685
In-Plane Elastic-Viscoplastic Behavior of Long Fiber-Reinforced Laminates: Analysis Based upon Homogenization Theory	
T. Matsuda, H. Tanaka and N. Ohno	691
Thixoforging Process for Development of Composites Cylinder Linear and their Mechanical Properties	
S.W. Youn, P.K. Seo and C.G. Kang	697
Finite Element Analysis of Forming Flow Stability in Thermoplastic Composite Sheet Forming	
H.R. Daghyani, M.T. Abadi and S. Fariborz	703
Plastic Limit Analysis of Defective Pipelines under Complex Loads	
B.Y. Xu, Y.H. Liu and B. Yang	709
Deformation Behavior of Nanocrystalline Zn-22wt%Al Alloy Using Thermomechanical Controlling Process	
T. Tanaka, K. Makii, A. Kushibe and K. Higashi	719
Rubbing Contact between Rotating Blade and Casing Plate, Part 1 – Experimental Study	
B. Wang, J. Zheng and G.X. Lu	725
A Tube under Transverse Loading – FEM and Experiment	
D.W. Shu	731
Collapse Analysis of Auto-Body Structures Considering the Effect of Fabrication	
K.P. Kim and H. Huh	737
Prediction of Hot Strength of Steels with Advanced Models	
L.X. Kong and P. Hodgson	743
Finite Element Model Satisfying Zero Volume Flow Rate Leaking from the Surface of Stream-Tube in 3-Dimensional Steady State Analyses	
S. Toyoshima and M. Gotoh	749
Mechanical Properties of Fine-Grained P/M Aluminum	
J. Ma, W.Y. Lee, W. Cheng and G.E.B. Tan	755
The Influence of Plasticity on the Local Buckling Behaviour of a Cylinder with Discrete Stringer Stiffeners Above Local Supports	
W. Vanlaere, J. Belis, P. Buffel, G. Lagae and R. Van Impe	761

Deformation Behaviour of a Cylinder under Simultaneous Compression and Torsion	767
X. Ma, M.R. Barnett and Y.H. Kim	
The Influence of Non-Dissipative Quantities in Kinematic Hardening Plasticity	773
M. Wallin, M. Ristinmaa and N.S. Ottosen	
Viscoplastic Deformation of Lead-Free Solder Alloy - Experiments and Simulations	779
K. Sasaki, A. Yanagimoto and H. Ishikawa	
Viscoplastic Stress Analysis of Shrinkage and Warping in Graded Layers during Sintering	785
K. Shinagawa and Y. Hirashima	
Influence of Plastic Deformation of the Heat Affected Zone on the Mechanical Behaviour of Welds in High Strength Steels	791
D.M. Rodrigues, L.F. Menezes, A. Loureiro and J.V. Fernandes	
FEM Analysis of Elasto-Plastic Deformation and Anisotropy in Two Neighbouring Holes in Sheet Metal	797
Y. Nakayama	
Life Assessment of Udimet 720Li Thin Diaphragm Disc Using a Viscoplastic Material Model	803
J.T. Yeom, N.K. Park and S.J. Williams	
Numerical Analysis of Residual Stresses Induced by Low Plasticity Burnishing	809
W. Zhuang and B. Wicks	
An Investigation of the Influence of Pre-Strain on Material Properties of Sheet Brass	815
K.P. Rao and E.V.R.K. Mohan	
Impact of Finish-Forging Temperature on Structure and Properties of Micro-Alloyed Steels	821
M. Greger and S. Rusz	
Thermo-Mechanical Finite Element Model of Shell Behavior in the Continuous Casting of Steel	827
C.S. Li and B.G. Thomas	
In Situ Deformation Behavior Study during Uniaxial Tension of Aluminium Alloys Using a High Resolution EBSD	835
J.H. Han, K.H. Oh and Y.H. Chung	
Modeling Anisotropic Behaviour for Steel Sheets Using Different Yield Criteria	841
T. Kuwabara, D.S. Comsa, D. Banabic and E. Iizuka	
Plastic Asymmetry and Anomaly of Iron Aluminides - An Internal Variable Approach	847
W.K. Bang, H.T. Lim, T.K. Ha and Y.W. Chang	
Multi-Axial Deformation Behavior and its Constitutive Equations for Superplastic Materials	853
M. Tokuda, T. Inaba, A. Kurakake, S. Ikushima, S. Makino and F.U. Enikeev	
Diffusion Bonding in Commercial Superplastic AZ31 Magnesium Alloy Sheets	857
H. Somekawa and K. Higashi	
Experimental Study of the Superplasticity of Mg Alloy	863
S. Ikushima, M. Tokuda, T. Inaba, A. Kurakake and F.U. Enikeev	
Cavitation of Superplastic AA5083 during Rapid Gas Forming	869
Y.H. Yu, S. Lee and B. Ou	
Fabrication of Low Temperature Superplastic AZ91 Mg Alloys Using Simple High-Ratio Extrusion Method	875
H.K. Lin and J.C. Huang	
Phase Evolution and Mechanical Behaviour of Super α_2-Ti₃Al Base Alloys during Superplastic Deformation at Lower Temperatures of 700-900°C	881
K.L. Yang, J.C. Huang and Y.N. Wang
