

Table of Contents

Preface

Calcium Phosphate Bioceramics: Past, Present and Future R.Z. LeGeros and J.P. LeGeros	3
Mechanism of Apatite Formation on Bioactive Tantalum Metal in Simulated Body Fluid H.M. Kim, H. Kaneko, T. Kokubo, T. Miyazaki and T. Nakamura	11
Comparative Study of Apatite Formation on Natural and Synthetic Polyamide in a Mimicking Solution to Body Fluid H. Inada, C. Ohtsuki, T. Miyazaki, S. Ogata and M. Tanihara	15
Investigation into the Formation of Bone-Like Apatite on Pretreated Metals Using Electrochemical Impedance Spectroscopy M. Wang and C.X. Wang	19
Porous Bioceramics Produced with Calcium Phosphate Nanoparticles J.S.V. Albuquerque, J.V.F. Neto, J.I.L.A. Júnior, D.O.d. Lima, R.E.F.Q. Nogueira and M.H. Prado da Silva	23
Bonelike Apatite Formation on Calcium-Containing Silica and Titania Gels in Simulated Body Fluid M. Wei and T. Kokubo	27
Apatite Formation on Silk Fiber in a Solution Mimicking Body Fluid A. Takeuchi, C. Ohtsuki, T. Miyazaki, S. Ogata, M. Tanihara, H. Tanaka, Y. Furutani and H. Kinoshita	31
Synthesis of Biocompatible Calcium Phosphate Powders by Using an Eggshell S.J. Lee and S.H. Oh	35
Porous Bioactive Composites from Marine Origin Based on Chitosan and Hydroxyapatite Particles P.B. Malafaya and R.L. Reis	39
Hydrothermal Conversion and Sol-Gel Coating of Red Sea Coral J.K. Innes, R. Vago and B. Ben-Nissan	43
A Novel Biomimetic Approach for the Manufacture of Hydroxyapatite Fibres E.C. Kolos, A.J. Ruys and G.J. Roger	47
Microwave Synthesis of Bioresorbable Carbonated Hydroxyapatite Using Goniopora R. Murugan, K. Panduranga Rao and T.S. Sampath Kumar	51
Biomimetic Apatite Deposition on Titanium Substrates Treated with Low Concentrations H₂O₂ Solutions K. Shibata, K. Tsuru, S. Hayakawa and A. Osaka	55
Apatite Formation on Polyamide Films Containing Sulfonic Groups by a Biomimetic Process T. Kawai, T. Miyazaki, C. Ohtsuki, M. Tanihara, J. Nakao, Y. Sakaguchi and S. Konagaya	59
Control of Dissolution of Porous α-TCP by Coating with Hydroxypropylcellulose T. Miyazaki, C. Ohtsuki, H. Iwasaki and M. Tanihara	63
Development of a Bioactive Alumina-based Composite by Electrophoretic Deposition N. Ozawa, Y. Ideta, K. Shimizu and T. Yao	67
Apatite Formation on Polymers Coated with Titania Synthesized from an Aqueous Solution N. Ozawa, Y. Ideta, T. Yao and T. Kokubo	71
Biomimetic Growth of Calcium Phosphate over ATP Coupled PMMA Films Y. Yokogawa, H.K. Varma and K. Sreenivasan	75
The Effect of Organisms on Formation of Bone-Like Apatite on Porous Calcium Phosphate in Simulated Body Fluid C.L. Deng, Y.R. Duan, J.Y. Chen and X.D. Zhang	81
Biomimetic Crystallization of Calcium Phosphates under Constant Conditions from the Revised SBF E.I. Dorozhkina, M. Eppe and S.V. Dorozhkin	85
Fabrication of Porous Titanium and Biomimetic Deposition of Calcium Phosphate Q.Y. Zhang, X. Liu, J. Chen and X. Zhang	89
Control of Bioactivity for Silica Gel by Simple Surface Modification with Calcium Ion S.B. Cho, S.B. Kim, K.J. Cho, Y.J. Kim, T.H. Lee and Y. Hwang	93

Effects of the Incorporation of Proteins and Active Enzymes on Biomimetic Calcium-Phosphate Coatings I.B. Leonor, H.S. Azevedo, C.M. Alves and R.L. Reis	97
Biomimetic Coating of Starch Based Polymeric Foams Produced by a Calcium Silicate Based Methodology A.L. Oliveira, M.E. Gomes, P.B. Malafaya and R.L. Reis	101
Deactivation of Active Oxygen Species due to Metals and their Blood Compatibility S. Takashima, T. Yamamoto, K. Tsuru, S. Hayakawa and A. Osaka	105
Tailoring the Bioactivity of Natural Origin Inorganic – Polymeric Based Systems A.L. Oliveira, I.B. Leonor, P.B. Malafaya, C.M. Alves, H.S. Azevedo and R.L. Reis	111
Biomimetic Hybrids - An Advancement for Biomaterials L. Sharma and G. Pezzotti	143
Toughening of Hydroxyapatite through Interpenetrating Organic/Inorganic Microstructure S.H. Li, J.R. de Wijn, P. Layrolle and K. de Groot	147
Bioceramics Derived from Polysiloxane – Hydroxyapatite B.S. Jun, H.J. Park, D.J. Kim, H.S. Ryu, J.H. Seo, K.S. Hong and H. Kim	151
Flexible Poly(Tetramethylene Oxide) (PTMO)-TiO₂ Hybrid with Apatite-Forming Ability M. Kamitakahara, R. Shineha, K. Masakazu, N. Miyata, T. Kokubo and T. Nakamura	155
In Vitro Bioactivity of Sol-Gel-Derived Silica Fiber and P(L/D,L) LA Composite T. Peltola, B.H. Choi, A. Haltia, M. Vehviläinen, S. Areva, M. Jokinen and A. Yli-Urpo	159
Preparation of Bioactive Polylactic Acid Composites Containing Calcium Carbonates H. Maeda, T. Kasuga, M. Nogami, Y. Hibino, K.I. Hata, M. Ueda and Y. Ota	163
Preparation of Porous Composites Consisting of Apatite and Poly(D,L-Lactide) F. Nagata, T. Miyajima and Y. Yokogawa	167
Effect of Calcium Salt Content in the Poly(ε-Caprolactone)/Silica Hybrid on the Nucleation and Growth Behavior of Apatite Layer S.H. Rhee	171
Effect of Heat Treatment on the Bioactivity and Mechanical Properties of a Poly(ε-Caprolactone)/Silica Hybrid Containing Calcium Salt S.H. Rhee	175
Effect of Molecular Weight of Poly(ε-Caprolactone) on the Bioactivity of a Poly(ε-Caprolactone)/Silica Hybrid Containing Calcium Salt S.H. Rhee	179
Effect of Silica Content in PMMA/Silica Hybrids Containing Calcium Salt on Calcium Phosphate Formation and Cell Responses S.H. Rhee, M. Hwang and J.Y. Choi	183
Effect of Silica Content on the Bioactivity and Mechanical Properties of Poly(ε-Caprolactone)/Silica Hybrid containing Calcium Salt S.H. Rhee	187
Oriented Needle-Like Apatite and Biodegradable Copolymer Composite Membranes T. Watanabe, S. Ban, T. Ito, S. Tsuruta, T. Kawai and H. Nakamura	191
In Vitro Study of Apatite Precipitation on Poly(2-Hydroxyethyl Methacrylate)-Silica Hybrids with Controlled Surface Areas R.O.R. Costa, M. Pereira, F.S. Lameiras and W.L. Vasconcelos	195
Dissolution Characteristics of Bioactive Glasses R.S. Pryce and L.L. Hench	201
Characterisation of a Novel Nitric Oxide Releasing Bioactive Glass R.S. Pryce and L.L. Hench	205
Effect of Porosity on the Mechanical Properties of Bioactive Foam Scaffolds J.R. Jones and L.L. Hench	209
Dissolution of Bioactive Gel-Glass Powders in the SiO₂-CaO System P. Saravanapavan and L.L. Hench	213
Structural Interpretation of the In Vitro Reactivity of SiO₂-MgO-Na₂O Glasses S. Agathopoulos, M.C. Ferro, J.Y. Xu, J.M. Oliveira, P.A.A.P. Marques, R.N. Correia and M.H.F.V. Fernandes	217
Creation of Bioactive Glass Coating on Titanium by Local Laser Irradiation; Part 1: Optimization of the Processing Parameters N. Moritz, E. Vedel, H.O. Ylänen, M. Jokinen, M. Hupa and A. Yli-Urpo	221

Creation of Bioactive Glass Coating on Titanium by Local Laser Irradiation; Part 2: Effect of the Irradiation on the Bioactivity of the Glass	
E. Vedel, N. Moritz, H.O. Ylänen, M. Jokinen, A. Yli-Urpo and M. Hupa	225
Preparation of Antibacterial Silver-Doped Silica Glass Microspheres by Sol-Gel Method	
K. Masakazu, S. Toda, T. Kokubo and N. Masuda	229
Effect of Composition and Texture on Controlled Rate Release of an Antibacterial Agent from Bioactive Gel-Glasses	
P. Saravanapavan, M.H. Patel and L.L. Hench	233
Porous Bioactive 3-D Glass Fiber Scaffolds for Tissue Engineering Applications Manufactured by Sintering Technique	
E. Pirhonen, L. Moimas and J. Haapanen	237
Low Melting Temperature Machinable Glass Ceramics	
M. Wei, Y. Zhang, X. Sun, L. Zhou and K. Wang	241
Effect of Particle Size on the Concentration and Rate of Ag⁺ Release from Antimicrobial SiO₂-CaO-P₂O₅-Ag₂O Gel-Glasses	
P. Saravanapavan, M.H. Patel and L.L. Hench	245
Effect of Ionic Variables (SiO₂, Ca²⁺, PO₄³⁻) on Biomimetic Mineralization	
A. Forsback, J. Korventausta, M. Jokinen and J.I. Salonen	249
Treatment of Osteomyelitis with Antibiotic-Soaked Porous A-W Glass Ceramic Blocks	
K. Kawanabe, J. Tamura, M. Shimizu, H. Iida, H. Hayashi and T. Nakamura	253
Effect of the Type of Surfactant on Bioactive Glasses Foam Formation	
M.B. Coelho, I.R. Soares, H.S. Mansur and M. Pereira	257
Characterization of CaO-SiO₂-B₂O₃ Glass-Ceramics and Effect of Composition on Bioactivity	
H.S. Ryu, J.H. Seo, H. Kim, K.S. Hong, H.J. Park, D.J. Kim, J.H. Lee, D.H. Lee, B. Chang and C.K. Lee	261
Calcium Phosphate Invert Glasses and Glass-Ceramics with Apatite-Forming Ability	
T. Kasuga, T. Fujimoto, Y. Hosoi and M. Nogami	265
Quantitative Analysis on the Absorption of Apatite-Wollastonite Glass-Ceramics In Vivo	
H. Teramoto, A. Kawai, S. Sugihara, A. Yoshida and H. Inoue	269
Fabrication of CaO-SiO₂-B₂O₃ Porous Glass-Ceramics by Self-Foaming Method	
J.H. Seo, H.S. Ryu, K.S. Hong, H. Kim, D.J. Kim, J.H. Lee, D.H. Lee and C.K. Lee	273
Novel Bioactive Coatings for Biomedical Applications	
J. Bibby, P.M. Mummary, N. Bubbs and D.J. Wood	279
Characterization of Plasma Sprayed Bioglass Coatings on Titanium	
G. Göller, F.N. Oktar, T. Yazıcı, S. Gurmen and E.S. Kayali	283
The Deposition of Calcium Phosphates within Polyelectrolyte Multilayer Films	
C. Gergely, P. Bar-Yosef, R. Govrin-Lippman, F. Cuisinier and H. Füredi-Milhofer	287
Variation in Biological Properties of Thin Calcium Phosphate Films Formed by e-Beam Evaporation	
I.S. Lee, J.C. Park, S.R. Kim, W.S. Seo, S.B. Cho and Y.C. Jung	291
Thin Film Hydroxyapatite as a Model Dental Surface	
M. Turkington, A. Joiner and B.J. Meenan	295
Bond Strength and Microstructure of Radio-Frequency Thermal Plasma Sprayed Hydroxyapatite / Titanium Composite Coatings	
M. Inagaki, Y. Yokogawa and T. Kameyama	299
Synthesis and Properties of Bioactive Ca-P-Ti Thin Films Synthesized by Reactive Plasma Co-Sputtering Deposition	
J.D. Long, S. Xu, H.Y. Foo and C.H. Diong	303
Reactive Species in RF Plasma Sputtering Deposition of Nanocrystalline Calcium Phosphate Bio-Active Films	
S. Xu, J.D. Long, K.N. Ostrikov and H.Y. Foo	307
Effect of Particle Size on Microstructure of High Velocity Oxy-Fuel (HVOF) Sprayed Hydroxyapatite Coatings	
K.A. Khor, H.L. Li and P. Cheang	311
Effects of Bond-Coatings on Plasma Sprayed Calcium Phosphate Coatings	
F.N. Oktar, G. Göller, M. Yetmez and D. Toykan	315

Comparative Study of Bioceramic Coatings in Static and in Simulated Physiological Conditions	
Q.Y. Zhang, Y. Cao, J.Y. Chen, J.M. Feng and X.D. Zhang	319
Fabrication of TiO₂-Apatite Composite Coating on Titanium by a Chemical Method	
B. Feng, J. Weng, J.H. Zhao, L. He, S. Qi and X. Zhang	323
A Radiological Follow-Up Study of Plasma Sprayed Fluorapatite (FA) Coatings	
F.N. Oktar, S. Ozsoy and L.S. Özyeğin	327
Revolutionary New Bone Cement Technique by Interposing HA Granules Between Bone and Bone Cement	
H. Oonishi, H. Fujita, S. Itoh, S.C. Kim, H. Dohkawa and K. Oomamiuda	333
Bone Cements Based on Tricalcium Silicate	
R.J. Chung, T.S. Chin, C.W. Huang, P. Lin, T.J. Hsu and F.I. Chou	337
Histological Study of Interface Bioactive Bone Cement (IBBC) Retrieved at 14 Years after THA	
H. Fujita, H. Oonishi, S. Itoh, S.C. Kim, H. Dohkawa and K. Oomamiuda	341
Pulpal and Periapical Tissue Responses to a Calcium Phosphate Cement Containing Barium Sulphate	
M. Yoshikawa, T. Toda and Y. Mandai	345
Calcium Phosphate Accelerated Setting Time of o-Ethoxybenzoic Acide (EBA) Temporary Cement	
L.S. Özyeğin, F.N. Oktar and N. Heybeli	349
Study of the Manipulation Energy on Fluoride Release by Dental Bioceramic	
H.S. Mansur, J.F.B.G. Giovannini, W.C. Jansen and M.M. Avelar	353
TEM/SEM Morphological Analysis of Dental Tissue-Resin Bonding System in Dry and Wet Conditions	
R.L. Mourão, H.S. Mansur, M.H. Santos, F.R. Tay and L.D. Lanza	357
Bone-Bonding Behaviour of PMMA Bone Cement Modified with Alkoxysilane and Calcium Acetate	
C. Ohtsuki, T. Miyazaki, A. Sugino, M. Tanihara, A. Mori and K. Kuramoto	361
Alumina Powder / PMMA Composite Cements: An Evaluation of Osteoconductivity	
S. Shinzato, T. Nakamura and T. Kokubo	365
Effects of Spherical Tetracalcium Phosphate on Injectability and Basic Properties of Apatitic Cement	
I. Kunio	369
Effects of Neutral Sodium Hydrogen Phosphate on Setting Property and Hemostatic Ability of Hydroxyapatite Putty as a Local Hemostatic Agent for Bone	
Y. Miyamoto, Y. Momota, M. Takechi, T. Yuasa, S. Tatehara, M. Nagayama and I. Kunio	373
Physical Properties Self-Setting Bone Cement with Particle Size Distribution of Dicalcium Phosphate Dihydrate	
J.K. Lee, I.S. Hwang and S.H. Cho	377
Bone Regeneration Therapy with Marrow Mesenchymal Cells in 10 Cases: Short Term Results	
T. Yoshikawa, T. Ohmura, Y. Sen, J. Iida, Y. Takakura, I. Nonaka and K. Ichijima	383
Osteo-Integration of Plasma-Spray, Biomimetic Octacalcium Phosphate and Carbonate-Apatite Coatings on Titanium Implants	
P. Habibovic, C.M. van der Valk, K. de Groot and P. Layrolle	387
Investigation of Bone Formation using Non-Crystalline Calcium Phosphate Glass in Beagle Dogs	
Y.K. Lee, H.S. Kim, K.S. Cho, K.N. Kim and S.H. Choi	391
Bone Formation Induced by Several Carbonate- and Fluoride-Containing Apatite Implanted in Dog Mandible	
T. Sakae, A. Ookubo, R.Z. LeGeros, R. Shimogoryou, Y. Sato, S. Lin, H. Yamamoto and Y. Kozawa	395
Porous Beta-Calcium Pyrophosphate as a Bone Graft Substitute in a Canine Bone Defect Model	
J.H. Lee, D.H. Lee, H.S. Ryu, B. Chang, K.S. Hong and C.K. Lee	399
The Effect of Aging an Injectable Bone Graft Substitute in Simulated Body Fluid	
M. Nilsson, E. Fernández, J.A. Planell, I. McCarthy and L. Lidgren	403

Biodegradable Coralline Hydroxyapatite Composite-Gel Using Natural Alginate R. Murugan and K. Panduranga Rao	407
Silica/Calcium Phosphate Sol-Gel Derived Bone Grafting Material and Bone Remodelling. An eight Months In Vivo Study T. Gerber, T. Traykova, K. Henkel, V. Bienengraber, M. Witt and J. Koewitz	411
Titanium Dioxide/Ultra High Molecular Weight Polyethylene Composite for Bone-Repairing Applications: Preparation and Biocompatibility M. Hashimoto, H. Takadama, M. Mizuno, Y. Yasutomi and T. Kokubo	415
In Vivo Evaluation of Macroporous Calcium Metaphosphate Ceramic as a Bone Substitute H.I. Shin, H.M. Cho, H.M. Ryoo, J.H. Chung, S.H. Oh and S.Y. Kim	419
Bioactive Composite Chitosan Membranes to Be Used in Bone Regeneration Applications R.M.P.d. Silva, P.B. Malafaya, J.F. Mano and R.L. Reis	423
The Use of New Zealand Animal Bone as Bioceramic Bone Xenografts: Concept to Clinical Study M.R. Mucalo, G.S. Johnson, A. Worth, J.G. Horne, H.M. Burbridge, W.J. Bruce and I.A. Anderson	427
Effects of Substrate Morphology on Osteoblastic Response to Thin Film Calcium Phosphate Coatings F. Horgan and B.J. Meenan	433
Surface Properties of HAP Particles Obtained by Hydrothermal Decomposition of Urea and Calcium-EDTA Chelates D. Janačković, I. Jankovic-Castvan, R. Petrović, L. Kostic-Gvozdenovic, S.K. Milonjić and D.P. Uskokovic	437
High Osteoconductive Surface for Bioactive Glass by Electrical Polarization A. Obata, S. Nakamura and K. Yamashita	441
Crystal Growth Modification by Surface Charges on Ceramic Electret in Simulated Body Fluid S. Nakamura, M. Ueshima, T. Kobayashi and K. Yamashita	445
Titanium Oxide Layers Obtained by Different Methods: Effect on Apatite Deposition R. Rohanizadeh, M. Al-Sadeq and R.Ž. LeGeros	449
The Influence of Polyelectrolytes on the Formation and Phase Transformation of Amorphous Calcium Phosphate H. Füredi-Milhofer, P. Bar-Yosef, R. Govrin-Lippman and N. Garti	453
Surface Structural Changes of Sintered Hydroxyapatite in Terms of Surface Charge T. Himeno, H.M. Kim, H. Kaneko, K. Masakazu, T. Kokubo and T. Nakamura	457
Chemical Modification of Titanium Surface: Effect on Apatite Deposition R. Rohanizadeh, W.A. Al-Fraih, M. Harsono and R.Z. LeGeros	461
Calcium Phosphate Formation on Chemically Modified Titanium S. Areva and M. Linden	465
Determination of the Internal Surface of Spongiosa-Like Ceramic Scaffolds using Light Microscopy and X-Ray Refraction Technique G. Berger, U. Mücke and K. Harbich	469
Biphasic Calcium Phosphate (BCP) Bioceramics: Preparation and Properties S.J. Lin, R.Z. LeGeros, R. Rohanizadeh, D.Q. Mijares and J.P. LeGeros	473
Synthesis and Sintering of Carbonated Apatites J.P. Lafon, E. Champion and D. Bernache-Assollant	477
Morphological Stability of Plate-Like Hydroxyapatite A. Milev, G.S.K. Kannangara and B. Ben-Nissan	481
Evaluation of the Biocompatibility of Nano-Sized Carbonate-Substituted Hydroxyapatite after Hydrothermal Treatment J. Huang, R.A. Brooks, S. Best and W. Bonfield	485
Synthesis and Characterization of Beta Tricalcium Phosphate A. Destainville, A. Rolo, E. Champion and D. Bernache-Assollant	489
Effects of Additives on Pore Structures in Freeze Dried Calcium Phosphate Granules S.H. Oh, S.W. Kim, M.H. Ahn, C.K. You, H.I. Shin and S.Y. Kim	493
The Characteristics and Properties of Hydroxyapatite Prepared by Spark Plasma Sintering (SPS) K.A. Khor, Y.W. Gu, P. Cheang and F.Y.C. Boey	497

Synthesis and Characterization of Ti-Substituted Hydroxyapatite S.R. Kim, Y.H. Kim, D.H. Riu, S.J. Jung and Y.J. Lee	501
Ultrastructural Characterisation of Hydroxyapatite and Silicon-Substituted Hydroxyapatite A.E. Porter, S. Best and W. Bonfield	505
High Resolution Transmission Electron Microscopy Investigation of Single Crystal Apatite Fibres Synthesized by using a Homogeneous Precipitation Method M. Aizawa, A.E. Porter, S. Best and W. Bonfield	509
Control of Crystal Orientation of Hydroxyapatite by using a High Magnetic Field K. Inoue, K. Sassa, Y. Yokogawa, Y. Sakka, M. Okido and S. Asai	513
Synthesis and Characterization of c-Axis Oriented Apatite Aggregates K. Ohta, M. Kikuchi, M. Tanaka and H. Eda	517
Novel Inorganic Materials for Biomedical Applications T. Kokubo	523
Crystallization of a Bone-Like Apatite onto Cholesterol from Aqueous Solutions E.I. Dorozhkina, M. Epple and S.V. Dorozhkin	529
Low Temperature Deposition of Bioactive Crystalline Titania Films: Effects of Tantalum J.M. Wu, S. Hayakawa, K. Tsuru and A. Osaka	533
Low Temperature Synthesis of Bioactive TiO₂ Thin Film by Two-Step Treatment F. Xiao, K. Tsuru, S. Hayakawa and A. Osaka	537
Accurate Geometric Characterization of Macroporous Scaffold of Tissue Engineering S.H. Li, J.R. de Wijn, P. Layrolle and K. de Groot	541
Improvement of Porous Titanium with Thicker Struts J.P. Li, S.H. Li, K. de Groot and P. Layrolle	547
Preparation and Evaluation of Dense Hydroxyapatite by PECS Method A. Nakahira, M. Tamai, K. Eguchi, S. Nakamura and K. Yamashita	551
Synthesis of Hydroxyapatite and Tricalcium Phosphate Nanoparticles – Preliminary Studies C.M. Manuel, M.P. Ferraz and F.J. Monteiro	555
Synthesis of New Biocompatible Apatite-Type Rare-Earth Silicates T. Kizuki, M. Ohgaki, S. Nakamura, K. Hashimoto, Y. Toda and K. Yamashita	559
Hydroxyapatite Coated Porous Alumina as a New Orbital Implant C.K. You, S.H. Oh, J.W. Kim, T.H. Choi, S.Y. Lee and S.Y. Kim	563
Fibrillogenesis of Hydroxyapatite/Collagen Self-Organized Composites M. Kikuchi, S. Itoh, H.N. Matsumoto, Y. Koyama, K. Takakuda, K. Shinomiya and M. Tanaka	567
Joining Hydroxyapatite Ceramics and Titanium Alloys by Hydrothermal Method T. Onoki, K. Hosoi and T. Hashida	571
Study of the Release Kinetics on some Anticancer Substances from Porous Ceramic Capsule A. Ravaglioli, A. Krajewski, M. Mazzocchi, E. Strocchi and C.M. Camaggi	575
Dosimetric Analysis and Characterisation of Radioactive Seeds Produced by the Sol-Gel Method W.S. Roberto, M. Pereira and T.P.R. Campos	579
Effect of Fabrication Processes on the Antimicrobial Properties of Silver Doped Nano-Sized HAp K.S. Oh, K.J. Kim, Y.K. Jeong and Y.H. Choa	583
Encapsulation of Hydroxyapatite Particles with Fluorapatite by a Multistep Procedure L.M. Rodríguez-Lorenzo and K.A. Gross	587
Hydroxyapatite -Zirconia Functionally Graded Bioceramics Prepared by Hot Isostatic Pressing T. Wei, A.J. Ruys and B. Milthorpe	591
Highly Interconnected and Functionally Graded Porous Bioceramics X. Miao, Y. Hu, J. Liu, B. Tio, P. Cheang and K.A. Khor	595
Adsorption on RF-Sputtered CaP Coatings in SBFs E. van der Wal, A.W. Denier van der Gon, S.J. Oldenburg, J.G.C. Wolke, J.A. Jansen and A.M. Vredenberg	599
Biocompatibility of Hydroxyapatite Films Formed on Ti Metal by a Simple Urea and Urease Treatment J. Nozaki, M. Aizawa, H. Suemasu, H. Uchida, K. Itatani, A. Nozue, I. Okada, M. Matsumoto, H. Matsumoto and Y. Toyama	603

Long-Term Stable Biomaterials Based on Apatite and Calcium Zirconium Orthophosphate G. Berger and U. Ploska	607
Micro-CT Analysis of New Bone Formation Around Implant with Electrochemically Deposited Apatite S. Ban, N. Arimoto, S. Tsuruta, H. Arikawa, T. Kanie and K. Fujii	611
Quantitative Analysis of Bone Formation in the Composites of Cultured Marrow Cells and Hydroxyapatite by X-Ray Computed Tomography Y. Tohma, H. Ohgushi, Y. Dohi, H. Shimaoka, Y. Ikeda, Y. Mizuta and Y. Takakura	615
The Improvement of Titanium Reinforced Hydroxyapatite for Biomedical Applications G. Göller, F.N. Oktar, D. Toykan and E.S. Kayali	619
Traumatological and Ballistic Aspects of Alumina Ceramics M. Vural, M.Z. Erim, C. Bindal, S. Zeytin and A.H. Ucisik	623
The Tissue Response to a Novel Calcium Zirconium Phosphate Ceramics U. Gross, C. Müller-Mai, G. Berger and U. Ploska	629
The Effect of Bioceramic Surface Chemistry on Osteogenic Cell and Healing Bone C.R. Howlett	633
Gene Expression and Bone Induction Regulated by Bioceramic Substratum M.E. Thomas, W. Richter, T. Matsaba, N. Ramoshebi, J. Teare, L. Renton and U. Ripamonti	639
Molecular Biologic Detections of Cell Activation Related Proteins on Polarized Hydroxyapatite M. Nakamura, Y. Sekijima, T. Kobayashi, S. Nakamura and K. Yamashita	643
Development and Biological Evaluation of Apatite Fibre Scaffolds with Large Pore Size and High Porosity for Bone Regeneration M. Aizawa, H. Shinoda, H. Uchida, K. Itatani, I. Okada, M. Matsumoto, H. Morisue, H. Matsumoto and Y. Toyama	647
Marrow Mesenchymal Stem Cells Cultured on Alumina Ceramics (From Basic Science to Clinical Applications) H. Ohgushi, H. Machida, M. Ikeuchi, T. Tateishi, Y. Tohma, Y. Tanaka and Y. Takakura	651
Osteogenic Potential of Cultured Bone/Ceramic Construct: A Comparison with that of Marrow Mesenchymal Cells/Ceramic Composites J. Iida, T. Yoshikawa, K. Ichijima and Y. Takakura	655
The Efficiency of FK 506 in In Vitro Bone Formation by Human Bone Marrow Cells N. Okumura, T. Yoshikawa, J. Iida, K. Ichijima and Y. Takakura	659
The Use of Mesenchymalpluripotent Cells with Porous Ceramics in the Treatment of Bony Defects B. Niechoda, M. Gianoutsos, Y.N. Yu and W.R. Walsh	663
Introduction of Ectopic Bone Formation by BMP-2 Incorporated Biomimetically into Calcium Phosphate Coatings of Titanium-Alloy Implants Y. Liu, E.B. Hunziker, K. de Groot and P. Layrolle	667
Cell Attachment and Proliferation on Hydroxyapatite and Ion Substituted Hydroxyapatites M. Wei, D. Vellinga, D. Leavesley, J.H. Evans-Freeman and Z. Upton	671
Interactions at the Surface of Oxide Bioceramics with Biological Liquids and Blood Cells S. Agathopoulos, A.J. Calado, J.Y. Xu, M.C. Ferro, M.H.F.V. Fernandes, M. Nedeia, P. Nikolopoulos and R.N. Correia	675
The Functional Expression of Osteoblasts Grown on Rapidly Resorbable Calcium Phosphates C. Knabe, C.R. Howlett, B. Markovic, G. Berger, R. Gildenhaar and H. Zreiqat	679
Response to Osteoblastic Cells of Bioactive Organic-Inorganic Hybrid Y. Aburatani, T. Uchida, Y. Shirosaki, K. Tsuru, S. Hayakawa and A. Osaka	683
Cytocompatibility on Silicone Modified with Organoalkoxysilane due to Emulsion Polymerization Y. Shirosaki, K. Tsuru, S. Hayakawa, A. Osaka and S. Takashima	687
The Early Osteogenesis Induction of Bone-Like Apatite after Implantation into the Muscle of Rats Y.R. Duan, M. Deng, Y. Li, J.Y. Chen and X.D. Zhang	691
Fluoride-Substituted Apatites Support Proliferation and Expression of Human Osteoblast Phenotype In Vitro M. Grzanna, R.Z. LeGeros, A. Polotsky, S.J. Lin, D.S. Hungerford and C. Frondoza	695

Effect of Prenucleation of RF-Sputtered CaP Coatings on In Vitro Rat Bone Marrow Cell Behaviour	
E. van der Wal, J.G.C. Wolke, J.J. Jansen and A.M. Vredenberg	699
Cytological and Biochemical Evaluation of Osteoblast in Contact with Ionic Products of Bioactive Ceramics	
P. Valério, A. Goes, M. Pereira and M.F. Leite	703
Surface Modification of Bioceramics Affect Osteoblastic Cells Response	
H. Zreiqat, C.R. Howlett, A. Zannettino, P. Evans, C. Knabe, G. Schulze-Tanzil and G.M. Shakibaei	707
Inductive Contact and Adherence Manipulation of Osteoblast-Like Cell on Polarized Hydroxyapatite Ceramics	
M. Ohgaki, S. Nakamura and K. Yamashita	711
Quantitative Monitoring of In Vitro Mineralization Process using Fluorescent Dyes	
M. Hirose, N. Kotobuki, H. Machida, E. Uchimura and H. Ohgushi	715
The Effect of 58S Bioactive Sol-Gel Derived Foams on the Growth of Murine Lung Epithelial Cells	
A. Tan, H.M. Romanska, R. Lenza, J.R. Jones, L.L. Hench, J.M. Polak and A.E. Bishop	719
Biocompatibility Study of Biodegradable Starch-Hydroxylapatite Particulates for Bone / Dentistry Fillers	
C.M. Alves, P.B. Malafaya, F. Stappers and R.L. Reis	725
Flowcytometric Analysis of Human Osteoblastic Cells Expressing Bone Specific Alkaline Phosphatase	
N. Kotobuki, M. Hirose, H. Funaoka and H. Ohgushi	729
Needs of Bioceramics to Longevity of Total Joint Arthroplasty	
H. Oonishi, I.C. Clarke, V. Good, H. Amino, M. Ueno, S. Masuda, K. Oomamiuda, H. Ishimaru, M. Yamamoto and E. Tsuji	735
Clinical and Tribological Perspectives of Wear in Alumina-Alumina THR	
I.C. Clarke	755
Novel Zirconia / Alumina Composites for TJR	
T. Nakamura	765
Long Term Data Concerning the Use of Alumina on Alumina Bearings in Total Hip Replacements	
L. Sedel, M. Hamadouche, P. Bizot and R. Nizard	769
Enhanced Fixation of Uncemented Knee Replacement with Hydroxyapatite	
M. Cross, G.J. Roger, M. Holt, N. Bradbury, P. Dixon and E. Parish	773
Phase Transformation and Residual Stresses in Retrieved Zirconia Ball Implant	
I.C. Clarke, G. Pezzotti, S. Sakakura and N. Sugano	777
Bio-Lubrication Phenomena affect Residual Stresses and Phases of Zirconia Implants	
I.C. Clarke, G. Pezzotti, S. Sakakura and B. Ben-Nissan	781
The Color of Bioceramics	
G. Willmann	785
Chemically Textured and Oxidized Zirconium Surfaces for Implant Fixation	
D. Heuer, A. Harrison, H. Gupta and G. Hunter	789
Ceramic on Ceramic Bearings in Total Hip Arthroplasty	
J.M. Buchanan	793
Retrieved Ceramic Total Knee Prosthesis in Clinical Use for 23 Years	
H. Oonishi, S.C. Kim, I.C. Clarke, T. Asano, B. Sonny Bal, M. Kyomoto and S. Masuda	797
Comparison of the Wear Properties of Polyethylene Plate in Total Knee Prostheses (TKP) using Different Femoral Component Materials	
M. Ueno, K. Ikeuchi, T. Nakamura and M. Akagi	801
Alumina Ceramic Talar Body Prosthesis for Idiopathic Aseptic Necrosis of the Talus	
Y. Tanaka, Y. Takakura, K. Kadono, A. Taniguchi, K. Hayashi, J. Iida, K.I. Sugimoto, Y. Tohma and H. Ohgushi	805
Investigation of the Wear Properties of Ceramic Total Hip Prostheses Made of Alumina and Zirconia Combination: A Hip Simulator Study	
M. Ueno and K. Ikeuchi	809
Retrieval of Ceramic Wear Couples in Total Hip Arthroplasty	
G. Willmann, N. Schikora and R.P. Pitto	813

Radiostereanalysis of Press-Fit Cups with Alumina Liner. A Randomized Clinical Trial R.P. Pitto, N. Schikora, G. Willmann, B. Graef and R. Schmidt	817
Clinical and Laboratory Wear Studies of Zirconia-on-UHMWPE Combination in Cementless THA T. Nakamura, K. Tanaka, J. Tamura, K. Kawanabe, Y. Takigawa, N. Sugano, Y. Saegusa, Y. Takatori, S. Kondo, K. Ninomiya, N. Mashima and T. Matsushita	823
Preliminary Investigation of Al-Doped Zirconia in Water for THR's D.D. Green, P.A. Williams, G. Pezzotti and I.C. Clarke	827
Low Temperature Stability of Zirconia/Alumina Hip Joint Heads D.J. Kim, D.Y. Lee and J.S. Han	831
Water-Lubrication Effects on Zirconia Debris Production in Hip-Joint Simulators P.A. Williams, I.C. Clarke, G. Pezzotti, D.D. Green and B. Ben-Nissan	835
Unexpected Subluxation Detected after Cemented Alumina-on-Alumina THA H. Ohashi, Y. Kadoya, A. Kobayashi, K. Inui and K. Takaoka	839
Computer Assisted Orthopaedic Surgery in Total Hip Arthroplasty with Alumina Alumina Pairing R. Schmidt, R. Petzold, L. Müller and R.P. Pitto	843
Impingement in Ceramic Hip Patien: A Retrieval and Wear-Scar Analysis of Femoral Head M. Manaka, I.C. Clarke, A. Gustafson and A. Imakiire	847
Squeaking and Neck-Socket Impingement in a Ceramic Total Hip Arthroplasty T. Eickmann, M. Manaka, I.C. Clarke and A. Gustafson	849
Femoral Reconstruction with Macroporous Biphasic Calcium Phosphate Ceramic in Revision Hip Replacement C. Nich, P. Bizot, R. Nizard and L. Sedel	853
Medium Term Clinical Results of Hydroxyapatite-Coated Total Knee Replacements M. Cross, P. Dixon, J. Chitnavis and E. Parish	857
Hydroxyapatite-Coated Screws Prevent Lag Screw Cut-Out in Trochanteric Fractures Fixed with DHS: A Prospective Randomized Study A. Moroni, C. Faldini, F. Pegreffì and S. Giannini	859
Evaluation of Periacetabular Bone Reaction after Total Hip Arthroplasty with Alumina-Alumina Pairing Using Computed Tomography L. Müller, R. Schmidt, A. Kress, R. Forst and R.P. Pitto	863
The Influence of Boundary Conditions on Finite Element Analysis R.M. Gillies and W.R. Walsh	867
Investigation of the Role of Dental Ceramic Core Material using Finite Element Analysis K. Proos, M.V. Swain, J. Ironside and G. Steven	871
The Dependence of Sintering Parameters on the Surface Quality and Roughness of Ceramic Veneered PFM-Restorations T. Klinke and R. Biffar	875
Microstructure of Alumina- and Alumina/Zirconia-Glass Infiltrated Dental Ceramics M. Guazzato, M. Albakry, M.V. Swain and S.P. Ringer	879
Lessons Learned from Implant Retrieval of Ceramic Bearings: A Case Study P.A. Campell, M. Manaka, I.C. Clarke and G. Gustafson	883
Repair of Segmental Long Bone Defect in Rabbit Femur using Bioactive Titanium Cylindrical Mesh Cage S. Fujibayashi, H.M. Kim, M. Neo, M. Uchida, T. Kokubo and T. Nakamura	887
Introducing a Unique Measurement for Biomaterial Nanomechanics G. Pezzotti	893
Toward Quantitative Modeling of Morphology Changes in Solids with Phase Field Theories: Atomistic Arguments for the Determination of Higher Gradient Coefficients W. Dreyer and W.H. Müller	901
Macro and Micro Fracture Behaviour of Biomaterials S. Sakakura and G. Pezzotti	915
Comparison of Sintering and Mechanical Properties of Hydroxyapatite and Silicon-Substituted Hydroxyapatite N. Patel, E.L. Follon, I.R. Gibson, S. Best and W. Bonfield	919
Bone-Bonding Ability of Anodic Oxidized Titanium B. Liang, S. Fujibayashi, J. Tamura, M. Neo, H.M. Kim, M. Uchida, T. Kokubo and T. Nakamura	923

Elastic/Plastic Surface Deformation of Porous Composites Subjected to Spherical Nanoindentation	
T. Miyajima, F. Nagata, W. Kanematsu, Y. Yokogawa and M. Sakai	927
Mechanical Properties of Hydroxyapatite-Granule-Implanted Titanium Alloy	
A. Watazu, A. Kamiya, J. Zhu, T. Nonami, T. Sonoda, W. Shi and K. Naganuma	931
Fatigue Performance of a Bioactive Composite Developed for Hard Tissue Replacement	
M. Wang and B.W. Chua	935
Sintering Effects on Mechanical Properties of Bioglass Reinforced Hydroxyapatite Composites	
G. Göller, F.N. Oktar, H. Demirkıran and E. Demirkesen	939
Mechanical Properties of Bioactive PDMS-CaO-SiO₂-TiO₂ and PTMO-CaO-TiO₂ Hybrids Soaked in a Simulated Body Fluid	
N. Miyata, M. Kamitakahara, K. Masakazu, T. Kokubo and T. Nakamura	943
Mechanical Properties of Glass-Ceramic A-W - Polyethylene Composites: Effect of Filler Content	
J.A. Juhász, S. Best, K. Masakazu, N. Miyata, T. Kokubo, T. Nakamura and W. Bonfield	947
Mechanical Property of Bioactive Polyethylene-Titania Composite Prepared by Hot Pressing	
H. Takadama, M. Hashimoto, Y. Takigawa, M. Mizuno, Y. Yasutomi and T. Kokubo	951
Fracture Toughness, Microstructure and Toughening Mechanism of Leucite and Lithium Disilicate Glass Ceramics	
M. Albakry, M. Guazzato and M.V. Swain	955
Effects of Al₂O₃ Addition in Glass Composition on the Mechanical Properties of A/W Glass-Ceramic	
H.J. Park, B.S. Jun, D.J. Kim, H.S. Ryu, J.H. Seo, K.S. Hong and H. Kim	959
Structure, Stability and Mechanical Properties of Calcium Aluminoborate Containing Na₂O and P₂O₅ Glass for Biomedical Applications	
V. Rajendran, A.N. Begum and F.H. El-Batal	963
