

Table of Contents

Preface

Vibration-Based Structural Health Monitoring – Concepts and Applications C.P. Fritzen	3
Applications of Spectral Kurtosis in Machine Diagnostics and Prognostics R.B. Randall	21
Crack Detection Using Acoustic Emission Methods – Fundamentals and Applications L.M. Rogers	33
Ultrasonic/Guided Waves for Structural Health Monitoring W.J. Staszewski	49
Identification of Crack Damage with Wavelet Finite Element X.F. Chen, Z.J. He, Q. Gao and Y. Zi	63
A Biological Immunity-Inspired Novelty Detection Algorithm for Rotor System Monitoring Y.G. Dong, E. Dong, H. Jia and W. Lv	71
Gearbox Fault Detection Using Hilbert and TT-Transform X. Fan and M.J. Zuo	79
Frequency-Demodulated Analysis Based on Cyclostationarity for Local Fault Detection in Gears J. He, J. Chen, G. Bi and F. Zhou	87
Gearbox Fault Diagnosis Using Adaptive Redundant Second Generation Wavelet H. Jiang, Z.J. He, C. Duan and X.F. Chen	95
Comparison of Two Software Tools for Damage Identification: Gradient-Based vs. Case-Based Approach P. Kołakowski, L.E. Mujica and J. Vehi	103
Identification of Impact Force for Base on Higher Order Wigner Distribution S.K. Lee, S. Hwang and J. Gu	111
Damage Identification of a Mechanical Structure with a Non-Minimum Phase Based on Singular Value Decomposition S.K. Lee, K. Rho and J. Gu	119
Wavelet Transform Domain Filter and Its Application in Incipient Fault Prognosis F.C. Li, J. Chen, G.C. Zhang and Z.J. He	127
Classification Using Radial Basis Function Networks with Uncertain Weights G. Manson, G. Pierce, K. Worden and D. Chetwynd	135
Comparison of Different Methods of Ritz Vectors Extraction K. Mendrok and T. Uhl	143
Considerations for Practical Neural Network Application to a Damage Detection Problem G. Pierce, K. Worden and G. Manson	151
Impact Load Identification Based on Local Measurements M. Wiklo and J. Holnicki-Szulc	159
Extracting Gear Fault Features Using Maximal Bispectrum G.C. Zhang, J. Chen, F.C. Li and W.H. Li	167
Data Mining for Fault Diagnosis and Machine Learning for Rotating Machinery G. Zhao, D.X. Jiang, K. Li and J.H. Diao	175
Vibration Based Modal Parameters Identification and Wear Fault Diagnosis Using Laplace Wavelet Y. Zi, X.F. Chen, Z.J. He and P. Chen	183
Detection of Fatigue Crack Growth in Aircraft Landing Gear, 4 Point Bend Test Specimens M.G. Baxter, R. Pullin, K.M. Holford and S.L. Evans	193
Detection of Cracks Using Piezoelectric Wafer Active Sensors A. Blazewicz, A.G. Kotousov and F. Wornle	201
Theoretical Models and Experimental Techniques in Nondestructive Evaluation of Concrete M. Brigante and M. Modano	207
Modal Analysis of Acoustic Emission Signals from Artificial and Fatigue Crack Sources in Aerospace Grade Steel R. Pullin, K.M. Holford and M.G. Baxter	217

Fatigue Damage Evaluation of Organic Coatings Subjected to Mechanical Stress K. Darowicki and M. Szociński	227
A Description of Damage Based on Nanoscale Modelling of Fracture J. Kaczmarek and W.M. Ostachowicz	235
On Fracture of Restored Teeth B. Kahler, A.G. Kotousov and K. Borkowski	245
Strip Yield Model for a Crack in a Plate of Arbitrary Thickness A.G. Kotousov	253
Simplified Methods for Prediction of Elastic-Plastic Behaviour of Complex Structures with Repeated Structural Units S.B. Leen, T.H. Hyde, R. Sabesan and W. Pan	261
Computation Tool for Rotor's Life Consumption in Steam Turbines According to Industrial Specifications A. Lucifredi, M.E. Poldi, P. Silvestri and E. Foglino	269
Damage Analysis of Internal Surface Flaws Using Thermoelastic Stress Analysis N. Sathon and J.M. Dulieu-Barton	279
Novel Vibration-Based Methods for Detecting Delamination Damage in Composite Plate and Shell Laminates M. Gherlone, M. Mattone, C. Surace, A. Tassotti and A. Tessler	289
Finite Element Model Updating for Damage Localisation and Quantification Using Experimental Modal Data A.S. Kompalka and S. Reese	297
Benchmark of Damage Localisation Algorithms Using Mode Shape Data J. Morlier, F. Bos and P. Castera	305
Damage Location in Beam and Plate Structures by Wavelet Analysis of Experimentally Determined Mode Shapes M. Rucka and K. Wilde	313
An Investigation on Vibration-Based Damage Detection in an Aircraft Wing Scaled Model I. Trendafilova	321
Example of Application of Experimental Modal Model for Damage Detection for a Rotating Shaft T. Uhl and W. Lisowski	329
Dynamics of Large Power Rotating Machine with Cracked Shaft S. Banaszek	337
Application of Degree of Cyclostationarity in Rolling Element Bearing Diagnosis G. Bi, J. Chen, J. He, F. Zhou and G.C. Zhang	347
Hybrid Model Based Identification of Local Rubbing Fault in Rotor Systems Q.K. Han, T. Yu, H. Li, Z.Y. Qin, Z.W. Zhang and B.C. Wen	355
Internet/Intranet Based Remote Condition Monitoring and Fault Diagnosis Scheme and System for Steam Turboset Y.Y. He, W.X. Lu and F.L. Chu	365
Intelligent Fault Diagnosis in Power Plant Using Empirical Mode Decomposition, Fuzzy Feature Extraction and Support Vector Machines Q. Hu, Z.J. He, Y. Zi, Z.S. Zhang and Y. Lei	373
Magnetic Bearings for Non-Destructive Health Monitoring of Rotating Machinery Supported in Conventional Bearings M. Kasarda, D.D. Quinn, T. Bash, G. Mani, D.J. Inman, R.G. Kirk and J.T. Sawicki	383
Assessment of Materials and Operational Imperfections in Rotating Machinery J. Kiciński	391
Modeling and Analyzing of Vibration in Working Crankshaft with Cracks X.Y. Lei, G.C. Zhang, X.G. Song, J. Chen and G.M. Dong	401
Stability Analysis of a Flexible Bladed-Rotor N. Lesaffre, J.J. Sinou and F. Thouverez	409
Genetic Algorithms Based Rubbing Location Identification in a Rotor System W.X. Lu, F.L. Chu and D. Guo	417
Bush Skewness Defect in Journal Bearing as an Example of Knowledge Base Development M. Luczak	425

Acceptable Dislocation of Bearings of the Turbine Set Considering Permissible Vibration and Load of the Bearings J. Rybczynski	433
Effect of Shaft Unbalance on the Operation of Worm Gear Rolling Bearings S. Strzelecki and Z. Towarek	441
Vibration Behaviour of a Disc Assembly with a Cracked Lacing Wire D. Szwedowicz, C. Acosta, J. Bedolla and E. Martinez	451
Model Based SHM - Rotating Machinery Application T. Uhl, T. Barszcz and J. Bednarz	459
Time-Frequency Feature Extraction without Cross-Terms Based on Acoustic Signal in Rotor Malfunctions F.Q. Wu and G. Meng	467
Diagnosis of Local Fault and Identification of Transient Fault Force in Rotating Machinery H.L. Yao, T. Yu, X.P. Li, Q.K. Han and B.C. Wen	475
Multi-Fault Classifier Based on Support Vector Machine and Its Application Z.S. Zhang, M. Shen, W. Lv and Z.J. He	483
Detecting Damage in a Beam by Static Tests S. Caddemi and A. Morassi	493
Strain-Based Damage Tolerance of Cylindrical Shells Subjected to Transient Loading and Its Application C.Y. Gao and Y.T. Fang	501
An Experimental Rig for Damage Detection of Rolling Bearings L. Garibaldi, A. Fasana and S. Marchesiello	509
Identification of Discontinuities in Composite Rods and Beams Based on Lamb Wave Propagation J. Grabowska and M. Krawczuk	517
Application of Statistical Energy Analysis for Damage Detection in Spacecraft Structures J. López-Díez, M. Torrealba, A. Güemes and C. Cuerno-Rejado	525
Experimental and Numerical Investigation of Wave Propagation in Composite Beam with an Additional Mass W.M. Ostachowicz, M. Krawczuk and M. Palacz	533
A Combined Finite and Spectral Element Approach to Wave Scattering in a Cracked Beam: Modelling and Validation S.P. Shone, B.R. Mace and T.P. Waters	541
Tracking of Cracks in Airplane Components Using Nonlinear Surface Wave Propagation Techniques S. Vanlanduit, P. Guillaume, J. Vermeulen and K. Harri	549
Wave Propagation Based Multi-Crack Identification in Beam Structures through Anti-Resonances Information D.S. Wang and H.P. Zhu	557
Damage Detection in Circular Cylindrical Shells by Frequency Sensitivities and Mode Shapes Z.H. Wang, J. Chen, Y. Zhao and H.W. Ma	565
Health Monitoring: New Techniques Based on Vibrations Measurements and Identification Algorithms on an Aeronautical Composite Panel I. Bovio, M. Della Ragione and L. Lecce	575
Identification of Damage in Composite Structures Using Thermoelastic Stress Analysis T.R. Emery, J.M. Dulieu-Barton and P.R. Cunningham	583
Predicting Failure in Multi-Bolt Composite Joints Using Finite Element Analysis and Bearing-Bypass Diagrams C.T. McCarthy, M.A. McCarthy and M.D. Gilchrist	591
Simulation of Damage Scenarios in an FRP Composite Suspension Footbridge R.A. Votsis, M.M. Abdel Wahab and M.K. Chryssanthopoulos	599
Non-Linear Vibration of a Delaminated Composite Beam A.J. Żak	607
A Uniplanar Capacitive Approach for Subsurface Damage Detection of Nonmetallic Materials E. Dong, Y.G. Dong, W. Lv, H. Jia and J. Li	617

Wireless Structural Health Monitoring Using MEMS M. Krüger, C.U. Grosse and P.J. Marrón	625
Multidisciplinary Software Developments in a Power Transformers Scenario P. Mariño, F. Poza, S. Otero and F. Machado	635
Simplified Modeling for Impedance-Based Health Monitoring D.M. Peairs, G. Park and D.J. Inman	643
The Kinematics and Dynamics of a Dextrous Parallel Manipulator for Structural Inspection Applications M.P. Cartmell, A.R. Whittaker and A. Krimly	653
Prediction of Machines Health with Application of an Intelligent Approach – a Mining Machinery Case Study M. Gibiec	661
Health Monitoring of Electric Circuits M. Kokot and J. Holnicki-Szulc	669
Damage Detection on Typical Aeronautical Structures R. Rodríguez, A. Yarza, J. López-Díez, C. Cuerno-Rejado and A. Güemes	677
An Analysis about Response of Small Structure Suffered Underwater Explosion Q. Wan, W.K. Jiang and Z.P. Zhao	685
Ultrasonic Damage Measurement in Reinforced Concrete Beams R. Bairrao, M. Chrzanowski, J. Duque and P. Latus	695
Instantaneous Identification of Polynomial Nonlinearity Based on Volterra Series Representation G.V. Demarie, R. Ceravolo and A. de Stefano	703
Impact Force Spectrum for Damage Assessment of Earthquake-Induced Structural Pounding R. Jankowski	711
Local and Global Damages of Quasi-Brittle Material in Uniaxial Compression Based on Gradient-Dependent Plasticity X.B. Wang	719
Vibration-Based Seismic Damage Identification in Buildings J.L. Zapico and M.P. González	727
Modal Analysis of a Reinforced Concrete Frame in Various States of Damage Z. Zembaty and M. Kowalski	735
Vibration-Based Condition Monitoring of Smart Prefabricated Concrete Elements D. Zonta, M. Pozzi, M. Forti and P. Zanon	743
Detecting Damage of Rolling Bearings Using EMD Q. Gao, Z.J. He, X.F. Chen and K.Y. Qi	753
Prediction of the Influence of Vibration on Structural Integrity of Elevator Suspension Ropes S. Kaczmarczyk	761
An Investigation into Scalpel Blade Sharpness Using Cutting Experiments and Finite Element Analysis C.T. McCarthy, M. Hussey and M.D. Gilchrist	769
A Correlative Method of Machine Condition Monitoring Based on the Choi-Williams Distribution G. Yang, Z. Wu and J.J. Gao	777
Detection of Stray Current Field Interference on Metal Constructions Using STFT K. Żakowski and K. Darowicki	785
