

Table of Contents

Laser Scattering Measurement of Microdefects on Silicon Oxide Wafer T. Ha, T. Miyoshi, Y. Takaya and S. Takahashi	3
Characterisation of Surface Properties by a Multi-Function TPM X.P. Liu and J. Zhang	9
Development of an Evanescent Light Measurement System for Si Wafer Microdefect Detection S. Takahashi, R. Nakajima, T. Miyoshi, Y. Takaya and K. Takamasu	15
An Embedded FBG Sensor for Dynamic Strain Measurement for a Clamped-Clamped Composite Structure H.Y. Ling, A.K.T. Lau, L. Cheng, J. Wei, R.S. Thomson and M.L. Scott	21
A Thermovision Method for Studying Deformation Kinetics of Materials and Structure Elements E.S. Lukin and A.M. Ivanov	27
Damage Detection of Composite Structures Using Dynamic Analysis L.H. Yam, L. Cheng, Z. Wei and Y.J. Yan	33
Investigation of Nonisothermal Crystallization Behaviors of Poly and Silica Nanocomposites Using Differential Scanning Calorimetry L.X. Kong and Z. Peng	39
Ellipsometric Detection of Transitional Surface Structures on Decapped GaAs(001) A.V. Vasev and S.I. Chikichev	45
Temperature Effect on the Stability of CuO Nanofluids Based on Measured Particle Distribution H. Chang, C.H. Lo, T.T. Tsung, Y.Y. Cho, D.C. Tien, L.C. Chen and C.H. Thai	51
Determination of Young's Modulus of Micromechanical Silicon Films Using an Acoustic Excitation and Optical Detection Resonance Method Y.M. Liu, W.J. Tian and S.J. Zhang	57
A High Precision AFM for Nanometrology of Large Area Micro-Structured Surfaces J. Aoki, W. Gao, S. Kiyono and T. Ono	65
A Study on the Mechanism of a New High Speed Scanning Miniature Nano-Measurement Probe K.C. Fan and Y.J. Chen	71
Use of Fiber Interferometer for AFM Cantilever Probe Displacement Control N.C. Shie, T.L. Chen and K.Y. Cheng	77
Determining the Radial Modulus of DNA Measured by VPSFM Y.H. Chen, X.J. Li, X.F. Zhou, J.L. Sun, W.H. Huang and J. Hu	83
Pitch Calibration by an Active Temperature Controlled Traceable Atomic Force Microscope and a Laser Diffractometer C.J. Chen, S.P. Pan and L.C. Chang	89
Micro-Force Calibration with an All-Coil Magnetic Levitation S.W. Hsu and T.L. Chen	95
Effect of Residual Stresses on a Micromachined Z-Axis Vibrating Rate Gyroscope A.P. Qiu, Y. Su, S.R. Wang and B.L. Zhou	101
A Measurement System for Step Imprint Lithography H.Z. Liu, B.H. Lu, Y.C. Ding, D.C. Li, Y.P. Tang and T. Jin	107
Design and Simulation of a DETF for Use in a Resonant Gyroscope Y.L. Zhu, S.R. Wang and A.P. Qiu	113
Micro Angle Measurement for a Scanning Stage Q.G. Liu, M. Li, D.C. Li, Z.G. Li and X.T. Hu	119
Defocusing Detection of Geometric Sizes in Micro-Machining X.H. Qu, X.H. Zhao and S.H. Ye	125
A Biological Sensor for Detecting Foreign Bodies Using a Balloon Probe H. Shimizu, S. Kiyono, W. Gao and H. Shoji	133
A Resonant Frequency Measurement System for Osseointegration Trans-Femoral Implant W. Xu, F. Shao and D. Ewins	139

Innovative 3D Dental Measurement for Tooth Model Restoration L.C. Chen and Z.Q. Xu	145
An Intelligent CO₂ Sensor for Private Homes M. Gürtner, N. Neumann and F. Schneider	151
A Hybrid Optical Correlator Used as an Intelligent Instrument S. Chang and C.P. Grover	159
A Mobile Shearography System for Non-Destructive Testing of Industrial and Artwork Components M. Kalms and W. Jueptner	165
A High Precision Three-Dimensional Optical Sensor Using Fourier Transform Profilometry H.Y. Sung, L.F. Tien, C.Y. Lin, C.Y. Lo, Y.R. Lin, Y.M. Lin and T.H. Tao	171
Development and Verification of a Confocal Fabry-Perot Interferometer for Broad Band Ultrasound Detection J.H. Shaw, J.Y. Lee, L.H. Chow and H.C. Shih	177
Laser Feedback Interferometers Based on Orthogonally Polarized He-Ne Lasers S.L. Zhang and Y.C. Ding	183
A Two-Color Heterodyne Interferometer Based on Diffraction Grating for Displacement Measurement G.H. Wu, Z.J. Cai and L.J. Zeng	189
A New Method for the Development of Frequency Standards for the Optical Wavelength Range of 243nm E.K. Izrailov and V.F. Ezhov	195
Optical Measurement Technologies and Systems for Industrial Applications Y.V. Chuguy	201
Influence of the Size of Round Objects on the Output Signal of Laser Measuring Scanner R. Jabłoński	209
A Study on the Multi-Wavelength Drop Analysis Technology G. Hao, Z.R. Qiu, G.X. Zhang and A.P. Zhang	215
Accurate Estimation of Phase Distribution on Reference Plane in Grating Projection Measurement M.R. Zhao, Y.C. Lin, X.B. Niu and D.M. Cheng	221
Measurement of Core Position of Fiber Array by a Calibrated Mask Method S.W. Hsu, Y.D. Jiaan and M.S. Huang	227
Detection of Random Defects on Highly Reflective and Complex Surfaces X.H. Qu, Y. He, G.X. Jia, J.M. Ding and S.H. Ye	233
Automatic Laser Monitoring for Dam Safety K.D. Yue, X. Zhou and J. Gao	239
An Application of the Kalman Filter in a Laser Tracking Measurement System X.R. Chen, P. Cai and W.K. Shi	245
A Scanning Multi-Probe Straightness Measurement System for Alignment of Linear Collider Accelerator W. Gao, J. Yokoyama, S. Kiyono and N. Hitomi	253
Measurement of the Straightness of a Leadscrew-Driven Precision Stage Y. Arai, W. Gao, S. Kiyono and T. Kuriyagawa	259
A Circular Profile Measurement Method Using Software Techniques E. Okuyama and K. Mitsui	265
A High Precision Circuit Based on Digital Techniques for Roundness Measurement W.Q. Zhao, J.B. Tan, Z. Xue and Z.D. Feng	271
A Circle Contour Measurement Technique Based on Randomized Hough Transform Using Gradient Information J.W. Cui and J.B. Tan	277
A Coaxiality Measurement Method for Hole Using Non-Diffracting Beam Technology X.B. Zhang, X.Q. Jiang and Z. Li	283
Effects of Rotation Angle on the Circular Test of Geometric Errors H.L. Liu	289
Theoretical Analysis and Basic Experiments for the 3D Displacement Measurement Using Ring-Shaped Laser Beam S. Usuki, K. Enami, M. Hiraki, S. Takahashi and K. Takamasu	295

High Resolution Ultrasonic Distance Measurement Systems Using Pulse Compression and Their Applications H.F. Schweinzer and H. Elmer	301
A Multi-Range Fiber-Optical Non-Contact Displacement Micrometer G.J. Hwang and W.H. Ko	307
A Study of the Deformation Measurement of 3D Displacement Field S.R. Lee, Z.S. Luo, H.S. Chiou, B.G. Wang and L.S. Liu	313
A Displacement Sensor Based on Differential Frequency Measurement D.L. Peng, X.H. Zhang and X.K. Liu	319
Development of a Sensitive Probe for Coordinate Measuring Machines M. Watanabe and R. Furutani	325
A Portable 3D Vision Coordinate Measurement System Using a Light Pen S.G. Liu, K. Peng, F.S. Huang, G.X. Zhang and P. Li	331
A High Precision Dynamic Autocollimator M.Z. Shen and S.T. Liao	337
Three-Dimensional Slit Width Measurement for Long Precision Slot Dies M. Furukawa, W. Gao, H. Shimizu, S. Kiyono, M. Yasutake and K. Takahashi	343
Comprehensive Inspection of Geometric Parameters of Running Freight Car Wheel Pairs A.N. Baybakov, V.M. Gurenko, S.P. Yunoshev, S.V. Plotnikov, V.V. Sotnikov and K.P. Kascheev	349
A New Method for the Measurement of Dynamic Angular Errors of a Photoelectric Shaft Encoder X.D. Cao, T.Q. Fan and L.H. Geng	355
Dynamic Measurement of Bearing Radial Clearances Y.X. Chen and S.N. Yang	361
Detection and Control of Synchro-Operation of Long-Stroke Cylinders in a Deep Ocean Mining Heave Compensation System B.H. Wu, T.B. Xiao, D.P. Zou and J.J. Long	367
An Ultraprecision On-Machine Measurement System H. Ohmori, Y. Watanabe, W.M. Lin, K. Katahira and T. Suzuki	375
Process Analysis and Characterization of ASNSS Using Automatic On-Line Measurement L.C. Chen, J.Y. Sun, T.T. Tsung, H. Chang and H.M. Lin	381
A Plastic Film Thickness On-Line Detecting System Y.Z. Ma, S.H. Ye, F. Duan and Y. Zheng	387
A Real-Time and On-Line Visual System for Seamless Steel Pipe Linearity Measurement C.J. Liu, X.Y. Yang, J.G. Zhu and S.H. Ye	393
A Structured-Light-Based On-Line 3D Measurement System and Software Development X.Y. Yu, F.B. Zhang, H.J. Yuan and Z.G. Lang	399
Effects of Key Parameters on the Performance of a New In-Process Optical Measurement Method Z. Tao and Y. Gao	405
Anti-Vibration Characteristics of a Lateral Shear Interferometer for On-Machine Surface Measurement X. Liu, Y. Gao, S. To and W.B. Lee	411
Application of Wavelet Analysis for Online Measurement of Crude Oils X. Li, Z.L. Ding and F. Yuan	417
On-Line Industrial 3D Measurement Techniques for Large Volume Objects J.G. Zhu, S.H. Ye, X.Y. Yang, X.H. Qu, C.J. Liu and B. Wu	423
Advances in Micro and Nano-Scale Surface Metrology L. Blunt, X. Jiang and P.J. Scott	431
2D and 3D Surface Texture Comparisons Using Autocorrelation Functions J. Song, L. Ma, E. Whintont and T. Vorburger	437
Spline Filters for Surface Texture Analysis M.P. Krystek	441
Web-Based Virtual Measurement, Analysis and Evaluation Software Development for 3D Surface Topography C. Anthony, L. Ma and J. Zhou	447

Texture Extraction and Identification of 3D Engineering Surfaces W. Zeng, X. Jiang, Y. Gao and T. Xie	453
Combination of M-Estimation and Gaussian Filtering for Characterizing 3D Engineering Surfaces H.F. Li, X.Q. Jiang and Z. Li	459
A Comparative Study of the Current 3D Motif Combination Methods J. Guo, Y. Gao and T. Xie	465
A New Three-Dimensional Profilometer for Surface Profile Measurement Using Digital Fringe Projection and Phase Shifting L.C. Chen, S.H. Tsai and K.C. Fan	471
A Two-Dimensional Surface Profile Imaging Technique Based on Heterodyne Interferometer K.W. Wang, Z.J. Cai and L.J. Zeng	477
A Laser Sensor Technique for Measuring 3D Surfaces Based on the Polarized Heterodyne Astigmatic Principle L.R. Qiu and X.M. Ding	483
Development of a Large Range Nanometer Level Profilometer with Controlled Contact Force L. Yang, Y. Gao, X.Z. Wang and T. Xie	489
Instantaneous Measurement of 3D Profiles by Projecting Coded Grating A.L. Tian, B. Li, M.T. Huang and Z.D. Jiang	495
A 3D Profile Parallel Detecting System Based on Differential Confocal Microscopy Y.H. Wang, X.F. Yu and Y.T. Fei	501
Artificial Life for Pavement Distress Survey Q. Wang and H. Zhang	507
Detection of Vortex Frequency in Gas Flow with Ultrasound V. Hans and C. Filips	515
Design, CFD Investigation and Implementation of a Novel Diverter Mechanism for Water Flow Measurement Y.L. Ho, J.Y. Chen, J.H. Shaw and C.T. Yang	521
Determination of the Jetting Force of a Jet Actuator L. Zhao, S.X. Yang and H. Ren	527
Performance Characterization of Pressure Sensors Using an Improved Pressure Square Wave Generator T.T. Tsung, L.L. Han, L.C. Chen and H. Chang	533
A High Sensitivity Pressure Sensing System with Fiber Bragg Grating Using the Transverse Strain Characteristics of a Straight Bourdon Tube M.X. Jiao, E.G. Zhao, Y.M. Liu and R.L. Qi	539
A Polarized Optical Fiber Pressure Sensor with a Sampling Reference Optical Path Y.Q. Huang, Y.X. Lin, Z.L. Huang, L.M. Zhu and Y.M. Chen	545
A New Sensing System for Dynamic Pressure Measurement under Severe Conditions Z.T. Wu, Q.S. Wang and Z.D. Jiang	551
An Ultra-Precision Air-Pin Sensor and Its Dynamic Characteristics H. Zhang, S.X. Deng, H.Q. Wang and S. Chen	557
An Automatic Sorting System Based on Pneumatic Measurement Y.H. Wang, S.Q. Hu and Y. Hu	563
An Optical Fiber Temperature Sensor Based on Spectrum Measurement Z.G. Li and B.G. Wang	569
A White Light Interference Distributed Optical Fiber Temperature Sensor X. Zhou, J. Gong, Y. Liu and J. Zhou	575
A Novel Non-Gyro Inertial Measurement Unit M. Ding, Q. Wang, G. Shen and P. Zhao	583
Design of an Intelligent Multi-Gyro Measurement Device J.P. Wang, W. Zhou, W.F. Tian and Z.H. Jin	589
An X-Y Stage with a Plane Cross Grating Metrology System X.Z. Wang, Y. Gao, J. Guo and T. Xie	595
A Fast Search Coil Sensing Method for Tracking Systems Z.J. Cai and L.J. Zeng	601

Design of a Two-Degree of Freedom Beating Machine S.L. Zhang and L.J. Zeng	607
Evaluation of Thrust Force and Positioning Accuracy of a New Linear Motor X. Chen, K. Takamasu and M. Nikaidou	613
Intelligence and Metrological Reliability of Measuring Transducers Built in Equipment R.E. Taymanov and K. Sapozhnikova	619
Measurement of Finishing Errors for Evaluation of Dynamic Characteristics of NC Machine Tools S.C. Kim, C.H. Lee and B.H. Lee	625
Evaluation of Dynamic Parameters for Underdamped Grinding Machines Y. Gao and S. Tse	631
Measurement and Analysis of the Dynamic Characteristics of a High Speed Painting Automizer Z. Yang, Y. Gao, T. Huang and D. Zhang	637
Combination of ICA and SOM for Classification of Machine Condition Patterns S.X. Yang, W.D. Jiao and Z.T. Wu	643
Observation of Scattered Evanescent Waves M. Ozaki and R. Furutani	649
Electromagnetic Field Analysis and Measurement for High Speed Attraction Type Magnetic Levitation Vehicle Systems D.X. Chen, M.C. Pan, F.L. Luo, Z.W. Kang, W.G. Tian and Y.Y. Hu	655
A DDS Waveform Generator for Electromagnetic Non-Destructive Testing X.H. Cao, F.L. Luo, F.T. Bai and Y.H. Zhang	661
Eddy Current Testing Using a Model Based Measurement Method F.L. Luo, Y.Y. Hu and Z.W. Kang	667
Power System Frequency Tracking Using an Adaptive Lattice Notch Filter S. Zhang, D. Li and J. Sun	673
A Least Square Method for Measurement and Optimisation in Selected Physical Experiments I. Frollo, P. Andris, I. Strolka and L. Bačiak	681
3D Digital Measurement of Large Scale Objects Based on Viscous Target B. Wu, J.G. Zhu, X.Y. Yang, T. Xue and S.H. Ye	687
Surface Reconstruction Based on Laser Scan Data Y.P. Luo, Z.D. Jiang, B. Li and Y.G. Wang	693
Improving Measurement Accuracy Using Image Super-Resolution D.S.H. Ling, H.Y. Hsu, G.C.I. Lin and S.H. Lee	699
Digital Image Processing for a Liquid Signature Analyzer System with CCD Camera H.X. Chen, Z.R. Qiu and G.X. Zhang	705
Sub-Pixel Edge Detection for Precision Measurement Based on Canny Criteria S.H. Xie, Q. Liao and S.R. Qin	711
An Application of the Fractal Theory in the Design of Heat Sink for Precision Measurement Instrument S.R. Lee, Z.G. Li, B.G. Wang and H.S. Chiou	717
Online Calibration for a Stereo Vision Measurement System Z.J. Yu, S.Y. Ma, R.S. Che, Q.Z. Wang, W. Tian, Z.H. Li and J.Z. Li	723
A New Ellipse Recognition Algorithm for CCD Camera C.K. Sun, X. Zhang, Z. Wang and S. Ye	729
A Rapid Calibration Method for the Laser Scanning 3D Measurement System Z. Xu, L. Tao, C.K. Sun and Y. Zheng	735
Error Evaluation of Aspheric Surfaces and Calibration of the Test Instrument Q. Hao, Q.D. Zhu and Y.T. Wang	741
Order Tracking Filtering for Rotating Machinery Diagnosis Based on Zero Phase Distortion Digital Filtering S.R. Qin and Y. Guo	747
An Application of the AGC Technology for Sensor Signal Processing X.K. Liu, D.L. Peng, X.H. Zhang and X.H. Cheng	753
