|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Active Cutting Edges in Vitrified CBN Grinding Wheels</b><br>R. Cai, H.S. Qi and G.Q. Cai                                                                                                                | 1   |
| <b>Optimising the Process Conditions in Ultra-Precision Grinding to Achieve Surface Finish of Optical Quality</b><br>T. Jin and D.J. Stephenson                                                             | 8   |
| <b>Grinding Wheel Loading Features Extracted by Image Processing</b><br>Z. Feng and X. Chen                                                                                                                 | 14  |
| <b>A Comparative Study on the Dressing of Metal-Bonded Diamond Saws</b><br>Y.Q. Yu, Y. Li and X.P. Xu                                                                                                       | 19  |
| <b>Influence of the State of Passivating Films in Electrolytic In-Process Dressing (ELID) Grinding Process</b><br>C.Z. Ren, J.H. Hua, Z.Y. Wu, T.Y. Wang, W.D. Jin and X.M. Jin                             | 24  |
| <b>Development of Vitrified Bond CBN Wheel for Internal Precision Grinding of the Air-Conditioner Compressor Piston Hole</b><br>H. Gao, Y.G. Zheng, W.G. Liu and J.H. Li                                    | 29  |
| <b>Energy Model in Laser Processing of a Cylindrical Grinding Wheel</b><br>X.Y. Wang, Y.B. Wu, R.K. Kang, D.M. Guo, W.J. Xu and M. Kato                                                                     | 33  |
| <b>Resin Bonded CBN Grinding Wheel Dressing by Laser — Simulation and Experiment</b><br>M. Chen, Y.P. Ma, G. Liu, D.H. Xiang and F.H. Sun                                                                   | 38  |
| <b>Machining Performance of Brazed Diamond Wire Saw with Optimum Grain Distribution</b><br>Z. Horita, B. Xiao, Y.C. Fu, H.H. Su, J.H. Xu and H.J. Xu                                                        | 43  |
| <b>Ti Coating of Nanocrystalline Diamond by Atomic Layer Deposition</b><br>J.B. Zang, J. Lu, Y.H. Wang, X.H. Qi and Y.G. Yuan                                                                               | 48  |
| <b>Technique and Application about Diamond Dressing Roller</b><br>Z.M. Cui and N.F. Liu                                                                                                                     | 52  |
| <b>Fabrication of Accurate Diamond - Metal Composite Cutting Blade by Electrotyping Method</b><br>L.L. Fang, B.L. Zhang and N. Yao                                                                          | 57  |
| <b>Ultrasonic Dressing of Grinding Wheel and Its Influence on Grinding Quality</b><br>F. Jiao, B. Zhao, X.S. Zhu and Q.T. Fan                                                                               | 62  |
| <b>A Study on the Methods for Precise Sorting of Synthetic Diamond Abrasives</b><br>Z.P. Luo and Y.L. Yao                                                                                                   | 66  |
| <b>Research of Photosensitive Resin Blade with Metal-Coated Abrasive</b><br>W. Peng, T. Gao, C.Y. Yao and X.L. Yuan                                                                                         | 71  |
| <b>A Study on Surface Generation of Metal-Bonded Diamond Grinding Wheel Dressed by Electro-Contact Discharge</b><br>J. Xie, Y. Tang and J. Tamaki                                                           | 76  |
| <b>Bonds of Electroplated Diamond Tools for Optical Glass Machining</b><br>A.B. Yu, A.J. Wang, C.G. Luan and S.F. Chen                                                                                      | 81  |
| <b>Edge Grinding of Ceramic Tile by Diamond Cup Wheels</b><br>H. Yuan, Y.P. Cheng, C.Y. Wang and Y.N. Hu                                                                                                    | 85  |
| <b>The Influence of Special-Shaped Stones Machining Parameters on Wear Performance of Metal Bonded Diamond Grinding Wheel</b><br>B. Huang, J.S. Zhang, J.F. Li and Z.W. Liu                                 | 90  |
| <b>Application of the Electrical Discharge Truing Technique on the Lapping Machining Process</b><br>W. Li, Y.F. Jin and G.X. Hu                                                                             | 94  |
| <b>EDM Dressing for Metal-Bond Super Hard Arc-Forming Wheel</b><br>F.H. Zhang, G.W. Kang, Y.S. Yang, X.K. Shi and S.B. Luo                                                                                  | 99  |
| <b>Study on Lapping Process of Diamond Cutting Tools</b><br>Z.Q. Li, T. Sun, L.Q. Shi and S. Dong                                                                                                           | 104 |
| <b>Researches on Dressing Diamond Grinding Wheels on Line by a Diamond Pen Aided with Laser Beam Preheating Based on Optical Fiber Delivering</b><br>Q.L. Deng, A.N. Xie, K.K. Sun, G.C. Zhou and J.L. Song | 109 |

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Form and Texture Control of Free-Form Surface Polishing</b><br>S.M. Ji, X. Zhang, L. Zhang, Q.L. Yuan, Y.H. Wan and J.L. Yuan                                       | 113 |
| <b>Research on Genetic Optimization of Special Spiral Rod Grinding Process</b><br>W. Wang, J.S. Yao and G.Q. Cai                                                       | 118 |
| <b>Analysis of the Breakage of Diamond Wire Saws in Sawing of Stone</b><br>G.Q. Huang and X.P. Xu                                                                      | 123 |
| <b>Development of Grinding Temperature Measuring System Considering Compensation of Thermocouple Dynamic Responding Error</b><br>H. Gao, R.K. Kang, D.M. Guo and J. Li | 127 |
| <b>Analysis on Surface Temperature Field of Ultra-High Speed Grinding</b><br>S.X. Yuan, W.Y. Tian and G.Q. Cai                                                         | 131 |
| <b>Analysis and Study of the Influence Factor on the Airflow of Ultra-Speed Grinding Wheel</b><br>Y.D. Gong, H. Li and G.Q. Cai                                        | 136 |
| <b>Nonlinear Stability and Bifurcation of Multi-D.O.F. Chatter System in Grinding Process</b><br>Q.K. Han, T. Yu, Z.W. Zhang and B.C. Wen                              | 141 |
| <b>Study on the Virtual Wheel and Grinding Process</b><br>W.S. Wang, F. Xu, F. Liang, J. Liu and Y.D. Gong                                                             | 146 |
| <b>Investigations of Grinding Forces for Nanostructured WC/12Co Coatings</b><br>Z.H. Deng, B. Zhang and F. Cheng                                                       | 151 |
| <b>A Comparison Study of Surface Hardening by Grinding Versus Machining</b><br>Z.Q. Liu, X. Ai and Z.H. Wang                                                           | 156 |
| <b>Mechanism of Surface Formation for Natural Granite Grinding</b><br>J.Y. Shen, W.M. Lin, H. Ohmori and X.P. Xu                                                       | 161 |
| <b>Experimental Study on Creep Feed Deep Grinding Titanium Alloy with Slotted CBN Grinding Wheel</b><br>Y.C. Fu, H.J. Xu and F.H. Sun                                  | 166 |
| <b>The Study on Ductile Removal Mechanisms of Ultrasonic Vibration Grinding Nano-ZrO<sub>2</sub> Ceramics</b><br>B. Zhao, Y. Wu, C.S. Liu, A.H. Gao and X.S. Zhu       | 171 |
| <b>A Fundamental Study on Optimal Oxide Layer of Fine Diamond Wheels during ELID Grinding Process</b><br>Y. Dai, H. Ohmori, W.M. Lin and D. Jiang                      | 176 |
| <b>On Electrorheological Effect Instantaneous Tiny Grinding Wheel for Fine Machining</b><br>F.F. Bi, Q.S. Yan and N.Q. Wu                                              | 181 |
| <b>Study on Precision Grinding Technique of PCD Tool's Cutting Edge</b><br>X.L. Liu, Y.F. Li, F.G. Yan, Y. Wang, J.S. Hu and Y.J. Wang                                 | 186 |
| <b>Study of Intelligent Prediction and Control of Workpiece Size in Traverse Grinding</b><br>N. Ding, L.S. Wang, G.F. Li, J.Z. Wang and X.W. Chen                      | 191 |
| <b>Groove, Chip and Force Formation in Single Grain High-Speed Grinding</b><br>B.F. Feng, G.Q. Cai and X.L. Sun                                                        | 196 |
| <b>Study on Block Electrode Discharge Grinding of Micro Rods</b><br>W.S. Zhao, B.X. Jia, Z.L. Wang and F.Q. Hu                                                         | 201 |
| <b>Study on Grinding Technology of Electrical Discharge Grinding of Curve Edge Polycrystalline Diamond</b><br>G. Liu, M. Chen, Z.G. Hu, X.F. Zhu, H. Xu and Z.W. Li    | 206 |
| <b>Machining Characteristics Analysis of Nano Ceramics in Ultra Precision Grinding Machining</b><br>Y.Z. Liu, Y.C. Liang and F.H. Zhang                                | 210 |
| <b>Mechanism of the High Efficiency Grinding Fluid Used for Ceramics</b><br>X.L. Tian, Z.Y. Wu and A.B. Yu                                                             | 214 |
| <b>Study on Fuzzy Reliability of Shaft Fixing Grinding Wheel in Internal Grinding</b><br>C.X. Ma, Z.H. Qu, Q.J. Wu, Z. Ruan and L.M. Xu                                | 218 |
| <b>Grindability Evaluation of Advanced Ceramics with AHP Approach</b><br>A.B. Yu and Y. Zhang                                                                          | 222 |
| <b>Application of Hilbert-Huang Transform to Predict Grinding Surface Quality On-Line</b><br>J.H. Wu, Z.Q. Yao, Y. Jin, H.B. Xie, Y.S. Zhao and L.C. Xu                | 227 |
