Preface

I. Shape Memory Alloys

Damping Properties of Vacuum Annealed and H-Doped NiTi Based Alloys at Low Stress Amplitudes	
B. Coluzzi, A. Biscarini, G. Mazzolai, F.M. Mazzolai, A. Tuissi and E. Villa	1
Damping Characteristics of Cold-Rolled and Annealed Equiatomic TiNi Shape Memory Alloy	
S.H. Chang and S.K. Wu	9
Suppression of Martensitic Phase Transformation, Shape Memory and High Damping by Ion Implantation in Ni-Ti Thin Films	
R. Gotthardt	17
Isothermal High Damping in Shape Memory Alloys	
A. Rivière, V. Pelosin, G. Covarel and M. Gerland	25
Effect of Heat Treatments on the Damping Characteristics of TiNi-Based Shape Memory Alloys	
I. Yoshida and K. Otsuka	33
Internal Friction of Hydrogenated Ti (Ni,Cu) Shape Memory Alloys	
T. Ueura, T. Sakaguchi, N. Igata and S. Takeuchi	39
Amplitude Dependent Internal Friction of CuAlMn Shape Memory Alloys	
A. Mielczarek, W. Riehemann, S. Vogelgesang, H. Zak and B. Tonn	45
Internal Friction of Fe-Mn-Si-Based Shape Memory Alloys Containing Nb and C and Their Application as a Seismic Damping Material	
T. Sawaguchi, T. Kikuchi, K. Ogawa, F.X. Yin, S. Kajiwarra, A. Kushibe and T. Ogawa	53

II. Alloys

Effect of Thermal Cycling ($\gamma \leftrightarrow \epsilon$) on Martensitic Transformation Kinetics and Damping Capacity of Fe-17mass%Mn Alloy	
Y.K. Lee, Y.S. Seo, W. Jin and C.S. Choi	59
Susceptibility of Damping Behavior to the Solidification Condition in the As-Cast M2052 High-Damping Alloy	
F.X. Yin, S. Iwasaki, T. Sakaguchi and K. Nagai	67
Effect of Chromium Addition on Damping Capacity, Mechanical Property, and Corrosion Resistance of Fe-18%Mn Alloy	
J.C. Kim, S.H. Baik, J.H. Jun and Y.K. Lee	73
Different Damping Dependences on Volume Fractions of Thermal and Deformation-Induced ϵ Martensites in an Fe-Mn Alloy	
J.H. Jun, Y.K. Lee, J.M. Kim, K.T. Kim and W.J. Jung	79
Influences of Si and Co Addition on Microstructure and Damping Capacity of Fe-Mn Alloy	
J.H. Jun, Y.K. Lee, J.M. Kim, K.T. Kim and W.J. Jung	85
Fe-Cr-Mn-(Co) High Damping Stainless Alloy (HIDAS)	
K. Yamagami, Y. Kogo, T. Morizumi, H. Isono, T. Kosaka, K. Miyahara and N. Igata	91
The Resonant Vibration Fracture Characteristics of Al-xZn Alloy and Mg-xAl-Zn Alloy	
F.Y. Hung, H.W. Chang, Z.F. Chen, T.S. Lui and L.H. Chen	95
Low-Frequency High-Temperature Internal Friction in Ti-13Nb-13Zr Alloy	
T.C. Niemeyer, C.R. Grandini and S.G. Schneider	103
Damping Behaviors of the Commercially Pure Al Prepared by ECAP	
J.C. Wang, Z.M. Zhang and G.C. Yang	109
Ultrasonic Attenuation Properties of Porous and Cellular Al Alloy with Spherical Pore	
X.D. Tang, J.S. Zhu and D.P. He	115
Influence of Oxygen on the Damping Properties of Nb-Zr Alloys	
O. Florêncio, P.S. Silva, T.F. Stefanini and W.J. Botta Filho	121

III. Metallic Glasses

Hydrogen-Induced Damping Peak Temperatures in Bulk Metallic Glasses H.R. Sinning	127
High Damping Performance of Hydrogenated Bulk Metallic Glasses H. Mizubayashi, K. Yamagishi and H. Tanimoto	133
Internal Friction and Mechanical Strength of Hydrogenated Ti-Rich Multicomponent Glassy Alloys M. Hasegawa, M. Takeuchi, D. Nagata, T. Wada, H. Kato, Y. Yamaura and A. Inoue	139
Can Metallic Glass Damping Be Increased by Stress Training Treatment? T.A.M. Aboki	145
Search for High Damping Metallic Glasses Y. Hiki, M. Tanahashi and S. Takeuchi	151

IV. Ceramics and Composites

High Damping in Ferroelectric and Ferrimagnetic Ceramics G. Fantozzi, E.M. Bourim and S. Kazemi	157
Damping Mechanisms in Oxide Materials and Their Potential Applications Q.F. Fang, T. Liu, C. Li, X.P. Wang and G.G. Zhang	167
Synthesis of Novel High Damping Ceramic-Polymer Composites and Its Application as Ceramic Musical Instruments T. Shimazu, M. Miura, H. Kuno, N. Isu, K. Ota and E.H. Ishida	173
Composite Damping Ceramic Coatings by Polymer Impregnation S. Patsias	181
Anelastic Properties of Mg+3vol.%Gr Prepared by Ball Milling Z. Trojanová, M. Bosse, G. Ziegmann, A. Mielczarek and H. Ferkel	189

V. Applications and Measuring Technique

Current Status of Japanese Passive Control Technology Using Various Damping Materials K. Kasai and Y. Ooki	197
Applications of High Damping Stainless Alloy (HIDAS) N. Igata	209
Application of High-Damping Alloy M2052 K. Kawahara	217
Damping Mechanisms in High Damping Materials I.S. Golovin	225
Advanced Techniques for Determining High and Extreme High Damping: OMI - A New Algorithm to Compute the Logarithmic Decrement A. Stanislawczyk	231
