

Table of Contents

I. Grinding: Modelling, Simulation, Characterisation and Novel Techniques

Implementation of Thermal Models in Grinding M.N. Morgan and W.B. Rowe	3
A Study on Optimum Condition of Centerless Grinding Machine for Ferrule Using Taguchi Method and Response Surface Method E.S. Lee and J.H. Lee	9
Grinding Acoustic Emission Classification in Terms of Mechanical Behaviours X. Chen and J. Griffin	15
Development of Intelligent Grinding Database R. Cai and M.N. Morgan	21
An Experimental Investigation of Optimal Grinding Condition for Aspheric Surface Lens Using Full Factorial Design S.Y. Baek, J.H. Lee, E.S. Lee and H.D. Lee	27
Grinding Performance of a Grain-Arranged Diamond Wheel against Industrial Pure Aluminum S. Okuyama, T. Kitajima and A. Yui	33
Improvement of Machining Accuracy in Micro Cylindrical Traverse Grinding K. Ohashi, G.F. He and S. Tsukamoto	39
A Micro Ultrasonic Grinding Device with Very High Frequency and its Application K. Suzuki, S. Mishiro, Y. Shishido, M. Iwai, W. Mei and T. Uematsu	45
Computer Simulations of Cylindrical Plunge Grinding - Influence of Work Stiffness on Grinding Accuracy - O. Horiuchi and T. Shibata	51
Study on the Formation of Grind-Hardening of Steel AISI 1066 J.D. Liu, G.C. Wang, B.L. Wang and K.M. Chen	57
Innovated Precision Grinding by Exploiting Grinding Point Movement in Radial Direction and Forward Backward Feeding of Wheel B. Yao, W.M. Xi, C.R. Chen and L. Shi	63
Wear Characteristics of the Sub-Aperture Tools and Material Removal Rate in Precision Grinding with Loose Abrasives H. Cheng, H.Y. Tam, Y. Gao, Y.B. Wu and Y. Wang	69
Experimental Studies on Grinding of Titanium Alloy with SG Wheels H.X. Zhang, W.Y. Chen and Z.T. Chen	75
Inverse Method for Determining Grinding Area and Material Removal Amount in Grinding Radome D.M. Guo, C.B. Zhang, R.K. Kang and Y.W. Sun	81
Study on The Self-Adaptive Forecast and Optimal Control Method for Grinding Wheel Infeed G.J. Liu, N. Mei, Y.D. Gong and W.S. Wang	87
Study of Intelligent Prediction Control of Surface Roughness in Grinding N. Ding, L.S. Wang and G.F. Li	93
Study on the Material Removal Mechanism of Precision Surface Grinding of Nanostructured WC/12Co Coating Z.H. Deng, B. Zhang and Z.W. Hu	99
Research on ELID Grinding of Nano-Cemented Carbide Tool F.H. Zhang, J.C. Gui, Y.Z. Liu and H.L. Zhang	105
A New Grinding Method for Large-Scale Surface of Revolution and Error Analyzing of Its Wheel Dressing Q.S. Yan, X.G. Zhou, B.Q. He and L.Y. Kong	111
Study on Infrared Ray Detecting Temperature and Network Technology for Grinding J.F. Chen and J.H. Cheng	117

A Study on the Mechanism of the Electrolytic In-Process Dressing (ELID) Grinding Using Molecular Dynamics (MD) & Finite Element (FE) C.Z. Ren, X.J. Guo and L.W. Yuan	123
Effects of ELID on High Speed Grinding of Partially Stabilized Zirconia Z.T. Shang, H. Huang, S.Q. Wang, X.M. Sheng and H.Q. Mi	131
An Accurate Digital Grinding Method on Inner Surface of Thin-Walled Rotary Part Z.W. Ren, Y.Q. Wang, Z.Y. Jia and X.J. Sheng	137

II. Dressing and Truing for Grinding: Modelling, Characterisation and Novel Techniques

Modeling of Laser Dressing for Metal-Bond Diamond Grinding Wheel X.Y. Wang, R.K. Kang, W.J. Xu, L.J. Wang and D.M. Guo	145
Single Diamond Dressing Characteristics of CMP Polyurethane Pad Y.S. Liao, M.Y. Tsai, J.C. Sung and Y.L. Pai	151
Amorphous Diamond Dresser for CMP Fixed Abrasives Pad P.L. Tso and Y.L. Pai	157
Laser Truing and Dressing of Small Vitrified CBN Grinding Wheel Y.B. Wu, X.Y. Wang, T. Tachibana and M. Kato	163
Development of Laser Dresser for Resin Bonded Diamond Wheel H. Matsuura, K. Hane, Y. Kunieda, N. Yoshihara, J.W. Yan and T. Kuriyagawa	169
Development of a New Laser Conditioning Method for Ultra-Fine Grit Diamond Wheels Y. Kunieda, H. Matsuura, S. Kodama, N. Yoshihara, J.W. Yan and T. Kuriyagawa	175
A Study of Wheel Wear and Truing Method of a Ball Type Wheel X.J. Wu, Y. Kita and K. Ikoku	181
Development of Solid-Type Diamond Rotary Dresser Utilizing CVD Diamond Disc - Application to Low-Speed Dresser - A. Kubo and J. Tamaki	187

III. Finishing, Lapping, Honing and Polishing: Processes, Characterisation and Novel Techniques

Investigation of Thermo-Chemical Polishing of CVD Diamond Film W.C. Chou, C.L. Chao, H.H. Chien, K.J. Ma and H.Y. Lin	195
A Study of Basic Characteristics of Polishing Using Particle-Type Electro-Rheological Fluid T. Tanaka	201
Vibration-Assisted Magnetic Abrasive Polishing S.H. Yin and T. Shinmura	207
Development of a Resin-Coated Micro Polishing Tool by Plasma CVD Method - Electrorheological Fluid-Assisted Polishing of Tungsten Carbide Micro Aspherical Molding Dies- T. Kaku, N. Yoshihara, J.W. Yan, T. Kuriyagawa, K. Abiko, Y. Mikami and M. Noguchi	213
Experimental Research on Ultra-Smooth Surface Polishing Based on Two-Dimensional Vibration of Liquid Z.N. Guo, X.Z. Huang, Z.G. Huang, Z.Q. Yu, T.M. Yue and W.B. Lee	219
An Experimental Study of the Polishing Process for MgO Single Crystal Substrate K. Wang, R.K. Kang, Z.J. Jin and N.H. Wang	225
Design of Completely Inserted and Feeding Electrode for Female Screw in Electrochemical Finishing P.S. Pa	231
Development of Face Magnetic Inductor with Permanent Magnets for Deburring Using MAF Process S.L. Ko, Y.M. Baron and J.I. Park	237
Development of Effective Magnetic Deburring Method for a Drilled Hole on the Inside of Tubing Using a Magnetic Machining Jig Y.H. Zou and T. Shinmura	243
Study of Internal Magnetic Field Assisted Finishing for Copper Tubes with MRF (Magneto-Rheological Fluid)-Based Slurry T. Sato, H. Yamaguchi, T. Shinmura and T. Okazaki	249

Development of Nano-Precision SynerGistic Finishing Process of ELID-Grinding and MRF for Silicon Mirror	
S.H. Yin, H. Ohmori, W.M. Lin and Y. Uehara	255
Magnetic-Field-Assisted Finishing with Axial Vibration -Deburring on Internal Holes and Internal Finishing of Pipes with Rectangular Cross-Sections-	
H. Fujita, T. Shinmura and H. Yamaguchi	261
Investigation on 4-Body Finishing Technology with Polishing Paste	
W.J. Zhou and Y. Tani	267
Characteristics of Free Form Finishing Applying V-CAM System	
W.M. Lin, H. Ohmori, T. Suzuki, Y. Uehara, Y. Watanabe and S. MORITA	273
A Try for Improvement of Performance in Dry Barrel Finishing by Centrifugal Disc Type	
K. Kitajima, A. Yamamoto and M. Izawa	279
Research on Material Removal of Magnetorheological Finishing	
G.W. Kang and F.H. Zhang	285
High-Efficiency Mirror Grinding of AlN by Ultra-Precision Plane Honing	
S. Suzuki, N. Yoshihara, J.W. Yan and T. Kuriyagawa	291
Study on Anodic Smoothing Velocity in Electrochemical Abrasive Lapping	
G.B. Pang, W.J. Xu, X.Y. Wang, A.D.Y. Xie, H.Y. Li and H. Wang	297
Experimental Investigation on Honing of Small Holes	
Y.J. Bai, L.H. Zhang and C.Z. Ren	303
High Speed Lapping Ellipsoid by Means of a Lapping Tool Bending Method	
J.D. Yang, Q. Liu, C.L. Tian, J.W. Guo and Y.H. Feng	309
Study on Mechanism and Experiment of Engine Cylinder by Laser Honing	
Y.K. Zhang, D.J. Kong, Y.H. Fu, J.Z. Lu, A.X. Feng and X.D. Ren	315

IV. Novel Abrasive Technologies: Processes, Characterisation and Applications

Cost Optimization of Abrasive Blasting Systems: A New and Effective Way for Using Blasting Nozzles	
V.N. Pi and A.M. Hoogstrate	323
Three-Dimensional Simulation of Liquid-Solid Two-Phase Flow Inside the Abrasive Water Jet Nozzle	
C.Z. Huang, R.G. Hou, J. Wang, X.Y. Lu and H.T. Zhu	329
Surface Characteristics of Ceramics Milled with Abrasive Waterjet Technology	
Y.X. Feng, C.Z. Huang, J. Wang, X.Y. Lu and H.T. Zhu	335
Fusion Identification for Wear Particles Based on Dempster-Shafter Evidential Reasoning and Back-Propagation Neural Network	
Y.B. Cao and X.P. Xie	341
Design of Robust Grinding Wheel Reciprocating Arrangement for Precision Point-Grinding Machining	
D.P. Wan, D.J. Hu, L.M. Xu, H.F. Wang and X.D. Yao	347
Improvement of Surface Texture of Stainless Steel by Utilizing Dry Blasting - 3rd Report: Effect of Blasted Texture on Adhesion of Plating -	
K. Minaki, K. Kitajima, Y. Nakahira, K. Minaki, M. Izawa and K. Tosha	353

V. Grinding and Nano-Processing of Brittle Materials: Mechanisms, Characterisation, Simulation and Novel Techniques

Experimental Investigations of Silicon Wafer Grinding	
J.H. Liu, Z.J. Pei and G.R. Fisher	361
Microstructural Analysis for Si Wafer after CMG Process	
S. Kamiya, H. Iwase, T. Nagaike, L.B. Zhou, H. Eda and S. Kimura	367
Study on Structure Transformation of Si Wafer in Grinding Process	
L.B. Zhou, M. Yamaguchi, J. Shimizu and H. Eda	373
Experimental and Simulation Research on Influence of Temperature on Nano-Scratching Process of Silicon Wafer	
H. Okabe, T. Tsumura, J. Shimizu, L.B. Zhou and H. Eda	379

A Study on Deformation and Removal Mechanisms of Tungsten Carbide Using Nanoindentation	
H. Huang, R. Irwan and T. Kuriyagawa	385
Material Removal Mechanisms Involved in Rotary Ultrasonic Machining of Brittle Materials	
C.L. Chao, W.C. Chou, C.W. Chao and C.C.A. Chen	391
Numerical Simulation and Prediction of Surface Heterogeneity in Diamond Turning of Single-Crystalline Germanium	
J.W. Yan, Y.F. Fan, N. Yoshihara, T. Kuriyagawa and S. Yokoyama	397
A Finite Element Analysis of Stress Fields in Vickers Indentation on Brittle Materials	
B. Zhang and M. Yoshioka	403
Critical Cutting Condition for Brittle-Ductile Transition of KDP Crystals in Ultra-Precision Machining	
J.H. Wang, M.J. Chen, S. Dong, H.X. Wang, J.H. Zhang and W.J. Zong	409
Nano-Structures Fabrication by Laser Combined with Near-Field Scanning Optical Microscopy	
D.J. Wu, J. Zhuang, X.Y. Wang, R.K. Kang and F.L. Zhao	415
Ceramic Grindability Evaluation with PCA Method	
A.B. Yu, Y. Chen, D.W. Jia and X.L. Tian	421
Analysis of Mechanical Property of Crystal KDP and Simulation of Ultra-Precision Cutting Process in the Ductile Mode	
M.J. Chen, J.H. Wang, X.M. Chen and Y.C. Liang	427
Experimental Investigation of Brittle to Ductile Transition of Single Crystal Silicon by Single Grain Grinding	
F.W. Huo, Z.J. Jin, F.L. Zhao, R.K. Kang and D.M. Guo	433
A New Complex Grinding Method for Ceramic Materials Combined with Ultrasonic Vibration and Electrodischarge Machining	
K. Suzuki, T. Uematsu, M. Iwai, S. Ninomiya, S. Sano and T. Nakagawa	439
Experimental Research on Surface Integrity of Ceramic Nanocomposites in Two-Dimensional Ultrasonic Vibration Grinding	
B. Zhao, Y. Wu, F. Jiao, G.F. Gao and X.S. Zhu	445
Modeling of High Efficiency Removal in the Grinding of Alumina/ZrO₂ Nanocomposites with the Aid of Two-Dimensional Ultrasonic Vibration	
Y. Wu, A.G. Sun, B. Zhao and X.S. Zhu	451

VI. Grinding Wheels: Characterisation, Novel Techniques and Applications

Development of 3R Diamond Wheel by Thermoplastic Resin Bond	
H. Matsuura, Y. Kunieda, N. Yoshihara, J.W. Yan and T. Kuriyagawa	459
Development of a Rubber-Bonded Grinding Wheel - Studies on Aspherical Grinding -	
N. Yoshihara, J.W. Yan and T. Kuriyagawa	465
Manufacturing Porous Diamond with Skeleton Structure from PCD by EDM and its Application to Grinding Tools	
K. Suzuki, D. Zhang, Y. Shiraishi, M. Iwai, T. Uematsu, S. Ninomiya and S. Sano	471
Grinding Characteristics of Boron Doped Diamond Grits Grinding Wheel	
M. Iwai, K. Nakagawa, T. Uematsu, K. Takeuchi and K. Suzuki	477
The Effect of Workpiece Roundness of the Run-Out of CBN Electroplated Grinding Wheels	
T.R.A. Pearce, D.C. Fricker and A. Speight	483
Experimental Study on New Bonding Materials for Developing Nano-Grinding Plates	
W. Peng, C.Y. Yao, X. Lv, F.Q. Liu, T. Gao and J.L. Yuan	489
Development of Electroplated CBN Wheel with Cemented Carbide Base for Precision Grinding of Compressor Cylinder Vane Slot	
H. Gao, W.G. Liu and Y.G. Zheng	495
Shear Strength of Brazed Joint between Diamond Grains and Steel Matrix Using a Ni-Cr Filler Alloy	
J.H. Xu, W.F. Ding and F. Qian	501
Theoretical Analysis and Simulation of Airflow of Super High-Speed Grinding Wheel	
Y.D. Gong, H. Li and G.Q. Cai	507

Abrasion Performances of Stainless Steel/Carbon Fiber Reinforced Polyetheretherketone (PEEK) Friction Material	
H. Fu, B. Liao, B.C. Sun, A.P. Liu, F.J. Qi and Z.L. Ding	511

VII. Precision Measurment and Evaluation: Analysis, Modelling, Surface Characterisation and New Technologies

Roundness Modeling Using Fractal Interpolation	
M.C. Yoon and D.H. Chin	521
An Evaluation on Surface Topography Finished by Abrasive Jet with Grinding Wheel as Restraint	
C.H. Li, G.Q. Cai, S.C. Xiu and F. Liu	527
Key Technologies of Image Measurement for Curve Accurate Grinding	
Y.H. Zhang, L.H. Wang and D.J. Hu	533
Surface Roughness Prediction Based on Cutting Parameters and Nose Radius in Precision Turning	
Y.C. Liang, Y.S. Zhai, H.X. Wang, Q.S. Bai and Y. Zhao	539
Measurement of Elastic Modulus and Residual Stress of Diamond Thin Films	
D.H. Xiang, M. Chen, Y.P. Ma and F.H. Sun	545
Quantitative Adhesion Measures of Diamond Films Using A Blister Test	
X.G. Jian, L.D. Shi, M. Chen and F.H. Sun	551
Analysis of Stress-Induced Birefringence in Nd:YAG Crystal	
H. Matsuura, Y. Kunieda, N. Yoshihara and T. Kuriyagawa	557

VIII. Micro-Machining, Fabrication and Forming: Characterisation, Novel Techniques and Applications

Trouble Diagnosis in Machining the Micro Grooves for the Mold of PDP Barrier Rib	
N.H. Kim, N.K. Kim and E.S. Lee	565
Machinability in Precision Cutting of Carbon Tool Steel for Small-Size Parts	
K. Okuda and Y. Takeno	571
Micro-Cutting of Polytetrafluoroethylene (PTFE) for Application of Micro-Fluidic Devices	
S. Hira and M. Yoshioka	577
Development of Small Radius Ball End Mill for Deep Precision Machining - Feasibility of Highly Accurate Deep Precision Machining with Less Vibration -	
T. Akamatsu, K. Kitajima, Y. Matsumoto and T. Kiriyaama	583
Micromachining Characteristics of Sapphire with Fifth HG Nd:YAG Laser	
T. Noji, K. Nakamura, H. Horisawa and N. Yasunaga	589
Technique of Brass Spiral Structure Deposition Using Micro EDM in Gas	
Z.L. Wang, B.D. Jin, G.H. Cao, Z.W. Wei and W.S. Zhao	595
Discussion on the Radial Superresolution of the Two-Photon Microfabrication	
P. Wei, Y. Zhu, Q.F. Tan, G.H. Duan and G.H. Gao	601
Development of a Silicon Based Air-Breathing Micro Direct Methanol Fuel Cell	
L.D. Wang, J.S. Liang, C. Liu and G.Q. Sun	607
Direct Fabrication of Bulk Nanostructured Ceramic from Nano-Al₂O₃ Powders by Selective Laser Sintering	
L.D. Shen, Y.H. Huang, Z.J. Tian and G.R. Hua	613
Preparation and Properties of PZT Bimorph on Metal Substrate by Hydrothermal Method	
L.Q. Du, Y. Lv, W.J. Dong and X.G. Gao	619
Bending Deformation of Pure Titanium Plate in CO₂ Laser Forming	
K. Okuda, Y. Sugie and M. Nunobiki	625
Forming Fine V-Grooves on a Tungsten Carbide Workpiece with a PCD Electrode by EDM	
S. Sano, K. Suzuki, W.L. Pan, M. Iwai, Y. Murakami and T. Uematsu	631
Non-Traditional Forming Process of Sheet Metal Based on Laser Shock Waves	
J.Z. Zhou, H.X. Liu, C.J. Yang, X.G. Cao, J.J. Du and M.X. Ni	637
Analysis of the Replication Properties of Lightguiding Plate for Micro Injection Compression Molding	
Y.K. Shen, H.J. Chang and L.H. Hung	643

The Analysis of Focused Ion Beam Processing Characteristics for Micro Mold Fabrication H.J. Choi, E.G. Kang, W.P. Hong, S.W. Lee and Y.J. Choi	649
 IX. Advances in Machining: Cutting Performance, Machine Tools, Cutting Tools and Novel Techniques	
Ecological Deep Hole Drilling by Novel Coated and Designed Drill Y. Murakami and T. Yamamoto	657
High Speed Milling of Ti6Al4V Alloy with Minimal Quantity Lubrication W. Zhao, N. He and L. Li	663
Research on Heating Density Function and Temperature Field Mathematical Model for Milling Insert with 3D Complex Groove Z.J. Li, Y.N. Cheng, Y.B. Wang and Y.G. Zhao	669
A Physical Machining Accuracy Predicting Model in Turning S.F. Zhang, Z.H. Sha and R.K. Kang	675
Finite Difference Modeling of Cutting Temperature in Machining of A6061-T6 Aluminum Alloy at Ultra High Cutting Speeds T. Obikawa, A. Basti and J. Shinozuka	681
A Comparative Study of Stone Sawing with Thin and Normal Blades Q.L. Han, Y. Li and X.P. Xu	687
Theoretical Analysis and Simulation of the Effect of Vibration Amplitude on Cutting Force in Precision Ultrasonic Vibration Cutting Z.S. Lu and L. Yang	693
Preparation of Turbulated Cooling Hole for Gas Turbine Blade Using Electrochemical Machining M. Wang, D. Zhu, N.S. Qu and C.Y. Zhang	699
Effect of Tool Flank Wear on the Orthogonal Cutting Process X.L. Zhao, Y. Tang, W.J. Deng and F.Y. Zhang	705
Optimized Machining Condition Selection for High-Quality Surface in High-Speed Finish Milling of Molds S.W. Lee, S.H. Nam, H.J. Choi, E.G. Kang and K.Y. Ryu	711
Simulation of Burr Formation in Feed Direction in Turning A.A. Toropov and S.L. Ko	719
Active Braze Coated Diamond (ABCD) J.C. Sung, S.C. Hu and Y.S. Chang	725
Investigation of Toughness and Wear Resistance of a-C/a-C:Cr Multilayer Coatings K.J. Ma, H.H. Chien and C.L. Chao	731
Fabrication of Diamond Micro Tool Array (DMTA) for Ultra-Precision Machining of Brittle Materials Q.L. Zhao, D.G. Xie, E. Brinksmeier, O. Riemer and K. Rickens	737
Autoregressive Spectrum Analysis of Vibration and Condition Monitoring of Self-Propelled Rotary Tool W.S. Hao, X.S. Zhu, B.J. Tian and M.R. Chi	743
Investigation on the Cutting Performance of the Super Alloy with Thermal Sprayed Coatings D.L. Wang and X. Li	749
Deposition of Smooth Diamond Films with High Adhesive Strength on WC-Co Inserts and Their Cutting Performance in Turning GFRP H.G. Xue, F.H. Sun, Y.P. Ma and M. Chen	755
Study on Magnetic Barrel Machine Equipped with Three-Dimensional Arrangement of Magnets Y. Zhang, M. Yoshioka and S. Hira	761
An Experiment Investigation for Dynamics Characteristics of Grinding Machine Y.X. Jiang, W.X. Tang, G.L. Zhang, Q.H. Song, B.B. Li and B. Du	767
Recognition on Rolling Bearing's Condition of Grinding Machine by Using a Novel Approach-Wavelet Hilbert Marginal Spectrum H.K. Li, X.J. Ma, Q.M. Ren and J.L. Zhao	773

Study on the Application of the Combined Prediction Modeling Method to Thermal Error Modeling on NC Machine Tools	
Y.X. Li, J.G. Yang, Y.Y. Li, H.T. Zhang and G. Turyagyenda	779
Basic Properties of Coolant Supply Using a Coolant Flow Guided Flexible Sheet	
S. Ninomiya, M. Iwai, K. Suzuki, Y. Shiraishi, T. Shimizu and T. Uematsu	785
Modeling of Micro-Positioning System Using Direct Mapping and Polynomial Fit for Precision Grinding Process Control	
S. Tse and Y. Gao	791
