

Table of Contents

The Effect of Surface Irregularities, Subsurface Layers, Pressure, Lubrication, and Sliding Speed on Friction Resistance to Sliding in Metals B. Avitzur	1
The Mechanics of Plastic Deformation of Surface and Subsurface Layers in Rolling And Sliding Contact K.L. Johnson	17
Plastic Analysis of Near-Surface Zones in Sliding Contact of Metals F.E. Kennedy	35
Subsurface Fracture and the Wear of Brittle Solids E. Ling and I. Finnie	49
A Survey of the Development of Subsurface Zones in the Wear of Materials S.L. Rice, H. Nowotny and S.F. Wayne	77
The Role of Microstructure in Subsurface Damage Induced by Sliding Contact J.J. Wert	101
Combined Thermal - Mechanical Effects in Frictional Sliding A. Azarkhin, J.R. Barber and R.L. Rolf	135
The Layered Contact System with Paraboloidal Surfaces Y.P. Chiu	161
Propagation of an Inclined Subsurface Crack in Rolling/Sliding Contact Fatigue M. Kaneta, T. Okazaki and Y. Murakami	191
Elastoplastic Finite Element Analysis of Spheres in Contact M. Taalebinezhad and N. Saka	213
