Preface

Keynote Papers

Aspects of Novelty Detection

K. Worden, G. Manson and C. Surace

1

3

Identification of Structural Property Degradations by Computational Model Updating

17

Identification of Structural Property Degradations by Computational Model Updating

M. Link, S. Stöhr and M. Weiland

19

Structural Identification and Health Monitoring on the Historical Architectural Heritage

35

Structural Identification and Health Monitoring on the Historical Architectural Heritage

A. de Stefano

37

Structural Analysis Methods for Structural Health Management of Future Aerospace Vehicles

55

Structural Analysis Methods for Structural Health Management of Future Aerospace Vehicles

A. Tessler

57

Damage Assessment of Structures-An Air Force Office of Scientific Research Structural Mechanics Perspective

67

Damage Assessment of Structures - An Air Force Office of Scientific Research Structural Mechanics Perspective

V. Giurgiutiu

69

1A. Damage Location and Quantification I

75

Multi-Phased Array for Damage Localisation

P. Malinowski, T. Wandowski, I. Trendafilova and W.M. Ostachowicz

77

Generalized Fourier Coefficients and Applications to Damage Detection in Rods

A. Morassi

83

A Multi-Algorithm Procedure for Damage Location and Quantification in the Field of Continuous Static Monitoring of Structures

F. Lanata and D. Posenato

89

Damage Localization Using Levenberg-Marquardt Optimization

D.L. Parker, W.G. Frazier and M.A. Gray

95

Finite Element Model Updating of a Steel-Concrete Composite Moment - Resisting Structure with Partial Strength Joints

O.S. Bursi, M. Molinari, A. Savadkoohi and D. Zonta

101

Damage Localization in Systems with Unknown Inputs

D. Bernal

107

1B. Signal Processing I

	113
Guided Waves in Steel Rails – Experimental Works and Wavelet Signal Processing	
M. Rucka and K. Wilde	115
Experimental Application of a Damage Localisation Technique Based on Smoothed Proper Orthogonal Modes	
U. Galvanetto, L. Monopoli, C. Surace and A. Tassotti	121
Vibration-Based Structural Damage Detection and Precise Assessment via Stochastic Functionally Pooled Models	
F.P. Kopsaftopoulos and S.D. Fassois	127
On the Applicability of the Ho-Kalman Minimal Realization Theory	
R. Spadavecchia, A. de Stefano and D. Sabia	133
A Principal Component Analysis of Acoustic Emission Signals from a Landing Gear Component	
R. Pullin, J.J. Hensman, K.M. Holford, K. Worden and S.L. Evans	139
Damage Detection Using Prior Wavelet Decompositions	
D. Chetwynd, K. Worden, F. Mustapha and J.A. Rongong	145

2A. Fatigue Damage

	151
Monitoring of Growing Fatigue Damage Using the E/M Impedance Method	
K.J. Xing and C.P. Fritzen	153
Fatigue Damage Prevention on Turbine Blades: Study of Underplatform Damper Shape	
T. Berruti, C.M. Firrone, M. Pizzolante and M.M. Gola	159
In-Situ Load Testing: A Theoretical Procedure to Design a Diagnostic Cyclic Load Test on a Reinforced Concrete Two-Way Slab Floor System	
A. De Luca, N. Galati, A. Nanni and T. Alkhrdaji	165
System Fatigue Damage Reliability Assessment of Railway Riveted Bridges	
C.S. Wang, Y. Xu, A.R. Chen and W.Z. Chen	173
Fatigue Behavior of RC Slab Retrofitted with Carbon Fiber Mesh after Different Levels of Pre-Damage	
S.Y. Seo, H.D. Yoon and C.W. Park	179

2B. Damage Assessment

	185
Assessing the Feasibility of Monitoring the Condition of Historic Tapestries Using Engineering Techniques	
J.M. Dulieu-Barton, M. Sahin, F.J. Lennard, D.D. Eastop and A.R. Chambers	187
Damage Assessment of Beams Using Flexural Wave Reflection Coefficients	
S.P. Shone, B.R. Mace and T.P. Waters	193
Damage Assessment of Nanostructures	
N.M. Pugno	199
Damage Detection in an Aluminium Plate with an Active Constrained Layer Damping Treatment	
D. Chetwynd, T.L. Lew, K. Worden and J.A. Rongong	205
An Investigation on Damage Detection in Aircrafts Panels Using Nonlinear Time Series Analysis	
I. Trendafilova, E. Manoach, M.P. Cartmell, W.M. Ostachowicz and A. Zak	213

3A. Condition Monitoring

	219
Modal-Model Applications for Large Energetic Machines	
P. Kurowski	221
Bayesian Approach to Condition Monitoring of PRC Bridges	
D. Zonta, M. Pozzi and P. Zanon	227

Near Real-Time Monitoring of Bead Area Damage in Rolling Tires Using a Rotating Wheel Model and Multi-Directional Vibration Data	
N.C. Yoder, T.J. Johnson and D.E. Adams	233
New Image Processing Tools for Structural Dynamic Monitoring	
J. Morlier, P. Salom and F. Bos	239
Nonstationary System Monitoring Using Cointegration Testing Method	
Z. Xu and Q. Chen	245

3B. Signal Processing II

	251
Wavelet Analysis for Damage Identification in Composite Structures	
J. Grabowska, M. Palacz, M. Krawczuk, W.M. Ostachowicz, I. Trendafilova, E. Manoach and M.P. Cartmell	253
Experimental Modal Analysis for Damage Detection of Buildings via Gabor Transform Technique	
C. Valente, D. Spina and S. Gabriele	259
Advanced Rolling-Element Bearing Diagnostics Based on Cyclic Spectral Analysis	
J. Antoni and R. Boustany	265
Bearing Fault Detection Using Higher-Order Statistics Based ARMA Model	
F.C. Li, L. Ye, G.C. Zhang and G. Meng	271

4A. Case Studies-Civil Structures I

	277
Structural Health Monitoring on Real Scale Model of a Masonry Triumphal Arch	
G. Damonte, S. Podestà, G. Riotto, S. Lagomarsino, G. Magonette and F. Marazzi	279
Rc Infilled Frame: Shaking Table Tests on a Full Scale Model	
E. Candigliota and A. Le Maout	285
Damage Quantification and Monitoring in Masonry Monuments through Digital Photogrammetry	
J. Armesto, P. Arias, C. Ordóñez, H. Lorenzo and N. Caparrini	291
Experimental Seismic Damage Quantification in a 3-Storey Laboratory Structure	
O.R. de Lautour and P. Omenzetter	297

4B. System Diagnosis-Aeroenautical Structures

	303
A Framework for Novelty Detection in Jet Engine Vibration Data	
D.A. Clifton, P.R. Bannister and L. Tarassenko	305
Structural Health Monitoring Experimental System Implemented in a Turboprop Commercial Aircraft	
I. Bovio and L. Lecce	311
Effect of Crowning of Dovetail Joints on Turbine Blade Root Damping	
M. Allara, S. Zucca and M.M. Gola	317
Comparison of RBF Neural Network and Support Vector Machine on Aero-Engine Vibration Fault Diagnosis	
K. Xiong, D.X. Jiang, Y.S. Ding and K. Li	323

5A. Case Studies-Civil Structures II

	329
Instantaneous Identification of Bouc-Wen-Type Hysteretic Systems from Seismic Response Data	
R. Ceravolo, G.V. Demarie and S. Erlicher	331
Assessment of Damage Due to Earthquake-Induced Pounding between the Main Building and the Stairway Tower	
R. Jankowski	339

The Umberto I Gallery in Naples: The Influence of Corrosion Damage on the Seismic Performance of the Iron Roofing Structure	
R. Landolfo, G. Di Lorenzo, M.R. Guerrieri, O. Mammanna and F. Portioli	345
Experimental and Numerical Modal Identification of the Fossanova Gothic Cathedral	
G. de Matteis, I. Langone, F. Colanzi and F.M. Mazzolani	351
Fatigue and Fracture Evaluation of a 70 Year Old Steel Bridge	
C.S. Wang, H. Qian, A. Zhan, Y. Xu and D.L. Hu	359
The Structural Stability Analysis of a Container Crane According to the Boom Shape Using Wind Tunnel Test	
S.W. Lee, T.W. Ahn, D.S. Han, T.H. Kim and G.J. Han	365

5B. Sensors and Measurement Strategies I

Measurement of Acoustic Emission Signals: Influence of the Couplant	373
A. Fasana and L. Garibaldi	375
A Numerical Determination of Acoustic Emission Sensor Response in Plates Using Dispersion Curves	
R. Pullin, P.T. Theobald, K.M. Holford and S.L. Evans	381
Sensor Fault Identification Using Autoregressive Models and the Mutual Information Concept	
P. Kraemer and C.P. Fritzen	387
Design and Numerical Simulation of an Optic Fibre Sensor for Damage Assessment of Structures	
C. Delprete and C. Rosso	393
Broadband Source-Based Interrogation Scheme of Fiber Bragg Grating Sensors for Structural Health Monitoring	
D. Tosi, M. Olivero and G. Perrone	399
Energy Harvesting for Autonomous Sensing	
D.J. Inman, J. Farmer and B.L. Grisso	405

6A. Damage Location and Quantification II

Crack Detection in Beams by Means of the Driving Force Parameters Variation at Non-Linear Resonance Vibrations	411
A.P. Bovsunovsky and O. Bovsunovsky	413
Minimum Relative Entropy Criterion for Damage Detection and Location	
A. Kyprianou, C. Mares, C.D. Charalambous and J.E. Mottershead	421
Structural Damage Identification Using Low Frequency Non-Resonance Harmonic Excitation	
A. Świercz, P. Kołakowski and J. Holnicki-Szulc	427

6B. Damage Mechanisms

Modelling Damage Progression by a Statistical Energy-Balance Algorithm	433
F. Bosia, N.M. Pugno, G. Lacidogna and A. Carpinteri	435
Finite Element Analysis of an Improved Center Crack Specimen	
M.R. Ayatollahi, M.R.M. Aliha and S. Rahmanian	441
Distributions of Local Damage Variable and Local Plastic Tensile Strain and Precursors to Failure of Quasi-Brittle Pure Bending Beam	
X.B. Wang	447

7A. System Diagnosis-Output Only Vibration Based Methods

Using the Detection and Relative Damage Quantification Indicator (DRQ) with Transmissibility	453
N.M.M. Maia, A.M.R. Ribeiro, M. Fontul, D. Montalvão and R.P.C. Sampaio	455

An Updated Comparison of the Force Reconstruction Methods	461
M. Klinikov and C.P. Fritzen	
Output-Only Technique for Parameter Identification of Nonlinear Systems Working under Operational Loads	467
J. Iwaniec	
Combining Cyclostationarity and the Frequency Domain Subspace Technique for Operational Modal Analysis	473
J. Antoni, D. Hanson and B. Randall	
Automated Operational Modal Analysis as Structural Health Monitoring Tool: Theoretical and Applicative Aspects	479
C. Rainieri, G. Fabbrocino and E. Cosenza	

7B. Sensors and Measurement Strategies II

	485
Plastic Optical Fiber Displacement Sensor for Cracks Monitoring	487
M. Olivero, G. Perrone, A. Vallan and S. Abrate	
Dynamics of Structures with Piezoelectric Sensors and Actuators for Structural Health Monitoring	493
D. Mateescu, Y. Han and A. Misra	
Wireless Sensor Network Based Bridge Monitoring System	499
T. Uhl, A. Hanc, K. Tworkowski and Ł. Sekiewicz	
Structural Health Monitoring of Aerospace Structures with Sol-Gel Spray Sensors	505
A. Ouahabi, M. Thomas, M. Kobayashi and C.K. Jen	
Displacement Measurement of an Existing Long Span Steel Box-Girder Using Terrestrial Laser Scanning	511
H.M. Lee, Y.H. Kwon, H.S. Park and I. Lee	
Computing Method for Estimating Strain and Stress of Steel Beams Using Terrestrial Laser Scanning and FEM	517
D.S. Kang, H.M. Lee, H.S. Park and I. Lee	

8A. Modelling and Assessment in Composites

	523
Damage Assessment of Adhesively Bonded FRP Beams Using Modal Parameters	525
A.M. Ali, M.M. Abdel Wahab, A.D. Crocombe and I.A. Ashcroft	
Dynamic Behaviour of Undamaged and Damaged Multilayered Composite Plates	531
M. Gherlone and M. Di Sciuva	
Influence of Temperature Fields on Wave Propagation in Composite Plates	537
P. Kudela, W.M. Ostachowicz and A. Zak	
On the propagation of Lamb Waves in Viscoelastic Composites for SHM Applications	543
M. Calomfirescu and A. Herrmann	

8B. Numerical Modelling

	549
An Interval Uncertainty Based Method for Damage Identification	551
S. Gabriele, C. Valente and F. Brancaloni	
Experimental and Numerical Coupling Proof of Conical Frictional Joints	557
D. Szwedowicz and J. Bedolla	
Computational Approaches for Good Alternative Solutions Based Load Resistance Capacity in Design of Steel Moment-Resisting Frames	563
B.H. Choi	
An Interval Parameter Perturbation Method for Predicting the Natural Frequency Bounds of Intelligent Truss Structures with Uncertain-But-Bounded Parameters	569
W.Y. Chen, F.L. Chu, S.Z. Yan and K.Y. Wang	

9A. Damage Location and Quantification III

Damage Mechanisms Interpreted by Acoustic Emission Signal Analysis A. Carpinteri, G. Lacidogna and A. Manuello	577
Locating Damage In Waveguides From Point FRF Measurements S.P. Shone, B.R. Mace and T.P. Waters	583
Damage Localization Based on Power Spectral Density Analysis S.E. Fang, R. Perera and M.C. Huerta	589
Application of the Higher Modes to Crack Identification in a Cantilever Beam Y.X. Liu, W.W. Zhang and H.W. Ma	595
Incipient Crack Identification in Beam Structures Using the Slope of the Anti-Resonance Curve D.S. Wang, H.P. Zhu and B. He	601
Leak Location in a T-Shaped Pipe with CFD Modelling M. Taghvaei, S.B.M. Beck, W.J. Staszewski and J.B. Boxall	607

9B. Advanced Methods of NDT

	613
Structural Integrity Monitoring of Composite Pipes N. Constantin, A. Mihai, M. Găvan, Ș. Sorohan, C. Dumitrașcu and V. Anghel	615
Damage Monitoring of Composite Materials Using Pulsed Phase Thermography and Thermoelastic Stress Analysis T.R. Emery and J.M. Dulieu-Barton	621
Experience and Technologies in NDT of Ropes V. Carriatore, A. Canova, A. Vallan and B. Vusini	627
A Novel Ultrasonic Technique to Detect Damage Evolution in Quasi-Brittle Materials P. Antonaci, P.G. Bocca, D. Masera, N.M. Pugno, M. Scalerandi and F. Sellone	633
Acoustic Techniques for Wind Turbine Blade Monitoring K. Burnham and G. Pierce	639
Vibration-Based Damage Assessment for Controller Reconfiguration: Application to an Oilpan B. Peeters, S. Kanev, M. Verhaegen and H. Van der Auweraer	645

10A. System Diagnosis - Impact

	651
Effect of Impact-Fatigue on Damage in Adhesive Joints J.P. Casas-Rodriguez, I.A. Ashcroft and V.V. Silberschmidt	653
Robust Post-Accident Reconstruction of Loading Forces Ł. Jankowski, M. Wiklo and J. Holnicki-Szulc	659
Damage Assessment through Impact Force History Recording N. Constantin, M. Găvan, M. Sandu, Ș. Sorohan and V. Anghel	665
Effect of the Strain Rate on the Mechanical Behaviour of Epoxy Adhesives L. Goglio, M. Peroni and M. Rossetto	671

10B. System Diagnosis - Vibration Based Techniques

	677
Real-Time Flutter Detection from In-Flight Vibration Data T. Uhl and M. Petko	679
Lateral Vibration of Footbridges under Crowd-Loading: Continuous Crowd Modeling Approach J. Bodgi, S. Erlicher and P. Argoul	685
Reconstruction Problem of Reinforced Concrete Beams under Harmonic Excitations S. Kokot and Z. Zembaty	691
Active Vibration Control of a Cracked Composite Beam by MSM Actuators K. Majewska, A. Zak and W.M. Ostachowicz	697
