Committees

Preface

Multiscale Modelling of Softening Materials

I.M. Gitman, H. Askes and L.J. Sluys 1

Fretting Fatigue Phenomena on an all Aluminium Alloy Conductor

M. Boniardi, S. Cincera, F. D'Errico and C. Tagliabue 5

Reliability of Fatigue Behaviour of Weld Metal

N. Gubeljak, J. Vojvodič-Tuma, J. Predan and Z. Tišma 9

Cohesive Zone Modeling of Mode I Fracture in Adhesive Bonded Joints

M. Alfano, F. Furguele, A. Leonardi, C. Maletta and G.H. Paulino 13

The Use of the Singular Elastic Peak Stress Evaluated by FE Analyses for Fatigue Strength Assessment of Welded Joints

B. Atzori, P. Lazzarin and G. Meneghetti 17

Eurocode 3's Standard Curves and Theory of Critical Distances to Estimate Fatigue Lifetime of Steel Weldments

L. Susmel 21

Behavior of Microbiological Influenced Corrosion of the Ship Plate Steel in Marine Environment

Q.F. Li, C.H. Li, P. Long and L.L. Xue 25

A New Approach for Critical Chloride Content in (Non)Carbonated Concrete

I.S. Yoon and E.A.B. Koenders 29

Cyclic Damage Evolution in a PMC Laminate

A. Plumtree and M. Melo 33

Effect of Triaxiality on Damage Parameters in Adhesive

I. Hilmy, M.M. Abdel Wahab, A.D. Crocombe, I.A. Ashcroft and A.G. Solana 37

The Brittle Fracture of Polycrystalline Zinc

G.M. Hughes, G.E. Smith, P.E.J. Flewitt and A.G. Crocker 41

Automatic 3-D Crack Propagation Calculations in Industrial Components: A Pure Hexahedral versus a Combined Hexahedral-Tetrahedral Approach

G. Dhondt 45

Repair of Cracked Structures under Dynamic Load Using Electromechanical Admittance Approach

C.P. Provdakis 49

Modeling Crack Initiation and Propagation in Nickel Base Superalloys

A.M. Korsunsky, X. Song, J. Belnoue, L.D.G. Prakash, D. Dini and M.J. Walsh 53

How Does Bone Detect Cracks?

D. Taylor, J. Hazenberg, F. O'Brien and T.C. Lee 57

Micro-Damage Mechanisms and Property Fluctuation of Recycled Aggregate Concrete

J.Z. Xiao, Q. Liu, J.T. Du and C.Z. Zhang 61

An Evaluation of Fatigue Crack Growth in a Reactor Steel in Air and Water Environments Considering Closure Effects

I. Černý and V. Linhart 65

Fracture Analysis of Magnetoelastoelectric Composite Materials

R. Rojas-Díaz, F. García-Sánchez, A. Sáez and C.Z. Zhang 69

Interface Crack in Anisotropic Solids under Impact Loading

M. Wünsche, C.Z. Zhang, J. Sladek, V. Sladek and S. Hirose 73

A Probabilistic Extended Finite Element Approach: Application to the Prediction of Bone Crack Propagation

J. Grasa, J.A. Bea and M. Doblaré 77

Mechanical Behavior of High-Tension Bolted Joints with Varying Bolt Size and Plate Thickness

S.Y. Lee, C.W. Park, S.C. Kwon and H.H. Lee 81

Finite Element Analysis of the Cohesive Zone across a Strength Mismatched Bimetallic Interface V.G. Ukadgaonker and S. Bhat	85
A New Correction Procedure to Correct the Predicted Crack Extension Direction of a Mixed Mode Crack Path T. Lucht and F. M.H.Aliabadi	89
Shear Debonding of FRP from Concrete: The Influence of FRP Sheet Width on Load Carrying Capacity C. Carloni and L. Nobile	93
Probabilistic Analysis of Three-Dimensional Beams with Uncertain Damage C. Gentilini and L. Nobile	97
High Temperature Low Cycle Fatigue of Superalloys Inconel 713LC and Inconel 792-5A M. Petrenec, K. Obrtlík and J. Polák	101
Cyclic Plasticity of a Cracked Structure Subjected to Mixed Mode Loading S. Pommier	105
Molecule Mechanics Simulation on the Deformation and Damage Process in POSS Nanocomposite Y. Sun and F.L. Zeng	109
Cyclic Plastic Response and Fatigue Life of Materials J. Polák	113
Growth of Short Fatigue Cracks Emanating from Notches in an Austenitic-Ferritic Stainless Steel O. Kotecký, S. Degallaix and J. Polák	117
Aspects of the Modeling of High-Cycle Fatigue B. Paluszynski and T. Böhlke	121
Damage Assessment of Steel Bridge Members by Fatigue Vulnerability Considering Corrosion and Traffic Variation with Time H.J. Kim, D.J. Kim, H.C. Lee and S.H. Lee	125
Comparison of DBEM and FEM Crack Path Predictions with Experimental Findings for a SEN-Specimen under Anti-Plane Shear Loading R.G. Citarella and F.G. Buchholz	129
Progressive Failure Analysis of Composite Pressure Vessels by Finite Element Method L.L. Tong, Z.Q. Wang, S.H. Chen and B.H. Sun	133
Crack Growth Process of Ni-Single Crystal with Cathodic Hydrogen Charging H. Matsui and N. Takano	137
Rim Stress Analysis of Thin-Rimmed Gear G. Marunić	141
Effects of Conductive Fillers on the Dynamic Response and Fatigue life of Conductive Asphalt Concrete S.P. Wu, B. Li, J. Qiu and N. Li	145
Dynamic Crack Analysis in Functionally Graded Piezoelectric Solids by Meshless Local Petrov-Galerkin Method J. Sladek, V. Sladek and C.Z. Zhang	149
Time-Variant Reliability Analysis of Ship Structure Subjected to Fatigue and Corrosion S. Wang, X.H. Shi and J. He	153
Experimental Study on Fracture Properties of Cementitious Materials Y. Zhu and S.L. Xu	157
Comparison of Computational Crack Path Predictions with Experimental Findings for a Quarter-Circular Surface Crack in a Shaft under Torsion F.G. Buchholz, J. Wiebesiek, M. Fulland and H.A. Richard	161
Wire Cable Failures in Climbing Anchor Chocks J. Vogwell and J.M. Minguez	165
Experiment Studies on Fracture Energy of Cement Paste and Mortar S.L. Xu and Y. Zhu	169
Deformation and Damage Evolution of the Microstructure around Ti-Particles in IF Steel during Tensile Deformation O. León-García, R.H. Petrov and L.A.I. Kestens	173
Gearbox Failure Detection Using Growing Hierarchical Self-Organizing Map G.L. Liao, T.L. Shi and Z.R. Tang	177

Interfacial Fracture Toughness of APS Thermal Barrier Coating under High Temperature H.Y. Qi, X.G. Yang and R. Li	181
Fatigue Analysis of Forged Aerospace Components Based on Micro Structural Parameters M. Riedler, M. Stockinger, M. Stoschka and W. Eichlseder	185
Research on Fracture Damage Coupled with Crack Arrest by Anchorage Model of Discontinuous Jointed Rock Mass under the State of Complex Stress L.W. Zhang, S.C. Li and Y. Wang	189
Patternanalysis of the Severity of Multiple Crack Arrays P. Horst	193
Boundary-Singular Integral Equation Method to Calculate the Bending Center and Stress Intensity Factors of Cracked Cylinder under Saint-Venant Bending X.Y. Tang	197
A New Model for Fatigue Life Distribution of Concrete D.F. Zhao, Q.Y. Chang, J.H. Yang and Y.P. Song	201
Models for Estimating the Durability of Repeated Impacts I. Dumitru, L. Marsavina, N. Faur and I. Hajdu	205
Assessment of the Fatigue Behaviour of Friction Stir Welded Joints: Aluminium Alloy 6082-T6 P.M.G.P. Moreira, A.M.P. de Jesus, A.S. Ribeiro and P.M.S.T. de Castro	209
Mesoscopic Numerical Simulation Method for Fracture of Concrete Z.Q. Ying, C.B. Du and L.G. Sun	213
Microstructure Based Formability Characterization of Multi Phase Steels Using Damage Mechanics V. Uthaisangsuk, U. Prahl and W. Bleck	217
Microstructure and Strengthening Mechanism of TiCp/ZA-12 Composites W. Xiang and G.B. Ying	221
Failure Assessment and Reliability Analysis of CFRP Composite Pressure Vessel J. Shen, M.L. Zhang and D.Y. Hou	225
Identification of Damaged Bars in Three-Dimensional Redundant Truss Structures by Means of Genetic Algorithms E. Viola and P. Bocchini	229
Fatigue Analysis of Notched Shafts under Multiaxial Synchronous Cyclic Loading N. Pitatzis, G. Savaidis, A. Savaidis and C.Z. Zhang	233
Damage Behavior of Metallic Materials under Very High Cycle Fatigue G.C. Chai	237
Investigation of the Ballistic Performance of Two Different Polymer Matrix Composites M. Colakoglu	241
Fatigue Behavior of Corroded Structural Steel Members in Boundary with Concrete S. Kainuma, N. Hosomi and I.T. Kim	245
Fatigue Life of Multi-Spot Welded Structures P. Salvini, F. Vivio and V. Vullo	249
The Use of the Singular Elastic Peak Stress Evaluated by FE Analyses for Fatigue Strength Assessment of Welded Joints B. Atzori, P. Lazzarin and G. Meneghetti	253
Stress Intensity Factor for Cracks at the Toe of Welded Joints P. Livieri and R. Tovo	257
Fatigue Crack Propagation in Friction Stir Welded Joints of Particulate Metal-Matrix Composite A. Pirondi, L. Collini and D. Fersini	261
A Numerical Investigation about the Effects of the Riveting Operation on the Strength of Joints A. Soprano, F. Caputo and A. Grimaldi	265
Investigation of the Dynamic Damage of the Rocks Subjected to Short Pulse Laser S.L. Xu, D.Y. Xi, Z.P. Tang and Y. Du	269
Effect of Preformed Angle in Lap Zone on the Failure Procedure of Adhesively Bonded Aluminium Joint M. You, S. Yu, H.Z. Yu, Z. Li and W.J. Liu	273

The Inelastic Response Differences of Two Buildings Designed without and with Steel Braces	
J.A. Avila and A. Angeles	277
Microstructure and Mechanical Properties and Corrosion Behavior of Ti-Mo-Sn Alloys	
Y.F. Zheng and Y.B. Wang	281
An Evaluation of the Use of Fracture Mechanics Techniques for the Design of Orthotropic Decks	
W. de Corte and P. Van Bogaert	285
Study on Crack Propagation Behavior of Asphalt Concrete under Uniaxial Compression Load by Using CT	
T. Xie, Y.J. Qiu, Z.Z. Jiang and B. Lan	289
On the Study of Fatigue Crack Propagation in the Time Domain	
J.Z. Zhang, X.D. He and S.Y. Du	293
Characterization of Early Fatigue Damage in Welded Structures by Thermal Imaging	
J. Medgenberg and T. Ummenhofer	297
Stochastic Improvement of the Residual Strength of a Stiffened Panel	
F. Caputo, G. Lamanna and A. Soprano	301
CT Real-Time Analysis of Meso-Damage Propagation Law of Asphalt Concrete	
C.F. Ai, Y.J. Qiu, T. Xie and B. Lan	305
The Response Probability of Mesoscopic Damage in Sandstone to External Force and Temperature	
D.Y. Xi, S.L. Xu, Y. Du, T. Li and X.L. Wan	309
Fatigue Behaviour of Notched PVD-Coated Titanium Components	
S. Baragetti, L. Lusvarghi, F. Pighetti Mantini and F. Tordini	313
The Influence of Loading Ratio on Fatigue Crack Propagation Through a Bi-Material Interface	
L. Náhlík, P. Hutař and Z. Knésl	317
The Experimental Study on Fracture Characteristic of Rock	
G. Zhang, J.X. Chen, W.Y. Jiao and H.W. Zhang	321
Impact of Prior Loading on the Reliability of Safety Critical Systems	
D.J. Smith	325
Analysis of Thin Film Cracking and Buckling on Compliant Substrate by Fragmentation Test	
J. Andersons, S. Tarasovs and Y. Leterrier	329
Interaction Effects due to Overloads and Underloads on Fatigue Crack Growth	
F. Romeiro, M. de Freitas and M. da Fonte	333
Study on Propagation Rules of a Close Crack in Rockmass	
G. Zhang, J.X. Chen, Y. Li and L.L. Mao	337
Influence of Temperature and Increasing Traffic Flow on the Fatigue Damage of Welded Bridge Decks	
T. Guo, A.Q. Li and Z.X. Li	341
Fatigue Damage Sensing in Smart Carbon Fiber Concrete by Electrical Resistivity Measurement	
Z.H. Xu and Z.T. Liu	345
Hopf Bifurcation and Chaos Synchronization for a Class of Mechanical Centrifugal Flywheel Governor System	
Y.D. Chu, J.G. Zhang, X.F. Li and Y.X. Chang	349
Monitoring Analysis for the Velocity of Crack Propagation	
J.X. Chen, G. Zhang, H. Zhang and Y. Guan	353
The Interaction of a Cylindrical Elastic Inclusion with Semicircular Disconnected Curve and Linear Cracks in an Homogeneous Medium by SH-Waves	
Q. Hui and J.X. Zhao	357
Experimental Study on Mechanical Behaviors of the Prestressed Concrete Girder	
J.X. Chen, G. Zhang, H.F. Li and F.M. Chen	361
The Hysteretic Energy Analysis of Inelastic Structures during the Earthquake	
C.H. Zhai, H.B. Liu, N. Li and L.L. Xie	365
Concrete Damage Parameter and its Size Effect	
X.D. Wang, W.X. Zhu, A.M. Deng, D. Zhou and D.Y. Xu	369

Prediction of Welding Distortions of Stainless Steel Ship H. Li and H.L. Ren	373
Numerical Investigations of Corner Singularities in Cracked Bodies P. Hutař, L. Náhlík and Z. Knésl	377
Top Beam Flange Fracture Behavior in Steel Frame Connections under Gravity Loads H.B. Liu, C.H. Zhai, Y.S. Shao and L.L. Xie	381
Initial Aspects of Low-Cycle Fatigue Fracture of Martensitic Steels T. Eterashvili, T. Dzigrashvili and M. Vardosanidze	385
Structural Damage Survey Using Nondestructive Tests Based on Stress Waves Y.S. Cho and S.U. Hong	389
Numerical Modeling of Wave Propagation vs. NDT in Multi-Layer Media Y.S. Cho	393
Analysis of Chloride Penetration into the Corner Zone of Concrete Structure Member X.Y. Wang, H.S. Lee and H.M. Jung	397
Numerical Analysis of the Anisotropic Damage Evolution due to a Growing Mixed-Mode Crack K. Molla-Abbasi and H. Schütte	401
Study of Optimized Steel Truss Design Using Neural Network to Resist Lateral Loads Y.S. Cho, L. Xia, S.U. Hong, S.B. Kim and J.S. Bae	405
The Influence of Longitudinal Stiffeners on Weld Toe Stress Concentrations in Multi Planar Tubular KK Joints C.O. Woghiren and F.P. Brennan	409
Fatigue Strength of Three Dimensional Welded Joints: A Synthesis Based on the Strain Energy Density over a Control Volume M. Zappalorto, F. Berto and P. Lazzarin	413
A Study on the Evaluation of Probabilistic Durability Life for RC Structures Deteriorated by Chloride Ion D.S. Kim, H.S. Lee, S.M. Lee and X.Y. Wang	417
Prediction of the Elastic Modulus of Cement Paste as a Kinetic Hydration Model K.B. Park, H.S. Lee, X.Y. Wang and S.M. Lim	421
A Study on Water Penetration of Concrete under Water Pressure to Develop the Anti-Corrosion Repair System J.Y. Yoo, H.S. Lee, S.H. Tae and M.B. Chul	425
Characteristics of High Frequency Peening Methods and their Effects on the Fatigue Strength of Welded Details I. Weich and T. Ummenhofer	429
Study on the Mechanical Properties of Reinforcement Damaged by Reinforcement Corrosion H.S. Lee, J.W. Kyung and S.B. Lee	433
Effect of Carbon Fiber Sheets on Flexural Strengthening of RC Beams Damaged by Corrosion of Tension Rebar H.S. Lee, S.H. Shin and J.W. Kyung	437
Shear Retrofitting Effect of RC Beams Damaged by Corrosion of Stirrup Strengthened with CFS S.H. Tae, H.S. Lee and T.S. Kim	441
Failure Analysis of Roller Neck at a Cardboard Production Plant A. Göksenli and B. Eryürek	445
Fatigue Design of Welded Joints by Local Approaches: Comparison between Fictitious Notch Rounding and Strain Energy Averaging P. Lazzarin, F. Berto and D. Radaj	449
Anti-Corrosion Performance of Zn-Al Thermal Metal Spraying Method Using Steel Structures S.H. Lee, H.S. Lee, J.W. Kyung, C.S. Kang and M.H. Han	453
2ODE-IPD: An Object-Oriented Design Environment for Robust and Reliable Interdisciplinary Product Design A. Gayretli	457
Propagation of Fatigue Cracks Emanating from Sharp Notches under Different Loading Direction M. Benedetti, M. Beghini, L. Bertini and V. Fontanari	461

Friction Coefficient in High Tension Bolt Joints Using a Zn/Al Metal Spray Corrosion Resistance Method	
T.S. Kim, H.S. Lee, S.H. Tae and S.O. Oh	465
An Experimental Study on the Development of Structural Lightweight Concrete Using Micro Foam Agents	
J.Y. Choi, H.S. Lee and B.K. Lee	469
A Study on the Development Mechanism of Early Strength in Cement Mortar Using an Early-Strength Polycarboxylated Agent	
W.J. Park, H.S. Lee and K.B. Park	473
Study on an FEM Analysis to Evaluate Restrain-Performance of Surface-Finishes for Carbonation	
S.H. Lee, H.S. Lee and K.B. Park	477
Study on the Mechanism of Rebar Corrosion Considering the Relationship between Corrosion and Crack Width	
J.J. You, H.S. Lee and Y. Ohno	481
Study on the Prediction of the CO₂ Absorption Quantity in the Concrete According to the Surface-Finishes	
S.H. Lee, H.S. Lee and S.B. Lee	485
Residual Strength Research for Aluminum Alloy Sheet with Multiple Site Damage	
J.Y. Zhang, C.S. Wang, R. Bao and B.J. Fei	489
Two-Parameter Criteria for Ductile Crack Initiation and Propagation in High-Grade Line Pipes	
Y. Kayamori, P.S.J. Crofton and R.A. Smith	493
Effectiveness of Non-Linear Crack Mechanics under Plane Strain Conditions	
T. Teranishi and H. Nisitani	497
Numerical Simulation on Damage Effect of Explosion in Multilayer Mediums and Dimensional Analysis	
W. Cheng and J.G. Ning	501
A Numerical Method for Predicting the Chloride Diffusivity of Concrete with Interfacial Cracks	
J.J. Zheng, J.P. Pu and K.F. Mao	505
Improvement of MIC Behavior of Low Alloy Steel with Zn-Rich Epoxy Coating	
D. Liu, Q.F. Li, C.H. Li and L.L. Xue	509
The Constitutive Model for Isotropic Damage of Geomaterial	
Y.X. Liu, J.T. Zhou and Z.Y. Li	513
Stochastic Characteristics of Fatigue Crack Propagation for 2024-T3 Aluminium Alloy in Corrosive Environments	
R. Bao, J.Y. Zhang and B.J. Fei	517
Interaction of Circular Lining and Interior Linear Crack by Incident SH-Wave	
H.L. Li, G.C. Han and H. Li	521
A Unified Fatigue Life Calculation Model for Notched Components Based on Elastic-Plastic Fracture Mechanics	
G. Savaidis, A. Savaidis, O. Hertel and M. Vormwald	525
Local and Non-Local Approaches to Fatigue of Weldments: State of the Art and Possible Developments	
R. Tovo and P. Livieri	529
Numerical Testing for Dynamic Fracture of Three Point Bending Cement Mortar Specimen with Off-Center Edge-Crack	
G.P. Zou and P.X. Xia	533
Improvement of Fatigue Strength of Maraging Steel by Shot Peening	
N. Kawagoishi, T. Nagano, M. Moriyama and E. Kondo	537
Fatigue Crack Growth Resistance in Ni-Base Super Alloy	
K. Morino, N. Kawagoishi, Q. Chen, Y. Matsuyama and Y. Nakamura	541
Temper Embrittlement and Fracture Control Method Based on NGS Theory and Grain Refinement Technique	
Q.F. Li, X.F. Cui, H.M. Zhou and M. Liu	545
Effect of Isothermal Holding Temperature on NGS Kinetics of Phosphorus and Temper Embrittlement	
J. Wang, Q.F. Li and E.B. Liu	549

Finite Element Analysis of a Composite Bulkhead Structure A. Apicella, E. Armentani, R. Esposito and M. Pirozzi	553
Predicting Fatigue in Welded Joints: New Theories and some Practical Experience D. Taylor	557
Optimising Weld Process Conditions for Enhanced Fatigue Performance M.N. James, H. Lombard, D.G. Hattingh and A. Steuwer	561
Advanced Local Concepts for Assessing the Fatigue Durability of Welded Joints C.M. Sonsino, D. Radaj and W. Fricke	565
Experimental and Numerical Characterization of a Rail Steel Behavior under Cyclic Contact Stresses A. Mazzù	569
Fatigue Analysis of Structural Details of an Oceangoing LPG Ship S. Rudan, S. Tomašević and I. Senjanović	573
Micromechanical Analysis of Composites with Short Fibers and Particles A. Casaril, E. Rovaris Gomes, M.R. Soares and H.A. Al-Qureshi	577
Automatic Mixed-Mode Crack Propagation based on a Combined Hexahedral-Tetrahedral Approach D. Bremberg and G. Dhondt	581
On the Influence of the Corner Singularity on Kinking Mixed-Mode Crack Propagation H. Schütte and K. Molla-Abbasi	585
Behavior of Cracked Materials M. François	589
DBEM Crack Growth Simulation for a Riveted Aeronautic Reinforcement under Non-linear Contact Conditions R.G. Citarella, M. Lepore, A. Apicella and C. Cali	593
Research on High Arch Dam Failure Probability Based on Failure Mode Z.T. Chen and Q.W. Ren	597
Research on Standard of Acceptable Risk for High Arch Dam in Developing Countries Z.T. Chen and Q.W. Ren	601
Compression Test of Composite Sandwich Panel J.W. Lee, C.W. Kong, S.W. Eun, J.S. Park, Y.S. Jang, Y.M. Yi and G.R. Cho	605
Ductility of Ultra High-Strength Concrete Tied Columns under Combined Axial Load and Lateral Force J.K. Kim, S.H. Yoo, B.S. Han and S.W. Shin	609
New Fatigue Model for Service Life Assessment of Last Stage Blade in Steam Turbine Based on Liquid Corrosion and Dynamic Stress Y.H. Xie, D. Zhang and Z.P. Feng	613
Variation of Ultimate Concrete Strain at RC Columns Subjected to Axial Loads with Bi-Directional Eccentricities S.H. Yoo and S.W. Shin	617
Optimum Dosage of PP Fiber for the Spalling Control of High Strength Reinforced Concrete Columns S.H. Yoo, S.W. Shin and I.K. Kim	621
Numerical Analysis of the Crack Growth in a High Loaded Bolt Connection M. Knez, S. Glodež and J. Kramberger	625
Finite Element Analyses of Cracks in Piezoelectric Structures M. Kuna	629
Finite Element Analysis of a Polymer- Polymer Sliding Contact for Schallamach Wave and Wear M.A. Ashraf, B. Sobhi-Najafabadi, Ö. Göl and D. Sugumar	633
Fatigue Life Analysis of Al 8090 Helicopter Fuselage Panels M. Giglio, A. Manes and M. Fossati	637
Experimental Study of Interior Slab-Column Connections Subjected to Vertical Shear and Cyclic Moment Transfer M.S. Choi, I.J. Cho, B.S. Han, J.M. Ahn and S.W. Shin	641
Determination of the Fatigue Behavior of Aluminide Coatings by Means of the Impact Testing Method K. David, K.G. Anthymidis, P. Agrianidis and D.N. Tsipas	645

The Damping Effect on Constant-Ductility Seismic Demand Spectra of Inelastic Structures C.H. Zhai, M.H. Zhang and L.L. Xie	649
Fatigue and Tensile Properties of Pallets Made from Waste Plastics K. Takeda, T. Hiraba, R. Ebara, K. Shinagawa, M. Hirai, T. Nonomura and I. Morimoto	653
Models for Optimization of Gantry Crane Main Girder B. Aberšek and S. Mikluš	657
Crashworthiness Optimization of Crash Box in Automotive Structure H. Ghasemnejad, H. Hadavinia and G. Simpson	661
Hierarchical Models of Chemical Infiltrated Carbon/Carbon Composites R. Piat	665
The Influence of Plasma Cutting Process on the Fatigue Strength of High Strength Steel S960Q N. Jezernik, S. Glodež, T. Vuherer, B. Špes and J. Kramberger	669
Optimum Design of Construction Machine Parts N. Hattori, S. Nishida and H. Igawa	673
Solution Methods for General Stress Concentrators in Anisotropic Heterogeneous Media M. Kotoul, T. Profant, O. Ševeček and M. Krejčí	677
Micro- and Macro-Approach to the Fatigue Crack Propagation in High-Strength Pearlitic Steel Wires J. Toribio, B. Gonzáles, J.C. Matos and F.J. Ayaso	681
Numerical Modelling of Concrete Beams Reinforced with Pre-Stressed CFRP J. Alfaiate and T. Domingues	685
The Parametric Study of the Crack Growth in the Lubricated Rolling-Sliding Contact Problems R. Potočnik, J. Flašker, B. Zafošnik and S. Glodež	689
Gurson Model and Conic Programming for Pressure-Sensitive Materials J. Pastor, P. Thoré and C. Vandenbussche	693
Crack Identification in Gear Tooth Root Using Adaptive Analysis A. Belsak and J. Flašker	697
Evaluation of Fatigue Strength of Welded Joints by Local Strain Measurements at Weld Toe C. Casavola and C. Pappalettere	701
Fracture Analysis for Damaged Aircraft Fuselage Subjected to Blast J.S. Ju, X.G. Jiang and X.R. Fu	705
Modelling Crack Growth in the Life Assessment of Elevated Temperature Components K.M. Nikbin	709
Investigation of a Mode III Crack in Functionally Graded Magnetoelastoelectric Materials B.L. Wang and H.Y. Zhang	713
Fracture Moment Strength of Reduced Beam Section with Bolted Web Connections K.H. Moon, S.W. Han and J.E. Jung	717
Damage Detection of Building Structures Using Ambient Vibration Measurement S.H. Yoo, S.Y. Kim and S.W. Shin	721
Structural Optimization of Laminated Composite Plates for Maximum Buckling Load Capacity Using Genetic Algorithm O. Soykasap and Ş. Karakaya	725
Deterioration of Concrete Due to Combined Reaction of Carbonation and Chloride Penetration: Experimental Study I.S. Yoon	729
Flexural Behavior of High-Strength Lightweight Concrete Beam with Eco Lightweight Aggregates I.H. Jung, W.J. Yang, W.H. Yi, S.W. Jee and S.Y. Lee	733
Simulation of Failure in Hydrating Cement Particles Systems L.K. Tan, E. Schlangen and G. Ye	737
Comparison of Seismic Behaviors of Interior Joints in PT and RC Flat Plate Systems Y.M. Park, S.W. Han and J.H. Ryu	741
FEM Simulation and Experimental Test on Residual Stress of Cold Expansion Hole of Rectangular Plate X.J. Shao, J. Liu, Y.S. Liu and Z.F. Yue	745

An Experimental Study on the Influence of Steel Bar Corrosion in the Structural Performance of Bridge Piers	
I.S. Kang, H.S. Lee, H.M. Jung and T.S. Ahn	749
Modeling of Material Parameters of Marine Concrete for Service Life Prediction	
I.S. Yoon	753
Effect of Roughness on Fatigue Life of Open Holes	
Y.S. Liu, J. Liu, X.J. Shao and Z.F. Yue	757
Fully Coupled Fatigue Damage Analysis of Welded Steel Bridge Member under Traffic Loading	
T.Q. Zhou, Y. Hua and T.H.T. Chan	761
Analysis on the Temperature Field when Crack Arresting in an Axial Symmetry Metal Die by Pulse Current Discharged	
L.J. Zheng and Y.M. Fu	765
The Effect of Cracks on Chloride Penetration into Concrete	
I.S. Yoon, E. Schlangen, M.R.d. Rooij and K. van Breugel	769
An Experimental Study on the Influence of Steel Rod Corrosion in Concrete Cracks	
H.M. Jung and H.S. Lee	773
An Experimental Study on the Performance Evaluation of RC Beams to Calculate the Partial Reduction Coefficient of High Strength Glass Fiber Transparent Composite Panels	
I.S. Kang, H.S. Lee, J.D. Kim, J.H. Jang and J.Y. Seong	777
Stiffness Reduction for Flat Plate Systems due to Cracking	
Y.M. Park, S.W. Han and J.O. Cho	781
Investigation into Damage of Aluminum Gas-Filled Pressure Vessels under Hypervelocity Impact	
G.S. Guan, B.J. Pang and Y. Ha	785
Experimental Study on K-Dominance of Static Crack Tip in Functionally Gradient Materials	
W. Xu, X.F. Yao and L.Z. Wu	789
Failure Mechanism of Pure Nickel (Ni 200/201) under Thermo-Mechanical Loading	
H. Koeberl, G. Winter, M. Riedler and W. Eichlseder	793
A Modified Technique for FEM Stress Analysis in Practical Problem	
K. Ushijima and H. Nisitani	797
Onset of Microplasticity in Copper Crystal during Nanoindentation	
J. Horníková, M. Černý, P. Šandera and J. Pokluda	801
Fracture Analysis on the Invasion Problem of the Porous Material	
L.Q. Tang, Y. Yang and J.Y. Yang	805
Modelling of Effect of ASR on Concrete Microstructure	
O. Çopuroğlu and E. Schlangen	809
Parametric Variational Principle for Solving Coupled Damage Problem	
Y. Hua, B.H. Lv and T.Q. Zhou	813
The Asymptotic Elastic-Viscoplastic Field at Mode I Dynamic Propagating Crack-Tip	
Z.Q. Wang, J.B. Wang, W.Y. Liang and J. Su	817
Crack-Tip Stress Fields in FGMs under Anti-Plane Shear Impact Loading Using the Non-Local Theory	
X.S. Bi, X.F. Cai and J.X. Zhang	821
An R-Curve Approach for Fracture of Ultra High Performance Cementitious Composites	
X.G. Wu, S.M. Han, S.W. Kim and S.T. Kang	825
Direct Tensile Performance of UHPCC Element Based on Damage Mechanics	
S.M. Han, X.G. Wu, S.W. Kim and S.T. Kang	829
Damage Constitutive Relationship of SRC Member Nonlinear Analysis	
S.S. Zheng, S.L. Che, L. Li, L. Zhang and Q. Zhao	833
Seismic Damage Model for Steel Reinforced High Strength and High Performance Concrete Frame Joints	
S.S. Zheng, L. Zheng, L. Li, S.L. Che and L. Zhang	837
Characteristics of Fracture Mechanics for Crack Tip near the Interface between Steel and Concrete in Composite Structures	
S.S. Zheng, L. Li, S.L. Che, L. Zeng and J. Zheng	841

Theoretical Model for Interfacial Nonlinear Bond Softening Behavior between Embedded Steel and HSHPC	
S.S. Zheng, L. Li, G.Z. Deng, S.L. Che and W. Zhao	845
Theoretical Analysis and Experimental Study on Damage Probability of HSHP Concrete	
S.S. Zheng, S.L. Che, L. Zheng, L. Li and J. Zheng	849
Study on Interfacial Crack Propagation and Fracture between Embedded Steel and HSHPC	
S.S. Zheng, L. Li, G.Z. Deng and L. Zhang	853
Numerical and Experimental Investigations of Curved Fatigue Crack Growth under Biaxial Proportional Cyclic Loading	
H. Theilig, D. Hartmann, M. Wünsche, S. Henkel and P. Hübner	857
Scattering of SH Wave by an Interacting Mode III Crack and a Circular Cavity in Half Space	
Z.L. Yang, Z.G. Chen and D.K. Liu	861
Experimental Analysis on the Fatigue Threshold Behaviour of a Nitrided and Shot Peened Steel	
M. Guagliano	865
Damage Mechanisms of Initiating Micro-Pitting on 42CrMo4 Hardened and Tempered Steel	
F. D'Errico, M. Boniardi, S. Barella and S. Cincera	869
Influence of Microstructure on Mechanical Properties of an AZ91D Thixomolded® Magnesium Alloy	
F. D'Errico, M. Boniardi, G. Perricone and D. Vujanovic	873
Slow Strain Rate Tensile Testing for Evaluating Stress Corrosion Cracking of Type-40Cr Steel in the Acidic Chloride Solution	
L.J. An, Y.T. Zhao and Q.F. Li	877
Mathematical Model for Shear Stress-Strain Relationship of Soil-Concrete Interface during Shear Fracture Process	
W. Wang, T.H. Lu and B.X. Sun	881
Comparison of Dynamic and Fatigue Properties of Virgin and Recycled Asphalt Mixture	
S.P. Wu, J. Qiu, Z.H. Shui and H.J. Wang	885
Damage Behavior of Steel Fiber Reinforced and Polymer Modified Concrete under Impact Loading	
Y.P. Liu, L.Q. Tang and X.Q. Huang	889
An Open Crack Model for Vibration Simulation of Beam Structures by Transfer Matrix Method	
K.M. Wang and S. Xiang	893
Effect of Stress Distribution on Fatigue Life of Tubular Joints in Offshore Engineering	
Y.B. Shao	897
Development of a Prediction Algorithm for Column Shortening in High-Rise Buildings Using a Neural Network	
W.J. Yang and W.H. Yi	901
Damage Evaluation of Bone Tissues with Dental Implants	
D. Lin, Q. Li, W. Li, I. Ichim and M. Swain	905
Damage Detection by the Use of Wavelet	
X.D. Zhao and S.L. Wang	909
Fracture Parametric Study on Bond Behaviour between FRP Laminates and High Strength Concrete with Experiments	
H.N. Li, Y.W. Zhou, S.Y. Wang and G. Liu	913
Retrofit of Artificially Perforated Shear Wall in Existing Dominant Wall Structure	
C.S. Choi, Y.C. Choi, H.K. Choi and M.S. Lee	917
Evaluation of Fatigue Strength of Fillet Welded Connections with Respect to Different Post-Weld Treatment Methods	
K.S. Kyung, S.Y. Lee, S.G. Lee and K.S. Kim	921
Debonding Failure Mechanism of Basalt Fiber Sheet Bonded on Concrete	
C.W. Park and J.S. Sim	925
The Investigations of Fatigue Characteristics of Porous Asphalt with Organomodified Montmorillonite Modified Asphalt	
S.P. Wu, G. Liu, J.Y. Yu and T.W. Cao	929

Boundary Effect on the True Specific Fracture Energy of Concrete Y.H. Zhao, S.L. Xu, Z.M. Wu and H.B. Gao	933
Fire Damage and Residual Strengths of Recycled Aggregate Concrete J.Z. Xiao and C.Z. Zhang	937
Numerical Simulation of Fracture Process of Concrete Dam due to Freezing and Thawing with Finite Element Method L.J. Cao, S.J. Li and Z.C. Shangguan	941
Dynamic Loads and Strength Requirements for Flapping Wing P. Dabnichki and M. La Mantia	945
A Study on Normal Stress Distribution and Failure of Adhesively Bonded Joint under Cleavage Loading X.L. Zheng, M.S. Zhang, M. You, H.Z. Yu and Z. Li	949
Numerical and Experimental Study of a Crash Absorption Keel C. Colombo, L. Vergani and N.A. Modica	953
Lateral Stress Effect on Fracture Quantities of a Crack in a Piezoelectric Medium E. Viola, C. Belmonte and G. Viola	957
Experimental Investigation on Initial Cracking Criterion and Size Effect for I-II Mixed Mode Fracture in Concrete Z.M. Wu, W. Dong, F.M. Yi and S.T. Yang	961
Development of Damage Zone by Scattered Cracking around Crack Tips in Brittle Solids under Compression A. Saimoto, A. Toyota and Y. Imai	965
Experimental Investigation of T-Stress Effects on Photoelastic Fringes in Brazilian Disk under Mode II Conditions M. Guagliano, M.R. Ayatollahi, M. Zakeri and C. Colombo	969
Flexural Capacity of Reinforced Concrete Member Retrofitted with Carbon Fiber Sheet S.Y. Seo, K.T. Kim, H.D. Yun, K.B. Choi and S.J. Yoon	973
Applicability of Sub-Size Charpy Specimens to Transition Behaviour of RPV Materials M. Falcnik, P. Novosad, P. Pesek and M. Kytka	977
