## Preface

|                                                                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Concrete-Polymer Composites – The Past, Present and Future</b><br>Y. Ohama                                                                                                            | 1   |
| <b>Seven Well Known Fundamental Flaws against Innovations in Construction Chemistry</b><br>P. Seidler                                                                                    | 15  |
| <b>Microstructural Analysis of Paste and Interfacial Transition Zone in Cement Mortars Modified with Water-Soluble Polymers</b><br>E. Knapen and D. Van Gemert                           | 21  |
| <b>Shrinkage Properties of Polymer-Modified Cement Mortars (PCM)</b><br>K.A. Bode and A. Dimmig-Osburg                                                                                   | 29  |
| <b>The Effect of Latex and Chitosan Biopolymer on Concrete Properties and Performance</b><br>U.T. Bezerra, R.M. Ferreira and J.P. Castro-Gomes                                           | 37  |
| <b>Evaluation of the Hydration of Portland Cement Modified with Polyvinyl Alcohol and Nano Clay</b><br>T.M. Piqué, H. Balzamo and A. Vázquez                                             | 47  |
| <b>Hydration of Cement in the Presence of SBR Dispersion and Powder</b><br>R. Wang and P.M. Wang                                                                                         | 57  |
| <b>Effect of Epoxy Resin Addition on the Moisture Sensitivity of Macro Defect Free Polymer-Cement Composites</b><br>O. Ekincioglu, M.H. Ozkul, Y. Ohama, S. Patachia and G. Moise        | 65  |
| <b>Characterization of Poly(vinyl Alcohol) Fiber Reinforced Organic Aggregate Cementitious Materials</b><br>B. Xu, H.A. Toutanji, T. Lavin and J.A. Gilbert                              | 73  |
| <b>Effect of Types and Contents of Polymer Resin on Spalling Prevention of High-Strength Concrete Subjected to Fire</b><br>C.G. Han, M.C. Han, C.C. Pei and S.H. Yang                    | 85  |
| <b>Influence of Environmental Temperatures on the Performance of Polymeric Stabilising Agent in Fresh Cementitious Materials</b><br>W. Schmidt, H.J.H. Brouwers, H.C. Kuehne and B. Meng | 97  |
| <b>Chemical Shrinkage of Pastes Made with Shrinkage Reducing Admixtures</b><br>A.B. Ribeiro, V. Medina, A. Gomes and A. Gonçalves                                                        | 105 |
| <b>Mechanical Behaviour and Thermal Conductivity of Mortars with Waste Plastic Particles</b><br>V. Corinaldesi, A. Mazzoli and G. Moriconi                                               | 115 |
| <b>Realization of TRC Façades with Impregnated AR-Glass Textiles</b><br>J. Hegger, C. Kulas and M. Horstmann                                                                             | 121 |
| <b>Development of an Ultra-Lightweight Thin Film Polymer Modified Concrete Material</b><br>D. Kruger and M. van der Westhuizen                                                           | 131 |
| <b>Polymer-Modified Mortars for Surface Treatment with the Utilization of Waste Polystyrene</b><br>N. Žižková, R. Drochytka and K. Nosek                                                 | 141 |
| <b>Polymer-Modified Mortars for Corrosion Protection at Offshore Wind Energy Converters</b><br>L. Lohaus and H. Weicken                                                                  | 151 |
| <b>Microstructural Analysis during the Hydration of Cement-in-Polymer Coatings</b><br>O. Weichold, M. Hojczyk, A. Adams, A. Olaru and H. Stanjek                                         | 159 |
| <b>Innovative Coating Technology for Textile Reinforcements of Concrete Applications</b><br>M. Glowania, T. Gries, J. Schoene, M. Schleser and U. Reissen                                | 167 |
| <b>Advanced Coatings to Improve the Durability in Continuous Glass-Fibre Reinforced Concrete</b><br>O. Weichold                                                                          | 175 |
| <b>Effect of Concrete Hydrophobation against Chloride Penetration</b><br>V. Årskog, K. Borgund and O.E. GjØrv                                                                            | 183 |
| <b>Optimization of Polymer-Cement Coating Composition Using Material Model</b><br>L. Czarnecki and J.J. Sokołowska                                                                       | 191 |

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Nucleation on Polymer Nanofibers and their Controllable Conversion to Protective Layers:<br/>Preliminary Theoretical Study</b>             |     |
| P. Demo, Š. Hošková, M. Davydova, P. Tichá, A. Sveshnikov, J. Krňanský and Z. Kožíšek                                                         | 201 |
| <b>Advanced Seismic Countermeasures for Concrete Bridges by Using Polymer in Japan</b>                                                        |     |
| M. Kawakami, F. Omata, J. Iketani and S. Matsuoka                                                                                             | 207 |
| <b>Composition of Concrete Surfaces after Demoulding and Coating: Comparative Study by<br/>XPS, FTIR and Raman Spectroscopies</b>             |     |
| M. Horgnies and M. Chollet                                                                                                                    | 215 |
| <b>Tests of Flexible Polymer Joints Repairing of Concrete Pavements and of Polymer Modified<br/>Concretes Influenced by High Deformations</b> |     |
| A. Kwiecień, M. Gruszczyński and B. Zajac                                                                                                     | 225 |
