Committees, Sponsors and Preface

Keynotes

Size Effects in Micro Forming F. Vollertsen	3
Adaptive Control in CNC Sheet Metal Processing W. Serruys	13
Environmental Performance of Sheet Metal Working Processes J.R. Dufloy, K. Kellens, Renaldi and W. Dewulf	21
Application of Servo Presses to Sheet Metal Forming K. Mori	27
Innovative Machine Concepts for 3D Bending of Tubes and Profiles M. Hermes, D. Staupendahl, C. Becker and A.E. Tekkaya	37

Processes

On the Development of Novel Light Weight Profiles for Automotive Industries by Roll Forming of Tailor Rolled Blanks P. Beiter and P. Groche	45
Incremental Bending of Ultra-High-Strength Steels A. Määttä, K. Mäntyjärvi and J.A. Karjalainen	53
Material Hybrid Joining of Sheet Metals by Electromagnetic Pulse Technology R. Schäfer, P. Pasquale and A. Elsen	61
Optimisation of Condition in Hot Gas Bulging of Aluminium Alloy Tube Using Resistance Heating Set into Dies T. Maeno, K. Mori and C. Unou	69
A Methodology for Optimization of the Direct Laser Metal Deposition Process A. Angelastro, S.L. Campanelli, G. Casalino, A.D. Ludovico and S. Ferrara	75
Sheet-Bulk Metal Forming of Preformed Sheet Metal Parts T. Schneider and M. Merklein	83
Machines and Tools for Sheet-Bulk Metal Forming M. Merklein, A.E. Tekkaya, A. Brosius, S. Opel, L. Kwiatkowski, B. Plugge and S. Schunk	91
Process Design for Hydroformed Tailored Blanks Technology through CAE Techniques A. Del Prete, G. Papadia and B. Manisi	99
Backward Drawing of Necks Using Incremental Approach A. Petek, K. Kuzman and R. Fijavž	105
Numerical and Experimental Investigation of Process Parameters Effect of Low Carbon Steel Wire Produced with Roll Drawing Process F. Lambiase and A. di Ilio	113
Flow Behaviour of Magnetorheological Fluids, Considering the Challenge of Sealing in Blank Hydroforming in the Flange Area with Rectangular Leakage Area Cross-Sections S. Rösel and M. Merklein	121
Assessment of Electrical Resistance Heating for Hot Formability of Ti-6Al-4V Alloy Sheet F. Ozturk, R.E. Ece, N. Polat and A. Koksall	130
Measurement of Material Flow in Series Production A. Neumann, D. Hortig and M. Merklein	137
Analysis of Continuous Bending of Thin Plates in Rubber Pad Bending M. Mehrara and M.J. Nategh	145
Wrinkling Study in Tube Hydroforming Process K. Khalili, S.E. Eftekhari Shahri, P. Kahhal and M.S. Khalili	151
Optimisation of Tubular Hydroforming Processes for Wrinkling and Thinning Control J.F.M. Caseiro, R.A.F. Valente, A. Andrade-Campos and R. Natal Jorge	159

Improved Roller Hemming System for High Volume Part Production M. Zubeil, K. Roll and M. Merklein	168
The Effect of Process Parameters on Thickness Distribution in Hydroforming of Conical-Cylindrical Cups A. Gorji, M. Bakhshi-Jooybari, S. Norouzi, S.J. Hosseinipour and G. Mohammad-Alinejad	176
Combination of Finite-Element and Semi-Analytical Models for Sheet Metal Leveling Simulation A. Amor, M. Rachik and H. Sfar	182
Analytical-Numerical Solution of Bending Problem of Thin Plates in Rubber Pad Bending M. Mehrara and M.J. Nategh	190

Presses and Press Tools

Influence of Die Materials on the Microstructural Evolution of HSS Sheets in Hot Stamping A. Ghiotti, S. Bruschi and D. Pellegrini	201
Development of Bionic Design Concepts for Structure Optimisation of Forming Tools According to Production and Stress Constraints E. Oswald, M. Liewald and O. Stephan	209
Development of a Hydraulic Actuator to Superimpose Oscillation in Metal-Forming Presses B.A. Behrens, S. Hübner, R. Krimm, C. Wager, M. Vucetic and T. Cahyono	217
Characterization of Horizontal Loads in the Production of Asymmetrical Parts B.A. Behrens, A. Bouguecha, R. Krimm, T. Matthias and V. Salfeld	223
High Performance Active Elements for Agricultural Machines Made of Ultra High-Strength Steels W. Homberg and T. Rostek	229

Cutting and Joining

On the Performance of Welded, Riveted and Adhesive Bonded Al/Mg Sheet Metal Joints M. Alfano, G. Ambrogio, L. Filice, F. Furguele, E. Gallus and D. D'Antuoni	237
Process Design for the Manufacturing of Magnetic Pulse Welded Joints V. Psyk, G. Gershteyn, B. Barlage, C. Weddeling, B. Albuja, A. Brosius, A.E. Tekkaya and F.W. Bach	243
Identification of Post-Necking Hardening Behaviour of Sheet Metal: a Practical Application to Clinch Forming S. Coppieters, P. Lava, H. Sol, P. van Houtte and D. Debruyne	251
Light Metal in High-Speed Stamping Tools M. Hirsch, P. Demmel, R. Golle and H. Hoffmann	259
Small Batch Laser Welding Using Light Fasteners and Laser Tack Welding M. Rasmus, K. Mäntyjärvi and J.A. Karjalainen	267
Application of the Finite Element Methods on the Staking Process of Staking Fasteners M. Tofall, M. Merklein and R. Plettke	273
The Low-Cycle Fatigue Strength of Laser-Welded Ultra-High-Strength Steel M. Keskitalo, K. Mäntyjärvi and T. Kiuru	281
Modelling of Fine Blanking Process of the Aluminium Sheets W. Wieckowski, P. Lacki and J. Adamus	290
The Effect of Residual Stresses on the Strain Evolution during Welding of Thin-Walled Tubes M. De Strycker, W. van Paepegem, L. Schueremans and D. Debruyne	298
Computer Aided Design of an Effective Fixture for FSW Processes of Titanium Alloys G. Buffa and L. Fratini	304

Materials and Testing

Thickness Effect on the Formability of AZ31 Magnesium Alloy Sheets A. Forcellese, F. Gabrielli, M. Simoncini and M. El Mehtedi	313
--	-----

The Importance of Governing Metal Thickness for Resistance Spot Welding of Aluminium L. Han, M. Thornton, D. Boomer and M. Shergold	319
A Theoretical Study on Forming Limit Diagram Predictions Using Viscoplastic Polycrystalline Plasticity Models M. Serenelli, M. Bertinetti, P. Turner and J. Signorelli	327
Influence of the Processing of Magnesium Alloys AZ31 and ZE10 on the Sheet Formability at Elevated Temperature L. Stutz, J. Bohlen, G. Kurz, D. Letzig and K.U. Kainer	335
Optical Measuring Technique for the Investigation of Built-Up Cold-Formed Steel Structural Members I. Georgieva, L. Schueremans, G. De Roeck and L. Pyl	343
Analytical and Experimental Evaluation of the Stress-Strain Curves of Sheet Metals by Hydraulic Bulge Tests L. Lazarescu, D.S. Comsa and D. Banabic	352
Comparison of the Identifiability of Flow Curves from the Hydraulic Bulge Test by Membrane Theory and Inverse Analysis M. Bambach	360
Methods for Determination of Residual Stress of a Formed Plate Using Laser Ablation, Wire EDM and Milling J. Lämsä, K. Mäntyjärvi, A. Järvenpää, M. Grüner, M. Merklein and J.A. Karjalainen	368
Study on Impact Crushing Properties of High Strength Steel Sheets K. Natori, K. Watanabe, T. Tanaka and Y. Imaida	376
Investigation of Influence Parameters on Forming Limit Diagrams of Aluminum Alloy-AA2024 G. Celik, B. Kaftanoğlu and C. Karadogan	382
Theoretical and Experimental Evaluation of the Formability of Anisotropic Zinc Sheets Y. Jansen, R.E. Logé, M. Milesi, S. Manov and E. Massoni	390
Fracture Characterization of ST37-2 Thin Metal Sheet with Experimental and Numerical Methods M. Aberkane and O.O. Mohand	396
Experimental Characterisation of Structured Sheet Metal S. Fritzsche, R. Ossenbrink and V. Michailov	404
The Effects of Notch Manufacturing Method and Tolerance on Impact Test Results of UHS Steels J. Kantola, K. Mäntyjärvi, R. Toppila and J.A. Karjalainen	412
Adjusting Optimized Material Properties for Tailored Heat Treated Blanks M. Merklein and H. Nguyen	420
Intermediate Heat Treatment – A New Proceeding for Aluminum Alloys Using Forming Limit Diagrams K. Siefert, M. Merklein, A. Töpperwien, W. Nester and M. Grünbaum	428
The Influence of Through-Thickness Material Property Variation on Stretch Forming Springback R.J. McMurray, A.G. Leacock and D. Brown	436
Transformation in Austenitic Stainless Steel Sheet under Different Loading Directions T. van den Boogaard, J. Krauer and P. Hora	444
On the Study of Constitutive Parameter Identification of Advanced Yield Criteria M.S. Aydin, A. Canpolat, J. Gerlach, L. Kessler and A.E. Tekkaya	452
Development of a Microscopic Damage Model for Low Stress Triaxiality M. Achouri, G. Germain, P. dal Santo, S. Boude, J.L. Lebrun and D. Saidane	460
Numerical Simulation of Forming Limit Test for AZ31 at 200°C M. Nebebe, J. Bohlen, D. Steglich and J. Mosler	468
Experimental Methods for Characterizing of Sheet Metals at High Strain Rates L.W. Meyer, S. Abdel-Malek and N. Herzog	474
Assessment of Damage Models in Sheet Metal Forming for Industrial Applications M. Doig and K. Roll	482
Modification of the Mechanical Anisotropy in Extruded AZ31 Sheets N. Grittner, M. Engelhardt, M. Hepke, D. Bormann, B.A. Behrens and F.W. Bach	490

Modelling Techniques

Modeling Laser Heating for Roller Hemming Applications T. Kleeh, M. Merklein and K. Roll	501
Geometrical Modeling of the Sheet Metal Parts in the Incremental Shrinking Process Z.R. Yang, D. Scherer, M. Golle and H. Hoffmann	509
A Predictive Model for Tolerance Verification of Bent Sheet Metal Parts T.H.M. Nguyen, J.R. Duflou and J.P. Kruth	516
The Simulation of Metal Foams Forming Processes G. D'Urso, M. Longo, G. Maccarini and C. Giardini	524
Effect of Friction and Back Pressure on the Formability of Superplastically Formed Aluminium Alloy Sheet P. Wood, M.J. Qarni and A. Rosochowski	532
Numerical Simulation of Electron Beam Welding Process of Inconel 706 Sheets P. Lacki, K. Adamus, K. Wojsyk and M. Zawadzki	540
Numerical Inverse Method for Friction Coefficient Estimation in Tube Hydroforming A. Fiorentino, R. Marzi, E. Ceretti and C. Giardini	548
Simulation of Hot Sheet Metal Forming Processes Based on a Micro-Structural Constitutive Model M. Farzin, R. Jafari Nedoushan and M. Mashayekhi	556
Continuous Roll Forming Simulation Using Arbitrary Lagrangian Eulerian Formalism R. Boman and J.P. Ponthot	564
Prediction of Surface Quality due to Chatter Vibration in Rolling of Thin Steel Strip Using ALE Finite Element Method M.R. Niroomand, M.R. Forouzan and M. Salimi	572
Numerical and Experimental Study of the Effect Pressure Path in Tube Hydroforming Process M. Elyasi, H. Khanlari and M. Bakhshi-Jooybari	579
Modeling and Optimization of Pressure Profile in Hydroforming of St12 Conic Part with RSM and Genetic Algorithm H. Shahrajabian, K. Khalili and M.S. Khalili	587
Parametric Investigation of Circular and Elliptical Bulge Tests in Warm Hydroforming Process for AA5754-O Sheet H. Gedikli, Ö.N. Cora and M. Koç	594
Analytical and Numerical Calculation of the Force and Power Requirements for Air Bending of Structured Sheet Metals V. Malikov, R. Ossenbrink, B. Viehweger and V. Michailov	602
Simulation of Super-Plastic Forming Based on a Micro-Structural Constitutive Model and Considering Grain Growth M. Farzin, R. Jafari Nedoushan and M. Mashayekhi	610
Investigation on the Effect of Pulsating Pressure on Tube-Hydroforming Process K. Khalili, S.Y. Ahmadi-Brooghani and A. Ashrafi	618
Modeling Uniaxial, Temperature, and Strain Rate Dependent Behavior of AZ31 Alloy by Softening Model S. Toros, F. Ozturk and M. Kaya	624
Constitutive Modelling of Anisotropy, Hardening and Failure of Sheet Metals I.N. Vladimirov, Y. Kiliclar, V. Tini and S. Reese	631
Computer Aided Modelling of Rubber Pad Forming Process A. Del Prete, G. Papadia and B. Manisi	637
Experimental and Numerical Investigation of the Effect of Anisotropy on Springback in U-Bending Process V. Daiezadeh, M. Elyasi, B. Rahmani and M. Bakhshi-Jooybari	645
Numerical Prediction of Damage Evolution in Sheet Metal Forming Processes with Nonlinear and Complex Strain Paths B. Jamshidi, F. Haji Aboutalebi, M. Farzin and M.R. Forouzan	653
FEM Analysis of Sandwich Shells with Metallic Foam Cores H. Mata, R. Natal Jorge, A.A. Fernandes, R.A.F. Valente and M.P.L. Parente	659

A Simulation Approach for Chaining the Forming-Welding-Crash Behaviour of Sheet Metal Structures	
L. Papadakis, A. Schober, M.F. Zaeh and G. Demosthenous	667
Simulation of Heat Assisted Forming of Commercial Aluminium Alloy AA5182	
R. Govindarajan, M. Zubeil, K. Siefert, C. Ageorges and K. Roll	675
Blank Optimization in Elliptical-Shape Sheet Metal Forming Using Response Surface Model Coupled with Reduced Basis Technique and Finite Element Analysis	
K. Khalili, P. Kahhal, E.E. Shari and M.S. Khalili	683
Influence of the Adaptive Remeshing during Simulations of Sheet Metal Forming Processes	
L. Giraud-Moreau, A. Cherouat and H. Borouchaki	691
FE-Simulation of the Heat Transfer by Defined Cooling Conditions during the Hot Stamping Process	
T. Svec, M. Grüner and M. Merklein	699
Consideration of Elastic Tool Deformation in Numerical Simulation of Hydroforming with Granular Material Used as a Medium	
M. Grüner and M. Merklein	707
Advanced Friction Modeling in Sheet Metal Forming	
J. Hol, M.V. Cid Alfaro, T. Meinders and J. Huétink	715
Identification of the Characteristics of Hydroformed Structures Using Optimization Methods	
B. Radi, A. Ayadi, A. Cherouat, L. Giraud-Moreau and A. El Hami	723

Process and Production Planning

DOE Analysis of the Effects of Geometrical Parameters on the Self-Piercing Riveting of Aluminium Alloy AA6060T4	
G. Casalino	733
Cutting Path Optimization Using Tabu Search	
R. Dewil, P. Vansteenwegen and D. Cattrysse	739
A Knowledge-Based System for Manufacturability Assessment of Deep Drawn Sheet Metal Parts	
V. Naranje and S. Kumar	749
A Holistic Modeling Approach for the Design of Tension Leveling and Scale Breaking Processes and Equipment	
L. Steinwender, C. Salzmann, A. Kainz, K. Krimpelstätter and K. Zeman	757
Sheet Metal Forming Process Design Rules Development	
A. Del Prete, G. Papadia and T. Primo	765

Manufacturing Systems

Employment of Finite Element Modelling and Design of Experiments to Investigate the Geometrical Factors in T-Type Bi-Layered Tube Hydroforming	
A. Alaswad, A.G. Olabi and K.Y. Benyounis	775
Continuous Improvement of Manufacturing Systems with the Concept of Functional Periodicity	
D.T. Matt and E. Rauch	783
Experimental Investigation of Parameters Effect on Laser Forming Productiveness	
F. Lambiase, A. Paoletti and A. di Ilio	791
Design for Manufacture Based on an Integrated Product Process Design Model	
H. Voswinckel, H. Schleifenbaum, M. Bambach and G. Hirt	799

Energy and Resource Efficiency

Impact of Laser-Based Technologies in the Energy-Consumption of Metal Cutters: Comparison between Commercially Available Systems	
M. Oliveira, J.P. Santos, F.G. Almeida, A. Reis, J.P. Pereira and A. Barata da Rocha	809

Heuristic-Based Evaluation of Energy Flows in Press Hardening Process Chains R. Neugebauer, F. Schieck, A. Göschel and J. Schönherr	816
On the Sustainability Evaluation in Sheet Metal Forming Processes G. Ingarao, G. Ambrogio, R. Di Lorenzo and F. Micari	824

Single Point Incremental Forming (SPIF)

Force Modeling in Single Point Incremental Forming of Variable Wall Angle Components R. Pérez-Santiago, I. Bagudanch and M.L. García-Romeu	833
Multivariate Adaptive Regression Splines as a Tool to Improve the Accuracy of Parts Produced by FSPIF J. Verbert, A.K. Behera, B. Lauwers and J.R. Duflou	841
Enhancing Incremental Sheet Forming Performance Using High Speed G. Ambrogio, L. Filice and F. Gagliardi	847
Robot-Based Incremental Sheet Metal Forming – Increasing the Geometrical Accuracy of Complex Parts D. Kreimeier, B. Buff, C. Magnus, V. Smukala and J. Zhu	853
Finding the Best Machine for SPIF Operations - a Brief Discussion S.R. Marabuto, D. Afonso, J.A.F. Ferreira, F.Q. Melo, M.A.B.E. Martins and R.J.A. de Sousa	861
On the Formability and Microstructural Characteristics of AISI 301 Parts Formed by Single-Point Incremental Forming I. Lonardelli, P. Bosetti, S. Bruschi and A. Molinari	869
The Simulation of Robot Based Incremental Sheet Metal Forming by Means of a New Solid-Shell Finite Element Technology and a Finite Elastoplastic Model with Combined Hardening Y. Kiliclar, R. Laurischkat, S. Reese and H. Meier	875
Accuracy Improvement in Single Point Incremental Forming through Systematic Study of Feature Interactions A.K. Behera, H. Vanhove, B. Lauwers and J.R. Duflou	881
CAM-Solution for Two Robots Based Incremental Sheet Metal Forming D. Kreimeier, J. Zhu, V. Smukala, B. Buff and C. Magnus	889
Tool Directionality in Contour-Based Incremental Sheet Forming: an Experimental Study on Product Properties and Formability P. Eyckens, H. Vanhove, A. Van Bael, J.R. Duflou and P. van Houtte	897
Tool Path Strategies for Single Point Incremental Forming I. Bagudanch, R. Pérez-Santiago and M.L. García-Romeu	905
Shape Distortion and Thickness Distribution during SPIF Processes: Experimental and Numerical Analysis G. Buffa, G. Ingarao, L. Fratini and F. Micari	913
Investigation on Incremental Sheet Forming Combined with Laser Heating and Stretch Forming for the Production of Lightweight Structures B. Taleb Araghi, A. Göttmann, G. Bergweiler, A. Saeed-Akbari, J. Bültmann, J. Zettler, M. Bambach and G. Hirt	919
Comparison between SPIF with Robot and CNC Machine A. Attanasio, E. Ceretti, C. Giardini and S. Antonioni	929
Deviations between FE Simulation and Experiments in the SPIF Process I. Vasilakos, J. Gu, H. Vanhove, H. Sol and J.R. Duflou	937

Quality and Reliability

Measurement of Critical Dimensions of Cold Roll Formed Sections Using Digital Image Processing I. Williams, B. Shirvani and J.M. Mourier	949
Enhanced Requirements for Surface Quality of Outer Car Body Shells According to Thermal Manufacturing Processes C. Albiez, M. Liewald, A. Görres and J. Regensburger	957

Pressure Field Stabilization in High-Voltage Underwater Pulsed Metal Forming Using Wire-Initiated Discharges	
I. Eguia, J. San José, M. Knyazyev and Y. Zhovnovatyuk	965
Predicting Dimensional Accuracy of Mechanically Joined Car Body Assemblies	
R. Neugebauer, M. Rössinger, M. Wahl, F. Schulz, A. Eckert and W. Schützle	973
Counter Laser Treatment for Recovering Deformation of Slender Workpiece	
L. Giorleo, E. Ceretti, C. Giardini and B. Previtali	981

Micro Technologies

Micro Warm Coining of Stainless Steel Sheets Using Electric Conductive Heating	
K.N. Zhao, B. Wietbrock and G. Hirt	991
Investigation of the Hole Shape in Pulsed Fiber Laser Microdrilling of Nanostructured Titanium	
C.A. Biffi and B. Previtali	999
Forming Behavior of Thin Foils	
Z.Y. Hu, H. Wielage and F. Vollertsen	1008
