

Table of Contents

Preface

A General Approach to the Equalisation of Partial Contact Ratios in 3K Transmissions A. Golenko	1
A New Technique of Spine Disease Treatment Supported by ADRSK1 Device S. Grymek and M. Pawelec	8
An Analysis of Weld Damage in Punching Press J. Ryś and S. Łaczek	16
Measurement of Normal Force in Magnetorheological and Ferrofluid Lubricated Bearings J. Salwiński and W. Horak	25
Compensation of Pressure Peaks in PWK-Type Hydraulic Pumps L. Osiecki, P. Patrosz, T. Zawistowski, B. Landvogt, J. Piechna and B. Żyliński	33
Construction Analysis of Mini-Generator of Electric Energy Using Working Medium Flow as the Working Environment R. Kaczyński, I. Wilczewska and B. Hoscilo	45
Crack Propagation in Zirconia MgO-PSZ Ceramic Material W. Karaszewski	54
Designing a Pumping System of Gear Pumps Featuring the Involute Internal Gearing D. Słodczyk and J. Stryczek	64
Designing of High-Speed Machine Shafts of Carbon Composites with Highly Nonlinear Characteristics Z. Dąbrowski and P. Deuszkiewicz	76
Development of Bevel Gear Motion Transmission Graphs with FEM J. Pacana	83
Dynamics Conscious Approach to Tribometer Design and Tribo-Testing J.I. Lubinski, S. Grymek, K. Druet and H. Olszewski	90
Experimental Investigation of Prototype Water-Lubricated Compliant Foil Bearings A. Olszewski, M. Wodtke and P. Hryniewicz	97
Influence of Design of Hydraulic Components on their Operation in Low Ambient Temperatures R. Jasiński	106
Influence of Magnetorheological Fluid Volume onto Obtained Critical Pressures on Rotary Shaft Seals M. Potoczny and B. Zachara	119
Influence of Shaft Misalignment on Water Lubricated Turbine Sliding Bearings with Various Bush Modules of Elasticity W. Litwin, A. Olszewski and M. Wodtke	128
The Influence of the K_{HB} Factor Determination Method on the Evaluation of the Gear Tooth Surface Durability and Bending Strength S. Krawiec	135
Investigation of Dynamic Magnetic Fluid Seal Wear Process in Utility Water Environment Z. Szydło and M. Szczech	143
Methods of Increasing Loadability for the Plastic Cycloidal Gears K. Biernacki	156
Modelling the Contact between the Rolling Elements and the Raceways of Bulky Slewing Bearings M. Krynke, L. Kania and E. Mazanek	166
Modernization of the Trailer for Tyre/Road Rolling Resistance Measurements R. Woźniak, S. Taryma and G. Ronowski	179
Multicaterpillar Track Chassis of Big Machines - Identification of Loads T. Smolnicki and P. Maślak	187
New Satellite Pumps P. Sliwinski	195
Novel Design of an Ocean Wave Power Device C. Dymarski, P. Dymarski and W. Litwin	206

Numerical Analysis of Crack Propagation in Silicon Nitride W. Karaszewski	216
Numerical and Experimental Analysis of Stress and Strains in Flat Ends of High-Pressure Vessels B. Szybiński, P. Romanowicz and A.P. Zieliński	226
Numerical Model of Bevel Gears Cutting by Duplex Helical Method J. Pisula and M. Płocica	237
Problems of Analytical Determination of Journal Bearing Bush Fatigue Strength Estimates R. Gawarkiewicz, J. Sikora and B. Siwek	247
Radial Stiffness of Thrust Ball Bearings A. Raczyński and J. Kaczor	257
Relieving the Measuring System of the Trailer for Tyre/Road Rolling Resistance Measurements from the Inertia Force R. Woźniak, S. Taryma and G. Ronowski	265
Selected Properties of Bearings with Helical Groove on the Journal J. Sep	273
The Influence of Gas Mixture in the Glow-Discharge Nitriding Process of Austenitic Stainless Steel on Characteristic of Nitrided Cases A. Sitko, M. Szkodo and M. Gazda	282
The Influence of Geometrical Parameters on the Friction Process in the Needle Bearing J. Nachimowicz and R. Korbut	288
The Integrity Analysis of the Structural Element Made of Ultra High Strength Steel M. Graba, T. Nykänen and A. Neimitz	296
The Method of Finite Differences in Solutions Concerning Circular Plate H.G. Sabiniak	305
The Numerical Methods in Geometric Construction Mapping H.G. Sabiniak and R. Cichowicz	312
Wear of Ultra-Thin DLC or Tungsten-Modified DLC Coatings under Reciprocating Sliding K. Druet and J.I. Lubinski	323
