

Table of Contents

Preface, Sponsors and Committees

Chapter 1: Grinding Processes (1): Modeling and Surface Quality

Polishing Silicon Wafers with the Nanodiamond Abrasive Tools Prepared by Sol-Gel Technique

G.Q. Hu, J. Lu and X.P. Xu 1

Calculation of Effective Ground Depth of Cut by Means of Grinding Process Model

T. Yamada, M.N. Morgan, H.S. Lee and K. Miura 7

Grindability of Single Crystal Sapphire in Medical Use and the Scheme of Forming Highly Precise Spherical Heads

O. Mgaloblishvili, R. Turmanidze, D. Butskhrikidze and M. Beridze 13

Error Size of the Helix (screw) Groove by Grinding

K. Janděčka 19

Influence of the Corrosion Surrounding on Surface Quality of Grounded Hardened Steels

M. Novák 25

Chapter 2: Special Session – Laser Manufacturing

New Laser Machine Tools for Processing Carbon Fibre Reinforced Plastic (CFRP)

P.W. French, A. Wolynski, M. Naeem and M.C. Sharp 30

Advanced Fiber Laser Perforation Technology for Thermoplastic Pre-Preg Material

A.A. Kutin and M.V. Turkin 36

Laser Assisted Micro Grinding of High Strength Materials

W.L. Chang, X.C. Luo, Q.L. Zhao, J.N. Sun and Y. Zhao 44

Transformation "Insulator-Conductor" after Laser Irradiation of the Polymer Films

J.N. Aneli, E.F. Semiletova, N.V. Bakradze and T.N. Dumbadze 50

Fibre Laser Cleaning of Grinding Wheels

M.C. Sharp, R. Yadav, A. Batako and P.W. French 55

Comparison of Picosecond and Femtosecond Laser Ablation for Surface Engraving of Metals and Semiconductors

J. Lopez, F. Deloison, A. Lidolff, M. Delaigue, C. Hönninger and E. Mottay 61

Chapter 3: Cutting Tool Technology: Coatings

Ecologically Friendly Dry Machining by Cutting Tool from Layered Composition Ceramic with Nano-Scale Multilayered Coatings

A.S. Vereshchaka, A.A. Vereshchaka and A.K. Kirillov 67

Tool Coatings with the Effect of Adaptation to Cutting Conditions

M. Migranov and R. Migranov 75

The Influence of Machining Condition Forming Multilayer Coatings for Cutting Tools

V.P. Tabakov 80

Wear Resistance of Coatings for the Cutting Tool

M. Migranov 86

High Speed Turning of Ti-6Al-4V Alloy with Straight Cemented Carbide and PVD Coated Carbide Tools

Y.S. Li, J.X. Deng, S. Ebbrell, M.N. Morgan and X.J. Ren 92

Chapter 4: Rotor Design and Vibratory Mass Finishing

Analysis of New Designs of Rotors with Variable Geometry Parameters and Results of their Tests

R. Turmanidze and T. Mosashvili 98

Investigation of Thermally Treated Recycled Glass as a Vibratory Mass Finishing Media

P. Benjarunroj, P. Harrison, S. Vaughan, X.J. Ren and M.N. Morgan 104

Chapter 5: Grinding Processes (2): Modeling and Surface Quality

Experimental Evaluation of Grinding Mechanism in Micro Depth of Cut T. Yamada, H. Yuge, H.S. Lee and K. Miura	110
Thermodynamics of Precision Diamond Lapping of Ceramic Surfaces V.P. Baharev and A.S. Vereshchaka	115
Bearing Surfaces with Sapphire for Total Hip-Joint Replacement O.A. Rozenberg, R. Turmanidze, S.V. Sokhan and V.V. Voznyy	121
A Model of Forming the Surface Layer of Ceramic Parts Based on Silicon Nitride in the Grinding Process V. Kuzin	127
New Ways in Aluminium Alloys Grinding M. Novák, N. Naprstkova and L. Ruzicka	132

Chapter 6: Advanced Manufacturing Technology: Cutting

Turning of Inconel 718 by Cemented Carbides I. Mrkvica, R. Konderla and M. Faktor	138
Pulsed Processes when Cutting Heat-Resistant Alloys A. Kozlov and M. Deryabin	144
Single Point Diamond Turning of Single Crystal Silicon Carbide: Molecular Dynamic Simulation Study S. Goel, X.C. Luo, R.L. Reuben, W. Bin Rashid and J.N. Sun	150
An Investigation on Improved Theoretical Modelling for Surface Generation in Nanometric Cutting W. Sawangsri and K. Cheng	156
Numerical Research of the Plastic Strain in Hard Turning in Case of Orthogonal Cutting G. Szabó and J. Kunderák	162
Theory and Practice of Technology for Machining Non-Rigid Smooth Shafts Y. Maximov	168

Chapter 7: Precision Surfaces: Accuracy and Characterisation

Surface Integrity in Notches Machining J. Madl, V. Razek, V. Koutny and J. Kafka	176
Reactive Atom Plasma for Rapid Figure Correction of Optical Surfaces M. Castelli, R. Jourdain, P. Morantz and P. Shore	182
Optimizing Heat Transfer Rate in an Internally Cooled Cutting Tool: FE- Based Design Analysis and Experimental Study S. Che Ghani, K. Cheng, X.Z. Sun and R. Bateman	188
Characterization of Topography of Cut Surface Based on Theoretical Roughness Indexes C. Felhő and J. Kunderák	194
Improved Accuracy of Console Boring of Deep Apertures M.U. Kulikov and M.A. Larionov	200

Chapter 8: Advanced Machining and Simulation (1)

Possibility of Reducing Environmental Load in Hard Machining J. Kunderák and G. Varga	205
Influential Parameters in Determination of Chip Shape in High Speed Machining T.T. Öpöz and X. Chen	211
Influence of Machining Process on Design Notch Performance F. Holešovský, M. Novák and M. Lattner	217
Simulation Study of Cutting Forces, Stresses and Temperature during Nanometric Cutting of Single Crystal Silicon S. Goel, X.C. Luo, R.L. Reuben, W. Bin Rashid and J.N. Sun	223

Chapter 9: Advanced Machining and Simulation (2)

Monitoring of Vibrations in the Technology of AWJ T. Krenický and M. Rimár	229
The Application of Taguchi Approach to Optimise the Processing Conditions on Bonnet Polishing of CoCr S.Y. Zeng, L. Blunt and X.Q. Jiang	235
Multi-Pass Nanometric Machining Simulation Using the Molecular Dynamics (MD) A. Oluwajobi and X. Chen	241
Analysis of Micro-Pin Manufacturing Using Inverse Slab Electrical Discharge Milling (ISED) Process R. Gil, J.A. Sánchez, N. Ortega, S. Plaza, B. Izquierdo and I. Pombo	247
Chapter 10: Machining Technology: Drilling	
Fine-Sized Spiral Drills with Variable Inclination Angle of Chip Grooves - Design and Manufacture R. Turmanidze and Z.M. Gviniashvili	253
The Investigation of Thrust Force of Printed Circuit Board Drilling L.J. Zheng, C.Y. Wang, Y.P. Qu, L.P. Yang and Y.X. Song	259
