

Table of Contents

Preface

Waveform Effect on the Low Cycle Fatigue Behavior of AISI 304 Stainless Steel at High Temperature S.R. Lee, H.J. Lee, J.O. Chung, S. Oh, C. Huh and D. Yoon	1
Low-Cycle Fatigue Life Prediction of Circumferentially Notched Component Based on Elastic-Plastic Stress Strain Analysis K. Hatanaka, T. Fujimitsu and S. Shiraishi	7
Strain Behavior in the Vicinity of Crack Tip in Fatigue Fracture of Polymer and Its Life Estimation A. Shimamoto, E. Umezaki and J.S. Hawong	13
Viscoelastic Analysis of Residual Stress and Deformation of PP Resin in Cooling Process M. Shimbo, S. Sugimori, Y. Miyano and T. Kunio	19
A Theoretical Study on Creep Damage Detection by Ultrasonic Wave Measurement M. Matsubara, A. Nitta, S. Sakai and N. Fujinawa	25
Influence of Non-Metallic Inclusions on Fatigue Strength of High Manganese Steel I. Maekawa, J.H. Lee, H. Shibata and S. Nishida	31
Effects of Small Defects and Nonmetallic Inclusions on the Fatigue Strength of Metals Y. Murakami	37
Fatigue Properties of Nitrided Ti-6Al-4V Alloy T. Morita, M. Shimizu, K. Kawasaki, T. Chiba and T. Chiba	43
Relation between Critical Size of Inclusion Responsible for Fatigue Failure and Inclusion Size Distribution Y. Kuroshima, M. Shimizu and K. Kawasaki	49
K_{II} Influence on the Shape of Caustics in CT and CC Specimens O.S. Lee and M.K. Han	55
Accuracy Improvement Technique for Measuring Stress Intensity Factors in Photoelastic Experiment T.H. Baek and C.P. Burger	63
Stress Intensity Evaluation for Surface Crack with Use of Boundary Element Method and Influence Function Method and the Surface Crack Extension Analysis R. Yuuki and K. Ejima	69
Determination of Thermal Stress Intensity Factors for Symmetric Lip Cusp Crack by Boundary Element Method K.Y. Lee and Y.H. Cho	75
Development of the Method to Evaluate the Fatigue Life of Spot-Welded Structures by Fracture Mechanics - Development of BEM-Spot System to Analyze the Stress Intensity Factors by Use of Boundary Element Method R. Yuuki and T. Ohira	81
Efficient Boundary Element Analysis of Stress Intensity Factors for Interface Cracks in Dissimilar Materials S. Cho and R. Yuuki	87
An Investigation on the Behavior of Longitudinally Cracked Pipe Wall due to Thermal Striping Y.J. Yu, S.H. Park and G.H. Sohn	93
Direct Observation of Crack Tip Phenomena and a Dislocation Model of Fracture C.G. Park, C.S. Lee and Y.W. Chang	99
Stress Corrosion Cracking Behavior of Al-Li Alloys S. Ohsaki and T. Takahashi	107
Stress Corrosion Cracking of High Strength Steels and Their Weldments in Synthetic Sea Water J.K. Lim, T. Shoji, J.W. Who, S.H. Chung and H. Takahashi	113
Relation between Test Temperatures and Notch Tip Radii in Tensile Fracture Manner of Center Notched CFRP Y.H. Kim, H. Nisitani, R. Murakami, T. Nonomura and S. Okada	119

Notched Strength of Woven Laminate Composites Containing Circular Holes H.G. Kim, W. Hwang and K.S. Han	125
Failure Criteria for Symmetric Balanced Angle-Ply Laminates under Uniaxial Loading C.W. Bert and K.N. Cho	131
Failure Criteria for Carbon/Epoxy Composites under Biaxial Loading J.Y. Park, H. Hwang, H.C. Park and K.S. Han	137
The Micromechanics Study of Crack Propagation in a Cross Ply E-Glass/Epoxy Laminate under Hydrochlorid Acid H. Sekine, H. Suzuki, T. Miyanaga and J.H. Chen	143
A Study on the Fracture Mechanics of Orthotropic Plate under Pure Shear Force (A Study on the Development of the Pure Shear Force Device for Orthotropic Materials) J.S. Hawong, S.H. Choi, K.H. Lee, A. Shimamoto and S. Takahashi	149
Effect of Vickers Indented Load and Microstructure on Hardness, Bending Strength and Fracture Toughness in Sintered Silicon Carbide Ceramics Y. Ochi, S.K. Sasaki, A. Ishii and M. Kawai	155
Effect of Stress Corrosion Cracking on Fracture Strength of Si_3N_4 H. Kobayashi, Y. Arai, S.C. Hwang and S. Kani	161
Particle Impact Damage in Silicon Carbide A. Suzuki, T. Natsumara, S. Sugiyama, T. Teramae and S. Hamada	167
Particle Impact Damage on Ceramics I. Maekawa, H.S. Shin and H. Miyata	173
Mechanics Approach to Fracture Strength of Ceramics/Metal Joints H. Kobayashi, Y. Arai, H. Nakamura and M. Nakamura	179
The Evaluation of the Strength of Adhesive Joints by Application of Fracture Mechanics N.Y. Chung, R. Yuuki, H. Ishikawa and S. Nakano	185
Strength Evalulation of Carburized Gear Teeth Based on Fracture Mechanics M. Kato, K. Inoue, G. Deng and B.S. Jeong	191
The Effect of Microstructural Variation on the Mechanical Properties of Ti-10V-2Fe-3Al Alloy C.S. Lee, S.J. Kim, C.G. Park and Y.W. Chang	197
Effects of Austempering on Fatigue Crack Propagation Resistance of Ductile Cast Irons Y. Sugiyama, K. Asami and Y. Nakazawa	203
The Effect of Load Ratio and Grain Size on Fatigue Crack Growth Rates in Nickel Base Superalloy AP-1 S. Kim and J.F. Knott	209
An Analysis on Surface Crack Growth under Rotary Bending Fatigue in Terms of Fracture Mechanics H. Ogawa and K. Hatanaka	215
Fatigue Crack Propagation between Holes or Ingredients J.U. Cho, S.C. Kim and O.S. Lee	221
Surface Crack Growth Behavior in Corrosion Fatigue of Off-Shore Structural Steel J.G. Lee, T. Shoji, H. Takahashi, J.K. Lim and S.H. Chung	227
Material Degradation and Strength Characteristics of a Long-Term Operated HP-IP Rotor T. Ogata and A. Nitta	233
Analytical Evaluation of Remaining Service Life of Fossil Steam Turbine Rotor and Casing S. Shiotani, Y. Takahashi, T. Fujioka, M. Matsubara, T. Ogata and A. Nitta	241
Standardization of Grain Boundary Etching Test Method for Evaluating High Temperature Material Degradation F. Nogata, K. Seo, S.H. Chung, J.J. Lee, H. Takahashi and K. Tamagawa	247
The Evaluation for In-Service Material Degradation of Superheater Tubes of Fossil Boiler J.K. Kim, T.R. Chung, J.K. Lim and S.H. Chung	253
DBTT Estimation of Ferritic Low Alloy Steels in Service Plant by means of Small Punch Test T. Matsushita, M.L. Saucedo-Muñoz, Y.H. Joo and T. Shoji	259
Fatigue Crack Behavior under Constant Stress and Two-Step Block Stress S.H. Song and K.R. Lee	265
Effect of Single Overload on Retardation Behavior in 7075-T73 Aluminium Alloy J.K. Kim and B.H. Park	271

Estimation Method of Elastic-Plastic Fatigue Crack Growth Rates under Variable Amplitude Loadings	
M. Jono and A. Sugeta	277
Fatigue Crack Growth and Closure through a Tensile Residual Stress Field under Random Loading	
J.S. Kim, C.Y. Kim and J.H. Song	283
Fatigue Crack Acceleration and Retardation in Glassy Polymers due to a Single Peak Overload	
T. Shiraishi and Y. Soyama	289
Effects of Accelerated Thermal Aging and Prestressing on Fracture Toughness of A533B-1 Steel	
H. Nakamura, H. Kobayashi, T. Shimizu, S. Kanno, M. Saito, M. Asano and H.K. Yoon	295
Effect of Temperature on the Elastic-Plastic Fracture Toughness in A516 Gr70 Steel	
Y.S. Choi, W.H. Yang, Y.J. Kim and C.S. Seok	301
Elastic-Plastic Fracture Toughness Test under Mixed Mode Loading	
K. Tohgo and H. Ishii	307
Study on the Ductile Fracture of Aluminium Alloys - Observation of the Fracture Process by FRASTA and FEM Simulation -	
M. Kikuchi and H. Miyamoto	313
Maximum Load Prediction in Plane-Strain Ductile Fracture	
I. Gu	319
The Near Crack Tip Deformation and Fracture Initiation of a Ductile Material under Mixed Mode Loading	
S. Aoki, K. Kishimoto and T. Yoshida	325
A Study of Mixed Mode Fracture Criterion - Maximum Tangential Strain Energy Density Criterion	
J.M. Koo and Y.S. Coy	331
Impact Force and Elastic Response of Tapered Bars in Collision with Rigid Wall	
M. Daimaruya and H. Kobayashi	337
Dynamic Crack Propagation in a Micropolar Medium	
S.Y. Han, M.N.L. Narasimhan and T.C. Kennedy	343
Fatigue Crack Closure Monitoring at Elevated Temperatures Using Laser Interferometric Displacement Gage	
K. Ogura and I. Nishikawa	349
Effect of Crack Surface Oxidation on Near-Threshold Fatigue Crack Growth Characteristics in A508-3 Steel at Elevated Temperature	
H. Kobayashi, H. Tsuji and K.D. Park	355
The Fatigue Crack Propagation Behavior of the Submerged Arc Welded Plate	
S.H. Song and H. Kim	361
Prediction of Fatigue Crack Growth Rate in Residual Stress Fields	
A. Todoroki and H. Kobayashi	367
Stress Analysis around Micro Surface Cracks by FEM Modeling of 3 Dimensions	
S.H. Song and J.B. Kim	373
Fracture Mechanics Analysis of the Mode I Crack in the Variable Thickness Plate Having Fillet	
Y.S. Choi, W.H. Yang and M.R. Cho	379
Efficient Improvement of Virtual Crack Extension Method by a Derivative of the Finite Element Stiffness Matrix	
H. Ishikawa, S. Nakano, R. Yuuki and N.Y. Chung	385
Application of the J_k Integral to Arc Cracked Rotating Disks	
S.J. Chu and C.S. Hong	391
Discontinuity of Stress Intensity Factor for Kinked Interfacial Crack under Anti-Plane Shear	
K.S. Lee, S.R. Choi and Y.Y. Earmme	397
Thermoelastic Analysis of an Interfacial Crack in Bimaterial	
T.W. Kim, S. Im and Y.Y. Earmme	403
Development of Inelastic Constitutive Relations	
Y.W. Chang, C.S. Lee and C.G. Park	409

Axisymmetric Contact Problem in Consideration of Tangential Displacement T. Shibuya, T. Koizumi and J. Fukuchi	417
A Study on Width Spread in 2-High Rolling of Rectangular Bars S.G. Yoon and D.W. Kim	423
Deformation of Circular Tubes in Lateral Compression H. Kobayashi and M. Daimaruya	429
Fracture Strength Evaluation of Welded Joint in Steels by Using Small Punch Test D.Y. Lyu, H.S. You, H.D. Jung, J.K. Lim and S.H. Chung	435
An Improvement of the Fatigue Strength of the Spot-Welded Lap Joint D.H. Bae, N. Tomioka, J. Niisawa and H. Kitagawa	441
A Study on the Effect of the Building up by Welding on the Fatigue Fracture Behaviors for the Forged Steel Y.S. Kim, J.H. Kim and M.S. Han	447
Load and Strain Histories for CFRP Laminates under Low Velocity Impact J. Kook, M. Suzuki, T. Adachi, S. Ujihashi and H. Matsumoto	453
Impact Damage Energy of Laminated Composite Beams Subjected to Transverse Impact K.C. Park and M.S. Kim	459
Evaluations of Performances to Plasma Disruption and Neutron Irradiation of Graphites and C/C-Composites as First Wall Components for Fusion Reactor Devices S. Sato, A. Kurumada, K. Kawamata, R. Ishida, T. Takizawa and K. Teruyama	465
A Fabrication Method of Aluminium-Short Fiber Alumina Metal Matrix Composites Processed by Compocasting H.C. Lee and M.S. Kim	471
Small Punch Test for Ceramic Composites at Very High Temperature M. Saito, T. Hashida and H. Takahashi	477
Fracture Behaviors and Mechanical Properties of Metal Matrix Composites T. Lim, C.S. Lee, Y.H. Kim, K.C. Lee and K.S. Han	483
Ultrasonic Testing of Closed Cracks M. Saka	489
Measurements of Residual Stress in the Field of the Stress Gradient by the Hole Drilling Method T.S. Lee, B.K. Choi, S.Y. Jeon and H.A. Moon	495
Crack Prevention of S-Tech Wood during Autoclave Drying by means of Accoustic Emission Technique K. Tamakawa, K. Sato, H. Takahashi, K. Homma and S. Yunome	501
A Study on the Development of Orthotropic Photoelastic Material Having Arbitrary Size and Direction J.D. Parks, J.S. Hawong, J.D. Kwon and S.H. Choi	507
One-Point-Bend Impact Testing of Ceramic Material K. Kishimoto, S. Takahashi and S. Aoki	513
Evaluations of the Critical Current Densities of Carbon Brushes by Thermal Shock Fracture Testings S. Sato, A. Kurumada, K. Kawamata, J.K. Lee, N. Takahashi, N. Yamashita and Y. Shou	519
Probabilistic Life Assessment for Surface Cracked Body by an Influence Function Method M. Shiratori and T. Miyoshi	525
The Probabilistic Prediction of the Fatigue Crack Propagation Life of a Semi-Elliptical Surface Crack H.Y. Yoon and H. Okamura	531
Fatigue Crack Initiation and Growth Life Prediction with Statistical Consideration J.D. Kwon, S.H. Choi, S.G. Kwak and K.O. Chun	537
Nondestructive Detection and Evaluation of Materials Degradation of 2.25Cr-1Mo Steel by means of Electrochemical Method Y. Watanabe and T. Shoji	543
Degradation Problems in Life Prediction H. Kitagawa, J.D. Kwon and S.H. Choi	549
Fracture Behavior and Acceptance Size of Flaw for Pressurized Piping K. Hasegawa, S. Kanno, T. Shimizu, N. Gotoh and T. Saitoh	555
