

Preface

Organized by the Ministry of Science and Technology of the People's Republic of China, People's Government of Jiangxi Province and the Chinese Ceramic Society, the 2012 China (Jingdezhen) International Forum on High-tech Ceramics and the First International Conference on Testing and Evaluation of Inorganic Materials (TEIM2102) was held from October 15 to 18, 2012, in Jingdezhen, Jiangxi Province, China.

TEIM2012 was set on materials properties and testing technique, which covered most aspects of testing techniques on mechanical, chemical, physical properties and microstructures of ceramics, glass and concrete. This conference received over 200 abstracts and 162 papers were accepted by the Academic Committee for academic exchanges at the conference. More than 200 scholars from 11 countries and regions attended the conference and presented their latest research results. This conference actively promoted the research and development in relation to testing and evaluation of inorganic materials.

The conference received 132 manuscripts from the participants. After review process, 108 papers were finally accepted for publication in the proceedings.

The Editors would like to thank the members of the Organizing Committee for their efforts and successful preparation of this event.

We would like to thank all colleagues who have devoted much time and effort to organize this meeting.

The efforts of the authors of the manuscripts prepared for the proceedings are also gratefully acknowledged.
