

Preface

The Asia Pacific region has become a manufacturing hub for optical components and optoelectronics. These optical devices are widely used in imaging optical systems, such as various consumer and scientific products, instruments and lighting systems, etc. The first Asia Pacific Conference on Optics Manufacture 2007 (APCOM 2007) has been successfully held in Hong Kong. The Second Asia Pacific Conference on Optics Manufacture 2009 (APCOM 2009) has been successfully held in Taipei. The Third APCOM was held on 26-28th August , 2012 in Changchun, Northeast China.
