

Table of Contents

Preface

Chapter 1: Formability of Metallic Materials

Transient Negative Strain Hardening during Severe Plastic Deformation of Al-30wt%Zn Alloys	
M. Borodachenkova, J. Grácio, F. Barlat and C.R. Picu	3
Correlation of Tensile Test Parameters and Bendability of High-Strength Steels	
J. Lämsä, A. Väisänen, J. Heikkala and A. Järvenpää	12
Formability of Hybrid Aluminum-Magnesium Compounds	
A. Feuerhack, C. Binotsch and B. Awiszus	21
Analysis of the Deformation Behavior of Ti-6Al-4V at Elevated Temperatures	
M. Merklein, H. Hagenah, M. Kaupper and A. Schaub	29
Accurate Evaluation Method for the Hydraulic Bulge Test	
J. Mulder, H. Vegter, H. Aretz and T. van den Boogaard	33
A Cruciform Shape to Study the Influence of Strain Paths on Forming Limit Curves	
L. Leotoing, D. Guines, S.Y. Zhang and E. Ragneau	41
Ductile Failure Modelling in AA5182 Aluminium Alloy Sheet Forming	
H. Aretz, S. Keller, O. Engler and H.J. Brinkman	47
Hot Tensile Behavior of Superplastic and Commercial AA5083 Sheets at High Temperature and Strain Rate	
S. Bruschi, A. Ghiotti and F. Michieletto	63
Crystal Plasticity Finite-Element Simulation of Deformation Behavior during Unloading under Compression in Magnesium Alloy Sheet	
T. Hama, N. Kitamura, H. Fujimoto and H. Takuda	71
Achieving High Strains in Sheet Metal Characterization Using the In-Plane Torsion Test	
Q. Yin, J. Kolbe, M. Haupt and A.E. Tekkaya	77
Joint Strength of SPCC/A5052P-H Joint Welded by Laser Butt Welding with Compression	
R. Itani and T. Iizuka	86
Numerical Modeling of Ductile Plastic Damage in Tensile Test	
G. Papadia, T. Primo and S. Schipa	93
Influence of Dislocations on the Deformability of Metallic Sheets	
S. Cleja-Țigoiu and R. Pașcan	99
Ductile Damage in Tension and Bending for DP980 Steel Sheets	
J. Troufflard, G. Requena, S. Thuillier and É. Maire	110
On the Influence of Cold Rolling Parameters for 14CrW-ODS Ferritic Steel Claddings	
T. Louise, O. Patrick, R. Elodie, D. Bossu and Y. de Carlan	118
A Theoretical Study of the Effect of the Double Strain Path Change on the Forming Limits of Metal Sheet	
M. Butuc, F. Barlat, J. Grácio and G. Vincze	127
Material Modeling of High Strength Steel Sheet Using Multiaxial Tube Expansion Test with Optical Strain Measurement System	
T. Hakoyama and T. Kuwabara	139
Stress Relaxation for Formability Improvement	
K. Hariharan, O. Majidi, C.M. Kim, M.G. Lee and F. Barlat	145
Effect of Material Model on Finite Element Modeling of Aerospace Alloys	
M. Saboori, J. Gholipour, H. Champiaud, A. Gakwaya, J. Savoie and P. Wanjara	151
Submicrocrystalline Structure and Dynamic Recovery of Cold Flowformed ELI Grade Ti-6Al-4V	
D. Depriester and E. Massoni	157
Prediction of Surface Roughening and Necking Behavior for Metal Foils by Inhomogeneous FE Material Modeling	
T. Furushima, H. Tsunehashi, T. Nakayama, K. Manabe and S. Alexandrov	169

Design of an Experimental Device for Biaxial Tension Tests Used in a Uniaxial Test Machine	
H.K. Tsai, Y.W. Lin, F.K. Chen and S.W. Wang	174
Determination of Flow Curve Using Bulge Test and Calibration of Damage for Ito-Goya Models	
B. Martins, A.D. Santos, P. Teixeira, K. Ito and N. Mori	182
Deep Drawing of Ti6Al4V: Experiments and Modeling over a Wide Range of Strain Rates and Temperatures	
B. Chartrel and E. Massoni	190
Analysis of the Incremental Forming of Titanium F67 Grade 2 Sheet	
A. Daleffe, L. Schaeffer, D. Fritzen and J. Castelan	195
Effect of the Mechanical Parameters Used as Input Data in the Yield Criteria on the Accuracy of the Finite Element Simulation of Sheet Metal Forming Processes	
L. Lazarescu, I. Ciobanu, I.P. Nicodim, D.S. Comsa and D. Banabic	204

Chapter 2: Forging and Rolling

On the Development and Identification of Phenomenological Damage Models - Application to Industrial Wire Drawing and Rolling Processes	
T.S. Cao, C. Bobadilla, P. Montmitonnet and P. Bouchard	213
Optimization Analysis of A7075 Bicycle Stem Forging Process	
D.C. Chen, J.R. Shiu and J.G. Lin	227
Sensitivity Analysis to Optimise the Microstructural Properties of an Inconel 718 Component Manufactured by Rotary Forging	
A. Mangas, M. Santos, J.I. Zarazua, J. San José, G. Atxaga and O. Adarraga	234
Application of a Fast Calculation Model for the Process Monitoring of Open Die Forging Processes	
D. Rosenstock, D. Recker, G. Hirt, K.J. Steingießer, R. Rech, B. Gehrmann and R. Lamm	248
Application of Combined Casting-Forging Process for Production of Durable Lightweight Aluminum Parts	
S. Dedov, G. Lehmann and R. Kawalla	264
Effect of Different Finish-Rolling Parameters on the Microstructure and Mechanical Properties of Twin-Roll-Cast (TRC) AZ31 Strips	
S. Gorelova, M. Ullmann, M. Oswald and R. Kawalla	274
Investigation on the Influence of Manufacturing Parameters on the Fatigue Strength of Components	
A. Reiss, U. Engel and M. Merklein	280
Experimental & Numerical Study of the Hot Upsetting of Weld Cladded Billets	
J.C. Wang, L. Langlois, M. Rafiq, R. Bigot and H. Lu	287
Finite Element Simulation as a Tool to Evaluate Gear Quality after Gear Rolling	
A. Khodaei and A. Melander	300
Die and Process Design for Hot Forging of a Gear Wheel – A Case Study	
T. Henke, M. Bambach and G. Hirt	307
Time-Efficient and Precise FEM/BEM Simulation of a Cold Forging Process Verified by Tool Load Determination	
F. Schongen, F. Klocke, P. Mattfeld, S. Rjasanow, M. Fleck and R. Grzhibovskis	317
Methodology to Straighten the End Parts of Long Workpieces	
A. Belhadj Ahmed, C. Baudouin, S. Leleu, R. Bigot and P. Secordel	328
Speed Roll Laws Influence in a Ring Rolling Process	
L. Giorleo, E. Ceretti and C. Giardini	337
Potential of Duplex Plasma Deposition Processes for the Improvement of Wear Resistance of Hot Forging Dies	
B.A. Behrens, T. Yilkiran, G. Braeuer, H. Paschke and M. Weber	345
Beta Forging of Ti-6Al-4V: Microstructure Evolution and Mechanical Properties	
A. Astarita, A. Ducato, L. Fratini, V. Paradiso, F. Scherillo, A. Squillace, C. Testani and C. Velotti	359
Computer Aided Design of Manufacturing of Anchors and Formulation of the Optimization Task for in Use Properties	
M. Skóra, S. Weglarczyk, J. Kusiak and M. Pietrzyk	372

Chapter 3: Composites Forming Processes

Experimental Study of Steel and Glass Knitted Fabrics Thickness under Pre-Strain and Shear	
M. Barburski, S. Lomov, F. Lanckmans, F. de Ridder and I. Verpoest	385
Two-Scales Kinetic Theory Model of Short-Fibers Aggregates	
E. Abisset-Chavanne, R. Mezher and F. Chinesta	391
Effect of Tow Meander on the Shear Compliance of Woven Engineering Fabrics Measured Using the Biaxial Bias Extension Test	
F. Abdiwi, P. Harrison and W.R. Yu	402
Simulation of Composite Forming at Meso Scale	
S. Gatouillat, A. Barregi, E. Vidal-Sallé and P. Boisse	410
Identification of Fibre Degradation due to Friction during the Weaving Process	
C. Florimond, H. Ramezani-Dana and E. Vidal-Sallé	416
Identification of Forming Limits for Unidirectional Carbon Textiles in Reality and Mesoscopic Simulation	
P. Böhler, F. Härtel and P. Middendorf	423
Forming of a Non-Crimp 3D Orthogonal Weave E-Glass Composite Reinforcement	
J. Pazmino, V. Carvelli, S. Lomov and I. Verpoest	433
Analysis of the Blank Holder Force Effect on the Preforming Process Using a Simple Discrete Approach	
W. Najjar, X. Legrand, P. Dal Santo, D. Soulat and S. Boude	441
Monolithic Approach of Stokes-Darcy Coupling for LCM Process Modelling	
L. Abouorm, N. Moulin, J. Bruchon and S. Drapier	447
Experimental Setup to Validate Textile Material Models for Drape Simulation	
H. Krieger, A. Schnabel, L. Appel and T. Gries	456
Validation of Macroscopic Forming Simulations of a Unidirectional Pre-Impregnated Material through Optical Measurements	
A. Margossian, F. Dumont and U. Beier	465
Numerical Modelling of the Weaving Process for Textile Composite	
J. Vilfayeau, D. Crépin, F. Boussu, D. Soulat and P. Boisse	472
Characterization of Cured Composite Materials for Wind Turbine Blades	
C.J. Mitchell, J.A. Sherwood, K.A. Fetfatsidis and L.M. Dangora	478
Finite Element Modeling of Unidirectional Non-Crimp Fabric for Manufacturing of Composites with Embedded Cabling	
A.S. Petrov, J.A. Sherwood, K.A. Fetfatsidis and C.J. Mitchell	484
Analysis of the Stress Components during the Forming of a Textile Composite Reinforcement	
G. Hivet, E. Vidal-Sallé and P. Boisse	492
Formability of Fiber-Reinforced Thermoplastics in Hot Press Forming Process Based on Friction Properties	
U. Sachs, S.P. Haanappel, B. Rietman, R. Ten Thijs and R. Akkerman	501
Experiment Study of Thermoforming of Plain Woven Composite (Carbon/Thermoplastics)	
H.L. Yin, X.Q. Peng, T.L. Du and J. Chen	507
Simple Tests as Critical Indicator of Intra-Ply Shear Locking	
D.J. Wolthuizen, R.H.W. Ten Thijs and R. Akkerman	512

Chapter 4: Semi-Solid Processes

Yield Stress in Semi-Solid Alloys – The Dependency on Time and Deformation History	
S. Harboe and M. Modigell	523
Rheology of Blast Furnace Slags Admitted High Concentration of Titanium Oxides	
P. Migas and M. Korolczuk-Hejnak	536
Application of X-Ray Microtomography to Quantify the Liquid Fraction of M2 Steel for Semi-Solid Forming Process	
G.C. Gu, R. Pesci, E. Becker, L. Langlois and R. Bigot	547

Microstructure Analysis of High-Manganese TWIP Steels Produced via Strip Casting M. Daamen, S. Richter and G. Hirt	553
Advances in the Twin-Roll Strip Casting of Strip with Profiled Cross Section M. Vidoni, M. Daamen and G. Hirt	562
Thixoforging of Ultrasound Treated 6060 Aluminum Alloy A. Pola, A. Attanasio, E. Ceretti and G.M. La Vecchia	572
Thermal Profiles and Fraction Solid of Aluminium 7075 at Different Cooling Rate Conditions A.H. Ahmad, S. Naher and D. Brabazon	582
Laser Surface Modification of AISI 1025 Low Carbon Steel Using Pulsed Nd:YAG Laser for Enhance Surface Properties F. Fauzun, S.N. Aqida and M.S. bin Wahab	596
Thermal Barrier Coatings on Laser Surface Modified AISI H13 Tool Steel Using Atmospheric Plasma Spray Technique M.S. Reza, S.N. Aqida, M.R. Mohd Toff and D. Brabazon	603

Chapter 5: Light Weight Design and Energy Efficiency in Metal Forming

Cold Piercing of Cylindrical Aluminum Billet with Counter Punch Pressure R. Matsumoto and H. Utsunomiya	613
Energy-Efficient Solid Forward Extrusion through Hybridization Based on Process-Integrated Resistance Heating M. Terhorst, F. Klocke, S. Niebes, F. Schongen and P. Mattfeld	620
Basic Experimental and Numerical Investigations on Chip Pressing M. Grüner and M. Merklein	630
Coupled Thermo-Mechanical-Metallurgical Analysis of an Hot Forging Process of Titanium Alloy A. Ducato, L. Fratini and F. Micari	638
Hot Stretch Forming of a Titanium Alloy Component for Aeronautic: Mechanical and Modeling A. Astarita, E. Armentani, E. Ceretti, L. Giorleo, P. Mastrilli, V. Paradiso, F. Scherillo, A. Squillace and C. Velotti	647
Development of Metal Hollow Sphere Sheet and its Formability and Mechanical Property Y. Yoshida and Y. Otsuka	657
Numerical Investigation of the Incremental Tube Forming Process C. Becker, K. Isik, A. Bayraktar, S. Chatti, M. Hermes, C. Soyarslan and A.E. Tekkaya	664
Groove Filling Characteristics and Strength of Form-Fit Joints Produced by Die-Less Hydroforming S. Gies, C. Weddeling, L. Kwiatkowski and A.E. Tekkaya	671
Topology Optimization of a Car Seat Frame J. Oliveira, P. Teixeira, G. Lobo, J. Duarte and A. Reis	681

Chapter 6: New and Advanced Numerical Strategies for Material Forming

Modeling Thixofforming Process Using the eXtended Finite Element Method and the Arbitrary Lagrangian Eulerian Formulation E. Biotteau, P. Bussetta and J.P. Ponthot	691
Towards Online Control of Forming Processes Involving Residual Stresses: Defining Multi-Parametric <i>Computational vademecums</i> J.V. Aguado, F. Chinesta, A. Leygue and E. Cueto	699
Toward a Real Time Control of Toolpath in Milling Processes F. Poulhaon, M. Rauch, A. Leygue, J.Y. Hascoet and F. Chinesta	706
Direct 3D Simulation of Powder Sintering by Surface and Volume Diffusion D. Pino Muñoz, J. Bruchon, S. Drapier and F. Valdivieso	714

3D Modelling of Doped and Multi-Materials during Sintering of a Granular Packing H. Tossoukpe, F. Valdivieso, J. Bruchon and S. Drapier	724
Improvement on CAE Model Considering Surface Deformation of Tools in Contact with Blank Sheet for Accurate Torsional Springback Prediction in High Strength Steel Part Forming A. Ishiwatari, J. Hiramoto and T. Inazumi	732
Electromagnetic Sheet Bulging: Analysis of Process Parameters by FE Simulations J.P.M. Correia and S. Ahzi	741
An Efficient Algorithm for Modeling the Thermo-Mechanical Material Response of Heavy Steel Plates during Accelerated Cooling W. Essl, T. Antretter and E. Parteder	749

Chapter 7: Extrusion and Drawing

Coextrusion and Mechanical Characterization of Aluminum Coated Mg-Profiles M. Negendank, C. Weber, S. Müller and W. Reimers	767
Velocity Field in Direct, Indirect and Friction Assisted Extrusion of Al S. Torabzadeh Khorasani and H. Valberg	776
Modeling Approach for the Determination of Material Flow and Welding Conditions in Porthole Die Extrusion with Gas Pocket Formation M. Schwane, F. Gagliardi, A. Jäger, N.B. Khalifa and A.E. Tekkaya	787
Design Criteria in Numerical Design of Profile Extrusion Dies R. Siegbert, S. Elgeti, M. Behr, K. Kurth, C. Windeck and C. Hopmann	794
Composite Extrusion of Thin Aluminum Profiles with High Reinforcing Volume D. Pietzka, N. Ben Khalifa, S. Gerke and A.E. Tekkaya	801

Chapter 8: Friction and Wear in Material Processing

Surface Evolution and Lubricant Distribution in Deep Drawing M. Ludwig, S. Volk and P. Groche	811
Novel Experimental Set-Up to Investigate the Wear of Coatings for Sheet Metal Forming Tools F. Sgarabotto, A. Ghiotti and S. Bruschi	825
Development of Upsetting-Extrusion Type Tribometer for Evaluating Lubrication Coating Performance in Cold Forging Z.G. Wang, S. Komiyama and Y. Yoshikawa	833
Study of Morphology Wear Model of Moulds from Alloys of Aluminium EN AW-6082 in Injection Process A. Pereira, P. Hernández, J. Martínez, J.A. Pérez and T. Mathia	844
Numerical Simulations of Asperity Crushing Using Boundary Conditions Encountered in Cold-Rolling Y. Carretta, R. Boman, N. Legrand, M. Laugier and J.P. Ponthot	850
Sclero-Topometry in Superficial Wear and Metal Processing of Ductile Cast Iron at Boundary Lubrication. Application to Tribological Valorization of Waste Oil S. Eymard, R. Ourahmoune, S. Bouvier, Z. Ignaszak and T.G. Mathia	858

Chapter 9: Nano-Structured Materials and Microforming

Incremental ECAP with Converging Billets A. Rosochowski and L. Olejnik	869
Route Effects in I-ECAP of AZ31B Magnesium Alloy M. Gzyl, A. Rosochowski, E. Yakushina, P. Wood and L. Olejnik	876
Enhancing Mechanical Properties and Formability of AISI 301LN Stainless Steel Sheet by Local Laser Heat Treatment A. Järvenpää, M. Jaskari, L.P. Karjalainen and M. Hietala	885

Microstructuring by a Combination of Micro Impact Extrusion and Shear Displacement Forming	
A. Schubert, S.F. Jahn and B. Müller	893
Accuracy of Transferring Microparts in a Multi Stage Former	
R. Mahshid, H.N. Hansen and M. Arentoft	900

Chapter 10: Inverse Analysis Optimization and Stochastic Approaches

Sequential Optimization of Strip Bending Process Using Multiquadric Radial Basis Function Surrogate Models	
J. Havinga, G. Klaseboer and A.H. van den Boogaard	911
Surrogate POD Models for Parametrized Sheet Metal Forming Applications	
H. Mohamed, G. Le Quilliec, P. Breitzkopf and P. Villon	919
Damage Material Parameters Identification Using the ANN-GA Method and the Bulge Test	
H. Aguir and H. Bel Hadj Salah	928
On the Development and Computational Implementation of Complex Constitutive Models and Parameters' Identification Procedures	
T.J. Grilo, N. Souto, R.A.F. Valente, A. Andrade-Campos, S. Thuillier and R.J.A. de Sousa	936
Development of an Inverse Routine to Predict Residual Stresses in the Material Based on a Bending Test	
A. Abvabi, B.F. Rolfe, P. Hodgson and M. Weiss	949
A Two-Pronged Approach for the Assessment of Springback Variability for Sheet Metal Forming Applications	
J. Lebon, G. Le Quilliec, R. Filomeno Coelho, P. Breitzkopf and P. Villon	957
Application of Tube Hydroforming in Square Cross-Section Die for Inverse Identification Method Validation	
A. Khalfallah, T. Zribi and H.B. Salah	966

Chapter 11: Innovative Joining by Forming Technologies

Microstructure and Mechanical Properties of Friction Stir Welded AA6060-T6 Tubes	
G. D'Urso, M. Longo and C. Giardini	977
Effect of Welding Parameters on AA8090 Al-Li Alloy FSW T-Joints	
E. Lertora, C. Mandolino and C. Gambaro	985
Effect of Surface Pretreatment on the Performance of Adhesive-Bonded Joints	
C. Mandolino, E. Lertora and C. Gambaro	996
Study of the Forces Generated during Nonlinear Friction Stir Welding: Circular Trajectory	
N. Jemal, S. Chevert, L. Langlois and G. Abba	1007
Cladding of Advanced Al Alloys Employing Friction Stir Welding	
A.A. van der Stelt, T.C. Bor, B. Geijselaers, R. Akkerman and T. van den Boogaard	1014
A Numerical and Experimental Analysis of Microstructural Aspects in AA2024-T3 Friction Stir Welding	
P. Carlone and G.S. Palazzo	1022
Influence of Parameters in a Hybrid Joints (SPR/Bonded) GFRP-Aluminum	
G. Di Franco, L. Fratini and A. Pasta	1031
Numerical Study of a Crimped Assembly Mechanical Strength	
M. Petitprez and K. Mocellin	1037
Numerical and Experimental Analysis of Self Piercing Riveting Process with Carbon Fiber-Reinforced Plastic and Aluminium Sheets	
W.G. Drossel, R. Mauermann, R. Grützner and D. Mattheß	1045
Similar and Dissimilar FSWed Joints in Lightweight Alloys: Heating Distribution Assessment and IR Thermography Monitoring for On-Line Quality Control	
A. Forcellese, M. Martarelli, G. Pandarese and M. Simoncini	1055
FSW of AA 2139 Plates: Influence of the Temper State on the Mechanical Properties	
C. Velotti, A. Astarita, P. Buonadonna, G. Dionoro, A. Langella, V. Paradiso, U. Prisco, F. Scherillo, A. Squillace and A. Tronci	1065

The Friction Stir Welding of Cylindrical Components C. Bruni and S. Zitti	1075
Effect of Process Parameters on the Joint Integrity in Friction Stir Welding of Ti-6Al-4V Lap Joints G. Buffa, L. Fratini, M. Schneider and M. Merklein	1083
Partial Joining of Blanks with Electrochemical Support (ECUF) H.C. Schmidt, W. Homberg, G. Grundmeier and H.J. Maier	1091

Chapter 12: Multiscale & Continuum Constitutive Modelling

Research into the Flow Stress of Al-Mg-Si Alloy (AD-35) during the Abrupt Change of the Strain Rate at Elevated Temperatures P.A. Petrov, V. Voronkov, K. Potapenko, M. Petrov and O. Gamzina	1099
A Finite Element Based Approach for the Accurate Determination of the Shear Behaviour of Textiles with the Picture-Frame Shear Test O. Döbrich, T. Gereke and C. Cherif	1105
Characterization and Modeling of the Elastic Behavior of a XC68 Grade Steel Used at High Strain Rates and High Temperatures L. Tabourot, P. Baland, M. Vautrot, O.S. Hopperstad, J. Raujol-Veillé and F. Toussaint	1116
Growth and Closure of Voids in Metals at Negative Stress Triaxialities M. Zapara, N. Tutyshkin and W.H. Müller	1125
Analysis of Metallic Materials Behavior during Severe Loadings Using a FE Modeling of the SHPB Test Based on a Numerical Calibration of Elastic Strains with Respect to the Raw Measurements and on the Inverse Analysis Principle A. Gavrus, F. Bucur, A. Rotariu and S. Cănănașu	1133
On the Selection of Active Slip Systems in Rate Independent Crystal Plasticity M. Orthaber, T. Antretter and H.P. Ganser	1147
Polycrystalline Model Predictions of Flow Stress and Textural Hardening during Monotonic Deformation Q.G. Xie, P. Eyckens, H. Vegter, J. Moerman, B. van Bael and P. van Houtte	1157
Physically-Motivated Elasto-Visco-Plastic Model for the Large Strain-Rate Behavior of Steels J.M. Pipard, T. Balan, F. Abed-Meraim and X. LEMOINE	1164
On the Study of Distinct Algorithmic Strategies in the Implementation of Advanced Anisotropic Models with Mixed Hardening T.J. Grilo, R.A.F. Valente and R.J.A. de Sousa	1174
Asymmetric Yield Locus Evolution for HCP Materials: A Continuum Constitutive Modeling Approach D.G. Tari, M.J. Worswick and U. Ali	1184
Crystal Plasticity Modeling of the Through-Thickness Texture Heterogeneity in Heavily Rolled Aluminum L. Delannay and O.V. Mishin	1189
How to Combine the Parameters of the Yield Criteria and the Hardening Law P. Prates, M.C. Oliveira, N.A. Sakharova and J.V. Fernandes	1195
Comparison of Different Constitutive Models in Sheet Metal Forming M. Uçan and H. Darendeliler	1203
Activation Energy for Hot Deformation of 15-5 PH Stainless Steel J.D. Muñoz-Andrade	1217
Hot Deformation Studies of a Low Carbon Steel Containing V C. Poletti, M. Dikovits and J. Ruete	1224
Modelling of Polishing Tools for High Spatial Frequency Defect Correction on Aspherical Surfaces A. Goupil, I. Iordanoff, J.L. Charles and A. Rinchet	1232

Chapter 13: Incremental and Sheet Metal Forming

A Plasticity Induced Anisotropic Damage Model for Sheet Forming Processes M.S. Niazi, V.T. Meinders, H.H. Wisselink, C.H.L.J. ten Horn, G. Klaseboer and T. van den Boogaard	1245
Deformation Scenarios of Combined Stretching and Bending in Complex Shaped Deep Drawing Parts D. Kitting, A. Ofenheimer, T. van den Boogaard and P. Dietmaier	1252
Application of Response Surface Analysis and Genetic Algorithm for the Optimization of Single Point Incremental Forming Process R. Bahloul, H. Arfa and H.B. Salah	1265
Forming of Automotive Aluminum Body Panels by Sheet Hydroforming T. Maki	1273
Force Prediction for Correction of Robot Tool Path in Single Point Incremental Forming J. Belchior, D. Guines, L. Leotoing and E. Ragneau	1282
Finite Element and Experimental Investigation of the Multipoint Flexible Hydroforming S. Naceur and B.H.S. Hedi	1290
Flow Characteristics of New Steel Grades Dedicated to Hot Stamping S. Bruschi, A. Ghiotti and M. Novella	1298
Influence of Tool Geometry Variation on the Punch Force in Micro Deep Drawing G. Behrens and F. Vollertsen	1306
Evaluating Material Constitutive Equations for the Simulation of Incremental Sheet Forming Applied to Form Thermoplastic Materials I. Bagudanch, A. Elías-Zúñiga and M.L. García-Romeu	1312
Reduction of Springback in Hat Channel with High-Strength Steel Sheet by Stroke Returning Deep Drawing T. Geka, M. Asakura, T. Kiso, T. Sugiyama, M. Takamura and M. Asakawa	1320
Investigation on Effect of Slide Motion Control on Stamping of High Strength Steel Sheets M. Takamura, S. Nishimura and H. Sunaga	1331
Material Property Evolution in Incremental Sheet Forming - A Review and Comparison T. Katajarinne and S. Kivivuori	1338
The Influence of Toolpath Strategy on Geometric Accuracy in Incremental Forming E. Malyer	1351
Incremental Sheet Metal Forming with Direct Resistance Heating Using Two Moving Tools H. Meier and C. Magnus	1362
Friction-Spinning – an Innovative Incremental Forming Process for the Manufacturing of Functional Graded Parts W. Homberg, B. Lossen and A. Struwe	1368
Comparison between an Advanced Numerical Simulation of Sheet Incremental Forming Using Adaptive Remeshing and Experimental Results L. Giraud-Moreau, A. Cherouat, J. Zhang and H. Borouchaki	1375
Control System Algorithm for the Prediction of Springback in Air Bending M. Longo and G. Maccarini	1382
Single Point Incremental Forming of a Medical Implant R. Araújo, P. Teixeira, M.B. Silva, A. Reis and P. Martins	1388
An Investigation of Factors that Influence the Overall Magnitude of Cross-Sectional Distortions in Draw Bending T. Welo and F. Widerøe	1394
Experimental and Numerical Studies of Edge Rounding Process in HSLA Steels Sheet Metal M. Achouri, E. Gildemyn, G. Germain, P. dal Santo and A. Poirion	1400
Tool Path Generation for Single Point Incremental Forming Using Intelligent Sequencing and Multi-Step Mesh Morphing Techniques A.K. Behera, B. Lauwers and J.R. Dufloy	1408
Brass 70/30 and Incremental Sheet Forming Process D. Fritzen, A. Daleffe, J. Castelan and L. Schaeffer	1419
A Study on the Nose Radius Influence in Press Brake Bending Operations by Finite Element Analysis J. Bessa Pacheco and A. dos Santos	1432
On the Geometric Accuracy in Shallow Sloped Parts in Single Point Incremental Forming A. Mohammadi, H. Vanhove, A. van Bael and J.R. Dufloy	1443

Determination of Tool Motions in Stretch Forming Process for Aerospace Applications by Using Finite Element Method H.A. Hatipoglu, C.O. Alkas and C. Karadogan	1451
--	------

Chapter 14: Sheet-Bulk-Metal Forming

Manufacturing of Geared Sheet Metal Components Using Flexible Rolled Tailored Blanks S. Opel, T. Schneider and M. Merklein	1459
Development of a Friction Law Respecting Plastic Surface Smoothing F. Hauer and K. Willner	1471
Novel Five-Axis Forming Press for the Incremental Sheet-Bulk Metal Forming P. Sieczkarek, L. Kwiatkowski, N. Ben Khalifa and A.E. Tekkaya	1478
Influence of Superimposing of Oscillation on Sheet-Bulk Metal Forming B.A. Behrens, S. Hübner and M. Vucetic	1484
Innovative Tools to Improve Incremental Bulk Forming Processes P. Sieczkarek, L. Kwiatkowski, A.E. Tekkaya, E. Krebs, P. Kersting, W. Tillmann and J. Herper	1490

Chapter 15: Heat Transfer Modelling

Experimental Determination of Heat Transfer Coefficients for Forming of Stainless Steel Sheets Considering Process Conditions and Deep-Drawing Film P. Schmid and M. Liewald	1501
Estimation of the Heat Transfer Conditions in a die Radius during Hot Stamping A. Blaise, B. Bourouga, B. Abdulhay and C. Dessain	1509
Simulations of an Infrared Composite Curing Process S. Nakouzi, F. Berthet, Y. Le Maoult and F. Schmidt	1517
Simulation of IR Heating for Composite Stamping A. El Bakali, O. De Almeida, J. Bikard, M. Villière, F. Schmidt, Y. Le Maoult and M. Dauphin	1523
Influence of the Impact Angle and the Gravity Direction on Heat Transfer during the Cooling of a Cylinder by a Free Planar Subcooled Impinging Jet S. Devynck, S. Denis, J.P. Bellot, G. Maigrat, M. Varlez, T. Benard and M. Gradeck	1530
Induction Heat Treatment for an Automotive Crankshaft: Large Scale Modelling with Moving Inductors S. Klonk and F. Bay	1539
Temperature and Displacement Fields Measurements to Assist the Numerical Simulation of the Welding-Brazing Process of Thin Automotive Parts B. Beaubier, K. Lavernhe-Taillard, R. Billardon and C. Boucq	1545
Characterization of Roll Bite Heat Transfers in Hot Steel Strip Rolling and their Influence on Roll Thermal Fatigue Degradation N. Legrand, D. Weisz-Patrault, J. Horský, T. Luks, N. Labbe, M. Picard and A. Ehrlicher	1555

Chapter 16: Structures, Properties and Processing of Polymers

Prediction of Tensile Properties of Injection Moulding Flax Fibre Reinforced Polypropylene from Morphology Analysis E. Lafranche, C.I. Martins, V. M. Oliveira and P. Krawczak	1573
Digital Image Correlation for On-Line Wall Thickness Measurements in Thick Gauge Thermoforming B. van Mieghem, P. Lava, D. Debruyne, A. van Bael and J. Ivens	1583
An Original Model Experiment Designed for High-Pressure Crystallization with a Polymer Processing Concern S.A.E. Boyer and J.M. Haudin	1592
Numerical Simulation of Plug-Assisted Thermoforming Process: Application to Polystyrene C.A. Bernard, J.P.M. Correia, N. Bahlouli and S. Ahzi	1602
Uniform Cooling and Part Warpage Reduction in Injection Molding Thanks to the Design of an Effective Cooling System A. Agazzi, V. Sobotka, R. Le Goff and Y. Jarny	1611

A New PVT Device for the Thermoplastics Characterization in Extreme Thermal Conditions	
X. Tardif, N. Boyard, V. Sobotka, N. Lefèvre and D. Delaunay	1619
Structure Development of Biodegradable Polymers: Crystallization of PLA	
Z. Refaa, M. Lipinska, M. Boutaous, R. Fulchiron, F. Rousset, M. Zinet, S.H. Xin and P. Bourgin	1628
Thermo-Kinetic Analysis of Liquid Silicone Rubber	
A. Harkous, G. Colomines, N. Allanic, P. Mousseau and R. Deterre	1634
Multi Criteria Adaptive Meshing for Polymers Processing in Rem3D®	
G. Francois, L. Ville, L. Silva and M. Vincent	1649
Evaluation Method for Stretch Blow Moulding Simulations with Process-Oriented Experiments	
J. Zimmer, C. Detrois and M. Stommel	1658
Multi-Response Parameters Optimisation for Energy-Efficient Injection Moulding Process via Dynamic Shainin DOE Method	
K.H. Yin, H.L. Choo, D. Halim and C. Rudd	1669
In-Line Visualisation of Polymer Plastication in an Injection Moulding Screw	
T.L. Pham, J. Balcaen, J.Y. Charneau and Y. Bereaux	1683
Numerical Analysis of Non-Isothermal Viscoelastic Materials for Thermoforming of Polymer Films	
D. Ahmad, P. Wang, N. Hamila and P. Boisse	1692
Thermal Simulation of Polymer Crystallization during Post-Filling	
R. Spina, M. Spekowius, K. Küsters and C. Hopmann	1699
Morphology-Crystallinity Relationship in PLA-PHBV Blends Prepared via Extrusion	
A. Guinault, G. Dutarte, M. Boufarguine, G. Miquelard-Garnier and C. Sollogoub	1707
Transversely Isotropic Hyperelastic Constitutive Models for Plastic Thermoforming Simulation	
Z. Oueslati, M. Rachik and M.F. Lacrampe	1715
Analysis and Simulation of the Free-Stretch-Blow Process of PET	
J. Nixon, S. Yan and G. MENARY	1729
Role of the Interphase in the Interfacial Flow Stability in Coextrusion of Compatible Multilayered Polymers	
H.G. Zhang, K. Lamnawar and A. Maazouz	1738
Compounding and Melt Strengthening of Poly(Lactic Acid): Shear and Elongation Rheological Investigations for Forming Process	
B. Mallet, K. Lamnawar and A. Maazouz	1751
Structure-Properties Relationships in Processed Poly(ethylene terephthalate)	
J. Viana and L. Todorov	1757
Physical Modelling and Identification of Polymer Viscoelastic Behaviour above Glass Transition Temperature and Application to the Numerical Simulation of the Hot Embossing Process	
G. Cheng, J.C. Gelin and T. Barrière	1763

Chapter 17: Non-Conventional Processes

Numerical and Experimental Study of Tube Hydroforming for Aerospace Applications	
S. Mojarad Farimani, H. Champiaud, J. Gholipour Baradari, J. Savoie and P. Wanjara	1779
An Experimental Study on the Friction Stir Processing Process of Aluminium Alloy	
M.S. Weglowski	1787
Primary Research on Jet ECM Processing of Difficult to Cut Materials	
P. Lipiec, D. Wyszynski and S. Skoczypiec	1793
Machining of External Cylindrical Surfaces on a RAM Electrical Discharge Machine	
L. Slătineanu, M. Coteață, I. Besliu, L. Gherman and O. Dodun	1800
Material Efficient Manufacturing of Three-Dimensional Components Using Metal Knitting	
E. Sagström, N.K. Persson and Å. Lundevall	1806
Rapid Manufacturing of Shaped Die and Draw Punch Tools for Presses	
M. Kananen, M. Hietala and K. Mäntyjärvi	1814

Influence of Process Parameters on Surface Hardening in Hammer Peening and Deep Rolling J. Scheil, C. Müller, M. Steitz and P. Groche	1819
Investigation of Residual Stresses Induced during the Selective Laser Melting Process L. van Belle, G. Vansteenkiste and J.C. Boyer	1828
Ti-6Al-4V Cutting by 100W Fibre Laser in Both CW and Modulated Regime A. Astarita, S. Genna, C. Leone, F.M.C. Minutolo, V. Paradiso and A. Squillace	1835
Experimental Investigation on Dry Electrical Discharge Drilling M. Coteață, I. Besliu, H.P. Schulze, N. Pop and L. Slătineanu	1845
Spring Back of Curved Flanges of Rubber Formed Aluminum Parts J. Sinke	1851
Influence of Steaming and Boiling at 180 °C Plus on the Injectability of Bamboo Powder S. Kajikawa and T. Iizuka	1856
Numerical Simulation of Laser Bending of Aluminum Foams F. Quadrini, D. Bellisario, D. Ferrari, L. Santo and A. Santarsiero	1864
Novel Aerospace Architectures Made Possible by Forming Simulation J. Zettler and S. van der Veen	1872
Press-Shaving Characteristics of Ultrahigh-Strength Steel Sheets M. Murakawa, K. Nakamura, T. Shionome, F. Komuro, G. Muro and N. Koga	1879
Effect of Process Parameters on Surface Roughness in Hammer Peening and Deep Rolling M. Steitz, J. Scheil, C. Müller and P. Groche	1887
A Roll Caster to Cast Clad Strip T. Haga, H. Tsuge, S. Kumai and H. Watari	1902
Modelling and State Estimation in Pulsed ECM with Variable Electrolyte Conductivity M. Boxhammer and J.M. Lu	1910
Electrical Discharge Machining of Alumina-Zirconia-TiC Composites with Varying Zirconia Content R. Landfried, F. Kern and R. Gadow	1916
DPSS Nd:YAG Laser Precision Machining of Monocrystalline Sapphire D. Wyszynski, P. Lipiec and S. Skoczypiec	1922
Forming of Shape Memory Composite Structures L. Santo, F. Quadrini and L. De Chiffre	1930

Chapter 18: Machining and Cutting

Experimental Evaluation of Innovative Tools for Ti-6Al-4V Turning M. Strano, P. Albertelli, E. Chiappini and S. Tirelli	1941
Experimental Investigation on the Cutting Heat Distribution with Different Coating Structures Inserts Y. He, L.N. Li, C.Y. Li, L. Chen and X. Yue	1953
Experimental Study of tool Wear Mechanisms in Conventional and High Pressure Coolant Assisted Machining of Titanium Alloy Ti17 Y. Ayed, G. Germain, A. Ammar and B. Furet	1961
Cutting Edge and its Influence on the Fatigue Life of High Strength CrMn-Austenitic Stainless Steel J. Kantola, K. Mäntyjärvi and J.A. Karjalainen	1967
Effect of the Process Parameters on the Machinability Characteristics of a CoCrMo Alloy S. Bruschi, A. Ghiotti and A. Bordin	1976
Numerical Simulation of Machining Operations on Flexible Parts E. Rivière-Lorphèvre, E. Filippi and P. Dehombreux	1984
A Study of the BTA Deep Drilling Process through a Quantitative and Qualitative Analysis of the Chip Formation Process B. Haddag, J. Thil, M. Nouari and C. Barlier	1992
Investigation of the Impact of Orthogonal Cutting Processes on Nanocrystalline Surface Layer Generation V. Schulze, F. Zanger and F. Ambrosy	2009
Implementation of Advanced Frictional Laws for Modelling of High Speed Machining Y. Senecaut, M. Watremez, D. Meresse and L. Dubar	2021

Analysis of Machining Operations of a Femoral Prosthesis Using CAM Applications P. Ferreira, C. Relvas and F. Simões	2029
An Experimental Study of Drilling Parameters Effect on Composite Carbon/Epoxy Damage Y. Turki, M. Habak, R. Velasco, J.N. Laurent and P. Vantomme	2038
Thermo Mechanical Loads in Ti-6Al-4V Machining P.J. Arrazola, T. Matsumura, I. Armentia and A. Kortabarria	2047
3D Simulation of Laser Assisted Side Milling of Ti6Al4V Alloy Using Modified Johnson-Cook Material Model H. Zamani, J.P. Hermani, B. Sonderegger and C. Sommitsch	2054
Potential of Modern Lubricoolant Strategies on Cutting Performance F. Klocke, D. Lung, A. Krämer, T. Cayli and H. Sangermann	2062
An Error Model in Micro Dimple Milling T. Matsumura, R. Watanabe and Y. Musha	2072
Air Jet Assisted Machining of Inconel 718 with Whisker Reinforced Ceramic Tool T. Obikawa and K. Funai	2079
Metallurgical Aspects of Material Behaviour in Cutting of AISI 1045 C. Courbon, T. Mabrouki, J. Rech, D. Mazuyer, F. Perrard and E. D'Eramo	2085
The Effects of Cutting Conditions on Surface Integrity in Machining Inconel 718 Alloy D. Umbrello	2093

Chapter 19: Integrated Design, Modelling and Reliability Assessment in Forming (I-DMR)

Inverse Identification of CDM Model Parameters for DP1000 Steel Sheets Using a Hybrid Experimental-Numerical Methodology Spanning Various Stress Triaxiality Ratios Z.M. Yue, C. Soyarslan, H. Badreddine, K. Saanouni and A.E. Tekkaya	2103
Calibration of Material Parameters of Anisotropic Yield Criterion with Conventional Tests and Biaxial Test S.Y. Zhang, L. Leotoing, D. Guines and S. Thuillier	2111
A FEM-DBEM Investigation of the Influence of Process Parameters on Crack Growth in Aluminum Friction Stir Welded Butt Joints R.G. Citarella, P. Carlone, M. Lepore and G.S. Palazzo	2118
The Internal Stress Evaluation of Pultruded Blades for a Darrieus Wind Turbine I. Baran, C.C. Tutum and J.H. Hattel	2127
A Generic Methodology to Improve the Control of Forging Process Parameters Z. Allam, E. Becker, C. Baudouin, R. Bigot and P. Krumpke	2138
Open Die Forging of Large Shafts with Defects – Physical and Numerical Modelling P. Christiansen, J. Hattel, N. Bay, L.M. Alves and P.A.F. Martins	2145
Shape Optimization of the Conventional Simple Shear Specimen N. Souto, A. Andrade-Campos and S. Thuillier	2156
Utilizing Multiple Objectives for the Optimization of the Pultrusion Process Based on a Thermo-Chemical Simulation C.C. Tutum, I. Baran and J. Hattel	2165
Integrated Design of Wing Panel Manufacture Processes A.I. Oleinikov	2175
Integrity Evaluation of Steel Flanges Joined with Metallic Gaskets R. Gjengedal, Ø. Fyllingen and H. Sture	2187
Development of an Optimized Loading Path for Material Parameters Identification E. Ferreira, J. Pinho-da-Cruz and A. Andrade-Campos	2200
Numerical Optimization of Selective Superplastic Forming of Friction Stir Processed AZ31 Mg Alloy V. Paradiso, A. Astarita, L. Carrino, M. Durante, S. Franchitti, F. Scherillo, A. Squillace and C. Velotti	2212
CAD/CAM Strategies for a Parallel Kinematics SPIF Machine J.B.S. Farias, M.A.B.E. Martins, D.G. Afonso, S.R.H. Marabuto, J.A. Ferreira and R.J.A. de Sousa	2221
Effect of Moisture on the Behaviour of an Extruded Clay Paste J. Vignes, F. Schmidt, G. Dusserre and J.F. Dalmaso	2230

Integrated Design and Numerical Simulation of Stiffened Panels Including Friction Stir Welding Effects	
R.M.F. Paulo, P. Carlone, R.A.F. Valente, F. Teixeira-Dias and G.S. Palazzo	2237
Development of Adapted Material Testing for Cold Pilgering Process of ODS Tubes	
K. Mocellin, E. Vanegas, Y. de Carlan and R.E. Logé	2243
Study of Formability of Sandwich Shells with Metal Foam Cores	
H. Mata, R.N. Jorge, A. dos Santos, M.P.L. Parente, R.A.F. Valente and A.A. Fernandes	2252
Sensitivity Analysis of Process Parameters in the Drawing and Ironing Processes	
V.M. Simões, J. Coër, H. Laurent, M.C. Oliveira, J.L. Alves, P.Y. Manach and L.F. Menezes	2256
Earing Prediction in Drawing and Ironing Processes Using an Advanced Yield Criterion	
P.D. Barros, M.C. Oliveira, J.L. Alves and L.F. Menezes	2266
Applying Nagata Patches in the Description of Smooth Tool Surfaces Used in Sheet Metal Forming Simulations	
D.M. Neto, M.C. Oliveira, J.L. Alves, L.F. Menezes and P.Y. Manach	2277
Analysis of Incremental Sheet Forming Parameters and Tools Aimed at Rapid Prototyping	
P.J. Silva, L.M. Leodido and C.R.M. Silva	2285
Experimental Study on the Overall Spifability of AISI 304 Sheets under Different Bending Conditions	
G. Centeno, I. Bagudanch, M.L. García-Romeu, A.J. Martínez-Donaire and C. Vallengano	2293
The Influence of Cold Forming Conception on the Springback Magnitude	
P. Balon and A. Świątoniowski	2299
Improving Surface Based Clamping Simulations by Measuring the Position of Active Surfaces during the Clamping Process	
W.G. Drossel, M. Wahl, F. Schulz, R. Mauermann, W. Schützle and P. Ackert	2312

Chapter 20: Finite Element Technology and Multi-Scale Methods for Composites, Metallic Sheets and Coating Models

Comparison of Hyper- and Hypoelastic-Based Formulations of Elastoplasticity with Applications to Metal Forming	
T. Brepols, I.N. Vladimirov and S. Reese	2321
Prediction of Springback in Unconstrained Bending by a Model for Evolving Elastic and Plastic Anisotropy	
I.N. Vladimirov and S. Reese	2330
Material Modeling and Numerical Analysis of the Heat Treatment in High Carbon Steels-Application to Ring Rolling	
R. Kebriaei, I.N. Vladimirov and S. Reese	2338
A Micro-Scale Model for Fiber Tow Characterization under Nondeterministic Assumption: Longitudinal and Transverse Permeability	
P. Carlone and G.S. Palazzo	2348
Towards Fracture Prediction in Single Point Incremental Forming	
C.F. Guzmán and A.M. Habraken	2355
Simulation of Electromagnetic Forming of a Cross-Shaped Cup by Means of a Viscoplasticity Model Coupled with Damage at Finite Strains	
Y. Kiliclar, O.K. Demir, I.N. Vladimirov, L. Kwiatkowski, S. Reese and A.E. Tekkaya	2363
Micromechanical Modeling of Damage and Failure in Dual Phase Steels	
J.H. Lian, N. Vajragupta and S. Münstermann	2369
Influence of the Number of Tensile/Compression Cycles on the Fitting of a Mixed Hardening Material Model: Roll Levelling Process Case Study	
E. Silvestre, J. Mendiguren, L. Galdos and E. Sáenz de Argandoña	2375
Multi-Scale Modeling of Microstructure Evolution Induced Anisotropy in Metals	
T. Yalcinkaya	2388
Test Procedures and Simulation Model Calibration Strategies for Nonlinear Stiffness Behavior of Joints in Large-Scale Structures	
S. Hensel, F. Jesche, R. Neugebauer and R. Mauermann	2400
Numerical Implementation and Finite Element Analysis of Anisotropic Hyperelastic Biomaterials - Influence of Fibers Orientation	
R. Djeridi and M. Ould Ouali	2414

Numerical Modeling and Digital Image Correlation Strain Measurements of Coated Metal Sheets Submitted to Large Bending Deformation	
L. Duchêne, A. Ben Bettaieb, V. Tuninetti and A.M. Habraken	2424
Modelling of Damage in Blanking Processes	
A. Del Prete, G. Papadia, T. Primo and E. Mariano	2432
Influence of Anisotropic Yield Functions on Parameters of Yoshida-Uemori Model	
H. Kano, J. Hiramoto, T. Inazumi, T. Uemori and F. Yoshida	2440
Validation of the Computer Simulation Process Applied to the Incremental Forming Process for the Evaluation of Strain Paths	
F.A. Lora, U. Boff, C.C. Yurgel, L.F. Folle and L. Schaeffer	2453

Chapter 21: Intelligent Computation in Forming Processes

Optimization of the Heat Treatment Layout and Blank Outline of THTB	
M. Lechner, A. Kuppert, H. Hagenah and M. Merklein	2465
An Efficient Knowledge Based System for the Prediction of the Technical Feasibility of Sheet Metal Forming Processes	
D. Steffes Lai, S. Turck, C. Klimmek and T. Clees	2472
Development of a Damage Prediction System for Bending and Cutting of High Strength Steels	
P.H. Vatter, S. Hildering, I. Tsoupis and M. Merklein	2479
Metamodeling Based on the Fusion of FEM Simulations Results and Experimental Data	
B.M. Colosimo, L. Pagani and M. Strano	2487
Dramatic Speed-Up in FEM Simulations of Various Incremental Forming Processes Thanks to Multi-Mesh Implementation in Forge®	
P. De Micheli, E. Perchat, R. Ducloux, H. Digonnet and L. Fourment	2499
Deformations in Idealized 2D Extrusion Welding	
H. Valberg, D. Nolte and S. Torabzadeh Khorasani	2507
