

# Table of Contents

## Preface

<b>Applications and Prospective Markets for Advanced Technical Ceramics</b> R.M. Spriggs	1
<b>Advanced Engineering Ceramics for Biomedical Applications</b> J.F. Shackelford	13
<b>Crack Resistance Behaviour in Transformation Toughened Ceramics</b> M.V. Swain	23
<b>Alumina Ceramics for High Temperature Applications</b> P.A. Badkar	45
<b>A Review on Boron Carbide</b> F. Thevenot	59
<b>Titanium Carbide Based Cermets for Wear Resistance Applications</b> D.M. Deo, J.P. Saxena and S. Basu	89
<b>Key Issues in Si<sub>3</sub>N<sub>4</sub> and SiC Matrix Composites for Automobile and Aerospace Applications</b> S. Dutta	99
<b>Nitride Ceramics - A Brief Account of Work Done in CGCRI</b> J. Mukherji	107
<b>Engineering Ceramics Development in BARC</b> S.K. Roy	121
<b>Structural Ceramics for Launch Vehicles and Satellites</b> B.K. Sarkar	135
<b>Comparative Evaluation of Alumina Powders Obtained from Different Routes for Engineering Applications</b> C.H. Page and A.K. Chatterjee	151
<b>Coated Powders for Ceramics and Composites</b> D.K. Agrawal, S.B. Majumder and G.V. Ramani	165
<b>Self-Propagating High Temperature Synthesis of Refractory Nitrides, Carbides and Borides</b> S. Kumar	183
<b>Spray Drying of Ceramic Slurries</b> H.J. Graef and G. Seitz	189
<b>Sintering Aspects of Nonoxide Ceramics</b> G.S. Upadhyaya	205
<b>Characterisation and Control of Rheological Properties in Engineering Ceramics</b> R. Blanc, C. Camoin and J.C. Casanova	227
<b>Silicon Nitride Powders and their Processing</b> S.G. Malghan	243
<b>Prospects and Problems with Ceramic Injection Molding</b> B.C. Mutsuddy	265
<b>Energy Conservation through Silicon Carbide 'ENECOAT' of Higher Emissivity</b> I. Benko and A. Fargo	303
<b>Characterisation of Engineering Ceramics by Electron Microscopy</b> F. Appel, M. Bartsch and U. Messerschmidt	313
<b>Nano-Composite Materials Based on Si<sub>3</sub>N<sub>4</sub> and SiC</b> K. Niihara, K. Izaki and A. Nakahira	319
<b>Thermal Analysis of Engineering Ceramics</b> S. Meriani, V. Sergo and C. Schmid	327
<b>The Deformation and Fracture Characteristics of Superplastic Ceramics</b> A.H. Chokshi	349
<b>Indentation Techniques for Evaluation of Mechanical Properties of Ceramics and Glasses</b> H. Matzke	365
<b>Nondestructive Testing of Ceramic Engineering Components by X-Ray and Ultrasonic Techniques</b> W. Arnold and H. Reiter	393

<b>Classification and Standardization of Advanced Technical Ceramics</b> G.C. Padgett	411
<b>Test Methods of Advanced Ceramics - Reasonable Approaches to Certification of Ceramics</b> G. Gogotsi	419
<b>Ceramic Nuclear Fuels Development at BARC - Recent Activities</b> C. Ganguly	435
<b>Fabrication, Characteristics and In-Pile Performance of UO<sub>2</sub> Pellets Prepared from Dry Route Powder</b> A. Chotard, A. Ledac and M. Bernardin	471
<b>Sol Gel Processes for Nuclear Fuels and their Application Potential for Non Nuclear Materials</b> P. Gerontopoulos	489
<b>Synroc - An Alternative for High Level Nuclear Waste Fixation</b> K.D. Reeve	507
<b>Solidification of High-Level Radioactive Waste</b> C.G. Sombret and A.F. Jouan	527
