

Table of Contents

Preface

Chapter 1: Heat Transfer and Fluid Mechanics

Effect of the Inclination on Three-Dimensional Incompressible Fluid Flow in a Discretely Heated Cavity	
L. Belarche, B. Abourida, S. Smolen and T. Mediouni	3
Operational Control of Hydraulic Turbines Assisted by Speed Variation	
U. Borchert, J.A. Szymczyk and J. Iwan	9
Free Convection of Water-Al₂O₃ Nanofluid from Horizontal Porous Coated Tube	
J.T. Cieřliński and K. Krygier	15
Wettability of Horizontal Stainless Steel Tube by Nanofluid Droplets	
J.T. Cieřliński and K. Krygier	21
Development of a Stall Barrier with Internal Flow Channel for Effective, Highly Separated Boundary Layer and Flow Control in the Rotor Blade Root Region	
F. Kortenstedde, B. Stanke, C. Wendler and B. Steckemetz	29
Experimental Investigation of Parameters, Influencing Velocity Fields during Beer Fermentation	
H. Meironke and K. Böttcher	37
Calculation and Optimization of Heat Transfer between the Low Exergy Heat Source and Organic Rankine Cycle Applied to Heat Recovery Systems	
S. Smoleń and H. Boertz	45
Experimental and Numerical Investigation of Thin Liquid Layers at Curved Solid Edges	
O. Sommer, D. Moller and G. Wozniak	51
Effect of Surface Roughness on Thermal-Hydraulic Characteristics of Plate Heat Exchanger	
J. Wajs and D. Mikielwicz	63

Chapter 2: Power Engineering

Methods of Determination of the Fuel Consumption of the Locomotive Diesel-Electric Propulsion System for Regular Operating Conditions	
P. Kortas	77
Organic Rankine Cycle as Bottoming Cycle to a Combined Brayton and Clausius - Rankine Cycle	
D. Mikielwicz, J. Wajs and E. Źmuda	87
The Analysis of Turbine Propulsion Systems in Nuclear Submarines	
M. Piwowarski	99
Selected Problems of Cogeneration Energy Systems Designing, Fueled with Landfill Biogas	
M. Ziolkowski	107

Chapter 3: Mechanics and Mechatronics

Modal Parameters Identification with Particle Swarm Optimization	
M.A. Galewski	119
High Speed Milling Vibration Surveillance with Optimal Spindle Speed Based on Optimal Speeds Map	
K.J. Kaliński, M.A. Galewski and M.R. Mazur	125
On Software Unit Testing for Improving Security and Performance of Distributed Applications	
H. Krawczyk, M. Barylski and A. Barylski	131
Frequency Response Spectra Applied to Assess Efficiency of the Training Techniques	
T. Kucharski	137

Numerical Comparison of Damping Amplification Effects Obtained in Neighbourhood of a Mechanism's Singular Position - Viscous and Electromagnetic Cases K. Lipiński	145
--	-----

Chapter 4: Technology and Automotive Engineering

Investigations into Fundamentals and Forming System Design for Micro-Tube Expansion with Pressurized Media G. Anyasodor and C. Hartl	153
Generative Process Planning with Reasoning Based on Geometrical Product Specification M. Deja and M. Siemiatkowski	159
Analysis of Rolling Resistance of Tires with Run Flat Insert J.A. Ejsmont, J. Jackowski, W. Luty, G. Motrycz, P. Stryjek and B. Swieczko-Zurek	165
Diffusible Hydrogen Control in Flux Cored Arc Welding Process D. Fydrych, A. Świerczyńska and J. Tomków	171
The Initial Selection of Parameters for Dynamic Brake for Car Engine Test Dynamometer Z. Kneba and J. Kropiwnicki	179
Carbon Dioxide Potential Reduction Using Start-Stop System in a Car J. Kropiwnicki and Z. Kneba	185
Road Texture Influence on Tire Rolling Resistance S. Taryma, J.A. Ejsmont, G. Ronowski, B. Swieczko-Zurek, P. Mioduszewski, M. Drywa and R. Woźniak	193
Analysis and Comparison of Safety of Children and Adult Passenger in Car Based on Crash Tests Results B. Zdunek, M. Landowski, S. Taryma, R. Woźniak, K. Imielińska and A. Muszyński	199
