Editorial

Chapter 1: Metrology for SI

Revision of the SI: The Determination of the Avogadro Constant as the Base for the Kilogram	
A. Nicolaus, H. Bettin, M. Borys, U. Kuetgens and A. Pramann	3
Characterizing the New Sphere Interferometer for the Diameter Determination of the Avogadro Spheres	
T. Mai, G. Bartl, A. Nicolaus and A. Peter	11
New Avogadro Spheres for the Redefinition of the Kilogram	
A. Nicolaus, R. Meeß and G. Bartl	17
Recommendations for Unified Rules for Key Comparison Evaluation	
F. Härtig, H. Bosse and M. Krystek	26

Chapter 2: Position & Displacement Metrology

Reproducibility of a Nanometre Accurate Moving-Scale Measurement System	
N. Bosmans, J. Qian and D. Reynaerts	37
Error Separation and Dynamic Compensation Method in Coplanar Planar Grating Displacement Measurement System	
Y.M. Liu, M.Q. Yuan, J.R. Cao, J. Ma and J.B. Tan	43
Highly-Stable Electronic Sensor Interface for Capacitive Position Measurement	
R. Nojdelov and S. Nihtianov	51
Model and Measurement Method of Optical Nonlinearities Caused by the Heterodyne and Homodyne Interference Terms in the Heterodyne Interferometer	
H.J. Fu, J.B. Tan, P.C. Hu and Z.G. Fan	58
Orthogonality Measurement of Cross-Grating Based on Image Processing of Multi-Order Diffraction Patterns	
Y. Hu and N.F. Wang	64
Research on a Long Travel Nanopositioning Air Bearing Stage with the Linear Motors	
F.J. Shiou, C.J. Chen, W.S. Chien and H.C. Liou	70

Chapter 3: Micro- and Nanometrology

Changing Technology Requirements of Mask Metrology in Semiconductor Industry	
K. Roeth, M. Wagner and F. Laske	81
Automated Tool for Measuring Nanotopography of 300 mm Wafers at early Stages of Wafer Production	
B. Tröger, A. Mühlig, T. Fries, S. Bauer, H. Wihr, F. Riedel, D. Lewke and M. Schellenberger	87
Full Scale Calibration of a Combined Tactile Contour and Roughness Measurement Device	
R. Volk and S. Feifel	94
A Virtual Instrument for SEM Uncertainty Analysis	
D. Gnieser, C.G. Frase, H. Bosse and R. Tutsch	101

Chapter 4: Macrometrology

Super-Large Gear Measurement Using Laser Tracker and CMM	
Z.Y. Shi, J.C. Lin, C.G. Pan, B. Zhang and H. Lin	111
Experimental Performance Study of Industrial-Grade Coordinate Measuring Machines Using a Calibrated Production Workpiece	
C.R. Baldo and G.D. Donatelli	118

Analysis of a Big Joint Implant R. Monostori and I. Dudás	125
High Stability of Temperature Control Using Vacuum Insulated Wall for Gauge Block Measurement M. Ranusawud, P. Limsuwan, K. Vatcharanukul and T. Somthong	133

Chapter 5: Optical Metrology

First Utilization of Energy Transfer in Structured Light Projection - Infrared 3D Scanner E. Wiedenmann, T. Scholz, R. Schott, J. Tusch and A. Wolf	141
High Precision Algorithms for 3D Objects Shadow Inspection in Partially Coherent Light Y.V. Chuguy and E.S. Senchenko	151
Measuring Parallelism for Two Thin Parallel Beams Based on Autocollimation Principle Z.G. Lu, S. Lin, T. Zheng, L.Y. Zhang and J.B. Tan	157
Realization of Non-Mechanical Lateral and Axial Confocal Microscopic Laser Scanning with a Phase only Liquid Crystal Spatial Light Modulator J.Q. Qu, L.M. Zou, Y.J. Chen and X.M. Ding	167
An Approach to On-Line Uncertainty Evaluation in Non-Contact Temperature Measurements A. Ionov, B. Ionov, N. Chernysheva and E. Plotkin	173

Chapter 6: Sensors and Actuators

Design and Testing of Wind Energy Harvester Based on PVDF L.J. Guan, F.X. Bai and W.J. Dong	185
Investigation of Energy Harvest Using a Piezoelectric Unimorph Post-Buckled by a Stretching Spring S.F. Sun, W.J. Dong and Y. Cui	193
Development of a Compact Deformable Mirror Using Push-Pull Actuators H. Shimizu, K. Tanaka and Y. Tamaru	200
Self-Diagnostics of Piezoelectric Transducers V.N. Kostyukov and A.V. Kostyukov	204
Evaluation of the Transient Temperature Distribution of End-Face Sliding Friction Pair Using Infrared Thermometry W. Wei, J.W. Yu, T. You, X.F. Yu and Y.H. Wang	213
IEEE 1451-Based Sensor Interfacing and Data Fusion for Fire Smoke Detection C.C. Ho and D.W. Kuo	219
Valveless Micropump with Saw-Tooth Microchannel Y.H. Xu, W.P. Yan and L. Guo	228

Chapter 7: Material Properties' Characterization

Analysis of Materials and Structures in Scientific Applications Using Micro Focus Computed Tomography G. Natour and F. Pauly	239
Investigation of Different Piezoresistive Materials to be Integrated into Micromechanical Force Sensors Based on SU 8 Photoresist A. Oerke, C. König, S. Büttgenbach and A. Dietzel	244
Investigation on Internal Stress of SU-8 Photoresist Film X.L. Zhang, L.Q. Du and S.M. Zhu	251
Measurement of the Thermal Conductivity of Polydimethylsiloxane Polymer Using the Three Omega Method N. Al-Khudary, P.Y. Cresson, Y. Orlic, P. Coquet, P. Pernod and T. Lasri	259

Chapter 8: Intelligent Instruments for Automation

Accumulative Drifting Model of Inertial Navigation Platform under Elliptic Vibration Z.X. Fu, Y.R. Lin, Y. Liu and X.L. Chen	269
Artificial Intelligent Systems for Quality Assurance in Small Series Production M.R. Stemmer, C.P.B. da Costa, J. Vargas and M.L. Roloff	279
Efficient Commissioning Processes for the Automotive Final Assembly C. Janssen, B. Falk and R.H. Schmitt	288
Graphical Hardware Description as a High-Level Design Entry Method for FPGA-Based Data Acquisition Systems C. Landmann and R. Kall	296
Improvement of the Reliability of Information Received from Sensor Devices with Metrological Self-Check Y. Backsheeva, K. Sapozhnikova and R. Taymanov	307

Chapter 9: Management of Measurement Processes

Uncertainty Evaluation for Surgical Processes M. Nau-Hermes, S. Pollmanns and R.H. Schmitt	317
Characterization and Correction of Geometric Errors Induced by Thermal Drift in CT Measurements F.B. de Oliveira, M. de Campos Porath, V.C. Nardelli, F.A. Arenhart and G.D. Donatelli	327
X-Ray Computed Tomography Applied as a Comprehensive Technique for Material Analysis and Dimensional Measurement of Metallic Parts D.C.B. Silva and C.R. Baldo	335
Theory and Practice of Uncertainty Evaluation of Coordinate Measurements W. Płowucha and W. Jakubiec	344
Capability of Measurement Processes Based on ISO/FDIs 22514-7 and VDA 5 E. Dietrich	354
Multi-Agent Based Chaotic Traffic Simulation for Cairo Ring Road S.E. Hussein and S. Zahwi	363
Novel Method for Predicting Solar Proton Events Based on Grey Relational Analysis and Joint Probability Density Q. Li, Z.Y. Wang, H. Yan and Q. Wang	374

Chapter 10: Calibration and Machine Tool Performance

Development of High Precision Test Masses for the MICROSCOPE Space Project D. Hagedorn, H.P. Heyne, S. Metschke, U. Langner, V. Lebat, M. Rodriguez, P. Touboul and F. Löffler	381
Measuring the Rail Profiles of a Long Hydrostatic Guideway in a Precision Roll Lathe J.S. Oh, C.H. Park and J.H. Jeong	392
Precision Control of Laser Beam Based on Liquid Crystal Spatial Light Modulator in Ultra-Precision Manufacturing J. Zhang, L.Y. Wu and D. Wang	401
Study on the Calibration of Dynamic Balancing Machine for Separating System Interference Vibration S. Deng, D.D. Zhao and P. Cai	408

Chapter 11: Trends in Production Technology

Cost-Efficient Measurement System Analysis for Small-Batch Production R.H. Schmitt, M. Wiederhold, J. Damm, M. Harding, P. Jatzkowski and R. Ottone	417
Improving the Accuracy of a Multi-Arm-Robot-System by Parameter Identification of the Single Arms T. Detert, T. Mannheim, M. Hüsing and B. Corves	428
Optical Part Measuring inside a Milling Machine N. Meier and A. Georgiadis	440

Strategies for Correcting the Workpiece Deformation during the Manufacturing at the Milling Process	
A. Georgiadis, M. Eggebrecht and T. Wagner	446
Requirements for Modeling the Human Operator in Socio-Technical Production Systems	
M. Faber, M.P. Mayer and C.M. Schlick	453

Chapter 12: Measurements, Modeling and Simulation in the Humanitarian Field

The Search for Metrics for a Musicians Performance Style	
N. Solovyeva	463
Measuring Mental Wealth: Indices of Social Inequality for Cross-Cultural Investigations	
V.M. Petrov and L.A. Mazhul	468
Measuring Social Progress: Indicators of Vertical Growth	
V.M. Petrov	474
Measurements Enable Some Riddles of Sounds to be Revealed	
R. Taymanov and K. Sapozhnikova	482
