

# Table of Contents

## Preface and Prologue

<b>The Influence of Equivalent Contact Area Computation in Extended Node to Surface Contact Elements</b> G. Wautelet and J.P. Ponthot	1
<b>A Partitioned Formulation for FEM/BEM Coupling in Contact Problems Using Localized Lagrange Multipliers</b> J.A. González, K.C. Park and R. Abascal	23
<b>On Steady Wear States for Monotonic Relative Sliding of Contacting Bodies</b> I. Páczelt and Z. Mróz	49
<b>Anisotropic Contact and Wear Simulation Using Boundary Elements</b> L. Rodríguez-Tembleque, F. M.H.Aliabadi and R. Abascal	73
<b>Life Assessment in Fretting Fatigue</b> C. Navarro, J. Vázquez and J. Domínguez	99
<b>Transient Dynamic Analysis of Cracked Multifield Solids with Consideration of Crack-Face Contact and Semi-Permeable Electric/Magnetic Boundary Conditions</b> M. Wünsche, A. Sáez, F. García-Sánchez, C.Z. Zhang and J. Domínguez	123
<b>BEM and Tangent Operator Technique Applied to Analysis of Contact Problems</b> S.G. Ferreira Cordeiro and E.D. Leonel	151
<b>Effect of Friction on the Size of the Near-Tip Contact Zone in a Penny-Shaped Interface Crack</b> E. Graciani, V. Mantič and F. París	179
<b>Closed-Form Solution of the Frictional Sliding Contact Problem for an Orthotropic Elastic Half-Plane Indented by a Wedge-Shaped Punch</b> A. Kucuksucu, M.A. Güler and A. Avcı	203
<b>Nonlinear Time Spectral Analysis for a Dynamic Contact Model with Buckling for an Elastic Plate</b> A.D. Muradova and G.E. Stavroulakis	227
