## Chapter I: Machining Technologies and Materials Engineering

|                                                                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Experimental Effect of Cryogenic MQL Cutting 304 Stainless Steel</b><br>A.D. He, B.Y. Ye and Z.Y. Wang                                                        | 3   |
| <b>Static Stiffness Optimization of Large Ram Based on Equivalent Elastic Modulus</b><br>F.H. Wu, X.P. Xu, J. Wang and J.W. Fan                                  | 9   |
| <b>Experimental Study on Laser Impact Welding of Dissimilar Metals</b><br>Y.X. Gu, X. Wang, E.S. Hao, Y.Y. Zheng, T.B. Qiu, Y.J. Ma and H.X. Liu                 | 19  |
| <b>A Study of Multiple Laser Shock Micro-Adjustment Using Numerical Simulation</b><br>D. Zhang, C.X. Gu, J.W. Yuan, Z.B. Shen, H.X. Liu and X. Wang              | 25  |
| <b>Simulation Study of Material Deformation in Monocrystal Silicon Nano-Machining</b><br>N. Yu, Y.C. Liang, J.X. Chen and Y.B. Guo                               | 32  |
| <b>A Strategy for On-Line Monitoring the Crosslinking Degree of 3D Printing Hydrogel Fiber Based on Dual-Threshold Enhancement Method</b><br>Y. Li and P.Y. Bian | 38  |
| <b>Clonal Selection Algorithm Based Optimization of Heating Channels for Variotherm Injection Mold</b><br>N.N. Gong, X.P. Li and C. Yang                         | 44  |
| <b>Research on the Formation of Dimensional Chain for Thread Hob of Double-Roller Machine Rolling Thread by Axial Feed</b><br>W.X. Li and M. Jia                 | 51  |
| <b>Application and Developing Trends of Mechanical Tiling Technology in the Laser Fusion Device</b><br>H. Si, Y.B. Guo and Y.C. Liang                            | 57  |
| <b>Research on Vibration Characteristics of Hardened Steel Precision Machining Process</b><br>G.J. Chen, Y.S. Wang, R. Xu and X.L. Liu                           | 63  |
| <b>Effects of Cutting Speed on the Wear Properties of TiAlN PVD Coated Tool for Cutting P20 Mold Steel</b><br>H. Lin, Y.X. Lin and Z.W. Han                      | 69  |
| <b>Effect of Cutting Speed on Wear Property of TiAlN PVD Coated Tools in High-Speed Milling of AISI P20 Mold Steel</b><br>Y.X. Lin, H. Lin and Z.W. Han          | 75  |
| <b>Study on the Strain Hardening Exponent N under the Ultrasonic Action and Establishment of Constitutive Equation</b><br>L.C. An and X.L. Cheng                 | 82  |
| <b>Effect of Injection Parameters on Warpage and Sink Index of High-Gloss Injection Parts</b><br>Y.N. Song, X.P. Li and N.N. Gong                                | 88  |
| <b>The Geometry Errors Analysis of Laser Cutting Head</b><br>S.C. Fu, H.Z. Zhang, Z.X. Yan and Y. Wang                                                           | 94  |
| <b>Research on the NC Woodworking Curve Band Saw CAM</b><br>Y. Chen, J.H. Tan, X.J. Zou, L.J. Chen, B. Li and J. Wang                                            | 101 |
| <b>Research of Blades of Complex Surface Construction Based on Laser Rapid Prototyping</b><br>Z.B. Yang and Z.P. Qu                                              | 107 |
| <b>Development Status and Trends of Mass Finishing Processes</b><br>W.H. Li, S.Q. Yang, X.H. Li and W.D. Li                                                      | 111 |
| <b>Technical Study of Laminated Template Electroforming in Fabrication of Metal Parts</b><br>H. Fan and Y.P. Zhao                                                | 121 |
| <b>Research on Factors of High Strength Steel TRB Hot Stamping</b><br>X.Q. Han, Y. Li and C.X. Lei                                                               | 127 |
| <b>Research on Ceramics Crack Propagation under the Ultrasonic Vibration Grinding Based on the Nonlocal Theory</b><br>J.L. Tong, C.J. Zhang and B. Zhao          | 134 |

|                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on the Grind-Hardening of the Loader Clevis Pin</b><br>J.D. Liu, J.Z. Zhuang and Z.L. Xu                                                                                 | 140 |
| <b>Research on Removal Mechanism and Surface Features of Al<sub>2</sub>O<sub>3</sub> Engineering Ceramics in Ultrasonic Lapping</b><br>C.J. Zhang, J.L. Tong, B. Zhao and F. Jiao | 146 |
| <b>Model-Based Design and Implementation of an Ultrasonic Elliptical Vibration Cutting Device</b><br>L.H. Hu, M. Zhou and Y.L. Zhang                                              | 153 |
| <b>On the Size Effects in Micro/Meso Upsetting of Brass H62 at Elevated Temperatures</b><br>H.Y. Wang, Z.H. Yao and D.Q. Mei                                                      | 158 |
| <b>Research on the Hot Stamping of Invar Based on Flexible Mould</b><br>J.S. Huang, G.L. Wang, D.X. Shao and H.Y. Wang                                                            | 165 |
| <b>Acoustic Emission Signal Acquisition and Analysis on Tool Wear</b><br>H.Y. Huang and Y. Hong                                                                                   | 171 |

## **Chapter II: Mechanical Engineering and Engineering Design**

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Tacho Plate's Technological Procedure Compilation and the Fixture's Digital Design</b><br>H.W. Lv and D.B. Wei                                                                                 | 181 |
| <b>Analysis of Bearing Mechanics Characteristic of Wind Turbine</b><br>L.Y. Xu, Y. Mao and Q. Wu                                                                                                  | 188 |
| <b>Torsional Vibration of Precise Cable Drive System</b><br>Y.F. Lu, D.P. Fan, Q.Y. Chen and X. Xie                                                                                               | 195 |
| <b>Research on Production Control Mode of Manufacturing System Based on Neuroendocrine Hormonal Regulation</b><br>D.B. Tang, H.T. Zhang, M. Dai and C.S. Wang                                     | 201 |
| <b>Research on the Composite Control Scheme for the Stabilized Loop of Inertial Stabilized Platform</b><br>H.B. Liao, S.X. Fan, M. Hei and D.P. Fan                                               | 209 |
| <b>Mechanical Design and Simulation Analysis of Finned Tube Winding Machine for Assembly</b><br>Y.P. Wang, G. Li, L. Gao, D.Y. Liu, C.X. Shi and W.Y. Yuan                                        | 215 |
| <b>Research on Aluminum Strip Winding Machine CNC System Design</b><br>G. Li, Y.P. Wang, Y.P. Shi, C.X. Shi, Y.X. Ying and J. Zhou                                                                | 221 |
| <b>The Optimization Design on Transmission Mechanism of Tightening Machine</b><br>Q.Y. Sun, Y.L. Wang, X.L. Meng and X.D. Yu                                                                      | 227 |
| <b>Development and Experimental Study of Magnetic Property for Servo Valve Torque Motor</b><br>C.C. Li, D.X. Shao and G.L. Wang                                                                   | 233 |
| <b>Design and Optimization of Elevator Mechanism in Roller Module Rapid Replacement System</b><br>H.H. Xu, Z.Q. Zhang, R.D. Li and L.S. Zeng                                                      | 239 |
| <b>Development and Experiment of Viscoelasticity Measurement Device for Sponge Material</b><br>Y.L. Song, T. Zhang, S.M. Gao and Z.X. Wang                                                        | 246 |
| <b>Structural Analysis for Space-Swing Mechanism on Gyrotory Compactor</b><br>J. Qian and L.W. Meng                                                                                               | 253 |
| <b>Research on Modelling and Experiment for Passive Adaptive MR Damper Based on GMM Inverse Effect</b><br>P. Ding, X.J. Liu, P.F. Li, Y.Z. Jiao and Q.G. Zhang                                    | 260 |
| <b>Research on Calibration Method of Structure Parameters of Parallel Mechanism Based on MATLAB</b><br>Y.G. Wei, Z.X. Wang, R. Wang and Y.C. Fan                                                  | 268 |
| <b>Generator Stator Bar-Ends Cure-Heating Monitor System on Fuzzy PID</b><br>X.D. Tan, X.X. Wang and J. Chen                                                                                      | 274 |
| <b>The Analysis of the Life of Conveyer-Belt on a Hydraulic Tensioning Device</b><br>X.D. Tan, P.W. Song and Y. Li                                                                                | 282 |
| <b>The Wireless Network Routing Protocols and Data Communication Methods for Multiple Sensor Information Used in Mining Mechanical</b><br>M. Wang, X.Y. Tang, W.X. Zeng, J.L. Zhou and R.H. Zhang | 288 |

|                                                                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Design of the B-Axis of the Water Chamber Special Turn-Milling Center</b><br>F.H. Wu, S.Z. Li, C.M. Jiang and D.D. Gao                                                           | 294 |
| <b>Analysis of Vibration Cause and Damping Design to Lubricating Oil Pipe of 10-K-302C Compressor Based on Numerical Simulation</b><br>Y.X. Zhang, H.L. Pan and X.Z. Xu             | 304 |
| <b>Analysis of High Pressure Transients in Water Hydraulic Pipeline Using Matlab/Simulink</b><br>T.Y. Zhao, D. Jiang, S. Yu, J. Wang and P. Yang                                    | 311 |
| <b>A Design of Electric Hydraulic Lifting Device Supported by Mechanical Structure</b><br>X.L. Ren, X.M. Shang, C. Fan and Y.T. Du                                                  | 317 |
| <b>Design of a Large-Torque Precise Cable Drive Mechanism</b><br>W.D. Tang, Q.K. Zhou, D.P. Fan, F.T. Xiong and N.Z. Xia                                                            | 323 |
| <b>Research of Non-Contact Stiffness Measurement Technology</b><br>W.X. Liu, H.F. Wang, G.L. Wang and D.X. Shao                                                                     | 331 |
| <b>Structure Design of Biaxial Rotary Milling Head with High-Torque, High-Precision and Mechanical Spindle</b><br>E.P. Chen, S.H. Li, F.H. Wu and C.M. Jiang                        | 337 |
| <b>A Piezo/Gear Compound Drive: Principles Analysis and Simulation</b><br>X. Xie, S.X. Fan, D.P. Fan and H. Liu                                                                     | 346 |
| <b>Venation-Like Layout Design of Plate's Stiffeners</b><br>Y.X. Li, F.H. Wu, F.X. Cheng, J. Wang and W.Y. Wang                                                                     | 351 |
| <b>Oil Temperature Control System PID Controller Algorithm Analysis Research on Sliding Gear Reducer</b><br>Y.M. Wang and X.G. Wang                                                 | 357 |
| <b>Marine Gear Reducer Design Device of Lubricating Oil Temperature Control System</b><br>Y.M. Wang and X.G. Wang                                                                   | 365 |
| <b>Design and Co-Simulation Analysis of Flip Climbing Transmission System for Stair-Climbing Wheelchair</b><br>Z.L. Wang, Y.J. Hu, Y.W. Chen and H.C. Guo                           | 372 |
| <b>Research on the Automatic Test System of Bus Dashboard Function Based on Machine Vision</b><br>R.X. Guo, J. Wang and P.G. Ma                                                     | 378 |
| <b>Numerical Design of Stepped Compound Horn with Longitudinal-Torsional Vibration under Single Acoustic Excitation</b><br>J.X. Zheng, J. Han and C.S. Liu                          | 385 |
| <b>Design of the Output Performance Test System of Permanent Magnet Linear Force Motor</b><br>X.X. Cheng, X.D. Pan and G.L. Wang                                                    | 392 |
| <b>Body Structure Static-Dynamic Analysis and Optimization of a Commercial Vehicle</b><br>M.M. Wang, T.F. Li, X. Li, C. Liu and H.X. Liu                                            | 400 |
| <b>The Virtual Design of the Self - Propelled Tomato Harvester</b><br>Y.J. He, A. Wu and Y. Li                                                                                      | 407 |
| <b>The Research on Red Light Ranging Float Pneumoelectric Conversion Technology</b><br>X.D. Pan, B. Li, G.L. Wang and G.Y. Zhang                                                    | 413 |
| <b>Research on Tension Control System of Wire Saw Slicing Machine</b><br>Y.B. Feng, B. Chen and T. Sun                                                                              | 419 |
| <b>Simulation and Experiment Study of Heat Dissipation of Heavy-Duty Vertical Lathe Faceplate</b><br>X.D. Yang, B.W. Gao, W.C. Lei, Y.Q. Zhang, L. Yu, D. Wang and Z.Q. Li          | 425 |
| <b>Comparative Study on Pressure Field of Hydrostatic Thrust Bearing with Different Recess Shapes</b><br>X.D. Yu, Z.Q. Wang, X.L. Meng, Q.H. Zhou, Y.Q. Zhang, L. Yang and H. Jiang | 431 |
| <b>Static Performance Analysis of Foil Thrust Bearing Based on Thin Plate Theory</b><br>J.J. Zhu, J.J. Du, B. Li, C.L. Li and D. Liu                                                | 437 |
| <b>Improvement and Error Analysis of Spring Tube Stiffness Measurement</b><br>W.X. Liu, H.F. Wang, G.L. Wang and D.X. Shao                                                          | 443 |
| <b>Technology Explore and Equipment Development of Walnut Shell-Breaking with Hierarchical and Double Roller</b><br>H. Zhang, S.H. Ma, H.P. Lan and Z.C. Hao                        | 450 |

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Modeling and Error Analysis of Hydrodynamic Experimental Apparatus</b><br>Y.W. Wang, K. Yu and J.B. Tan                            | 456 |
| <b>Modeling and Control Simulation for the Multi-Range Hydro-Mechanical CVT</b><br>M.Z. Zhang and Z.L. Zhou                           | 462 |
| <b>Adaptable Interface Design of Roller Module Rapid Replacement System</b><br>H.H. Xu, Z.Q. Zhang, R.D. Li and L.S. Zeng             | 470 |
| <b>Development and Experimental Study of Dynamic Characteristics for Servo Valve Torque Motor</b><br>C.C. Li, D.X. Shao and G.L. Wang | 476 |
| <b>Design of a Spool Valve Overlap Value Pneumatic Measuring System Based on Constant Pressure Control</b><br>R.Q. Song and G.L. Wang | 482 |

### **Chapter III: Industrial Robot Technology**

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Research on Kinematics of Assistant Robot Based on Vector Product Method</b><br>J.Z. Xing, Z.M. Wang, Y.M. Qi and S.P. Deng                                            | 493 |
| <b>Researches on Virtual Machining Simulation of Flexible Manufacturing Cell Based on KUKA Robot</b><br>T.B. Yu, X. Zhang, X.L. Xu, L. Geng and W.S. Wang                 | 499 |
| <b>Research on Modeling and Coordinated Driving Control for Wheeled Mobile Robot on Complex Terrain</b><br>P.S. Ge, R.H. Zhang, T. Zhang, X.C. Zhao and L. Tao            | 505 |
