

# Table of Contents

## Preface, Conference Organizers

## Chapter 1: Precision Metrology

<b>A Fast Approach to Obtain High-Precision Measurement of the Minimum Circumscribed Cylinder Using Computer Drawing</b>	
W.F. Chen and J.T. Chang	3
<b>A New Method of Reducing the Measurement Blind Area for MPS</b>	
C. Deng, Y.H. Kang, Q. Zhou and H. Li	9
<b>Calibration for Laser Scanners Based on the NIM 80m Indoor Ranging Facility</b>	
X.R. Deng, Z.Y. Qian and J.S. Li	14
<b>Cutting Force Evolution and its Power Spectrum Analysis with Tool Wear Progress in Ultra-Precision Raster Milling</b>	
G.Q. Zhang, S. To and G.B. Xiao	20
<b>Decision Rules and Risk Analysis</b>	
M. Krystek	26
<b>Design and Development of a Novel Coordinate Measuring Machine with 3-PUU Parallel Mechanism</b>	
S.Y. Li and P.H. Hu	34
<b>Error Detection Technology for Calibrating Precision of Non-Contact Coordinate Measuring Machine</b>	
Q.Z. Sun, J. Zhao, S.J. Ji, L. Zhang and S.H. Zhou	42
<b>Evaluation of Straightness of Two-Axes Stage</b>	
K. Iori, M. Ozaki and R. Furutani	47
<b>High Resolution SelfA Rotary Table by the Interpolation Signal Calibration</b>	
T. Watanabe, W. Samit, K. Vatcharanukul, A. Tonmueanwai and A.P. Drijarkara	53
<b>High Speed Machining of Difficult-to-Machine Materials under Different Lubrication Conditions</b>	
T. Obikawa, T. Ohno, R. Nakatsukasa, M. Hayashi and T. Tabata	60
<b>High-Accuracy Calibration of CMM Using Temporal-Coherence Fiber Interferometer with Fast-Repetition Comb Laser</b>	
N. Chanthawong, S. Takahashi, K. Takamasu and H. Matsumoto	66
<b>Identifying the Microtopographic Features Generated by Different Ultra-Precision Machining Techniques by Power Spectral Density</b>	
J.C. Chen and T. Sun	73
<b>Metrology for Comparison of Displacements at the Picometer Level</b>	
J. Stone, P. Egan, J. Hendircks, G. Strouse, D. Olson, J. Ricker, G. Scace and D. Gerty	79
<b>Study of Air Temperature Correction for Optical Path Based on Large-Scale Laser Comparator</b>	
J.S. Li, X.R. Huang, M.Z. He and L.F. Li	85
<b>Study on Dynamic Measurement of Plane Distance</b>	
W.C. Wang, D. Chen, H.T. Gao and Z.B. Yang	91

## Chapter 2: Precision Machining

<b>A Novel Method for Profile Error Analysis of Freeform Surfaces in FTS/STS Diamond Turning</b>	
W.K. Neo, M.D. Nadhan, A.S. Kumar and M. Rahman	101
<b>A Study of Minimal Quantity Lubrication with MWCNTs in Turning of AISI 304L Steel</b>	
W.T. Huang, H.H. Tsai, D.H. Wu and W.T. Lee	108
<b>A Study of the Cutting Temperatures in Milling Stainless Steels Using Chamfered Main Cutting Edge Nose Radius Worn Tools</b>	
C.S. Chang	115

<b>A Supervisory System in Machining Process Leading to Electric Power Saving</b>	123
Y. Kondo, M. Yamaguchi, S. Sakamoto and K. Yamaguchi	
<b>Adaptive Identification and Control of Hysteresis in Piezoelectric Actuators</b>	129
X.S. Chen, X. Chen, X.D. Chen and M.S. Yang	
<b>An Investigation of the Vibration Testing Method for Small Diameter Endmills</b>	134
T. Ono	
<b>Development of a Small Rotary Multi-Jet Abrasive Fluid Jet Polishing Tool</b>	140
A.A. Tsegaw and F.J. Shiou	
<b>Development of Fixing System for 2-Axis Micro Deep Drilling Assisted by Low Frequency Vibration</b>	144
I. Burdukovskyi, J. Kaneko and K. Horio	
<b>Diffusion Wear Mechanism of Single Crystal Diamond Tool in Machining Die Steels</b>	148
L. Zou and M. Zhou	
<b>Dressing of Grinding Wheels for Ultra Precision Grinding of Diffractive Structures in Tungsten Carbide Molds</b>	155
T. Bletek, F. Klocke, M. Hünten and O. Dambon	
<b>Dynamics Model of Micro-Displacement Stage Based on High-Frequency</b>	161
H.W. Zhou, X. Chen, X.D. Chen and K.T. Li	
<b>Estimation of Micro-Hole Shape in Laser Direct Drilling of High Heat Radiation Typed Printed Circuit Boards (Process Monitoring with a High Speed Camera)</b>	167
S. Onchi, T. Hirogaki, E. Aoyama and K. Ogawa	
<b>Experiment Study of the Fast Tool Servo (FTS) by Laser Interferometer</b>	172
R.L. Zhao, X. Chen, K.T. Li, X.D. Chen and Q. Liu	
<b>Fabrication of Comb Shape of Leading Edge Wing of Dragonfly</b>	178
S. Umezu, N. Tanabe and H. Hashimoto	
<b>Fabrication of Microstructured Surfaces by Five-Axis Ultra Precision Machine Tool</b>	182
D.X. Wu, G. Li, B. Wang, Z. Qiao and L. Lv	
<b>Finishing of 4H-SiC (0001) by Combination of Thermal Oxidation and Abrasive Polishing</b>	187
H. Deng, K. Endo and K. Yamamura	
<b>Improved GZO Thin Film Properties with SiO<sub>x</sub> Buffer Layer by Atmospheric Pressure Plasma Deposition</b>	192
K.H. Yang, P.C. Ho, J.W. Lin, T.H. Chou and K.M. Chang	
<b>Influence of Machining Characteristics on Ultra-Precision Cutting of Aluminum Alloys</b>	196
D. Hirase, Y. Maeda, K. Iwatsuka and T. Yazawa	
<b>Influences of Closed Loop Control Componentson the Performance of Ultra-Precision Machines</b>	201
C. Brecher, D. Lindemann and C. Wenzel	
<b>Monitoring of End-Mill Process Based on Infrared Imagery with a High Speed Thermography</b>	207
M. Shindou, H. Kodama, T. Hirogaki and E. Aoyama	
<b>Numerical Study of a 3-Axis Stage for Application of Fast Tool Servo</b>	213
Y.T. Liu and B.J. Li	
<b>Optimal Design of Piezoelectric Actuator for Precision Positioning Applications</b>	219
L.K. Chang and M.C. Tsai	
<b>Preliminary Investigation on Design and Fabrication of a Metallic-Ellipsoidal Neutron Focusing Mirror</b>	224
J. Guo, Y. Yamagata, S. Takeda, J. Kato, M. Hino, M. Furusaka and S. MORITA	
<b>Research on Light Intensity Modulation within KDP Crystal Based on Different Width of Gaussian Repaired Contour of Surface Defects</b>	230
Y. Xiao, M.J. Chen, W.M. Zhang, M.Q. Li and J. Cheng	
<b>Researches on the Measurement Rebuilding and Multi-Axis Flank Milling NC Machining of the Compressor Impeller</b>	234
W.F. Chen, J.T. Chang and J.H. Su	
<b>Satiny and Continuous-Curvature Corrugated Surface Generation by Integrating End-Milling Processes and Magnetic Polishing with a Machining Center</b>	241
T. Furuki, L. Ma, T. Hirogaki and E. Aoyama	
<b>Structural Analysis of an Orbital Grinding System for Grinding Crankshafts for 5ton 5m Class Ship Engines</b>	247
J. Jang, B.Y. Choi, H.S. Bang, W.C. Choi and S.J. Cho	
<b>Structural Analysis of an Orbital Grinding System for Grinding Crankshafts for 5ton 5m Class Ship Engines</b>	253

<b>The Development of an Displacement Sensor Embedded Voice Coil Motor Based Fast-Tool-Servo for the Machining of Micro-Structure</b>	258
Z.J. Yang, Y.D. Bai, S.J. Wang, X.D. Chen, Q. Liu, K.T. Li, H. Wang and X. Chen	
<b>The Error Analysis of Ultra-Precision Diamond Turning Machine Based on Tool Swing Feeding</b>	262
H.H. Yao, T. Sun and Z.Q. Li	
<b>Theoretical Analysis about Off-Axis Parabolic Surface Machining under Two Different Accurate Spiral Tool Paths</b>	267
S.J. Ji, H.J. Yu, J. Zhao, L. Zhang and D.P. Huang	
<b>Time-Varying Load Analysis on the Rotor-Bearing System for Twin-Screw Compressors</b>	274
Y.R. Wu and J.W. Chi	
<b>Tool Wear Characteristics for Near-Dry Cutting of Inconel 718</b>	282
T. Wakabayashi, Y. Maeda, K. Iwatsuka and T. Yazawa	
<b>Wireless Driving of Electrostatic Film Actuator by Pre-Charging Electrodes with DC High Voltages</b>	288
T. Hosobata, N. Yamashita, A. Yamamoto and T. Higuchi	

## Chapter 3: Optical Measurement

<b>A Differential Evolution Stereo Matching Method in Digital Image Correlation</b>	297
L. Chen, R.S. Lu, Y.Q. Shi and J.S. Tian	
<b>Automatic Optical Measurement of High Density Fiber Connector</b>	305
C.L. Chang, C.J. Chen and W.H. Wu	
<b>Comparison Measurement between Fizeau Interferometer and Scanning Deflectometric Profiler</b>	310
Y. Kondo and Y. Bitou	
<b>Identification of Fluids by the Color of Surface Plasmon Polaritons</b>	316
M. Ozaki, T. Sakai, H. Murata and R. Furutani	
<b>Length Traceability Using Optical Frequency Comb</b>	322
D. Wei, K. Takamasu and H. Matsumoto	
<b>Measurement of Step Height Using White Light Spectral Interferometry</b>	326
T. Guo, L.F. Ni, L. Ma, J.P. Chen, X. Fu and X.T. Hu	
<b>Study on Chemical Interaction Analysis of Reactive Fullerol Molecules in Cu-CMP Using High-Sensitive Raman Spectroscopy</b>	332
R. Murai, Y. Takaya, T. Hayashi and M. Michihata	
<b>The Assembly and Measurement of Corrector Lens of a Cassegrain Telescope</b>	339
P.H. Huang, M.Y. Hsu, T.M. Huang, R.J. Guo, J.Y. Lin and Z.Y. Chen	
<b>The Spatial Synchronization of Areal Measurement Data Sets by Multi-Probes</b>	346
D.H. Lee, M.G. Kim and N.G. Cho	

## Chapter 4: Manufacturing Systems and Machine Tools

<b>Binder-Free Green Composite Using Bamboo Fibers Extracted with a Machining Center-Investigation of Optimal Bamboo Fiber Length</b>	355
S. Imura, K. Ogawa, T. Hirogaki and E. Aoyama	
<b>Development of a CAM System with Linear Servo Motor for Automation of Metal Hammering</b>	360
H. Tanaka, K. Hoshino and N. Asakawa	
<b>High Efficiency AGV Transportation System Based on Knowledge of Taxis: Strategy for AGV Behavior at Intersections</b>	366
T. Ito, E. Aoyama, T. Hirogaki, K. Ogawa and D. Mitsuoka	
<b>High Efficiency Tool Path Generation for Freeform Surface Machining Based on NURBS Subdivision</b>	372
J. Zhu, A. Hozumi, T. Tanaka and Y. Saito	
<b>Identification of Flow Stress Applicable for FEM Simulation of Orthogonal Cutting Process</b>	378
N. Wahab, Y. Inatsugu, S. Kubota, S.Y. Kim and H. Sasahara	

**Performance of the Partially Porous and the Fully Porous Aerostatic Journal Bearings with Incompressible Air Flow**

T.Y. Huang, S.Y. Hsu, B.Z. Wang and S.C. Lin 384

**Positioning Calibration of a Parallel Mechanism Worktable with 6-DOF**

Y.R. Zhang, S. Nagase, J. Zhu, T. Tanaka and Y. Saito 392

**Study on the Fast Tool Servo (FTS) with the Replaceable Flexible Hinge**

K.T. Li, X. Chen, X.D. Chen, Q. Liu and H.W. Zhou 398

**Toolpath Planning and Simulation for Cutting Test of Non-Orthogonal Five-Axis Machine Tool**

J.N. Lee, C.H. She, C.W.B. Huang, H.S. Chen and H.K. Kung 402

## **Chatper 5: Motion Control/Polishing and Grinding**

**A New Prediction Model for Thermally Induced Errors of a Turning Center**

H.W. Chi and Y.R. Lin 411

**Design of an Optimal PID Controller by Genetic Algorithms for a Pantograph Type XY Platform**

Y.H. Fan, C.E. Chen and H.W. Liao 417

**Identification on Nonlinear Friction Model and Tracking Control for a Ball-Screw Actuated Stage Using Modified Charge System Search**

C.J. Lin, S.K. Yu, B.Y. Ho and C.S. Chen 423

**Microlens Array Fabrication by 3D Diffuser Lithography for Light Enhancement of Organic Light-Emitting Devices**

H.Y. Lin, Y.S. Sun, S.L. Chen and M.K. Wei 430

**A Study of Computer Controlled Ultra-Precision Polishing of Silicon Carbide Reflecting Lenses for Enhancing Surface Roughness**

Z.L. Li, W.B. Lee, B.C.F. Cheung, L.T. Ho and Y.G. Fu 437

**An Investigation of Factors Affecting and Optimizing Material Removal Rate in Computer Controlled Ultra-Precision Polishing**

L.T. Ho, C.F. Cheung, L. Blunt and S.Y. Zeng 446

**Complex Trajectory Planning for Lapping of Diamond Cutting Tool**

N. Yang, Z.Q. Li, W.J. Zong and T. Sun 453

**Investigation of Removal Mechanism of Sapphire in Plasma Assisted Polishing**

K. Monna, H. Deng, K. Endo and K. Yamamura 458

**Modeling of Vertical Micro Grinding**

A. Perveen, M. Rahman and Y.S. Wong 463

**Study on the Key Parameters in Etching of Fused Silica Using Atmospheric Inductively Coupled Plasma**

Q. Xin, B. Wang, H.L. Jin, N. Li, D. Li and G. Li 469

**Ultrasonic Vibration Assisted Grinding of Microstructures on Binderless Tungsten Carbide (WC)**

B. Guo, Q.L. Zhao, Y. Hou, C. Ge and X. Yu 475

## **Chapter 6: Advanced Moulding and Precision Forming/Advanced Technologies**

**Developing in Biodegradable Stents Technology**

S.Y. Lin, C.S. Chen, Y.S. Chen and S.F. Ma 483

**A Framework of a Continuous Injection Direct Rolling Process for Precision Manufacturing Plastic Plates with Patterned Microstructures**

L.B. Kong, J.B. Li, C.F. Cheung, Y. Lou, C.S. Wang, H.W. Peng, C.H. Mak and D. Li 489

**Automated Bin-Picking with Active Vision**

W.C. Chang and C.H. Wu 496

**Bending Method for Forming Curvature and Various Cross-Section Shapes**

N. Utsumi and M. Yoshida 505

**Electro Discharge Machining of AL<sub>2</sub>O<sub>3</sub> Based Ceramic**

S.K. Elmenshawy, M.A. Younes and H. El-Hofy 511

<b>Improvement on Die-Casting Efficiency and Property of Aluminum Alloy Casing.</b>	518
Q.C. Hsu, A.T. Do, K.C. Yeh and J.H. Ye	
<b>Molecular Dynamics Simulation of Pressure Generated inside Melting Area in EDM</b>	525
X.D. Yang, X. Han and M. Kunieda	
<b>Performance Stability of Recycle Amine-Free Water-Soluble Coolant in Long Term Operation</b>	530
K. Yamaguchi, Y. Kondo, S. Sakamoto, M. Yamaguchi and R. Nakazawa	
<b>Technology Evolution of Lower Extremity Exoskeleton from the Patent Perspective</b>	536
R.J. Lai and M.F. Li	

## Chapter 7: Non-Conventional Machining

<b>A Proposal of Process Strategy for Micro-Cutting Edge Fabrication: Effects of Shape Formation after Laser Hardening</b>	545
K. Ogawa, H. Tanabe and H. Nakagawa	
<b>Basic Study on Etching Selectivity of Plasma Chemical Vaporization Machining by Introducing Crystallographic Damage into Work Surface</b>	550
Y. Sano, T. Doi, S. Kurokawa, H. Aida, O. Ohnishi, M. Uneda, Y. Okada, H. Nishikawa and K. Yamauchi	
<b>Characteristics of Electrical Discharge Machining in a Working Fluid Mixed with Micro-Bubbles</b>	554
H. Takezawa, K. Suzuki and N. Mohri	
<b>Edge Effect and Compensation Method Research of the Template Electrochemical Etching</b>	559
H.Y. Wei, Z.N. Guo and G. Wang	
<b>FEM Simulation on the Effect of Cutting Parameters in the Driven Rotary Cutting</b>	564
W. Takahashi, H. Sasahara, H. Yamamoto and Y. Takagi	
<b>Figuring and Finishing of Reaction-Sintered SiC by Anodic Oxidation Assisted Process</b>	570
N. Shimozono, X.M. Shen, H. Deng, K. Endo and K. Yamamura	
<b>Improvement of Accuracy in Micro-EDM of Tungsten Carbide Using Deionized Water</b>	576
M.D. Nguyen, Q.Y. Neo, M. Rahman and Y.S. Wong	
<b>Improvement of Drill Life for Nickel Super Alloy by Ultrasonic Vibration Machining with Minimum Quantity Lubrication</b>	581
H. Isobe and K. Hara	
<b>Influence of Ultrasonic Assisted Processing on the Ductility of Binderless Tungsten Carbide</b>	587
B. Bulla, F. Klocke and O. Dambo	
<b>Material Removal Rate Control in Open-Air Type Plasma Chemical Vaporization Machining by Pulse Width Modulation of Applied Power</b>	593
Y. Takeda, Y. Hata, K. Endo and K. Yamamura	
<b>Surface Characteristics Produced by Multi-Wire Sawing of GFRP</b>	597
S. Sakamoto, M. Yamaguchi, Y. Kondo, K. Yamaguchi and A.J. Nomura	
<b>Ultrasonic Elliptical Vibration-Assisted Micro-Groove Turning</b>	603
C. Zhang, K. Ehmann, Y.G. Li and P. Guo	
<b>Ultrasonically Assisted Micro Drilling for Acrylic Resin <math>\mu</math>-TAS</b>	607
K. Hara, A. Asahi and H. Isobe	

## Chapter 8: High Precision Mechatronics/Robotics

<b>Development of a Piezoelectric-Actuated Drop-on-Demand Droplet Generator Using Adaptive Wavelet Neural Network Control Scheme</b>	615
J.W. Liang and H.Y. Chen	
<b>Integrated Control System Based on MCU for the Temperature and Sampling of Helical Microfluidic PCR Detection System</b>	621
Y. Yang, T. Chen, S.B. Liu and J. Wu	
<b>Visual Servoing of Automatic Alignment System Using Model Predictive Control</b>	627
C.Y. Lin and Y.S. Zeng	
<b>Design of Wrist Rehabilitation Device for Hemiplegic Patients</b>	633
T.S. Park, D.H. Shin, C.P. Jeong, J.H. Choi, J.I. Moon and S.H. Yang	

**Kinematic Design Consideration Based on Actuator Placement of Five-Bar Planar Robot for Arm Rehabilitation**

J.H. Choi, D.H. Shin, T.S. Park, C.P. Jeong, J.I. Moon and J.N. An

638

**Study of Adjusted Rapid Upper Limb Assessment for Evaluating of Rehabilitation Effects**

C.P. Jeong, D.H. Shin, T.S. Park, J.H. Choi, J.I. Moon and S.H. Yang

644

**Chapter 9: Others****Formation of Aluminum Nitride Films by Gas Nitriding**

M. Yoshida, Z. Tao and N. Utsumi

651

**Fabrication and Mechanical Properties of C/C-HfC-SiC Composites**

Y. Yano, K. Wada, T. Aoki, T. Ogasawara and S. Umezu

657

**Composite Characterization of Engineering Ceramics Ground Surface**

Z.L. Qi, B. Lin, Y.B. Zhang, X.H. Liang and X.Y. Li

662

**Using Rayleigh-Taylor Model to Predict Surficial Tension of Static Ferro-Fluid**

J.E. Ho

668

**Design Life Analysis of KTX Running Gear Systems on Various Operating Conditions**

C.W. Lee and D.H. Lee

674

**Dielectrophoresis Tweezers for Single Cell Manipulation Using Metal Coated Chemically Etched Fiber**

K. Taguchi, K. Aritoshi, K. Nishimoto and S. Fukutomi

678

**Dynamic Performance Measurement of Proximity Sensors for a Mobile Robot**

T.T. Tsung and N. Hoai

683

**Evaluation of Running Safety for Railway vehicles Based on Vibration Acceleration of Bogie**

Y.S. Ham

689

**Experimental Investigation of Cell Cloning Efficiency after Optical Trapping**

K. Taguchi and T. Hayashi

695

**Numerical Simulation Research of an Ultra-Micro Dispensing**

C. Xu, Q. Zhang, W.J. Huang and H. Aoyama

700

**Optical Simulation of Omnidirectional Inspection System for Screw Threads**

K. Park, C.H. Lee and S.W. Ra

706

**Study of Mechanism for Wear Adjustment with Electro Wedge Brake**

D.H. Shin, T.S. Park, S.H. Jin, J.I. Moon and S.H. Yang

712

**Swirl-Based Control Method of Cell Orientation-Impact on Control Performance with Eccentricity**

Q. Zhang, J.H. Wang, W.J. Huang and H. Aoyama

717

**Tuning the Shear Modulus of Single-Walled Carbon Nanotube by Feeding Van Der Waals Molecules**

B.H. Chen, W.H. Chao and R.J. Wu

722

**Visual-Servoing Control of Robot Hand with Estimation of Full Articulation of Human Hand**

M. Tomida and K. Hoshino

728

**Wettability of Polymeric Bionic Surface Replicated from Ginkgo Leaves**

X.L. Zhao, W.W. An, J.C. Yan, H.C. Yu and L.Q. Wang

736

**A Study of Cutting Strategy in Single-Point Diamond Turning of Micro V-Groove Patterns on Precision Roller Drums**

C.H. Mak, C.F. Cheung, M.J. Ren, L.B. Kong and S. To

742

**Analysis and Optimization of a Vibration Isolation Platform Based on 6-DOF Parallel Mechanism**

T.D. Yi, B. Li and N. Wang

748

**Chemically Etched Axicon Fiber as a Sensor Probe of Optical Coherence Tomography**

K. Taguchi and M. Takatsu

754
