# Table of Contents

Preface, Committee and Acknowledgements

## Chapter 1: Keynote

**Optical 3D Metrology for Optimization of Sheet Metal Forming Processes**  
K. Galanulis, S. Adolf and H. Friebe  

**Use of FE Simulation and Servo Press Capabilities in Forming of AHSS and Aluminum Alloys**  
A. Fallahiarezoodar, L. Ju and T. Altan  

**Stamping Plant 4.0 – Basics for the Application of Data Mining Methods in Manufacturing Car Body Parts**  
S. Purr, J. Meinhardt, A. Lipp, A. Werner, M. Ostermair and B. Glück

## Chapter 2: Forming

L. Lazarescu, I. Nicodim and D. Banabic  

**Flexible Manufacturing of Double-Curved Sheet Metal Panels for the Realization of Self-Supporting Freeform Structures**  
D. Bailly, M. Bambach, G. Hirt, T. Pofahl, G. Della Puppa and M. Trautz  

**Formability of AA6060 Tubes in Hot Metal Gas Forming at High Temperatures**  
F. Michieletto, A. Ghiotti and S. Bruschi  

**Friction Adjustment within Dry Deep Drawing by Locally Laser Textured Tool Surfaces**  
T. Häfner, J. Heberle, M. Dobler, M. Gränitz, I. Alexeev and M. Schmidt  

**Internal Flow-Turning - An Innovative Technology for the Manufacture of Tailored Tubes**  
W. Homberg, T. Rostek and E. Wiens  

**Laser Forming of Steel Dome-Shaped Parts Using a Flower Pattern**  
M. Loh-Mousavi, M. Rostami and M. Farzin  

**Lightweight Design in Architecture – Forming of Stainless Steel Composites for Modern Facades**  
M. Tulke, J. Watzke, A. Brosius and M. Schomäcker  

**On the Friction Effect on the Characteristics of Hydroformed Tube in a Square Section Die: Analytical, Numerical and Experimental Approaches**  
A. Abdelkefi, N. Boudeau, P. Malecot, P. Michel and N. Guermazi  

**Study of Earing Defect during Deep Drawing Process with Finite Element Simulation**  
R. Patel, H. Dave and H. Raval  

**Embossing of Metal Inserts for Subsequent Assembly Injection Moulding of Media Tight Electronic Systems**  
P. Frey, M. Heinle, C. Leisen, D. Drummer and M. Merklein  

**The Influence of Strain Rate on the Springback of Commercially Pure Titanium in a Stretch Forming Operation**  
A.G. Leacock, S. Quinn, G. Volk, D. McCracken and D. Brown  

**Goal Driven Optimization of Process Parameters for Maximum Efficiency in Laser Bending of Advanced High Strength Steels**  
J. Griffiths, M.J.W. Riley, G. Sheikholeslami, S.P. Edwardson and G. Dearden  

**Investigation of the Portevin-Le Chatelier Effect in AlMgSi-Tailored Heat Treated Blanks**  
A. Kahrimanidis, D. Wortberg and M. Merklein  

**Development of a New Method for Producing Plane Expanded Metal by Laser Cutting and Forming of Metal Plates under Uniaxial Tension**  
M. Merklein, D. Junker, A. Schaub, A. Kretschmer and M. Lechner

Chapter 3: Bending

The Effect of Punch Radius on the Deformation of Ultra-High Strength Steel in Bending
A.M. Arola, V. Kesti and R. Ruoppa

Experimental and Numerical Determination of the Required Initial Sheet Width in Die Bending
T. Traub and P. Groche

On the Identification of a Loading Scheme in Large Radius Air Bending
V. Vorkov, R. Aerens, D. Vandepitte and J.R. Duflou

Simulative Winding of Roll Formed Profile in Carcass Production for Flexible Pipes
P.S. Nielsen, C.A. Ormstrup, B.A.K. Hartz, M.S. Nielsen and N. Bay

Chapter 4: Incremental Forming

Negative Bulge Formation in High Speed Incremental Forming
H. Vanhove and J.R. Duflou

Accuracy and Material Properties in Incremental Forming for a Multi-Step Expanding Approach
J. Brüninghaus, A. Oster and B. Kuhlenkötter

Experimental Testing of an Analytical Model for Membrane Strains in Single Point Incremental Forming
D. Adams, T. McAnulty and M. Doolan

Formability Enhancement in Incremental Forming for an Automotive Aluminium Alloy Using Laser Assisted Incremental Forming
A. Mohammadi, H. Vanhove, A. van Bael, D. Weise and J.R. Duflou

Chapter 5: Hot Stamping

Local Prevention of Hardening for Punching of Hot-Stamped Parts
K. Mori, T. Maeno and T. Suganami

Numerical Analysis and Experimental Validation of the Thermo-Mechanical Flow Behaviour of the Hot Stamping Steel MBW® 1500
B. Potdar, S. Graff and B. Kiefer

Tribological Behaviour of Lubricants in Hot Stamping of AA6016
F. Medea, A. Ghiotti and S. Bruschi

Design of Press Tools to Investigate the Hot Stamping Behaviour of Alternative Coatings for Press-Hardened Steel Parts
D. Close, P. Feuser and R. Lallement

Investigation of Weld Seam Structures of Tailor Welded Blanks for Hot Stamping
R. Kolleck, R. Vollmer, C. Both and A. Breuer

Improvement of the Ductility of Press-Hardened Plane Sheets through a Modified Heat Treatment
T. Konrad and P. Feuser

Chapter 6: Sheet-Bulk Metal Forming

Experimental Verification of a Benchmark Forming Simulation

Flexible Rolling of Process Adapted Semi-Finished Parts and its Application in a Sheet-Bulk Metal Forming Process
P. Hildenbrand, T. Schneider and M. Merklein

Locally Adapted Tribological Conditions as a Method for Influencing the Material Flow in Sheet-Bulk Metal Forming Processes
M. Loeffler, T. Schneider, U. Vierzigmann, U. Engel and M. Merklein
Influence of Surface Modifications on Friction, Using High-Feed Milling and Wear Resistant PVD-Coating for Sheet-Metal Forming Tools
D. Biermann, D. Freiburg, R. Hense, W. Tillmann and D. Stangier

Experimental and Simulative Investigations of Tribology in Sheet-Bulk Metal Forming
F. Beyer, H. Blum, D. Kumor, A. Rademacher, K. Willner and T. Schneider

Measuring Systems for Sheet-Bulk Metal Forming

Chapter 7: Materials Testing

Formability Characteristics of Hot Stamped Ti6Al4V Sheets Electro-Chemically Modified on Surface for Biomedical Applications
B. Valoppi, S. Bruschi and A. Ghiotti

Modeling of the Plastic Characteristics of AA6082 for the Friction Stir Welding Process
S. Pellegrino, L. Fratini, M. Merklein, W. Böhm and H. Nguyen

Novel Punch Design for Nonlinear Strain Path Generation and Evaluation Methods
M. Liewald and K. Drotleff

Structural and Frictional Performance of Fused Deposition Modelled Acrylonitrile Butadiene Styrene (P430) with a View to Use as Rapid Tooling Material in Sheet Metal Forming
A.G. Leacock, G. Cowan, M. Cosby, G. Volk, D. McCracken and D. Brown

A New Approach to the Evaluation of Forming Limits in Sheet Metal Forming
M. Merklein, A. Maier, D. Kinnstätter, C. Jaremenko and E. Affronti

Analysis of Tensile Test of Titanium EBW Sheet
J. Adamus and M. Motyka

Effect of Pre-Compressive Strain on Work-Hardening Behavior upon Two-Step Loading in a Magnesium Alloy Sheet
T. Hama, Y. Tanaka, M. Uratani, T. Tanaka, H. Fujimoto and H. Takuda

Cold Formability of Automotive Sheet Metals: Anisotropy, Localization, Damage and Ductile Fracture
J.H. Lian, D.C. Ahn, D.C. Chae, S. Münstermann and W. Bleck

Investigation on the Strain Behaviour of a Precipitation-Hardenable Aluminium Alloy through a Temperature Gradient Based Heat Treatment
G. di Michele, P. Guglielmi, G. Palumbo and D. Sorgente

Identification of Plasticity Model Parameters of the Heat-Affected Zone in Resistance Spot Welded Martensitic Boron Steel
T. Eller, L. Greve, M. Andres, M. Medricky, T. Meinders and T. van den Boogaard

Influence of Stress Relaxation after Uniaxial Pre-Straining on Subsequent Plastic Yielding in the Uniaxial Tensile Test of Sheet Metal
S. Suttner and M. Merklein

Validation of Kinematic Hardening Parameters from Different Stress States and Levels of Plastic Strain with the Use of the Cyclic Bending Test
M. Rosenschon, S. Suttner and M. Merklein

Chapter 8: Modelling

Analysis and Optimization for the Production Process of an Automotive Alternator Using FEM and Experiments
A. D'Annibale, A. di Ilio, M. Trozzi and L. Bonaventura

Experimental and Numerical Investigation on a Pressure Dependent Friction Model
F. Zöller, V. Sturm and M. Merklein

A Constitutive Model for the Simulation of the Deformation Behavior of TWIP Steels
A. Haufe, A. Erhart and A. Butz

Numerical Prediction of Failure within Small Curvature Bending of Advanced High Strength Steels
I. Tsoupis and M. Merklein
Enhancement of Lemaitre Model to Predict Cracks at Low and Negative Triaxialities in Sheet Metal Forming
K. Isik, M. Doig, H. Richter, T. Clausmeyer and A.E. Tekkaya

A Modified Shell Element Model Combined with Yld91 Yield Function in Simulating Aluminum Alloy Applied Hydroforming

Creep Behaviour of AA6016 during Automotive Paint Drying Processes
J. Regensburger, L. Mendes de Lima, C. Albiez, P. Weigel and W.G. Drossel

Design of Numerical Simulations of Linear Friction Welding Processes: Issues and Difficulties
A. Ducato, D. Campanella, G. Buffa and L. Fratini

New Approach for Wrinkle Prediction in Deep Drawing Process
F. Han and R. Radonjic

Chapter 9: Cutting and Joining

M. Müller, U. Vierzigmann, R. Hörhold, G. Meschut and M. Merklein

Notch Shear Cutting of Press Hardened Steels
M. Feistle, M. Krinninger, R. Golle and W. Volk

On the Solid Bonding Phenomena in Linear Friction Welding and Accumulative Roll Bonding Processes: Numerical Simulation Insights
D. Campanella, G. Buffa, L. Fratini and M. Merklein

Solid State Recycling of Aluminium Sheet Scrap by Means of Spark Plasma Sintering
D. Paraskevas, K. Vanmeensel, J. Vleugels, W. Dewulf and J.R. Duflou

Chapter 10: Planning

Selection, Modeling and Prediction of Life of Stripper of Compound Die
S. Kashid, S. Kumar and H.M. Hussein

New Diagnostic Techniques for an Automated Hemming Validation of Hang-On Parts
C. Kaiser, M. Zubeil, K. Roll and W. Volk

Sheet Metal Laser Cutting Tool Path Generation: Dealing with Overlooked Problem Aspects
R. Dewil, P. Vansteenwegen and D. Cattrysse

Minimization of Energy Consumptions by Means of an Intelligent Production Scheduling
E. Mariano, F. Nucci, A. del Prete and A. Grieco

Chapter 11: MatProFuture

Cranial Reconstruction Using Double Side Incremental Forming

Fracture Prediction in Sheet Metal Stamping Based on a Modified Ductile Fracture Criterion
R. Zeng, L. Huang and J.J. Li

Finite Element Analysis on Plastic Deformation Behaviors of Ti-3Al-2.5V Tubes under Axial Compression
T. Huang, M. Zhan, J.Q. Tan, J. Guo and H. Yang

Numerical Study on the Comparison of Deformation Characteristics during the Fine Blanking Process of Spur Gears and Helical Gear
W.T. Xia, H.J. Mao, L. Hua and Y.X. Liu
