

Table of Contents

Foreword, Committees, Acknowledgements and Sponsor

I. Fundamentals of EPD

Effect of Electrode Reactions during Aqueous Electrophoretic Deposition on Bulk Suspension Properties and Deposition Quality S. Dey, S. Bhattacharjee, T.K. Rout, D.K. Sengupta, T. Uchikoshi and L. Besra	3
Substrate Selection and Management Strategies for Aqueous EPD P. Hope and J. Hope	10
Understanding the Colloidal Behaviour of 45S5 Bioactive Glass Particles to Obtain Bioactive-Glass Based Composite Coatings by EPD S. Cabanas-Polo and A.R. Boccaccini	15

II. Novel Approaches and Modeling

Advances in Microscale and Nanoscale Mechanisms of Electrophoretic Deposition in Aqueous Media G. Falk, A. Nold and B. Wiegand	23
Hydrodynamic Modeling of Electrocodeposition on a Rotating Cylinder Electrode A. Vakhrushev and E. Molchanov	29

III. Functional Films and Deposits

Electrophoretic Vinyl Polymers Prepared via Atom Transfer Radical Polymerization and Smart Coating on Metals T. Kameyama and A. Takasu	37
Piezoelectric Elements for Multi-Element Linear-Array Transducers Prepared by Electrophoretic Deposition M.S. Bernardo, B. Malič and D. Kuscer	42
Preparation of ZSM-5 Zeolite Membranes by Combined Hydrothermal Synthesis and Electrophoretic Deposition H. Negishi, S. Reuß, W. Schwieger and A.R. Boccaccini	47
Microfibres Containing Laminates Prepared by EPD: Microstructure and Fracture Behaviour Z. Chlup, H. Hadraba, D. Drdlík and I. Dlouhý	53
Nickel Oxide/Nickel Foam Composite as Supercapacitor Electrode via Electrophoretic Deposition Z. Gonzalez, A.J. Sanchez-Herencia, B. Ferrari, A. Caballero and J. Morales	58
Microfibres Containing Laminates Prepared by EPD: Kinetics of Co-Deposition H. Hadraba, Z. Chlup, D. Drdlík and J. Cihlár	65
Nickel-Cobalt Double Hydroxide Decorated Carbon Nanotubes via Aqueous Electrophoretic Deposition towards Catalytic Glucose Detection A. Balram, J.C. Jiang, M. Hernández Fernández and D.D.S. Meng	70
Electrophoretic Deposition of Nanoparticles as Electrocatalysts for Electrolysis in the Solar Sulfur Ammonia Hydrogen Production N.S. Pacheco, N. Verma, K. Haider and J.B. Talbot	76
Fabrication of Solid Oxide Fuel Cells (SOFCs) Electrolytes by Electrophoretic Deposition (EPD) and Optimizing the Process I. Azarian Borojeni, B. Raissi, A. Maghsoudipour, M. Kazemzad and T. Talebi	83
Ultra-Low-Power Electrophoretic Deposition of Silica Powder with Nonflammable Organic Solvent H. Negishi	88

ZnO-Based Gas Sensors Prepared by EPD and Hydrothermal Growth R. Yatskiv, M. Verde and J. Grym	94
--	----

IV. EPD in Ceramic Processing

Electrophoretic Method for Fabricating Porous Ceramics – Application to Different Oxide Materials K. Moritz and C.G. Aneziris	101
Fabrication and Characterization of 3-D Photonic Crystals of Various Microspheres by Electrophoretic Self-Assembly R.F. Louh, Y.J. Huang, Y.C. Tsai, D. Ho and D. Liao	106
Cu₃TeO₆ Dielectric Thick Films: Processing by Electrophoretic Deposition and Electrical Characterization X.L. Zhu, Z.H. Wang and P.M. Vilarinho	114
Multilayered Ceramic Constructs Created by EPD C. Mochales, R. Zehbe, S. Frank, F. Rahimi, A. Urbanska, C. Fleck and W.D. Müller	122
Corrosion Resistance of Enamel Vitreous Coating Obtained by Electrophoretic Deposition M.R. Pérez García, J. Muñoz and J.A. Diez	127
Electrophoretic Deposition of Bilayer Based on Sacrificial Titanium Dioxide and Lead Zirconate Titanate on Bare Silicon Wafer P. Galizia and C. Galassi	132

V. EPD of Biomaterials and Biological Entities

Alternating Current Electrophoretic Deposition of Bovine Serum Albumin onto Magnesium B. Neirinck, F. Singer, A. Braem, S. Virtanen and J. Vleugels	139
Electrophoretic Deposition of Porous Ti Coatings for Bone Implants: <i>In Vitro</i> and <i>In Vivo</i> Evaluation A. Braem, B. Neirinck, O. Van der Biest and J. Vleugels	144
Electrophoretic Deposition of Hydroxyapatite and 58S Bioactive Glass Coatings on the Ti6Al4V Alloy Subjected to Surface Mechanical Attrition Treatment J. Faure, R. Drevet, N. Ben Jaber, S. Potiron, C. Demangel, D. Retraint and H. Benhayoune	149
Optimization of Chitosan-Based Scaffolds Obtained via Cathodic Polarization L. Altomare, S. Bertoldi, M. Montorsi, G. Candiani, A. Cigada and L. de Nardo	154
Electrophoretic Deposition of Nanostructured Titania-Bioactive Glass/Alginate Coatings on Stainless Steel L. Cordero-Arias, S. Cabanas-Polo, S. Virtanen and A.R. Boccaccini	159
Development and Characterization of PEEK/B₂O₃-Doped 45S5 Bioactive Glass Composite Coatings Obtained by Electrophoretic Deposition M. Miola, E. Verné, A. Piredda, S. Seuss, S. Cabanas-Polo and A.R. Boccaccini	165
Bioactive Glass-Biopolymer Multilayer Coatings Fabricated by Electrophoretic Deposition Combined with Layer-by-Layer Assembly Q. Chen, S. Cabanas-Polo, Y.P. Ding and A.R. Boccaccini	170
Electrophoretic Co-Deposition of Chitosan and Graphene Oxide Results in Antibacterial Coatings for Medical Applications A.L. Metze, F. Pishbin, M.P. Ryan, S. Seuss, M. Diba, M.S.P. Shaffer and A.R. Boccaccini	176
Design of Electrophoretic Poly(2-Oxazoline)s for Hybridization with Bioactive Glass T. Hayashi and A. Takasu	183
Electrophoretic Deposition and Characterization of Chitosan/45S5 Bioactive Glass Composite Coatings on Porous Titanium for Biomedical Applications S. Borjas, E.J. Gil, L. Cordero, J.J. Pavón, J.A. Rodríguez-Ortiz, A.R. Boccaccini and Y. Torres	189
Electrophoretic Deposition of Gelatin/Hydroxyapatite Composite Coatings onto a Stainless Steel Substrate F. Frajkorová, E. Molero and B. Ferrari	195

VI. Nanostructured Materials and Films

Dispersion and Stabilization of TiN and TiC Nanoparticles in Organic Suspensions C. Mendoza, Z. González, Y. Castro and B. Ferrari	203
Titania Nanoparticle Film Prepared by Electrophoretic Deposition under DC Constant-Current Condition Y. Mori, K. Yamada, Y. Hattori, Y. Sato, S. Yoshikado and K. Tsuchiya	208
Electrophoretic Deposition of Metal Nanoparticle Monolayers from Nonpolar Solvents for Hydrogen Sensing J. Grym, R. Yatskiv, O. Černohorský, M. Verde, J. Lorinčík, V.H. Pham, T. Gebre and J.H. Dickerson	213
How Electrophoretic Deposition with Ligand-Free Platinum Nanoparticles Affects Contact Angle A. Heinemann, S. Koenen, K. Schwabe, C. Rehbock and S. Barcikowski	218
Modification of Polyaniline-Based Gas Sensor by Electrophoretic Deposition of Metal Nanoparticles in Ionic Liquids P. Kunzo, P. Lobotka and E. Kováčová	224
Study of the Electrophoretic Deposition of Chitosan/Halloysite Nanotubes/Titanium Dioxide Composite Coatings Using Taguchi Experimental Design Approach N.S. Jackoub Raddaha, S. Seuss and A.R. Boccaccini	230
Separating Nanoclay Minerals via Electrophoretic Deposition I.C. Bernardo-Aruguay and L.J.L. Diaz	240

VII. Polymers and Composite Coatings

Electrophoretic Deposition of Lignin Reinforced Polymer Coatings M.F. de Riccardis, D. Carbone and D. Cuna	247
--	-----

VIII. Advanced Experimental Techniques

Surface Modification of Complex Oxide Powder with Polyelectrolyte Layers Improving EPD Characteristics T. Uchikoshi, E. Eto, H.T. Suzuki, C. Matsunaga, K. Kobayashi, T.S. Suzuki, H. Muto and A. Matsuda	255
Light Directed Electrophoretic Deposition for Additive Manufacturing: Spatially Localized Deposition Control with Photoconductive Counter Electrodes A.J. Pascall, J. Mora, J.A. Jackson and J.D. Kuntz	261
Textured Beta-Sialon:Eu²⁺ Phosphor Deposits Fabricated by Electrophoretic Deposition (EPD) Process within a Strong Magnetic Field: Preparation Process and Photoluminescence (PL) Properties Depending on Orientation C.N. Zhang, T. Uchikoshi, L.H. Liu, B. Dierre, Y.J. Cho, Y. Sakka, N. Hirosaki and T. Sekiguchi	268
Fabrication of c-Axis-Oriented Zeolite L Seed Layer on Porous Zirconia Substrate by Electrophoretic Deposition in Strong Magnetic Field C. Matsunaga, T. Uchikoshi, T.S. Suzuki, Y. Sakka and M. Matsuda	274
Electrophoretic Characterization of Clay Mineral Systems for Smectite Recovery J. Manapat, I. Aruguay, J.M. Ambait, M.I. Galvan and L.J. Diaz	280
