

# Table of Contents

## Foreword, Committees, Acknowledgements and Sponsor

## I. Fundamentals of EPD

<b>Effect of Electrode Reactions during Aqueous Electrophoretic Deposition on Bulk Suspension Properties and Deposition Quality</b> S. Dey, S. Bhattacharjee, T.K. Rout, D.K. Sengupta, T. Uchikoshi and L. Besra	3
<b>Substrate Selection and Management Strategies for Aqueous EPD</b> P. Hope and J. Hope	10
<b>Understanding the Colloidal Behaviour of 45S5 Bioactive Glass Particles to Obtain Bioactive-Glass Based Composite Coatings by EPD</b> S. Cabanas-Polo and A.R. Boccaccini	15

## II. Novel Approaches and Modeling

<b>Advances in Microscale and Nanoscale Mechanisms of Electrophoretic Deposition in Aqueous Media</b> G. Falk, A. Nold and B. Wiegand	23
<b>Hydrodynamic Modeling of Electrocodeposition on a Rotating Cylinder Electrode</b> A. Vakhrushev and E. Molchanov	29

## III. Functional Films and Deposits

<b>Electrophoretic Vinyl Polymers Prepared via Atom Transfer Radical Polymerization and Smart Coating on Metals</b> T. Kameyama and A. Takasu	37
<b>Piezoelectric Elements for Multi-Element Linear-Array Transducers Prepared by Electrophoretic Deposition</b> M.S. Bernardo, B. Malič and D. Kuscer	42
<b>Preparation of ZSM-5 Zeolite Membranes by Combined Hydrothermal Synthesis and Electrophoretic Deposition</b> H. Negishi, S. Reuß, W. Schwieger and A.R. Boccaccini	47
<b>Microfibres Containing Laminates Prepared by EPD: Microstructure and Fracture Behaviour</b> Z. Chlup, H. Hadraba, D. Drdlík and I. Dlouhý	53
<b>Nickel Oxide/Nickel Foam Composite as Supercapacitor Electrode via Electrophoretic Deposition</b> Z. Gonzalez, A.J. Sanchez-Herencia, B. Ferrari, A. Caballero and J. Morales	58
<b>Microfibres Containing Laminates Prepared by EPD: Kinetics of Co-Deposition</b> H. Hadraba, Z. Chlup, D. Drdlík and J. Cihlár	65
<b>Nickel-Cobalt Double Hydroxide Decorated Carbon Nanotubes via Aqueous Electrophoretic Deposition towards Catalytic Glucose Detection</b> A. Balram, J.C. Jiang, M. Hernández Fernández and D.D.S. Meng	70
<b>Electrophoretic Deposition of Nanoparticles as Electrocatalysts for Electrolysis in the Solar Sulfur Ammonia Hydrogen Production</b> N.S. Pacheco, N. Verma, K. Haider and J.B. Talbot	76
<b>Fabrication of Solid Oxide Fuel Cells (SOFCs) Electrolytes by Electrophoretic Deposition (EPD) and Optimizing the Process</b> I. Azarian Borojeni, B. Raissi, A. Maghsoudipour, M. Kazemzad and T. Talebi	83
<b>Ultra-Low-Power Electrophoretic Deposition of Silica Powder with Nonflammable Organic Solvent</b> H. Negishi	88

<b>ZnO-Based Gas Sensors Prepared by EPD and Hydrothermal Growth</b> R. Yatskiv, M. Verde and J. Grym	94
--	----

#### **IV. EPD in Ceramic Processing**

<b>Electrophoretic Method for Fabricating Porous Ceramics – Application to Different Oxide Materials</b> K. Moritz and C.G. Aneziris	101
<b>Fabrication and Characterization of 3-D Photonic Crystals of Various Microspheres by Electrophoretic Self-Assembly</b> R.F. Louh, Y.J. Huang, Y.C. Tsai, D. Ho and D. Liao	106
<b>Cu<sub>3</sub>TeO<sub>6</sub> Dielectric Thick Films: Processing by Electrophoretic Deposition and Electrical Characterization</b> X.L. Zhu, Z.H. Wang and P.M. Vilarinho	114
<b>Multilayered Ceramic Constructs Created by EPD</b> C. Mochales, R. Zehbe, S. Frank, F. Rahimi, A. Urbanska, C. Fleck and W.D. Müller	122
<b>Corrosion Resistance of Enamel Vitreous Coating Obtained by Electrophoretic Deposition</b> M.R. Pérez García, J. Muñoz and J.A. Diez	127
<b>Electrophoretic Deposition of Bilayer Based on Sacrificial Titanium Dioxide and Lead Zirconate Titanate on Bare Silicon Wafer</b> P. Galizia and C. Galassi	132

#### **V. EPD of Biomaterials and Biological Entities**

<b>Alternating Current Electrophoretic Deposition of Bovine Serum Albumin onto Magnesium</b> B. Neirinck, F. Singer, A. Braem, S. Virtanen and J. Vleugels	139
<b>Electrophoretic Deposition of Porous Ti Coatings for Bone Implants: <i>In Vitro</i> and <i>In Vivo</i> Evaluation</b> A. Braem, B. Neirinck, O. Van der Biest and J. Vleugels	144
<b>Electrophoretic Deposition of Hydroxyapatite and 58S Bioactive Glass Coatings on the Ti6Al4V Alloy Subjected to Surface Mechanical Attrition Treatment</b> J. Faure, R. Drevet, N. Ben Jaber, S. Potiron, C. Demangel, D. Retraint and H. Benhayoune	149
<b>Optimization of Chitosan-Based Scaffolds Obtained via Cathodic Polarization</b> L. Altomare, S. Bertoldi, M. Montorsi, G. Candiani, A. Cigada and L. de Nardo	154
<b>Electrophoretic Deposition of Nanostructured Titania-Bioactive Glass/Alginate Coatings on Stainless Steel</b> L. Cordero-Arias, S. Cabanas-Polo, S. Virtanen and A.R. Boccaccini	159
<b>Development and Characterization of PEEK/B<sub>2</sub>O<sub>3</sub>-Doped 45S5 Bioactive Glass Composite Coatings Obtained by Electrophoretic Deposition</b> M. Miola, E. Verné, A. Piredda, S. Seuss, S. Cabanas-Polo and A.R. Boccaccini	165
<b>Bioactive Glass-Biopolymer Multilayer Coatings Fabricated by Electrophoretic Deposition Combined with Layer-by-Layer Assembly</b> Q. Chen, S. Cabanas-Polo, Y.P. Ding and A.R. Boccaccini	170
<b>Electrophoretic Co-Deposition of Chitosan and Graphene Oxide Results in Antibacterial Coatings for Medical Applications</b> A.L. Metze, F. Pishbin, M.P. Ryan, S. Seuss, M. Diba, M.S.P. Shaffer and A.R. Boccaccini	176
<b>Design of Electrophoretic Poly(2-Oxazoline)s for Hybridization with Bioactive Glass</b> T. Hayashi and A. Takasu	183
<b>Electrophoretic Deposition and Characterization of Chitosan/45S5 Bioactive Glass Composite Coatings on Porous Titanium for Biomedical Applications</b> S. Borjas, E.J. Gil, L. Cordero, J.J. Pavón, J.A. Rodríguez-Ortiz, A.R. Boccaccini and Y. Torres	189
<b>Electrophoretic Deposition of Gelatin/Hydroxyapatite Composite Coatings onto a Stainless Steel Substrate</b> F. Frajkorová, E. Molero and B. Ferrari	195

#### **VI. Nanostructured Materials and Films**

---

<b>Dispersion and Stabilization of TiN and TiC Nanoparticles in Organic Suspensions</b> C. Mendoza, Z. González, Y. Castro and B. Ferrari	203
<b>Titania Nanoparticle Film Prepared by Electrophoretic Deposition under DC Constant-Current Condition</b> Y. Mori, K. Yamada, Y. Hattori, Y. Sato, S. Yoshikado and K. Tsuchiya	208
<b>Electrophoretic Deposition of Metal Nanoparticle Monolayers from Nonpolar Solvents for Hydrogen Sensing</b> J. Grym, R. Yatskiv, O. Černohorský, M. Verde, J. Lorinčík, V.H. Pham, T. Gebre and J.H. Dickerson	213
<b>How Electrophoretic Deposition with Ligand-Free Platinum Nanoparticles Affects Contact Angle</b> A. Heinemann, S. Koenen, K. Schwabe, C. Rehbock and S. Barcikowski	218
<b>Modification of Polyaniline-Based Gas Sensor by Electrophoretic Deposition of Metal Nanoparticles in Ionic Liquids</b> P. Kunzo, P. Lobotka and E. Kováčová	224
<b>Study of the Electrophoretic Deposition of Chitosan/Halloysite Nanotubes/Titanium Dioxide Composite Coatings Using Taguchi Experimental Design Approach</b> N.S. Jackoub Raddaha, S. Šeuss and A.R. Boccaccini	230
<b>Separating Nanoclay Minerals via Electrophoretic Deposition</b> I.C. Bernardo-Arugay and L.J.L. Diaz	240

## VII. Polymers and Composite Coatings

<b>Electrophoretic Deposition of Lignin Reinforced Polymer Coatings</b> M.F. de Riccardis, D. Carbone and D. Cuna	247
--	-----

## VIII. Advanced Experimental Techniques

<b>Surface Modification of Complex Oxide Powder with Polyelectrolyte Layers Improving EPD Characteristics</b> T. Uchikoshi, E. Eto, H.T. Suzuki, C. Matsunaga, K. Kobayashi, T.S. Suzuki, H. Muto and A. Matsuda	255
<b>Light Directed Electrophoretic Deposition for Additive Manufacturing: Spatially Localized Deposition Control with Photoconductive Counter Electrodes</b> A.J. Pascall, J. Mora, J.A. Jackson and J.D. Kuntz	261
<b>Textured Beta-Sialon:Eu<sup>2+</sup> Phosphor Deposits Fabricated by Electrophoretic Deposition (EPD) Process within a Strong Magnetic Field: Preparation Process and Photoluminescence (PL) Properties Depending on Orientation</b> C.N. Zhang, T. Uchikoshi, L.H. Liu, B. Dierre, Y.J. Cho, Y. Sakka, N. Hirosaki and T. Sekiguchi	268
<b>Fabrication of c-Axis-Oriented Zeolite L Seed Layer on Porous Zirconia Substrate by Electrophoretic Deposition in Strong Magnetic Field</b> C. Matsunaga, T. Uchikoshi, T.S. Suzuki, Y. Sakka and M. Matsuda	274
<b>Electrophoretic Characterization of Clay Mineral Systems for Smectite Recovery</b> J. Manapat, I. Arugay, J.M. Ambait, M.I. Galvan and L.J. Diaz	280
