

Table of Contents

Preface

Chapter 1: Research and Development of Technologies and Tools for Material Processing

A New Method for Copper Spherical Surface Lathing with High Speed Steel Cutting Tool Z.F. Chen and L. Zhang	3
Analysis of Vibration Amplitude in High-Speed Cutting for Hardened Steel G.J. Chen, L. Wang, B.T. He, L.G. Kong and X.Q. Zhou	9
Application of Micro-Arc Oxidation Technology in Die Magnesium Alloy Wheels in Mass Production Z.L. Zhang, Y.Q. Zhang, L. Zhang, A.Q. Pan and J. Liu	15
Analysis of 45 Steel Rectangular Thin-Walled Parts Milling Deformation J. Li, Z.L. Wang, P. Xi and Y. Jiao	22
Basic Experiment of Ultrasonic Deep Rolling with Longitudinal-Torsional Vibration J.X. Zheng, Y.L. Hou and P.M. Ming	29
Cutting Force in High-Speed Face Milling AISI H13 Steel X.B. Cui, J.X. Guo and X.Y. Wang	35
Development of Nanomachining Mechanism Based on Molecular Dynamics Simulation P.Y. Zhao, Y.B. Guo and G.K. Qu	41
Die Forming Simulation of PM Parts Based on AMESim M.J. Zhang	47
Experimental Study on Laser Transmission Joining between PA66GF and AISI304 D.D. Meng, T. Jiang, H.X. Liu, X. Wang and Y.W. Wu	54
Experimental Study on Surface Quality in Milling Carbon Fiber Reinforced Plastics J.D. Liu, Y.S. Li, G.H. Yan, L.K. Huang, X.F. Yang and D.M. Yu	62
Experimental Study on Ultrasonic Vibration-Assisted Scratch of SiCp/Al Composite W. Zheng and M. Zhou	68
Global Stability Analysis on Combination Self-Excited Vibration of BTA Deep-Hole Boring Rotor Materials W. Zhao, Z.Q. Hu and D. Huang	75
Hilbert Curve Fractal Stacking in the Application of Path Planning in the Molten Molding Z.L. Wang, Y.Y. Chao and Y.J. Hu	82
Investigation on Cutting Force and Temperature of Cutting Cu₅₀Zr₅₀ Metallic Glass by Molecular Dynamics Simulation Y. Zhao, X.L. Wei, Y. Zhang, F.H. Wu and D.H. Huo	88
Light Scattering of HDPE and LDPE in Laser Transmission Welding X.J. Zhong, C.L. Fan, H.X. Liu, P. Li and X. Wang	95
MD Simulation and Optimization Analysis for Nanoscale Material Removal Process G.K. Qu	102
MD Simulations of Nanomachining Monocrystalline Silicon G.K. Qu	108
Optimization Design of Diamond Circular Saw-Blade with Discontinuous Cutting and Uneven Distribution for Cutting Thin-Walled Tubes L.Z. Gu	114
Research and Modeling of Blades with Complex Surfaces Based on Laser Rapid Prototyping Z.B. Yang, A.J. Liu and S. Liu	119
Test and Analysis of Electric Arc Machining Characteristics of Titanium Alloy and High-Temperature Alloy H. Peng and Y. Zhai	123
Research on Surface Quality for CBN Grinding Wheel Based on “Speed Effect” X. Sun, T.B. Yu and W.S. Wang	130

Simulation and Experiment Study on Cutting Temperature in Diamond Ultra-Precision Cutting of Aluminum Alloy Mirror Y.J. Zhang, G.J. Dong and M. Zhou	136
Study on Influence Laws of Surface Roughness of Micro-Groove in Single Crystal Silicon under Diamond Fly-Cutting Y.Y. Yan, R.X. Wang and B. Zhao	142
Research on Error Model of the Al5052 Sheet Stamping Forming Parts L.Z. Gu, Y. Ma and Q. Deng	149
Test and Analysis of Low Temperature Air Cutting Performance to Difficult-to-Machine Materials H. Peng and Y.F. Wang	155
The Experiment Investigation of the Tool Wear in Diamond Ultra-Precision Cutting of Aluminum Alloy Mirror G.J. Dong, Y.J. Zhang and M. Zhou	162
The Influence of Welding Sequence on Welding Deformation of Sheet Metal Stamping J.F. Shen, Y.J. He and Y.C. Yu	168
Dynamic Model of Material Removal Process in Through-Feed Centerless Grinding Based on the Lagrange Equation C. Qi, S.J. Chen, H. Ding and K. Cheng	173
Effect of FDM Process on Adhesive Strength of Polylactic Acid(PLA) Filament A.Q. Pan, Z.F. Huang, R.J. Guo and J. Liu	181
Heat Transfer Analysis on Aluminum-Polymer Composite Molding Process S. Wang, X.P. Li, L.L. Bai and N.N. Gong	187
Material Plastic Side Flow and White Layer in Hardened Steel GCr15 Precision Turning G.J. Chen, X.Q. Zhou, B.T. He, M. Ya, Z.H. Ba and X.L. Liu	194
Study on the Forming Accuracy and Density of Eucalyptus/PES Fabricated by Laser Sintering Y.L. Guo, Y.Q. Yu and K.Y. Jiang	200
Study on the Laser Shock Processing with Square Spot of Titanium Alloy Based on ABAQUS G.H. Li, H.J. Qi and Y.J. Cai	206
Study the Influence of Surface Treatment Technology to AZ31 Property Change X. Yang, Z.S. Wang and S.W. Zhang	213
Temperature Field Simulation of Wood Powder/PES Composite Powder Material Y.Q. Yu, Y.L. Guo and K.Y. Jiang	218
The Study of Finite Element Simulation for Cooling after Heating Process of Rail F.Q. Yu and J. Wang	224
The Analysis of Tool Wear in Milling CFRP with Different Diamond Coated Tool X.F. Yang, Y.S. Li, G.H. Yan, J.D. Liu and D.M. Yu	231
Finite Element Analysis of High Temperature Alloy Cutting Process Based on Abaqus Y. Li and C.B. Cai	237
Thermal Stress Analysis of Powder Metallurgy Sintering Process Based on ANSYS H. Qiu, Y.G. Zhu and L. Zhang	244
Study on the Preparation of Bamboo Plastic Composite Intend for Additive Manufacturing D.X. Zhao, X. Cai, G.Z. Shou, Y.Q. Gu and P.X. Wang	250
Technical Study of Jet Electrodeposition in Manufacture of Metal Parts H. Fan, Y.P. Zhao and S.K. Wang	259

Chapter 2: Properties of Materials

Dynamic Porosity of 3D Network SiC Ceramic as the Shock-Damping and Acoustic-Absorbing Material for Ultra-Precise Machine Laying D. Huang, Y. Wang and W. Zhao	267
Electrical Contact Property of AuNi9/AuCuAgZn Sheet Tribo-Couple T. Lei, Y.M. Gao, G.Y. Chen and H. Zhou	274
Electrochemical Characteristics of the Amorphous-Nanocrystal Ni–Mo Cathodes in Sodium Hydroxide Solution N. Li, J.M. Huang, W.Z. Chen and B. Wang	280

Experimental and Modelling of Constitutive Equation of Polycarbonate Material H.T. Liu, N. Chen and Y.Z. Sun	286
Finite Element Modeling and Simulation towards Metallic Microstructure of Titanium Alloy Based on Abaqus H.Y. Wang, Y.F. Li and G.L. Wang	292
Influence of Chemical Composition and Metallographic Structure to Dimagnetic Stainless Steel Q.W. Zeng and Z.M. Zhang	298
Mixing Y89 Influence on Mechanical Properties of Casting Mg17Al12 H. Yang, S.J. Hao and J.J. Liang	303
Pyrolysis Kinetics of PA66/CB D.H. Guo, X. Wang, H.R. Jiang, G.C. Chen, Z. Yan and H.X. Liu	308
Study on Characteristics of Green Parts of Birch Flour/Polyester Composite by Selective Laser Sintering D.J. Zhao, Y.L. Guo, W.L. Song, Z. Hui and Z.X. Yu	314
Experimental Research on Selective Laser Sintering of Bamboo Flour/Polyamide Hot-Melt Adhesive Blend D.J. Zhao, Y.L. Guo, W.L. Song, Z. Hui and Z.X. Yu	320
Finite Element Simulation and Experimental Study on Micro-Milling Cobalt-Based Alloy P. Zhang, Y.L. Du, B. Wang and D.B. Shan	326

Chapter 3: Materials in Construction

Analysis of Durability Performance of Ionic Soil Stabilizer Improving Soil Y.J. Wang, W.Y. Lin, Y.S. Huang, X. Qiu and J.H. Wu	335
Compressive Strength Analysis of Ionic Soil Stabilizer Improving Soil J.Q. Tao, W.Y. Lin, X.H. Luo, X. Qiu and J.H. Wu	341
Detecting and Expressing of Asphalt Materials Modulus Considering Temperature Effect X.H. Luo, Q. Yang, X. Qiu and S.L. Xiao	347
Fuzzy Comprehensive Evaluation for Road Base Material Selection Based on Analytic Hierarchy Process X.Q. Huang, X. Qiu, L.W. Chen, J.H. Wu and X.H. Luo	353
Mechanics Mechanism Analysis of Asphalt-Aggregate Interface Damage Q. Yang, S.L. Xiao, X. Qiu, X.H. Luo and Y.J. Wang	359
Mechanics Mechanism Analysis of Concrete Pavement Resonant Rubblization P. Chen, X. Qiu, Q. Zhu and C.C. Ouyang	365
Micro-Treatment Mechanism Study on Ionic Soil Stabilizer Improving Clay X.H. Luo, X. Qiu, Y.J. Wang, J.H. Wu and S.L. Xiao	370

Chapter 4: Measurements, Testing and Monitoring in Mechanical Engineering

The Study of the Electrothermal Heating Pipe Membrane Resistance Test Equipment X.L. Zhu, S.T. Deng, G. Li and Y.P. Li	379
Developing of the Experimental Device that Test Magneto Rheological Fluid(MRF) Shear Yield Stress Under Non Uniform Composite Field W.Z. Chen, G. Zhang, X.S. He, S.Q. Ren and P. Huang	385
Development of a Chemiluminescence Detecting System Based on FPGA A. Wu and J.H. Zhu	391
Diagnostic Testing on Crack Propagation of Asphalt Pavement Materials G. Shen, X. Qiu, J.Q. Tao, N.D. Du and Y.J. Hu	396
Stress Analysis of Stepped Oblique End-Face Combined Concave Die Based on the Least Square Method Z.P. Lyu, X.H. Ma, S.Z. Zhou and S.Z. Wei	402
Structure Damage Diagnostic Method of High-Flow Control Valve Stem F. Cao and R.J. Kang	408

The Electrothermal Heating Tube Membrane Resistance Test Method Research X.L. Zhu and G. Li	413
Design of the Auto-Stiffness Measuring Instrument for Electro Hydraulic Servo Valve Elastic Element G.L. Wang, N. Yin and H.F. Wang	419
HLP Type Hydraulic Oil Analysis for Meso-Scale Hole Measurement X. Zhang, Y. Hong, G.L. Wang, D.X. Shao and L. Sun	427
Advances in Skin Viscoelastic Detection Methods and Equipments J.C. Sun, Y.L. Song and S.M. Gao	433
Development of the Jet Flow Testing System and the Influence of the Hydraulic Oil on the Jet Flow Quality C.X. Bao	439
Spool Valve Hydraulic Measurement Flow Pattern Error Based on Variable Discharge Coefficient Z. Lin	444
UCBO Hydraulic Oil and Application on Hydraulic Measurement for Laval Nozzle Throat Diameter Y. Hong, X. Zhang, D.X. Shao, G.L. Wang and L. Sun	449
HLP Type Hydraulic Oil in Meso-Scale Hole Measuring X. Zhang, G.L. Wang, D.X. Shao, Y. Hong and L. Sun	455

Chapter 5: Research and Design Machines and Units of Technological Equipment

The Common 13Cr Steel RUL Forecast Model for Tri-High Gas Well Pipe R. Wu, P.F. Chen and C.L. Lei	465
Design and Analysis of Paver Leveling Control System J. Deng and Y. Li	470
Servo Valve Nozzle Fuzzy Clustering Analysis Pairing Algorithm X.D. Pan, W.D. Zhu and G.L. Wang	476
Design of Hydraulic Locking Mechanism Based on Material Friction W.D. Zhu, X.D. Pan, Y. Li and W.J. Huo	481
Motor Rotor Unit Composite Die Design and WEDM Programming of Stamping Dies (Convex-Concave Mould) Y. Li, Y.W. Zou, W.D. Zhu, J. Deng and W.J. Huo	487
Simulation and Analysis of Passive Torque Servo System C.C. Li, D.X. Shao and G.L. Wang	493
Design of the Energy-Saving Heater Based on Semiconductor Nano Electrothermal Film J.K. Xu, J.B. Cao, J.X. Cao, F.C. Qiu, Q.H. Sun, S.J. E, H.T. Zhang and X.Z. Ding	500
Research on Reverse Design of Flexible Rod Based on CMM W.M. Pan, G.H. Li, Y. Yu and N.N. Kong	506
Free Modal Analysis for the Pinion of Logarithmic Spiral Bevel Gear with 20CrMnTi L.Z. Gu, T.M. Xiang, P. Li and J.M. Xu	512
Mechanical Analysis and Finite Element Simulation of Scissor Transmission Mechanism under Partial Load J. Chen, X. Yuan and F. Zhang	518
Research on the Best Autofrettage Pressure of Ultra-High Pressure Valve Body X.H. Ma	524
Research on Wheel-Shoe Wear for High Friction Composite Brake Shoes Based Foundation Brake Rigging in Railway Wagon B.H. Lu, X.Y. Chen, B.Z. Qu and H.B. Zhang	530
Simulation and Experimental Research on Rubber Waveform Generator T. Gao, Q.P. Liu, J.X. Ma and H.L. Guo	536
Study on Performances of Amorphous Three-Phase Asynchronous Motor Q.T. Chen, X.P. Li, S. Wang and Y.F. Luo	542
Reliability Analysis of Double Derrick Based on Stress Analysis L. Zhu and Y. Geng	548

A Hormone-Transmission Inspired Multi-Layer Embryonics Supporting Hierarchical Self-Healing	
N.T. Wang, Y.L. Qian and Y. Li	555
Design of a Microwave Vacuum Drying Medicine Extract Model of Process Equipment	
C.X. He, L.M. Zhang and X.D. Wang	562
Research on CNC of FSW with Serial-Parallel Structure Based on 3-PRS Mechanism	
Y.G. Wei, Z.X. Wang, Q. Li and Y. Shi	568
Research on the Process of Ring-Involute Tooth Spherical Gear Based on Rapid Prototyping Processing	
Z.F. Huang, Y.L. Ma, J.Q. Zhang, X.G. Zheng and J. Liu	575
Structure Optimization of the Aluminum Alloy Frames of Flight Simulator	
J. Liu, P.G. Gui, J.M. Wang, Y. Yu and Z.H. Zhong	582
An Investigation on the Workpiece Roundness Generation in Centerless Grinding Based on the Integration of Virtual Machine Tool and Workpiece Material Removal Mechanism	
Q. Cui, S.J. Chen, H. Ding and K. Cheng	588
The Construction of Dimensionless Nonlinear Dynamic Model and the Research on Chaotic Features of Vibration Cutting Based on Dynamic Fracture Mechanics	
P. Li and L.Z. Gu	595
