

PREFACE

It is my pleasure to introduce work of participants of the “Special concrete and composite 2015” conference, which is the most powerful meeting of the experts in the field of concrete and composite research in the Czech Republic. This year we are celebrating 23rd anniversary from the time the SEKURKON Company founded the tradition of every year meeting experts. The international focus of the conference is done by taking a part of more than 80 experts from Czech Republic, Slovakia, Poland, Belgium, Russia and United Arab Emirates. I am glad that the SEKURKON Company together with Czech Technical University in Prague and its Experimental Centre of the Faculty of Civil Engineering are organizing such a great conference in a nice Skalský Dvůr venue.

I would like to wish great success to the conference meeting and I hope to the future development of the number of participants and a wider internationalizing of the meeting.

Good luck and many success.

Petr Konvalinka

President of CTU in Prague, CEO
