

Table of Contents

Preface

Computational Wear and Contact Modeling for Fretting Analysis with Isogeometric Dual Mortar Methods	
P. Farah, M. Gitterle, W.A. Wall and A. Popp	1
The Influence of Equivalent Contact Area Computation in 3D Extended Node to Surface Contact Elements	
G. Wautelet, L. Papeux and J.P. Ponthot	19
A Quadratic Contact Element Passing the Patch Test	
D.T. Nguyen, G. Rauchs and J.P. Ponthot	47
Elastic-Plastic Contact between Hard Metal Particles	
P.L. Larsson and E. Olsson	86
Mechanical Behaviour of Auxetic Microstructures Using Contact Mechanics and Elastoplasticity	
G.A. Drosopoulos, N. Kaminakis, N. Papadogianni and G.E. Stavroulakis	100
Analysis of Wear Processes for Periodic Loading	
I. Páczelt and Z. Mróz	117
Theoretical and Experimental Investigation on Friction in Lubricated Line Contacts with Different Materials and Textures in Presence of Wear	
F. Di Puccio and E. Ciulli	142
The Frictional Contact Problem of a Rigid Stamp Sliding over a Graded Medium	
M.A. Guler, M. Ozturk and A. Kucuksu	155
Numerical Solution of Frictional Contact Problems for Viscoelastic Solids by SGBEM and Quadratic Programming	
R. Vodička and V. Mantić	175
Quasistatic Electro-Elastic Contact Modeling Using the Boundary Element Method	
L. Rodríguez-Tembleque, A. Sáez, F.C. Buroni and M.H. Aliabadi	185
Contact Modeling of the Duct-Concrete Interface in the Evaluation of Multistrand Effect in High Curvature Post-Tensioned Tanks	
F. Medina-Reguera, H. Cifuentes-Bulté and F. Medina-Encina	197
Influence of the Main Contact Parameters in Finite Element Analysis of Elastic Bodies in Contact	
G. Hattori and A.L. Serpa	214
A Method for Characterizing Running-In of Sliding Contacts	
R. Ismail, M. Tauqiqirrahman, J. Jamari and D.J. Schipper	228
