

Table of Contents

Preface

Chapter 1: Engineering Technologies in Designing of Machines and Equipments

A FE Modelling Method for the Thermal Characteristics of High-Speed Motorized Spindle J.R. Wang, P.F. Feng, Z.J. Wu, D.W. Yu and J.F. Zhang	3
Aerodynamic Characteristic Analysis of Flow Structure around the High-Speed Train Equipment Bay Y.C. Zhang, Y.G. Xu and L.L. Zhang	11
An Improved Design Method of High Efficiency Contactless Power Transmission in Ultrasonic Vibration System H. Shen, P.F. Feng, J.F. Zhang, D.W. Yu and Z.J. Wu	17
Analysis of Multi-Components Force Standard Machine Loading System Based on Stewart Structure X. Luo and C.C. Li	25
Analyzing Out-of-Plane Vibration of a Rotating Ring with Wave Propagation D.S. Huang and H. He	31
Combining Design of Vibration Absorbing and Isolation for a Power Equipment Based on 2 Degrees of Freedom X.B. Liu, J.R. Zhang and J.L. Cheng	37
Design and Analysis of a Power Transmission Network Model of Electric Vehicle L.H. Liu	45
Design and Analysis of Conjugate Cam Beating-Up Motion Law Z.J. Li and H.M. Wang	53
Design and Analysis of the End-Effector of the Flexible Polishing Robot J. Tang, T. Wang, Z.Q. Yan and L.W. Wang	58
Design of Equipments for Nonlinear Static Experiment of Rubber Damping Materials C.L. Zhu, C.H. Zhu and C.C. Li	64
Design of High-Speed Thin Steel Plate Roller Based on the Fuzzy Reliability X.P. Li	69
Design of New Type High-Speed Cutting Deformation Test Device W.H. Wei, S.Y. Xie, T.M. Xue, D.L. Liu, J.W. Xu, F.Y. Yao, C.R. Yuan and T.Y. Wang	73
Design of Plasma Discharge Structure for Surface Treatment of PP Film Y.F. Wen, T.Y. Wang and H.W. Wang	77
Design on the Main-Axis in Big Power Inverted Umbrella Aeration Machine Based on Genetic Algorithms X.P. Li	84
Development of High Speed Precision Press and its Development Trends M.H. Xiao, L.B. Yu, G.H. Li and W.J. Liang	89
Dynamic Analysis and Simulation of 4R 3-DOF Wrists X.H. Wang, D.W. Zhang and C. Zhao	93
Dynamics Simulation Analysis of Column for NC Bevel Gear Grinder Y. Wang, Q.J. Liu, T.Y. Wang, Y.L. Wang, Z.Q. Yu, J. Deng and J.H. Huo	101
Empirical Research on Public Transport Type Escalator Riding Traffic Characteristics J.F. Xu, X.D. Li, G. Li and Z. Gao	109
Experimental on the Performance of Centrifugal Fan with Limited Size by Changing the Openness Distribution J. Zhao, C.J. Wu and C.F. Xia	117
Factors Affecting Contact Pressure Distribution on Bolted Joint Interface J.P. Liao, D.W. Yu and P.F. Feng	126
Five-Axis Stone Carving Machine Modeling and Optimization Design of the Column W. Tian, Y. Tian, L. Zhang, Z.H. Song and J. Sun	134

Frequency Characteristics Analysis of Micro-Displacement Structure with Parallel Flexure Hinges	
J.Q. Lin, M.M. Lu, X.Q. Zhou and Q. Liu	141
Improved Design of Driller Based on the Variable Drilling Speed Damping Mechanism	
D.L. Wang	146
Investigation on the Metrology of Conical Thread Gauge	
Y. Zhao, X.H. Qu, Y. Tian, R.J. Lu and H.G. Liu	150
Luggage Impact and Structure Optimization for Rear Seat Frame of Automobile	
Z.P. Wang, J.T. Ni and X. Zhang	155
Optimization Design of Input Location Parameters of Scissor Lift Mechanism	
W. Zhang and C. Yan	163
Optimization of the Frame and Performance Analysis of Solar Modules Based on Ansys Workbench and Solidworks	
W.H. Wei, Y.N. Zhu, T.M. Xue, S.Y. Xie, C.R. Yuan and T.Y. Wang	169
Particle Motion Simulation and Parameter Optimization Design in Drum Granulation	
Q. Lin and L.M. Chen	174
Research on Dynamic Characteristics of Glider Hydrofoil by Finite Element Models Analysis	
X.W. Hong, J. Zhao, S.Z. Zhao, M. Yu and Y. Yang	182
Research on Modal Analysis of Aero-Engine Key Parts Structure Damage	
Y.X. Huang, S.M. Li and Y. Zhang	187
Research on the Coaxial Connection between Gas Flowmeter and Critical Flow Venturi Nozzle Gas Flow Standard Device	
Y. Zhen	194
Structural Design and Improvement of Spindle in Five-Axis Wood Engraving Machine	
L. Zhang, Q.J. Liu, T.Y. Wang, H.B. Li and W. Tian	200
Study of Vehicle Jerking Problem during Clutch Engagement Based on Numerical Value Analysis Method	
X.B. Cheng and W.M. Zhang	205
Study on the Dynamic Characteristics of the Winding Head	
J. Yan, Y.X. Wang, S.J. Li, X. Hou and S.Z. Wang	213
Study on Torsional Excitation of Vibration Stress Relief Based on Lateral and Torsional Coupling	
Y.X. Huang, G.W. Cai and Y.W. Zhang	221
Study on Vibration Characteristics for Vehicle Inner Doors	
M. Yu, X.W. Hong, Z.P. Gao and S.Z. Zhao	227
The Design and Development of a Kind of Antenna Pattern Far-Field Verification Test Stand Based on Level Acquisition	
X.H. Liu and Z. Zhang	233
The Designing of High Speed Presses Safety Gates	
C. Jia, D.S. Xiao, J. Yang, M.H. Xiao and X.J. Lu	238
The Finite Element Analysis and the Multi-Objective Optimization Design of Spindle Systems of CNC Gantry Machine Tools	
Z.Z. Guo, Y.S. Zhang and S.H. Liu	243
The Influence of Non-Uniform Impeller on the Cross Flow Fan Noise	
Z.Q. Yang and C.J. Wu	251
The Research and Design of a Storage Variable Delivery Machine	
Y.X. Jiang, S.P. Deng, J. Marui and Q. Li	257
The Response of Irregular Enclosure with Different Excitation	
Y. Wang, J.R. Zhang, X.L. Wang and V.Q. Le	262
The Structural Design and Analysis of the New Type of Gripper	
X.H. Shi and S.C. Wang	269
Design and Calculation of Explosion Rotary Cutting Deformation Test Device	
S.Y. Xie, W.H. Wei, T.M. Xue, D.L. Liu, J.W. Xu, F.Y. Yao, C.R. Yuan and T.Y. Wang	275
Optimization Analysis of the Efficiency of the Gear Box in the In-Wheel Drive System	
D.G. Chang, F. Shu and X.B. Chen	282
The Design and Application of a New Type of CNC Tool Nozzle	
S.X. Zhu	286

Basic Experimental Study on Rubber Materials for Vibration Damping in Vehicles C.L. Zhu, J. Xu, S. Li and C.H. Zhu	292
Biomechanical Analysis of Femoral Fixation with a New Compression Plate Using Finite Element Method during Stair Climbing S. Wei, S. Wang, D.M. Wang, Y.P. Lin and X. Li	297
Dynamics Modeling and Simulation of Deployable Mechanism with Double Clearance H.Z. Huang, J.L. Li, Y.Q. Yang and S.Z. Yan	306
Effects of Wide-Area Operation Environment on the Bogie of High-Speed Train and Solutions P. Wang, T.Y. Wang, L.Y. Jing and Z. Liu	314
Energy Balancing Method to Identify Nonlinear Damping of Bolted-Joint Interface X. Liao and J.R. Zhang	318
Experimental Investigation of Dynamics of Assembly with Typical Mechanical Joint X. Liu, B.B. Sun, J.D. Chen, F. Xue and R.Q. Jiao	324
Finite Element Analysis and Experimental Study on Failure Rolling Bearing Z. Wu and J.C. Zhang	332
Finite Element Analysis of Dynamic and Static Performance for Machining Tool Bed of Precisions Grinding Machine SMF6020 Q.Y. Zhou, Y.H. Ren and H.Z. Guo	340
Hydrodynamic Lubrication and Load Carrying Capacity Analysis of Laser Surface Texturing Valve Core T. He, C.L. Wang, H.S. Deng, Y.L. Huang and C.F. Yu	348
Kinetic Properties of Hybrid Vibration Screen with Two-Translation and One-Rotation C.J. Wang, L. Li, X.R. Meng, Q. Liu and T.Y. Zhang	356
Modeling and Analysis of Single Hydraulic Props in Coal Mines T. He, C.F. Yu, X.L. Wu and H.S. Deng	364
Nonlinear Dynamic Modeling of Constant Force Supported Thermal Power Pipeline J. Ma, S.P. Deng, N. Wang and Y.Y. Wang	373
Numerical Analysis for an Novel Hooke Hinge Based on ANSYS X.Q. Qi, X.W. Hong, J. Zhao and Q.S. Xie	378
Research on FBE Grinding Device of Deepwater Multifunctional Pipeline Repair Machinery S.Q. Guo, L.Q. Wang, S.M. Yao and M. Liu	385
Research on Thermal Resistance of Micro Heat Pipe with Trapezium-Grooved Wick X.B. Li, M.J. Li, M. Li and Y.S. Wan	395
Simulation, Experiment and Optimization for Thermal Characteristics of a Machine Tool Spindle System D.X. Li, P.F. Feng and J.F. Zhang	403
Study of High-Pressure Physical Properties of Marine Heavy Oil S.Q. Kang, Y.P. You and M.Y. Feng	411
The Study of Offshore Wind Power Jacket Cutting Equipment Z.M. Zheng, J. Chen, G.Q. Liu and H.D. Qian	419
Vibration Analysis on the Tripod Sliding Universal Joint of Ships S.M. Li and D.G. Chang	425
A New Fuzzy Comprehensive Evaluation Method for Priority Design of Column of Vertical Grinding Machine Y.K. Liu, Y.L. Chen, D.S. Liu and P. Liu	433
A New Integrated Performance Forecasting Model of TBM X.Y. Jiang, C. Gao, W.X. Gao, P.C. Su and H.F. Zhao	439
An Approximate Analytical Solution for Dynamic Response of a Large Nonlinear Rotor-Bearing System X.Y. Liu, C.J. Yang, L.P. Zhou, Y. Wang and J.S. Wang	445
Analysis of Vibrational Energy on the Pendulum Based on Finite Element X. Luo	453
Calculation of Meshing Efficiency of Helical Gear Based on Double Integral Method D.G. Chang, F. Shu, X.B. Chen and Y.J. Zou	458

Coupled FEM/BEM Method for Noise Prediction of Common and Sandwich Circular Saw Blades	
T. Yao, G.L. Duan and T. Wang	463
Dynamic Characteristics Analysis and Structural Topology Optimization of the Plane Grinder	
R.T. Peng, W. Yan, X.Z. Tang and Z. Zhou	471
Hydrothermal Aging Test Study of Double-Glazed Module	
W.H. Wei, Y.N. Zhu, T.M. Xue, J.W. Xu, S.Y. Xie, C.R. Yuan and T.Y. Wang	479
Numerical Simulation of Duck Wave Energy Converter	
Y.X. Yao, H.L. Li, J.M. Wu and L. Zhou	484
A Numerical Research on Diverse Cratered Film Cooling Hole Geometries	
Z.W. Zhang, W.J. Qian and J.M. Hu	491
Color Offset in the Process of High-Power LED Life Aging	
L.Y. Zhang, Y.P. Cui, Z.N. Luo and L. Zhou	498
The Analysis of Longitudinal Impact Response for Variable Cross-Section Rod	
X.J. Jiao and J.M. Ma	504
The Vibration Features Analysis on Special Computer	
S.J. Li, W. Wang, H.X. Bi and Y.Q. Ma	511
The Process Research and Numerical Simulation of Composite Roll	
Q. Yu and Y.F. He	520

Chapter 2: Materials in Mechanical Engineering

An <i>In Situ</i> Raman Spectroscopy Study of Load Transfer for Carbon Nanotube Film	
Q. Li and W. Qiu	529
Application of Different Dispersants in Fabricating Ti(C,N)-Based Cermet Tool Materials	
Q.Z. Xu, X. Ai, J. Zhao, F. Gong, X.H. Tian and H.S. Zhang	535
Carbon Nanotubes Decorated by Carbon Nanospheres through Hydrocarbon Ion Deposition	
Q.T. Li and H.J. Wang	541
Cellular Automaton Modeling of Dynamic Recrystallisation Microstructure Evolution for 316LN Stainless Steel	
H.P. Ji, L.G. Zhang, J. Liu and T.Y. Wang	548
Design of Nano/Micro-Structured Diamond Coating on Cemented Carbide	
L. Zhang, B. Yang, W.Z. Lu and G.P. Ai	554
Drawing Die Preparation of Composite Diamond Coating Based on Nb Interlayer	
H.X. Wang and Z.H. Yin	560
Fabrication and Characterization of Lanthanum Treated Carboxyl-Graphene Oxide Self-Assembled Composite Film on Silicon Substrate	
D. Shu, H. Gao and D.B. Zhang	566
Layer-by-Layer Fabrication and Tribological Investigation of PDDA/GO Multilayer Film	
J. Shu and Y.S. Liao	576
Microstructure and Tribological Behavior of Ultra-Fine Cemented Carbides	
Y.Z. Pan, J. Zhao and J. Zhang	586
Oxygen-Enriched Combustion Characteristics of Solid Fuel - The Lignite	
X.Y. Chen, Y.F. Zhang, Q.C. Zhang and Q. Zhou	594
Semi-Sintered Medical Zirconia Ceramic Used for Denture CAM Processing	
X.B. Lei and F. Xie	597
Study on Microstructure and Properties of Coating on the Surface of Fe₁₄Mn₆Si₅Ni Alloy	
Y. Shen and H.X. Wang	605
Study on Performances of Plasma Sprayed Ceramic Coatings on Die Wear Surface	
Y.D. Guo	611
Study on SiC₂ Nanoparticles to Aluminum Alloy Surface Performance by FSP	
J.L. Wang, H.F. Wang, W.W. Song, D.W. Zuo and L. Zhu	616
Study on the Constitutive Model of SiCp/Al Composites	
X.G. Xue, L.J. Xie and T. Wang	621

Study on the Friction Factor and High-Temperature Friction Resistance of Semi-Metal Frictional Materials	
Y. Wang, Y.K. Zhou and H.W. Nie	629
Synthesis and Characterization of Graft Copolymers of Acrylic Acid onto Starch	
Y. Zhang, L. Zhao, K. Ma and G.Z. Mao	638
The Microstructure Properties of PbO-TiO₂-SiO₂ System Sealing Solder for Vacuum Glazing	
X. Shan, H. Miao, J.F. Zhang, H.J. Wang and J. Sun	644
Tribological Performance Comparison and Analysis on Friction Material: Four Modified Phenolic (PF) Resins	
D.B. Zhang, C.L. Li, Y. Cao, Z. Lu and Q.X. Cui	653
Well-Ordered Nanoporous Copper Fabricated by Dealloying Cu-Mn and its Characterizations	
B. Tang, M. Zhou, R. Zhou, P.F. Bai and G.F. Zhou	662
Experimental Study of Element Diffusion between the Material of Heavy-Duty Cemented Carbide Insert and the Material of Large Cylinder	
L. Liu, Y.N. Cheng, F.G. Yan, Y. Han and T. Wang	669
Microstructure Prediction of 316LN Stainless Steel for Dynamic Recrystallization Based on Cellular Automata	
H.P. Ji, L.G. Zhang, J. Liu and T.Y. Wang	674
Research on Drilling of Ni-Based Powder Metallurgy Superalloys	
W. Hui, P.Q. Guo, Y. Qiao and J.T. Niu	680

Chapter 3: Advanced Technologies in Material Machining

3D Topography Analysis of Ball-End Milled H-13 Die Steel Surfaces Using Wavelet Decomposition Method	
S. Liu, J. Zhao, X.H. Tian and W.Z. Qin	689
A Numeric Investigation of Rectangular Groove Cutting with Different Lateral Micro Textured Tools	
B. Wang, J.Y. Zhang, C.L. Wu and W.J. Deng	697
A Study of Cutting Force and Force Coefficients in Orthogonal Cutting of High-Strength CFRP T700 Laminates	
K.X. Qiu, Y.X. Bie, S. Qin, Q.L. An and M. Chen	704
An Experimental Investigation of Cutting Forces in Micro End-Milling Process	
Y.J. Yuan, X.B. Jing, H.Z. Li and J. Wang	710
Analysis on the Friction and Wear Properties of Friction Stir Jointing for 7022 Aluminum Alloy Joining Region	
H.F. Wang, J.L. Wang, W.W. Song, D.W. Zuo, D.L. Shao and Q.Q. Zhu	718
Analysis on the Melt Welding Process of the Finite Element for 7022 Aluminum Alloy	
W.W. Song and J.L. Wang	726
Analytical Prediction of Geometrically Necessary Dislocation Density during Plane Strain Microbending	
L.J. Wang, B.L. Kinsey and S. Parasiz	734
Effect of Microstructure of Welded Joints HG785D on Impact Toughness	
Q. Zhang, J.M. Han, Z.Y. Yang and J.Q. Wang	740
Experimental and Simulation Study on Friction Condition of the Tool-Chip Interface during Cutting Process	
X.L. Fu, Y.A. Pan, Y. Wang and Y. Qiao	747
Experimental Study on Machinability of 2.25Cr-1Mo-0.25V Steel and Heavy Cutting Tool Life	
Y.N. Cheng, J. Qian, L. Liu, Y.N. Gong, Y. Han and F.G. Yan	755
Experimental Study on the Distribution of Heat Flux along Contact Arc in Twin-Roll Continuous Strip Casting	
G.M. Zhu, C. Zhang, P.G. Xu and G.C. Bai	761
Experimental Study on the Formation Mechanism of Serrated Chip of TC11 Titanium Alloy	
L. Wen, C.Q. Yang, Q.L. Niu, W.W. Ming and M. Chen	767

Finite Element Simulation of Ceramics Machining J.X. Xue, H.B. Wu and Q.P. Sun	775
Free and Fixed Abrasive Lapping of BK7 Glass J. Li, Y.K. Tang, Y.W. Zhu, Y.L. Sun and D.W. Zuo	780
Geometrical Modeling of Tool-Workpiece Contact Zone and Chip Formation in Finish Ball End Milling Process with Tool Inclination Angles X.X. Chen and J. Zhao	788
High Speed Cutting Characteristics and Force Measurement Experimental Platform of Wood Plastic Composites W.H. Wei, S.Y. Xie, T.M. Xue, F.Y. Yao, J.W. Xu, D.L. Liu, C.R. Yuan and T.Y. Wang	795
High-Strength Steel Hot Forming Mechanics Performance and Characteristic Experimental Study Y.D. Guo	800
Influence of Cutting Parameters on Frictional Coefficient of Micro-Textured Tool H.Y. Chen, H.D. Yang, Z. Ye and N. Ding	807
Influence of Substrate Temperature on Microstructure and Properties of Ti-Si-C Film S. Liu, W.Z. Lu, Y.G. Chen and D.W. Zuo	813
Investigation on Residual Stresses in Pre-Stretching Process of Aluminum Alloy Thick Plate Based on Material Non-Uniformity F. Lin, H.M. Wang, G.H. Qin and D.W. Zuo	821
Literature Review of Jet Machining X. Geng, Y.B. Shi, Y.Y. Lv and S. Dong	830
Mathematical Modelling the Process of Cup Wheel Precision Grinding of Rotating Concave Paraboloid F.Y. Xia, L.M. Xu and D.J. Hu	837
Modeling and Simulation of Cutting Forces in Side Milling A.H. Li, J. Zhao, H.L. Pan and Z.C. Gong	843
Optimization of End Mill Geometry Parameters Based on Oblique Cutting Theory L. Wang, B. Lin, Y. Guo and J.M. Yao	850
Research on Cutting Force of Corner Milling of Inclined Plane S.X. Wu, B. Li and W. Ma	856
Research on the Effects of Hot Stamping Process Parameters on Mechanical Property for U-Shape Part L. Xu, G. Zhao, L. Pan and W.W. Du	863
Research on Semi-Finishing of NC Milling Y.S. Liao and J. Han	872
Research on Vibration and Surface Roughness in Hard Cutting Process of Hardened Steel L.G. Kong, G.J. Chen, L. Wang, D.W. Wang, W.D. Chen and T. Zhang	878
Simulation and Experimental Verification of W9Mo3Cr4V HSS Temperature Field in Cryogenic Treatment J.J. Li, X.G. Yan, H.Z. Zhang and D.Y. Li	884
Simulation of Abrasive Belt Topography Based on Generation of Random Rough Surface W.X. Wang, J.Y. Li, Y.M. Liu, R.Q. Wang and B. Sun	892
Study on CNC Milling Heat and Residual Stress Relationship Model W.W. Song, J.L. Wang, H.F. Wang and D.W. Zuo	900
Study on Micro Milling Tool with Hot-Pressed Sintered Ti(C₇N₃)-Based Cermet K.T. Xu, B. Zou, C.Z. Huang, H.J. Zhou, H.L. Liu, J. Wang and H.T. Zhu	906
Study on Ultrasonic-Assisted Laser Machining of Si₃N₄ Y.S. Yao, Y.Y. Wang, X.Y. Li, X.H. Chen, G.F. Yuan and F.J. Zhang	914
Superficial Residual Stresses in Face-Milling the 17-4PH Stainless Steel at Various Feed Rates G.L. Liu, C.Z. Huang, B. Zou, J. Wang, X.Y. Wang and H.L. Liu	922
Temperature Modeling Analysis for Milling of Titanium Alloy S.C. Sui, P.F. Feng and W.P. Mou	928
The Design of Turn-Mill Process Planning for Mass Customization Wheel Rim G.Z. Zhang, Y.Z. Zhou, J. Han and L. Xu	936
The Effect of Electrolytic Strengthening Treatment on Tap's Service Life Z.Y. Feng, X.G. Yan, Y.W. Lv, H. Guo, H. Fu and S.H. Zhang	944

The Influence of the Weld Line and the Selection of Mold Gate Location G.Y. Guo	952
The Influence of Tool Geometric Parameters on the Reliability of Deep Cryogenic High Speed Steel Taps S.H. Zhang, X.G. Yan, H. Guo, F. Peng, J.J. Li and Z.Y. Feng	959
The NC Machining Method and Application of Three Axial Impeller Based on Cimatron Software Q. Li	965
The Optimization of Process Parameters by Fixed Abrasive Pad for Lapping Magnesium Aluminate Spinel Z.K. Wang, Y.L. Zheng, J.G. Yao and J.X. Su	973
The Study of the Influence of Tool Wear on Cutting Temperature in Diamond Ultra-Precision Cutting of Aluminum Alloy Mirror Y.J. Zhang, G.J. Dong and M. Zhou	982
Ultrasonic Vibration Turning of Stainless Slender Shaft: Investigation on Run-Out of Two Clamping Methods X.D. He, G.Q. Guo, K. Li and M. Chen	990
Wear Mechanism of PCBN Hard Cutting the Powder Metallurgy Valve Seats H.D. Yang, N. Ding, X.J. Niu, H.Y. Chen and Z. Ye	996
A Study on Heat Transfer in High-Speed Grinding of Titanium Matrix Composites X.X. Xi, W.F. Ding, Z. Li, J.H. Xu and X.Y. Wang	1003
Experimental Optimization of Process Parameters for Turning TC11 Titanium Alloy Using Taguchi Methodology Design S.L. Chen, B. Shen and F.H. Sun	1009
Experimental Study on the Wear of Single Crystal Diamond Tools in Ultra-Precision Cutting of Titanium Alloy L.H. Hu and M. Zhou	1015
Finite Element Analysis of SiCp/Al Model of Unit Cell during Ultrasonic Vibration Scratching G.Q. Liang, P.F. Feng and J.F. Zhang	1022
Finite Element Analysis of Temperature Field in Vibration Milling X.H. Shen and M.Y. Wang	1030
Finite Element Deformation Analysis of Long Thin Cantilever Shape Parts in High Speed Ball End Milling of Titanium Alloy Ti-6Al-4V with PCD Tools at Various Tool Inclination Angles S.A. Abbasi, P.F. Feng, Y. Ma, X.C. Cai, D.W. Yu and Z.J. Wu	1038
Finite Element Simulation of the Cutting Process for Inconel 718 Alloy Using a New Material Constitutive Model X.Y. Wang, C.Z. Huang, J. Wang, B. Zou, G.L. Liu and H.L. Liu	1046
Finite Element Simulation on the Distribution of Discharge Gas in Hollow Cathode Plasma Y.F. Wen, Y.N. Rui and H.W. Wang	1054
Heat Conduction in Coated Tools during Cutting Based on Finite Element Simulation J. Du, Z.Q. Liu, J.J. Zhang, P.L. Xu and Y.J. Guan	1061
Influence of Edge Preparation Parameters on the Cutting Edge in Drag Finishing X.F. Zhao, L. He, S. Yuan and W.J. Zheng	1067
Microfabrication and Characterization of Tool Embedded Ni-Chrome Thin Film Micro-Sensors for Cutting Force Measurement Y.P. Cheng, W.G. Wu, X.J. Du and C.H. An	1074
Modeling Material Removal Rate of Heavy Belt-Grinding in Manufacturing of U71Mn Material R.Q. Wang, J.Y. Li, Y.M. Liu and W.X. Wang	1082
Process Optimization of Lapping Sapphire Substrate with Fixed Diamond Abrasive Pad J.B. Wang, Z. Li, H. Gao, D. Shu and P. Xiao	1090
Reliability of Al₂O₃/TiC Micro-Nano-Composite Ceramic Tool in the Machining of Stainless Steel Z.B. Yin, C.Z. Huang, J.T. Yuan, B. Zou, H.L. Liu and H.T. Zhu	1098
Research on Dental Ceramic Grinding: A Review D.N. Zhao, C.Y. Wang and X.L. Mao	1106

Research on the Effects of Tapping Performances with Multiple-Type Parameters F. Peng, X.G. Yan, H. Guo, L.J. Lu, S.H. Zhang and J.J. Li	1114
Research on the Finite Element Simulation of the Laser Shock Forming of TC4 Titanium Alloy G.H. Li, D. Mbukwa and W. Zhao	1121
Research on the Influence of Tool Wear on Cutting Performance in High-Speed Milling of Difficult-to-Cut Materials Z.J. Zhu, J. Sun and L.X. Lu	1129
Self-Sharpening Failure Characteristic of a Si₃N₄ Ceramic Tool in High Speed Cutting of Inconel 718 G.M. Zheng, J. Zhao, X. Cheng and M. Wang	1135
Spiral Bevel Gear B-Spline Tooth Surface Reconstruction Algorithm and Precision Analysis J.Y. Han, L.B. Li and J.H. Huo	1143
Study on the Cutting Performance of Al₂O₃-TiC-TiN Ceramic Tool Materials Y.H. Fei, C.Z. Huang, H.L. Liu and B. Zou	1148
The Influence of Bionic Micro-Texture's Surface on Tool's Cutting Performance F. Xie and X.B. Lei	1155
The Optimization of Modeling Orientation in FDM H.B. Li, Y. Tian, P.L. Li, L. Zhang and Y.L. Wang	1163
The Research of Straight Bevel Gear Face-Hobbing Method on General Five-Axis Machine Tool Y. Wang, Q.J. Liu, Z.Q. Yu, Y.L. Wang, Y. Zhang, T.W. Ma and Z.L. Lu	1169
The Research on Hard Cutting the Powder Metallurgy Valve Seat N. Ding, H.D. Yang, X.J. Niu and H.Y. Chen	1177
Trapezoidal Thread Processing Method Based on Surface Discretization Y. Zhang, Q.J. Liu, Z.Q. Yu and T.Y. Wang	1182
The X-C Linkage Grinding Force Model in Cam Grinding X.M. Chen, Q.S. Han, B.Y. Peng and Q.G. Li	1187
The Study of S-Shaped Acceleration and Deceleration Curve and the Trajectory Planning Strategy Analysis Z. Liu, J.C. Dong, Y.Y. Ding, B. Li and P. Wang	1195
Wear Mechanisms of Hard-Brittle Material Tools in High-Speed Machining of Powder Metallurgy Material Z. Ding, J. Han and H.D. Yang	1200
Wear of PCBN Tool when Cutting Materials Difficult-to-Cut Based on Thermodynamics Solubility F. Shao, Y.T. Wang, Y.Q. Xiao, L.H. Xiao, K.S. Zhang and Q. Cai	1207
Research on Dynamic Behavior of Different Grinding Wheel Hub Material with FEM Method Y.T. Liu, Y.C. Fu, L. Yang and J.H. Xu	1216
Structural Design of Groove and Micro-Blade of the End Mill Based on Bionics Z.X. Jiang, J. Sun and J.F. Li	1221
A Study on Tool Wear Prediction in Ultrasonic Vibration Turning of Tungsten Carbide F. Jiao, Y. Niu, J.L. Qi and J. Li	1228
Effect Analysis of Multifactor of HSS Tap Life Based on Orthogonal Experiment with Interaction H. Guo, X.G. Yan, X.Y. Liang, J.J. Li and H.Y. Zhi	1235
Modeling and Simulation of Single Abrasive-Grain Cutting Process in Creep Feed Grinding Z.G. Nie, G. Wang, Y.L. Lin, X. Su and Y.M. Rong	1241
One-Third Sub-Harmonic Resonance Analysis for the Up-Going Strip Emerging from the Zinc Pot S. Hui, H.J. Zhang, J. Ma and P.M. Xu	1247
Optimization of Electrostatic Atomization Cutting Using 3D FE Simulation of Electrostatic Field Y. Su, L. Gong, H. Cao and D.D. Chen	1255
Research on the Influence of Multidimensional Vibration on Casting Filling Capacity Based on Discrete Element Method C.J. Wang, L. Li, C.G. Xue and Q. Liu	1263

Development of the Two-Dimensional Ultrasonic Cutting System Based on the Mechanism of Single-Excitation Elliptical Vibration by Means of Opening Chutes on the Horn J. Li, F. Jiao, Y. Niu and L.F. Shi	1272
Quantitative Analysis and Evaluation of Valve Core Spherical Surface Grinding Texture L.M. Xu, Y.J. Wang and D.J. Hu	1279

Chapter 4: Algorithms and Methods of Data and Signal Processing in Technique of Measurements and Fault Detection

3D Model Reconstruction of the Broken Aero Engine Blade Based on the Detection Operator H. Wang, G.J. Tong, T. Wang and L.W. Wang	1289
A Fault Diagnosis System Based on Bistable Stochastic Resonance and Dynamic Time Warping Z.W. Liu, Z.W. Shang, Y.F. Li and T.Y. Wang	1294
A Kind of Vibration Sensor and Testing System in Electromechanical Equipment Based on Fiber Bragg Grating Q. Jiang and T.Y. Guo	1300
A Small Automated Enzyme Immunoassay Analyzer System Design and Implementation Based on Immunoenzymatic Techniques Z. Chang, Z.W. Shang, Z.W. Liu and T.Y. Wang	1308
A Structure of Cloud Test System for Signal Test C. Ding, L.W. Tang and S.J. Deng	1314
An Edge Detection Algorithm Based on Edge-Preserving C.R. Tang and A. Li	1321
An Efficient Parallel Association Rules Mining Algorithm for Fault Diagnosis H.P. Ji, T.Y. Wang, J. Liu, S.Y. Fan, Z.P. Wang and K.R. Zhang	1326
Application of RS-SVM in Coal Mine Fire Warning System H.P. Zhou, B.J. Xiong and C.J. Wang	1331
Application of Self-Made Dynamometer in Measuring Tool Forces in Friction Stir Welding Process H.F. Wang, J.L. Wang, W.W. Song, D.W. Zuo and Q.Q. Zhu	1339
Binary Resolution Matrix Based Incremental Attribute Reduction for Fault Diagnosis X.Y. Chen, W.L. Du, A.S. Li, K. Li and C.H. Qian	1346
Blind Source Separation for Under-Determined Mixtures Based on Time-Frequency Analysis H.K. Li, H.Y. Liu and C.B. He	1350
Composite Fault Diagnosis and Intelligent Maintenance Based on Data Driven J. Liu, Y.F. Dong, Y. Li, S.Y. Lei and S.Q. He	1357
Fault Feature Extraction Method of the Rolling Element Bearing Based on Reverse Order Tracking D.Z. Zhao, W.D. Cheng, W.G. Wen and Y. Liu	1361
Fault Tree Analysis of Pantograph Type Current Collector Based on Ontology Modeling L.L. Song, T.Y. Wang, L. Xu and X.W. Song	1371
One Abstraction Method for Displacement Response in the Sweep-Frequency Testing of Rotating Spindle Y.Z. Guo, T.N. Chen, X.P. Wang and Y.F. Xu	1377
Petri Nets in the Emu Pantograph Application of Fault Tree Analysis (FTA) S.F. Ye, D.X. Chen, T.Y. Wang and D. Wang	1385
Research and Simulation of SVPWM Algorithm Based on BP Neural Network H. Ji and Z.Y. Li	1391
Research of Multi-Sensor Data Fusion Based on Binocular Vision Sensor and Laser Range Sensor Q.L. Wang, J.Y. Li, H.K. Shen, T.T. Song and Y.X. Ma	1397
Research on SVM Based Diagnosis System for Oil Tubing L.Y. Jing, D.X. Chen, T.Y. Wang and P. Wang	1405
Rolling Bearing Fault Evolution Based on Vibration Time-Domain Parameters Z. Wu	1412

SIFT-Based Target Recognition in Robot Soccer Y.H. Du, C. Wu, D. Zhao, Y. Chang, X. Li and S. Yang	1419
Signal Classification for Pipeline Security Threat Event Based on Optimized Support Vector Machine D.J. Tan, H. Zhang and L. Liu	1428
State Inspection and Fault Diagnosis System of Train Axel Box Bearing Based on Virtual Instrument P. Wang, P. Zhang, L.Y. Jing and Z. Liu	1436
Study on Laser Measurement Technology of Inner Surfaces K. Wang, W.L. Li and X.W. Sun	1441
Study on the Influence of Roughness on the Detection for Mechanical Characteristics of the Machined Surface by Surface Acoustic Wave Dispersion Theory J.L. Xu, B. Lin and Y.X. Wei	1447
Study on the Relation of Wheel Hub Bearing Preload and Natural Frequency by Dynamic Test Z.G. Wang, Z.Y. Weng, Q.P. Cao, J.H. Mei and F.H. Zhu	1453
The Automatic Detection Technology for the Surface Defects of Automobile Engine Cylinder J.J. Ji and C. Ye	1458
The Pre-Travel Error Study of Electrical Trigger Probe in On-Machine Measurement Y.L. Cai, N.N. Cui, X. Mo, X.K. Yao and W.Q. Sun	1466
The System of Tensile Test Based on Multi-Agent Virtual Instrument J.B. Wang and H.F. Wang	1474
Weak-Points Diagnosis and Optimization of Shield Machine Cutter Tool Based on Characteristic Parameters J. Zhao, X.W. Hong, M. Yu, Z.P. Gao and W.J. Wang	1479
A Reliability Research on Internet of Objects Monitoring System of Facility Agriculture H.X. Wang and H.B. Xu	1486
Technology of Online Inspection in CNC Machine Tool Z.Q. Yu, T.Y. Wang, Y. Wang, H.B. Li, Y.L. Wang and Y. Chen	1492
Study on Gray Correlation Analysis Model for Anti-Fatigue Entropy-AHP Weight Parts W.Q. Li, Y.Z. Wang and R. Feng	1498
Analysis of the Milling Acoustic Signal Using Wavelet Decomposition T.Y. Wang and Q.P. Sun	1503
An Experimental Research on the Vibration Reduction of Ball Bearings by Superfinishing Process W.T. Liu, Y. Zhang, Z.J. Feng and D.F. Wang	1509
A Processing Method of Identifying Spectrum of Shock Load for the Combustion Gas Stream P. Lian and X.W. Jin	1517
A Transient Faults Diagnosis Method Based on EEMD, Spectral Kurtosis Theory and Energy Operator Demodulating Y.L. Wang, D.X. Chen, P. Zhang, Y. Wang, Z.Q. Yu and H.B. Li	1524
Research of Noise Mechanism and Performance Improve of DVC Drum Z.W. Shang, Z. Chang, Z.W. Liu and T.Y. Wang	1532
Time-Domain Fault Diagnosis Method of Mechanical and Electrical Equipment Based Improved Dynamic Time Wrapping Z.W. Shang, Z.W. Liu, Y.F. Li and T.Y. Wang	1539
Vibration Analysis of Civil Aero-Engine Based on Stochastic Resonance Preprocessing Y. Zhang, H.Y. Liao and G. Zhao	1545
2-D Defect Profile Reconstruction from Ultrasonic Guided Wave Signals Based on Radial Wavelet Basis Function Neural Network with ELM B. Liu, L.W. Tang, X.F. Yu, J.B. Wang and A.H. Li	1551
Design for New Gear Measuring Centers X.S. Wang, X.B. Liu and W. Zhao	1562
Development of Portable Fault Diagnosis System Based on SR P. Zhang, P. Wang, L.Y. Jin and Y.L. Wang	1567

Chapter 5: Mechatronics and Control Systems

Application and Research on CNC Operation Panel Based on PMAC Y. Lin	1573
Design and Implementation of DSP Based Cross-Platform Material Scratch Test Control System Z.H. Song, L.Y. Jing, P. Zhang, J. Sun and Q. Liu	1578
Design of Electrolytic Strengthening Machine for Cutting Edge of Cutter Y.Z. Guo, X.G. Yan, S.J. Li and H. Guo	1585
Research of RTCP Function for Five-Axis Machine Tools Based on Low-Cost Embedded CNC System X.X. Zou, Y.Y. Ding, T.Y. Wang, Z. Sang and H.N. Xu	1591
Research of the Method to Palletize Firebricks by Robot Based on the Group Policy D.D. Zhou and G.D. Wang	1598
Research on a Type of Program-Controlled Three-Dimensional Vibration Platform Y. Tian, Q.J. Liu, L. Zhang, S.L. Tian and P.L. Li	1604
Research on High-Speed Linking Algorithm of Continuous Small Blocks B.S. Ye and L.Q. Zhang	1611
Simulation Study of Motion Control for X-Y Table with a Novel Direct Contour Controller J.C. Dong, T.Y. Wang, Y. Tian, B. Li, Y.Y. Ding and Z. Liu	1618
The Design and Control of Electromagnetic Actuator for Six-Axis Force Sensor Dynamic Calibration J.F. Pei, D.Z. Xu and W. Zhang	1624
The Design of Pipe Dynamic Chase Cut Control System S.Q. Qi, G.S. Ma and L.J. Ma	1632
Analysis of Liquid Sloshing in Partially Filled Tank of Spacecraft during Maneuver H.L. Liu, D.L. Cui and S.Z. Yan	1638
Embedded PC On-Line Inspection System on NC Equipment Y.X. Jiang, S.P. Deng, N. Wang, J.R. Guo and Q. Li	1646
Experimental Study on Quadraped Wheel Robot for Wheat Precision Seeding H.B. Lin, C.J. Yi and Z.M. Liu	1651
Improving Contouring Accuracy by Using Gain Matching Method W.X. Cao, X.Q. Tian and Y.H. Wang	1658
Modeling and Simulation of Regenerative Braking Performance of Electric Vehicles Based on Decoupling Strategy P. Xiao, J. Lou, L.M. Niu and H. Gao	1667
NC Manufacturing System Based on Multi-Agent Programming J. Pang, X.B. Wang and J. Peng	1676
An Approach to Generate Three Dimensional Machining Process Model According to Information from Design Model Based on Definition H.L. Zhang, W.H. Liao, Y. Guo and W.A. Yang	1684
System Design and Experiments of Tool Setting Detection in Micro-Electrochemical Machining Based on LabVIEW P.Y. Dong, Z.Y. Li, H.B. Cui and J.J. Sun	1693
An Algorithm and Simulation for the Automatic Welding of Battery Cover P.L. Li, Q.J. Liu, Y. Chen, H.B. Li and L. Zhang	1698
Crankshaft Mould CNC Machining Based on CAD/CAM Technique T.T. Guo, X.Y. Feng and T.J. Sun	1704
A Method of Pitch Error Compensation for the Open Numerical Control System Y.Y. Ding, T.Y. Wang, Q.J. Liu, J.C. Dong, B. Li and Z. Liu	1711
A New 3D Wax Printer and its Control System J. Sun, T.Y. Wang, H.B. Li, Z.H. Song and W. Tian	1718
Continuous Data Acquisition Equipment Based on Embedded Linux System P. Zhang, L.Y. Jin, P. Wang and Y.L. Wang	1724
Design of PID Controller of Feed Servo-System Based on Intelligent Fuzzy Control Y. Chen, P. Zhang, H.B. Li, P.L. Li and Z.Q. Yu	1728

Fault Diagnosis of the Foundation Brake Rigging System Based on Fault Tree and Bayesian Network	
D. Wang, Y. Tian, T.Y. Wang, S.F. Ye and Q. Liu	1734
Gantry Robot Dynamic Analysis Based on Lagrange's Motion Equation	
A.I.I. Mahir, S.P. Deng and Y.M. Qi	1741
Pipe Thread-Intelligent Detection and Restoration Technology	
K. Wang, Z.X. Dong and W.Q. Jing	1747
Research of Electro-Hydraulic Position Servo System Based on PID with Disturbance Observer	
Z.H. Liu, S.P. Deng and Y.X. Jiang	1752
Research on a Motion Law Surveying Aparatus of a Cam Follower	
M.Y. Liu, J.J. Sun, W. Zhao, T.T. Zhang and Z.W. Liu	1758
Research on Intelligent Tool Selection System Based on Optimization Model	
R. Wang, W. Zhao, C.J. Luo, Z.Y. Wang and T. Luo	1765
Research on Nonlinear Commutating Characteristics of Valve-Controlled Motor System Based on Hammerstein Model	
Y. Feng, Z.Y. Qian, B.C. Lu and D.F. Zhang	1772
Research on Online Collision Detection Algorithm of CNC Machine Tools	
Z. Sang, T.Y. Wang, X.X. Zou and H.N. Xu	1780
Research on Thermal Errors Compensation Techniques in Machining Center's On-Line Inspection Software	
Y. Lin	1786
The Research of Circular Interpolation Motion Control Based on Rectangular Coordinate Robot	
X.M. Shi, W.J. Fei and S.P. Deng	1792
Development of Bevel Gear On-Machine Measurement System Based on Open CNC System	
Q. Liu, D.X. Chen, T.Y. Wang, J.W. Zhang, D. Wang and W. Tian	1799
A Hybrid Machining Database System Using Case-Based Reasoning and Fuzzy Technology	
X.F. Sui, C.Z. Huang, B. Zou, H.L. Liu, H.T. Zhu and J. Wang	1805
Development and Validation of a Series Hybrid Electric Bulldozer Model on Whole Working Condition	
B.D. Zhang, X. Zhang, L. Zhang and L.H. Xi	1811
New Simulation System Applying Virtual Reality for AC Servo System	
Y.Y. Liu, J. Li, D.Y. Huang, J.S. Diao and F.F. Dong	1818
The Development of the Synchronous Control Technology on Four-Channel Lifting Device	
A.W. Yu and C.M. Zhu	1826

Chapter 6: Applied Decisions by Information Technologies

Adaptable Material Coding Method for Product Lifecycle Management	
X.H. Xiao, T.Y. Wang and S.L. Tian	1837
The Research of Warning Model of Hidden Failure Based on Data Mining	
J. Liu, Q.X. Zhu, X. Yu, J.X. Wang and Y.G. Huang	1844
Research of Mass Redundant Data Deleting Algorithm for Intelligent Manufacturing Process	
L.L. Song, P. Zhang, T.Y. Wang, L. Xu and X.W. Song	1849
Development of an Information Management System for NC Machine Tools Based on B/S Architecture	
H.N. Xu, T.Y. Wang, X.X. Zou, Z. Sang and Z. Liu	1854
Development of NC Machine's On-Line Inspection Software	
Y. Lin	1861
Research on the Decision Support System for Cold Extrusion Process of Internal Thread	
H. Miao, Q. Mei, J.Y. Yuan, Z.X. Zheng, Y.F. Jin and D.W. Zuo	1867
Research on Mass Manufacturing Resource Sensory Data Management Based on Hadoop	
K.K. Su, W.S. Xu and J.Y. Li	1880
The Research and the Development of the 3D System Platform of Shafting Parts Based on CAA	
H.M. Fang, G. Zhao, G.Z. Zhang and P. Xiao	1886

Application of Lean Six Sigma Methodology in Software Continuous Integration
X.Q. Xu, C. Huang and H. Lu

1893

Chapter 7: Engineering Management and Product Design in Modern Manufacturing

3D Printing Technology Impact on Development of Industrial Design

X.D. Li and F. Zhao

1901

Research on PLM-Oriented Product Design Evaluation Based on User Experience

X.N. Li and H.L. Liu

1905

Study of Evaluation and Empirical Method on Manufacturing Quality Innovative Capacity

W.H. Li

1910

Study of Operational Reliability Assessment Method Based on Devices Operating Information

L. Wang and H.J. Wang

1916

Study on Production and Environmental Factors Based on GMM of Dynamic Panel System

B. Li, R. Yi and T. Li

1922

Study on the Relationship Model between Information and Quality

W.M. Mou

1935

Study on the Relative Model of Engineering Enterprise Career Planning

Y.Z. Guo

1943

The Digital Manufacturing Equipment and Development of High Speed and High Precision with Monitoring and Intelligent Maintenance

H.L. Liu, J.C. Dong, T.Y. Wang and Z.Q. Yu

1948

Study of the Dynamical Model for Manufacturing and Materials Market

Z.G. Wang, Y.Q. Sun and Y. Zheng

1954

Application of New Materials in Industrial Design

X.D. Li

1960

Energy Footprint Mapping Analysis-Based Energy Saving Product Design Study

Y. Tian, L. Zhang, T.Y. Wang, S.L. Tian, M.T. Jing and P.L. Li

1966

Energy-Saving Optimization Design Frame System Using Energy Footprint Graphical Model

Y. Tian, L. Zhang, T.Y. Wang, S.L. Tian and P.L. Li

1971

On the Construction of Visual Image Design System of Machine Tool Products

J.F. Xu, Z. Gao, Y.H. Ding and X.M. Ji

1975

Research on the Performance Evaluation Model of Functional Technologies with Partial Least Squares Regression

Y.J. He and Q.G. Meng

1981

The Influence Materials on the Product Design and Manufacturing

Y. Zhang and S.J. Chen

1991

The Research of CAD Technique in Transformation of Education

W.B. Zhang, R.S. Zhang, Z.Y. Feng, J.G. Shi, W.G. Liu and H.C. Chen

1997

Research and Application on Green Manufacturing in Industrial Design

X.D. Li and H.L. Liu

2003

The Research on Cost Analysis of Mechanical Product Manufacturing Process

Z.J. Wang and Y.M. Zhang

2009

Defining Method Research of Technological Conflict Based on Petri Net Theory

S.L. Tian, Y. Tian, X.H. Xiao, D.X. Chen, T.Y. Wang and L. Zhang

2016

The Research & Application on the Credit Appraisal Model of Architecture Enterprise by the GA-BP Neural Network

F.G. Yan and L.P. Fu

2022
